# **MANUAL SOBRE EL ESQUEMA DEL JAPÓN 2002/2003**

Asistencia a los países de la región asiática para las negociaciones en materia de  
trato NMF y trato arancelario preferencial y para la utilización del SGP

(RAS/97/A18)

NACIONES UNIDAS  
Nueva York y Ginebra, noviembre de 2002

## **Resumen**

Las negociaciones intergubernamentales celebradas bajo los auspicios de la UNCTAD culminaron con la adopción, en 1971, del Sistema Generalizado de Preferencias (SGP), por el cual la mayoría de los países desarrollados otorgan el trato arancelario preferencial a las exportaciones de los países en desarrollo, con carácter no recíproco y no discriminatorio, y se reducen o eliminan los derechos aplicables a la nación más favorecida (NMF).

Las descripciones y la clasificación de países y territorios que figuran en el presente estudio, así como la forma en que se presentan los datos, no implican, por parte de la Secretaría de las Naciones Unidas, juicio alguno sobre la condición jurídica de países, territorios, ciudades o zonas, o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites, de su sistema económico o de su grado de desarrollo.

## Introducción

El presente manual tiene por finalidad proporcionar, de manera agrupada y concisa, la información sobre las ventajas arancelarias de que disponen los países en desarrollo en el marco del esquema del Sistema Generalizado de Preferencias (SGP) del Japón, así como las condiciones en que los productos pueden beneficiarse del trato preferencial al ser importados en el Japón.

El presente manual forma parte de una serie de publicaciones destinadas a ayudar a los exportadores, los productores y los funcionarios a aprovechar las oportunidades comerciales existentes en el marco de los diversos esquemas SGP. El manual proporciona orientación práctica sobre la forma de utilizar las preferencias otorgadas en el marco del esquema SGP del Japón.

Además de explicaciones sobre los países y territorios beneficiarios, los productos incluidos, la magnitud de las reducciones arancelarias, las medidas especiales en favor de los países menos adelantados (PMA), las medidas de exclusión de las listas, las normas de origen, etc., en el manual se facilita información detallada sobre los tipos SGP por producto, el monto de los topes y las condiciones específicas para el reconocimiento del origen.

El manual se publica bajo los auspicios del proyecto de cooperación técnica de la UNCTAD sobre la asistencia a los países de la región asiática para las negociaciones en materia de trato NMF y trato arancelario y para la utilización del SGP (RAS/97/A18). El manual ha podido publicarse gracias a una contribución financiera del Gobierno del Japón.

## **Parte I**

### **Notas explicativas sobre el esquema SGP del Japón**

El Sistema Generalizado de Preferencias (SGP), basado en el acuerdo alcanzado en la UNCTAD, tiene por finalidad contribuir al desarrollo económico de los países en desarrollo. El SGP proporciona beneficios a esos países permitiendo que los productos que reúnan las condiciones ingresen en los mercados de los países otorgantes de preferencias (países desarrollados) con tipos de aranceles reducidos o en régimen de franquicia aduanera.

#### **A. Beneficiarios**

El Japón otorga trato preferencial a 164 países y territorios en desarrollo (véase la lista en la página siguiente). Los beneficiarios son designados por Ordenanza del Gabinete entre los países y territorios que solicitan ese trato si cumplen los siguientes criterios:

- La economía del país o territorio está en desarrollo;
- El territorio tiene su propio sistema arancelario y comercial;
- El país o territorio desea recibir un beneficio especial en la esfera de los derechos aduaneros; y
- El país o territorio figura en una Ordenanza del Gabinete como país o territorio al que se puede otorgar debidamente ese beneficio.

## B. Productos incluidos

### 1. *Productos agrícolas (Capítulos 1 a 24 del SA)*

El Japón otorga preferencias a determinados productos agrícolas y pesqueros. La lista completa figura en el anexo 2. Sin embargo, a los PMA beneficiarios se les concede franquicia arancelaria sin contingentes en otra lista de productos que figura en el anexo 5.

### 2. *Productos industriales (Capítulos 25 a 97 del SA)*

Se otorgan preferencias a los productos industriales, incluidos los forestales y mineros, con algunas excepciones. La lista de los productos industriales no incluidos en el esquema figura en el anexo 3. Sin embargo, a los PMA beneficiarios se les concede franquicia arancelaria sin contingentes en otra lista de productos que figura en el anexo 5.

