**World Investment Report 1991:  
The Triad in Foreign Direct Investment**  
Sales No. E.91.II.A.12 (\$25)

The report examines the boom in foreign direct investment, which reached \$200 billion in flows and \$1.5 trillion in stock in 1989, and the underlying corporate strategies. In particular, it analyses the emergence of three investment blocs (the Triad): the United States, the European Community and Japan.

“FDI is increasingly important in economic development because of its close links to trade, financial flows and technology transfer . . . Today it makes sense to look at the role of the Triad in global FDI . . . UNCTC provides the first detailed look at the investment links between the three big blocs—America, the European Community and Japan—and their investment in the rest of the world.” (From *The Economist*)

**World Investment Directory:  
Foreign Direct Investment, Legal Framework  
and Corporate Data**  
Volume I: Asia and the Pacific 1992  
(ST/CTC/66)

The Directory, composed of five regional volumes and one global volume, contains time-series data on foreign direct investment and related statistics, corporate data, legal information and other variables related to TNCs, including definitions of variables and the main sources of official and private information on TNCs for individual countries.

cies aimed at inward foreign direct investment can have an influence on the level of investment flows. It categorizes government foreign-direct-investment policies into discrete types and analyses data from 1977 to 1987 on foreign-direct-investment policy announcements made by 46 countries.

**Foreign Direct Investment and  
Industrial Restructuring in Mexico**  
UNCTC Current Studies, Series A, No. 18  
(ST/CTC/SER.A/18)

This study analyses the contribution of a group of the largest enterprises with foreign capital in Mexico's manufacturing sector to the industrial restructuring process of the country in terms of improving production efficiency, transferring competitive technology, expanding exports and creating linkages with local supplier industries. Special consideration is given to an evaluation of enterprise performance in those respects and how such performance has been influenced by macroeconomic policies and regulations governing foreign direct investment.

## FORTHCOMING

### **UNCTC Library on Transnational Corporations International Business and Development of the World Economy**

General editor: John H. Dunning

The aim of the *UNCTC Library of TNCs*, which consists of 20 volumes edited by some of the most distinguished experts from the field under the general editorship of John H. Dunning, is to contribute to a better understanding of TNCs throughout the world, in particular in developing countries.

The literature on various aspects of TNCs has expanded in the past 20 years to such an extent that it is difficult for anyone to follow the main lines of research. That, in turn, makes it hard for students, government officials, corporate executives, and others to obtain a state-of-the-art overview of various aspects of the emergence, growth, operation, impact and policy implications of TNCs. The *UNCTC Library* presents different views in a balanced way and, in

that respect, provides easy access to the major TNC-related issues. The volumes cover the following subject areas:

- Theoretical perspective
- Historical perspective
- Economic development
- Business strategy
- International financial management
- Organization
- Governments and TNCs
- International trade and payments
- Economic integration
- Natural resources
- Industrialization
- Innovatory activities
- Cooperative forms of activity
- Transfer pricing and taxation
- Services
- Technology transfer
- Legal issues
- Market structure and industrial performance
- Human resources
- Codes of conduct

The first eight volumes are scheduled for publication in late 1992, with the remaining ones following shortly thereafter. The twenty-first volume will combine the state-of-the-art introductory essays of the individual volumes into an overview volume. The *Library* will be published by:

Routledge  
11 New Fetter Lane  
London, EC4P, 4EE  
United Kingdom

## Instructions to Contributors

### *Manuscript preparation and style guide*

#### I. Manuscript preparation

Authors are requested to submit three (3) copies of their manuscript in English, accompanied with a statement that it has not been submitted for publication elsewhere, to:

The Editors  
*Transnational Corporations*  
Room DC2-1240  
2 United Nations Plaza  
New York, N.Y. 10017  
U.S.A.

*Transnational Corporations* is a refereed journal. Occasionally, articles are considered that are extracts from or summaries of books published after the publication of the issue of *Transnational Corporations* in which the article would appear; the author must clearly specify such situations when submitting a manuscript.

