

# Science and Technology for Development: the Role of CERN

---

**CSTD**

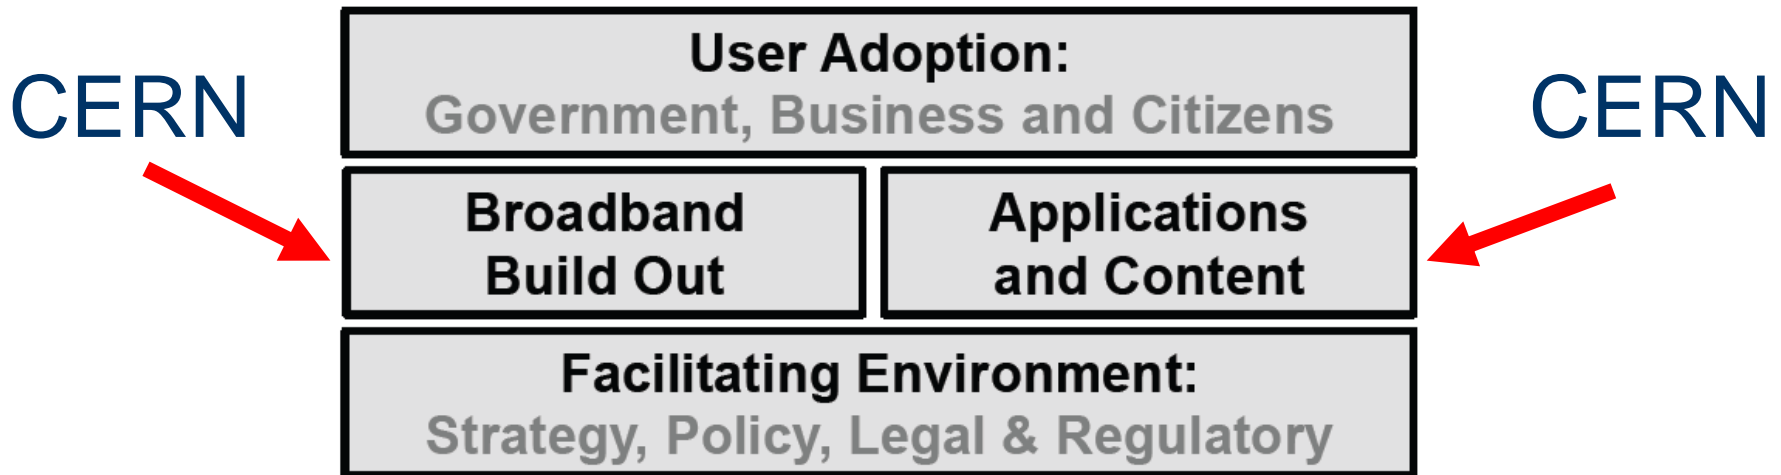

June 5, 2013

Sergio Bertolucci

CERN

# The Broader Digital Ecosystem

---

# What we have to offer

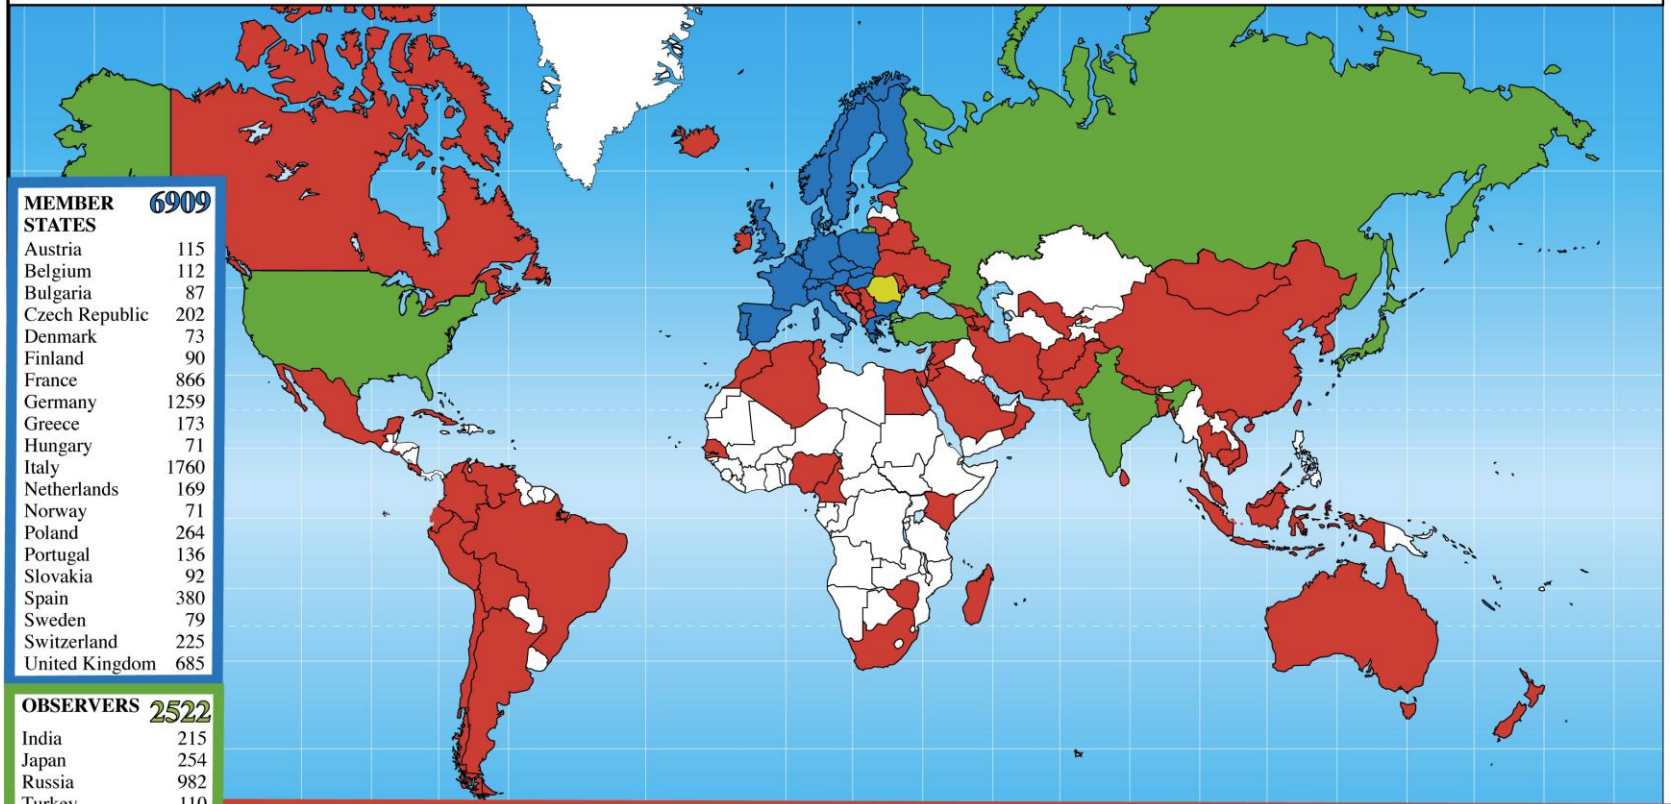

---

- A global network of scientists/engineers
- A primary training ground
- An extended suite of **open access software**
- A consolidated expertise in leading edge solutions on IT
- Our keen interest to bridge among research and society at large

# CERN in Numbers

## Distribution of All CERN Users by Nationality on 4 April 2012

<b>MEMBER STATES</b>	<b>6909</b>
Austria	115
Belgium	112
Bulgaria	87
Czech Republic	202
Denmark	73
Finland	90
France	866
Germany	1259
Greece	173
Hungary	71
Italy	1760
Netherlands	169
Norway	71
Poland	264
Portugal	136
Slovakia	92
Spain	380
Sweden	79
Switzerland	225
United Kingdom	685