	<b>Productos incluidos</b>		<b>Reducciones arancelarias</b>	<b>Salvaguardia</b>
Productos agrícolas	Productos del anexo 2 (los del anexo 5 se incluyen sólo en beneficio de los PMA beneficiarios)		Diversas reducciones arancelarias	Cláusula liberatoria
Productos industriales	Todos los productos, con exclusión de los del anexo 3 (los del anexo 5 se incluyen sólo en beneficio de los PMA beneficiarios)	Productos del anexo 4	20 a 100% de reducción	Tope (anexo 6)
		Otros productos industriales	100% de reducción (franquicia arancelaria)	Cláusula liberatoria

## C. Magnitud de la reducción arancelaria

### 1. *Productos agrícolas (Capítulos 1 a 24 del SA)*

Diversas reducciones arancelarias, incluido el trato en régimen de franquicia arancelaria, se aplican a los productos incluidos en el esquema. En el anexo 2 figuran los tipos arancelarios SGP correspondientes a los productos agrícolas incluidos en el esquema.

### 2. *Productos industriales (Capítulos 25 a 97 del SA)*

En principio, a los productos industriales incluidos en el esquema se les otorga franquicia arancelaria, con excepción de los productos seleccionados que figuran en el anexo 4 (Lista de productos seleccionados (reducción arancelaria del 20 al 100%)), para los cuales los aranceles se reducen de un 20 a un 100% respecto de los tipos NMF.

## D. Topes

### 1. *Topes*

- a) No hay topes para los productos agrícolas (Capítulos 1 a 24 del SA).

- b) En cuanto a los productos industriales (Capítulos 25 a 97 del SA), no hay topes para varios de esos productos. En cuanto al resto, se pueden hacer importaciones preferenciales hasta que se superen los topes. En el caso de 81 grupos de productos, cada uno de los cuales incluye los productos de un Capítulo, partida o subpartida del SA, los topes se calculan para cada ejercicio fiscal. La información sobre los topes correspondientes al ejercicio fiscal de 2001 figura en el anexo 6.

## **2. *Fórmula de cálculo***

TOPES DEL EJERCICIO FISCAL 2001. Añádase el 3% de las importaciones totales procedentes de los países beneficiarios en el ejercicio fiscal 1999.

TOPES DEL EJERCICIO FISCAL 2002 Y POSTERIORES. Tope del ejercicio fiscal anterior multiplicado por 1,03.

## **3. *Utilización de los topes***

Todos los países receptores de preferencias pueden utilizar en pie de igualdad los topes para cada grupo de productos. No se establece ninguna asignación o reserva para ningún país beneficiario.

Una vez que se hayan superado los topes se aplicará el tipo arancelario NMF. El trato preferencial se suspenderá para determinado grupo de productos en relación con determinado país receptor de preferencias si las importaciones preferenciales de productos originarios de ese país superan una cantidad máxima para ese país de un quinto del valor o cantidad total del tope.