Authors should provide the diskette of manuscripts once accepted for publication. The diskette, either 5 1/4" or 3 1/2", should be labelled with the title of the article, the name of the author and the software used (WordPerfect, Multimate, Microsoft Word or Wordstar). WordPerfect is the preferred software package. The format of the word processor must be shown on the diskette (e.g., WordPerfect 5.1). The editors do not accept responsibility for damage or loss of manuscripts or diskettes submitted.

The text of articles should, normally, not exceed 20 pages (8,000 words). Shorter research notes may be submitted. Book reviews should be between 500-800 words, unless they are review essays, in which case they may be the length of an article.

Manuscripts should be typewritten on one side of letter-size (A4) paper and should be double-spaced (including references) with wide margins. All pages should be numbered consecutively. All footnotes should appear at the end of the page they refer to. References, appendices, tables and figures (charts, graphs etc.) should be on separate sheets of paper and should be placed at the end of the manuscript.

The first page of the manuscript should contain the following: (i) title; (ii) name(s) and institutional affiliation(s) of the author(s); and (iii)

---

address, telephone number and facsimile number of the author or, if more than one, of the primary author who is to be contacted.

The second page of the manuscript should contain the title, the name(s) of the author(s) and an abstract of not more than 150 words.

Articles will be subjected to editing to ensure conformity with United Nations practice.

*Transnational Corporations* has the copyright for all published articles. The authors will be entitled to reuse the material in the published article in other publications written or edited by them with due acknowledgement.

## II. Style guide

### A. Quotations

Quotations should be double-spaced and long ones indented. A copy of the page(s) of the original source of the quotation, as well as a copy of the cover page of that source, should be provided.

### B. Footnotes

Footnotes should be numbered consecutively throughout the text with superscript arabic numerals. Footnotes should be single-spaced and should be placed at the end of each page. Footnotes should not be used for citing references. Important substantive comments should be integrated within the text itself rather than placed in footnotes.

### C. References

An alphabetical list of references of works used should be at the end of the manuscript.

In the text, references to publications should appear as follows: "Dunning (1979) reported that. . . ." or "This issue has been a subject in literature before" [Cantwell, 1991, p. 19]. The author should ensure that there is a strict correspondence between the names (years) in the text and those in the reference list.

Authors should ensure that there is *complete* reference in for every citation in the text. Journals should not be abbreviated. The following are examples of the proper form for most entries:

Bhagwati, Jagdish (1988). *Protectionism*. Cambridge, Massachusetts: The MIT Press.

---

Cantwell, John (1991). A survey of theories of international production. In *The Nature of the Transnational Firm*, Christos N. Pitelis and Roger Sugden, eds. London: Routledge, pp. 16-63.

Dunning, John H. (1979). Explaining changing patterns of international production: in defence of the eclectic theory. *Oxford Bulletin of Economics and Statistics*, 41 (November), pp. 269-295.

————— (1981). *International Production and the Multinational Enterprise*. London: George Allen & Unwin.

United Nations (1991). *World Investment Report 1991*. Sales No. E.91.II.A.12.

#### D. Tables

Tables should be placed on separate sheets of paper and should follow the references. If data are not available, put . . (two dots). If data are zero or negligible, put 0 (zero). The table header, subheaders and column headers should be clearly identified. The table header should indicate the year of the data. Tables should be self-contained with the full source appearing below each table. Footnotes to tables should be lower-case letters and should appear after the source. Indicate the position of the table in the text as follows:

\*\*\*\*\*

Put table 1 here

\*\*\*\*\*

#### E. Figures

Figures (charts, graphs, illustrations etc.) should be placed on separate sheets of paper and should follow tables at the end of the manuscript. Figures should be clearly presented with headers, subheaders and labels and should be self-contained. Full sources must be provided below each figure. Footnotes to figures should be lower-case letters and should appear after the sources. Authors are responsible for supplying camera-ready copies of figures. Indicate the position of the figure in the text as follows:
