Item 3 Electronic commerce and tourism

The Expert Meeting will discuss the implications of electronic commerce for the tourism industry from the perspective of developing countries. The experts are especially encouraged to draw on the experience of their own countries in order to highlight issues of concern and debate about their strategic implications. Agenda item 3 will have four segments. Under the first segment, discussion will focus on the way electronic commerce affects the tourist product offer and package, as well as the main service providers and intermediaries. Under the second segment, the deliberations of the Meeting will address the role of destination marketing organizations – and in particular national boards of tourism – in the changing environment of the tourism industry. Under the third segment, the Meeting will consider the various new technologies and support services that are being increasingly utilized and that are currently being developed by the different operators and service providers. Against the background of the previous three discussion items, the fourth segment of the Expert Meeting will focus attention on policy and practical recommendations directed to all parties involved in producing and exporting the tourism product in developing countries.