## **4. *Administración de los topes y cantidades máximas por país***

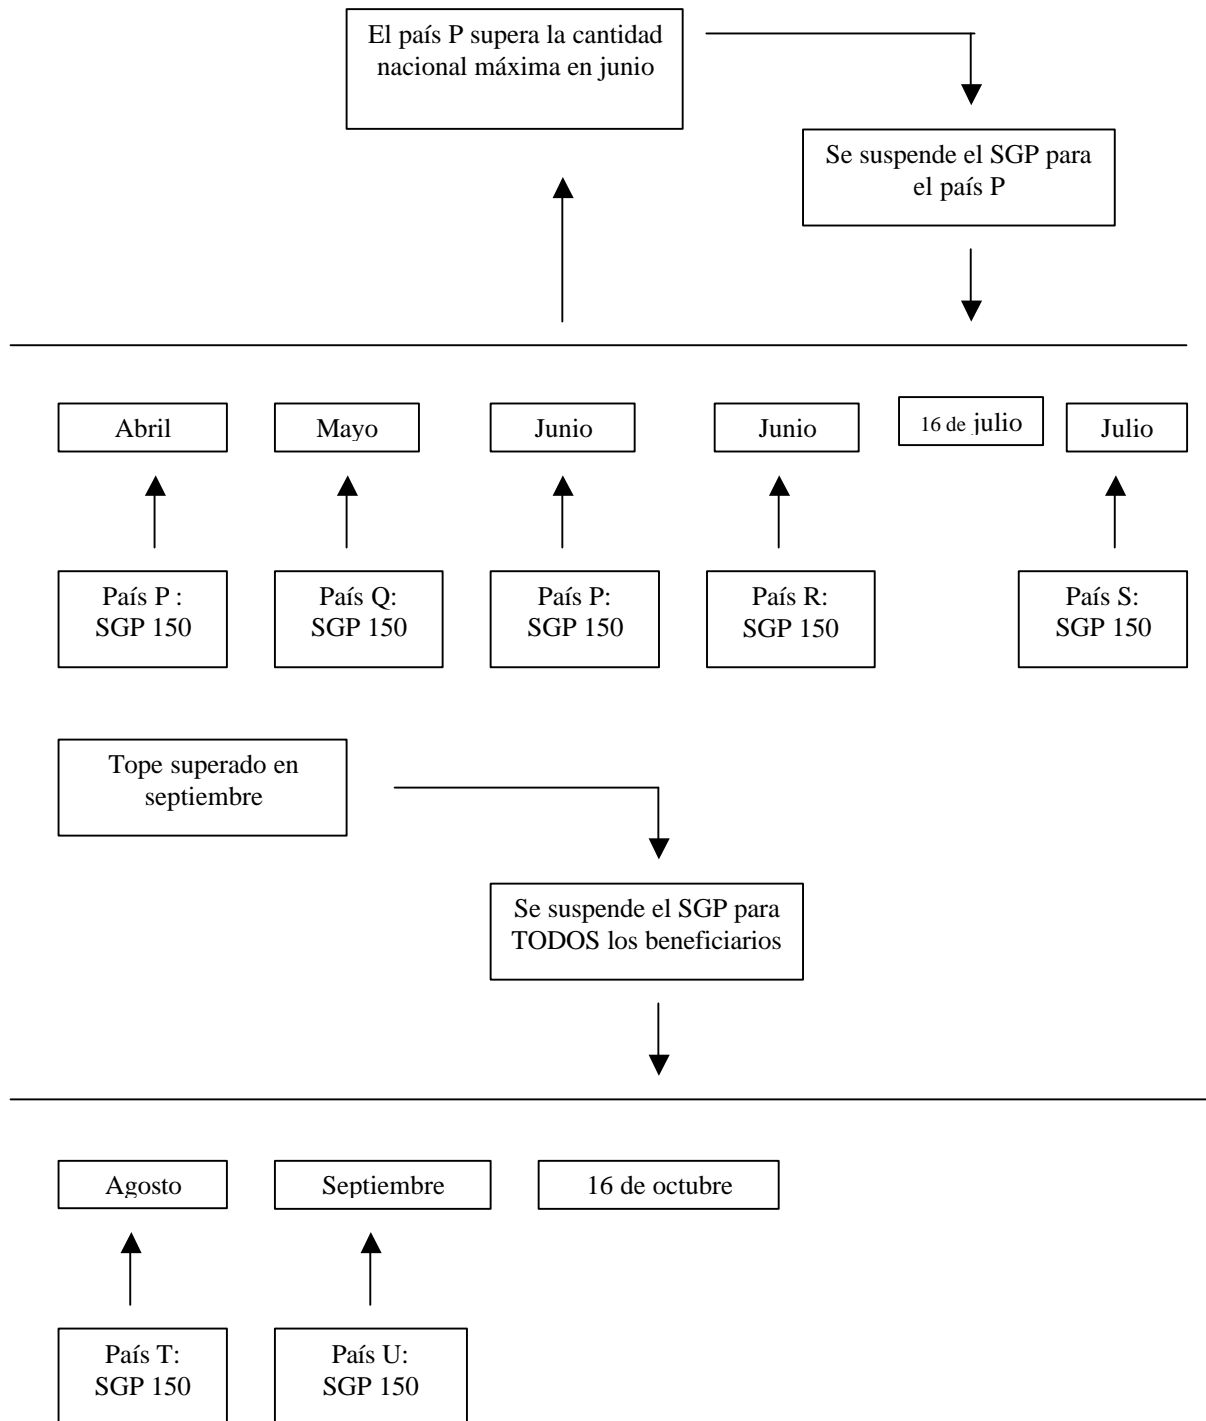

Los topes y las cantidades máximas por país se administran según el orden en que se efectúen las importaciones, con sujeción a un control mensual.

### **Control mensual**

Las importaciones se computan mensualmente y el tipo NMF se aplica el 16° día del primer mes que sigue al mes en que las importaciones han superado el tope o la cantidad máxima del país y después de ese día.

Ejemplo:

Tope: 1.000; cantidad máxima del país: 200.

