### **Companies without Borders: Transnational Corporations in the 1990s**

(published by International Thomson Business Press on behalf of UNCTAD,  
Division on Transnational Corporations and Investment) (£45)

This publication brings together a selection of key articles on TNCs which had previously appeared in *Transnational Corporations*. Apart from looking closely at the current global context and developments in international business theory, articles of Part I highlight the changes in the international economic system and the role of TNCs as lead actors in that transformation. Against this background, the chapters of Part II focus on the role of TNCs in salient features of today's world economy: privatization, regional integration, migration and the transition from a centrally planned to a market-based economic system. Part III looks at the redefined role of governments in aiding the conduct of international business transactions by private firms and the issues arising from a growing policy interdependence.

### **Transnational Corporations and World Development**

(published by International Thomson Business Press on behalf of UNCTAD,  
Division on Transnational Corporations and Investment)  
(£60, hardback and £19.99, paperback)

This volume brings together world experts in international business who offer a commentary on key issues related to TNCs. The articles consist of the twenty introductions from the United Nations Library on Transnational Corporations series, here updated and drawn together into a single volume. Each contributor offers a key introduction to each major aspect of TNCs and world development, including strategy, economic development, financial management, government policy, human resources management, innovation, technology and law. Each article discusses for the topic at hand, its evolution, the key issues in light of today's world and matters that require attention in the future.