### E. Mecanismo de salvaguardia

Como ocurre con otros esquemas SGP, en el del Japón se ha reservado el derecho a suspender el trato preferencial para los productos incluidos en el esquema en determinadas circunstancias.

## F. Exclusión de la lista de los países o territorios beneficiarios adelantados

Determinado producto de determinado país o territorio beneficiario puede ser excluido, mediante Ordenanza del Gabinete, del trato preferencial otorgado en el marco del SGP si:

- a) El país o territorio beneficiario ha sido clasificado como economía de renta alta en el Atlas del Banco Mundial o no figura en el Atlas, si se reconoce que tiene el mismo nivel de producto nacional bruto (PNB) por habitante;
- b) Las exportaciones del producto del país o territorio beneficiario al Japón exceden el 25% de las exportaciones mundiales de ese producto al Japón; y
- c) Las exportaciones del producto del país o territorio beneficiario al Japón representan más de 1.000 millones de yen.

Determinado país o territorio beneficiario puede ser excluido de la lista si ha sido clasificado como economía de renta alta en el Atlas del Banco Mundial de los tres años anteriores (exclusión total). En el anexo 9 figura la lista de países o territorios beneficiarios excluidos del trato preferencial.

## G. Trato especial a los países menos adelantados

El siguiente trato especial se ofrece a los PMA para todos los productos incluidos en el esquema:

- a) Franquicia arancelaria;
- b) Exención de las restricciones a los topes; y
- c) Lista adicional de productos industriales para los que se otorgan preferencias únicamente a los PMA beneficiarios (véase el anexo 5).

	Productos incluidos	Reducciones arancelarias	Salvaguardia
Productos agrícolas	Productos del anexo 2 Productos del anexo 5	100 % de reducción (franquicia arancelaria)	Cláusula liberatoria
Productos industriales	Todos los productos industriales (incluidos los del anexo 5), con exclusión de los productos del anexo 3	100% de reducción (franquicia arancelaria)	Cláusula liberatoria

Excepción: El cobre refinado (grupo N° 70 del anexo 4) importado de la República Democrática del Congo y Zambia.

## H. Información sobre las importaciones preferenciales

El valor o la cantidad de las importaciones preferenciales de cada grupo de productos se publica mensualmente en la Gaceta Oficial del Japón.

## Parte II

### Normas de origen en el marco del esquema SGP del Japón

Para que los productos exportados desde un país receptor de preferencias puedan beneficiarse del trato arancelario preferencial, deben ser reconocidos como originarios de ese país con arreglo a los criterios de origen del esquema SGP japonés y transportados al Japón de conformidad con sus normas de transporte.

#### A. Normas de transporte (expedición directa)

Estas normas deben garantizar que los productos mantengan su identidad y no sean manipulados o nuevamente transformados durante el transporte.

- a) En principio, los productos deben transportarse directamente al Japón, sin pasar por ningún territorio distinto del país exportador receptor de las preferencias.
- b) Sin embargo, en lo que respecta a los productos transportados al Japón por territorios distintos del país exportador receptor de las preferencias, pueden beneficiarse del trato preferencial si:
  - i) No han sido objeto de operación alguna en los países de tránsito distinta del transbordo o almacenamiento temporal impuesto exclusivamente por las exigencias en materia de transporte; y
  - ii) El transbordo o almacenamiento temporal se ha realizado en una zona bajo control aduanero u otro lugar similar bajo la supervisión de las autoridades aduaneras de los países de tránsito.
- c) Con respecto a los productos exportados desde un país receptor de preferencias para su almacenamiento temporal o presentación en exposiciones, ferias y actividades similares realizadas en otro país, que han sido exportados por la persona que las ha exportado así desde el tercer país al Japón, pueden beneficiarse del trato preferencial si:
  - i) El transporte al Japón desde el país en que se ha realizado la exposición o actividad similar queda comprendido en el inciso i) o ii) *supra*; y
  - ii) La exposición o actividad similar se ha realizado en una zona bajo control aduanero u otro lugar similar bajo la supervisión de ese país.

#### B. Criterios y origen

Se considera que los productos son originarios de un país receptor de preferencias si se obtienen enteramente en ese país.

En el caso de los productos elaborados total o parcialmente con materiales o piezas importados de otros países o de origen desconocido, se considera que los productos resultantes son originarios de un país receptor de preferencias si los materiales o piezas utilizados han sufrido una manipulación o transformación suficiente en ese país.

Por regla general, las operaciones de manipulación o transformación se considerarán suficientes cuando el producto resultante esté clasificado en una partida arancelaria del SA (4 dígitos) distinta de la que incluya a cada una de los materiales o piezas no originarios utilizados en su producción.

Sin embargo, hay dos excepciones a esa regla. Una es que la manipulación o transformación no se considerará suficiente cuando sea muy simple aunque haya un cambio en la partida del SA. La otra es la exigencia de que algunos productos reúnan determinadas condiciones para obtener la condición de originarios sin que haya un cambio en la partida del SA.

Se ha establecido una lista de productos -la "lista única"- para determinar los criterios de origen para esos casos. En esa lista figuran los requisitos de transformación que debe cumplir cada producto para obtener la condición de originario. Estos procesos se identifican esencialmente mediante una descripción del proceso requerido o un porcentaje máximo de los materiales importados (valor de costo, seguro y flete).

A pesar de una explicación general de los criterios de origen, los siguientes procesos mínimos no se aceptan para la obtención de la condición de originario:

- i) Las operaciones para garantizar la conservación del producto en buenas condiciones durante el transporte y almacenamiento (deseccación, congelación, colocación en salmuera y operaciones similares);
- ii) Simple corte o filtrado;
- iii) Simple colocación en botellas, cajas o envases similares;
- iv) Reembalaje, separación o clasificación;
- v) Marcación o fijación de marcas, etiquetas u otros signos distintivos en el producto o su embalaje;
- vi) Simple mezcla de productos no originarios;
- vii) Simple montaje de piezas de productos no originarios;
- viii) Simple constitución de juegos de productos no originarios; y
- ix) Combinación de dos o más de las operaciones mencionadas en los incisos i) a viii);

### **C. Utilización de materiales importados desde el Japón**

En cumplimiento de los criterios de origen, se otorgará el siguiente trato especial a los materiales importados desde el Japón en los países receptores de preferencias y utilizados en ellos para producir mercancías que se exportarán posteriormente al Japón (norma del contenido procedente del país otorgante de preferencias):

- i) En el caso de los bienes producidos en un país receptor de preferencias únicamente con materiales importados desde el Japón, o de los producidos en un país receptor de preferencias únicamente con materiales enteramente obtenidos en ese país y materiales importados desde el Japón, se considerará que esos bienes se han obtenido enteramente en ese país; y
- ii) Todos los productos exportados desde el Japón que se hayan utilizado como partes de materias primas o componentes para producir cualquier bien distinto de los previstos en el párrafo 1 *supra* se considerarán como enteramente obtenidos en ese país.

Sin embargo, no se otorgará el trato especial a los productos enumerados en el anexo 8.

### **D. Normas de origen acumulativo**

En el caso de los bienes producidos en dos o más países del Asia sudoriental, a saber, Filipinas, Indonesia, Malasia, Tailandia y Viet Nam, se considera que esos países son un país

receptor de preferencias a los fines de la aplicación de los criterios de origen y la norma del contenido procedente del país otorgante de preferencias.

Ese grupo se beneficia de los siguientes efectos cuando se aplican las normas sustanciales de fabricación:

- i) Los productos totalmente obtenidos en el grupo o los importados desde el Japón al grupo se consideran como originarios del grupo; y
- ii) Los productos elaborados total o parcialmente con materiales importados por el grupo o con materiales de origen desconocido se consideran como originarios del grupo si los materiales han sufrido una manipulación o transformación suficiente en los países que intervienen en la producción.

El origen de los productos que pueden beneficiarse del trato preferencial según las normas de origen acumulativo es el país que produce y exporta los productos al Japón. Para utilizar el sistema del origen acumulativo, debe presentarse a las autoridades aduaneras el certificado de manipulación o transformación acumulativa (anexo 10) al efectuar la declaración de aduanas, además del certificado de origen (formulario A).

## **E. Pruebas documentales**

### ***1. Pruebas relacionadas con el origen de los productos***

- a) Exigencias documentales que deben cumplir todos los productos para recibir el trato SGP

Para que los productos reciban el trato arancelario preferencial, debe presentarse un certificado de origen (formulario de declaración combinada con certificado de origen) (formulario A) (véase el anexo 10) a las autoridades aduaneras japonesas al importar los productos en el Japón. El certificado será expedido por las autoridades aduaneras (u otros organismos públicos competentes del país exportador receptor de preferencias u otras entidades de ese país, como las cámaras de comercio, habilitadas por las autoridades aduaneras japonesas para expedir el certificado) a petición del exportador cuando éste exporta las mercancías en cuestión. Sin embargo, en lo que respecta a los envíos de un valor aduanero que no supere los 200.000 yen o las mercancías cuyos orígenes son evidentes, no se exigirá el certificado.

- b) Materiales importados desde el Japón

Cuando se trate de obtener uno de los dos tratos especiales con arreglo a la norma del contenido procedente del país otorgante de preferencias respecto de productos que se exportarán desde un país receptor de preferencias al Japón, se exigirá la siguiente prueba para establecer que los materiales utilizados en la producción de los bienes se importaron originalmente en ese país desde el Japón: un certificado de materiales importados desde el Japón (véase el anexo 10) expedido por las mismas autoridades competentes que expidan el Certificado de origen (formulario A).

- c) Origen acumulativo

Cuando se trate de obtener uno de los dos tratos especiales con arreglo a las normas de origen acumulativo respecto de bienes producidos en un país del grupo, deberá presentarse a

las autoridades aduaneras japonesas un certificado de manipulación o transformación acumulativa al importar los productos en el Japón, junto con un certificado de origen (formulario A).

## **2. Pruebas relacionadas con el transporte**

En el caso del transporte de los incisos ii) y iii) de las normas de transporte mencionadas, deben presentarse las siguientes pruebas para establecer que el transporte se ajustó a las condiciones establecidas en dichas normas:

- a) Un conocimiento de embarque directo;
- b) Un certificado expedido por las autoridades aduaneras u otras autoridades competentes de los países de tránsito; o,
- c) A falta de esas pruebas, cualquier otro documento justificativo que se considere suficiente.

Sin embargo, tratándose de los envíos de un valor aduanero que no supere los 200.000 yen, no se exigirá esa prueba.

### **Número de partida SA de los productos exentos de requisitos documentales**

An information note is also obtainable from the UNCTAD secretariat.

### II. General conditions

To qualify for preference products must:

- (a) Fall within a description of products eligible for preference in the country of destination. The description entered on the form must be sufficiently detailed to enable the products to be identified by the customs officer examining them;
- (b) Comply with the rules of origin of the country of destination. Each article in a consignment must qualify separately in its own right; and
- (c) comply with the consignment conditions specified by the country of destination. In general, products must be consigned direct from the country of exportation to the country of destination but most preference-giving countries accept passage through intermediate countries subject to certain conditions. (For Australia, direct consignment is not necessary).

### III. Entries to be made in box 8

Preference products must either be wholly obtained in accordance with the rules of the country of destination or sufficiently worked or processed to fulfil the requirements of that country's origin rules.

- (a) Products wholly obtained: for export to all countries listed in Section I, enter the letter "P" in box 8 (for Australia and New Zealand box 8 may be left blank).
- (b) Products sufficiently worked or processed: for export to the countries specified the entry in box 8 should be as follows:
  - (1) United States of America: for single country shipments enter the letter "Y" in box 8, for shipments from recognized associations of countries the letter "Z", followed by the sum of the cost or value of the domestic materials and the direct cost of processing, expressed as a percentage of the ex-factory price of the exported products; (example "Y" 35% or "Z" 35%).
  - (2) Canada: for products which meet origin criteria from working or processing in more than one eligible least developed country enter letter "G" in box 8; otherwise "F".
  - (3) Japan, Norway, Switzerland and the European Union: enter the letter "W" in box 8 followed by the Customs Co-operation Council Nomenclature (Harmonized System) heading of the exported product; (example "W" 96.18).
  - (4) Bulgaria, Czech Republic, Hungary, Poland, the Russian Federation and Slovakia: for products which include value added in the exporting preference-receiving country enter the letter "Y" in box 8 followed by the value of imported materials and components expressed as a percentage of the f.o.b. price of the exported products (example "Y" 45%); for products obtained in a preference-receiving country and worked or processed in one or more other such countries, enter "PK".
  - (5) Australia and New Zealand: Completion of the box 8 is not required. It is sufficient that a declaration be properly made in box 12.

- 
- \* For Australia, the main requirement is the exporter's declaration on the normal commercial invoice. Form A, accompanied by the normal commercial invoice, is an acceptable alternative, but official certification is not required.
- \*\* Official certification is not required.
- \*\*\* The United States does not require GSP Form A. A declaration setting forth all detailed information concerning the production or manufacture of the merchandise is considered sufficient only if requested by the District Collector of Customs.