<b>OBSERVERS</b>	<b>2522</b>
India	215
Japan	254
Russia	982
Turkey	110
USA	961

<b>CANDIDATE FOR ACCESSION</b>	
Romania	117

<b>ASSOCIATE MEMBERS IN THE PRE-STAGE TO MEMBERSHIP</b>	
Israel	67
Serbia	39

<b>OTHERS</b>	Bosnia & Herzegovina	2	Cuba	6	Ireland	23	Mexico	63	Peru	5	Tunisia	6	
Afghanistan	1	Brazil	98	Cyprus	14	Jordan	2	Moldova	1	Qatar	1	Ukraine	46
Albania	3	Cambodia	1	Ecuador	2	Kenya	1	Mongolia	1	San Marino	1	Uzbekistan	2
Algeria	11	Cameroon	2	Egypt	9	Korea, D.P.R.	1	Montenegro	2	Saudi Arabia	3	Venezuela	10
Argentina	16	Canada	141	El Salvador	1	Korea Rep.	119	Morocco	13	Senegal	1	Viet Nam	10
Armenia	21	Chile	6	Estonia	15	Lebanon	11	Nepal	3	Slovenia	43	Zimbabwe	2
Australia	23	China	270	Georgia	31	Lithuania	17	New Zealand	8	South Africa	16		
Azerbaijan	6	China (Taipei)	48	Hong Kong	1	Luxembourg	3	Nigeria	1	Sri Lanka	6

# The global infrastructure is being put in place

# How is the information flowing?

---

Credit: [FreePhoto](#)

A one way flux does “only” require a good internet (which is important)  
A real exchange of information requires digital libraries **on both sides**

## Exchange of research results **must** go in all directions

- The print era had its natural limitations
- There is no reason to carry any of these limitations forward to the online era
- Today scientist expect to **exchange information** in all directions; North-South, South-North, South-South and North-North

# The CERN-UNESCO School

## on Digital Libraries

- Improve the visibility of African research
- Capacity building / knowledge and technology transfer
- Establishing contacts with African institutions

1<sup>st</sup> school: KIST, Kigali, Rwanda, September 2009

2<sup>nd</sup> school: CNRST, Rabat, Morocco, November 2010

3<sup>rd</sup> school: CNDST, Dakar, Senegal, November 2011

4<sup>th</sup> school: KNUST, Kumasi, Ghana, *in preparation for 2013*

# Invenio, the CERN tool for DL

Invenio is an open source software suite enabling you to run your own digital library or document repository on the web. The technology offered by the software covers all aspects of digital library management from document ingestion through classification, indexing, and curation to dissemination.

Invenio is the tool used for LHC publications workflow approval at CERN.

UNESCO & CERN have sponsored digital library schools in Africa (Rwanda 2009, Morocco 2010, Senegal 2011)

CERN has donated (WLCG Tier-0) computers to Africa (Morocco, Ghana, Egypt soon).

# First achievements

- First installations in place
- Sign of multipliers
- International coverage
  - ✓ Benin (3 participants)
  - ✓ Burkina Faso (4)
  - ✓ Cameroon (4)
  - ✓ Ethiopia (1)
  - ✓ Ghana (1)
  - ✓ Guinea-Bissau (3)
  - ✓ Guinea-Conakry (1)
  - ✓ Ivory Coast (3)
  - ✓ Mali (5)
  - ✓ Mauritania (1)
  - ✓ **Morocco (15)**
  - ✓ Mozambique (1)
  - ✓ **Rwanda (30)**
  - ✓ **Senegal (23)**
  - ✓ Tunisian Republic (3)

# CERN and UNESCO are reaching out Seeking new partners to sustain the series of schools

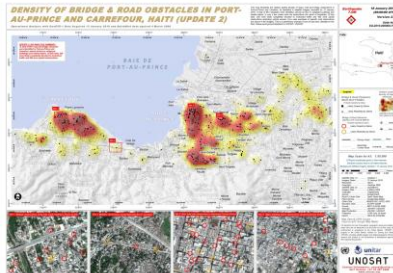

An obvious first goal:

join efforts to make all African theses available Open Access via digital libraries

The infrastructure is mostly in place, the required technology exists  
it is mainly a question of developing policy and capacity building!

# Did you know...?

WHO is connected via CERN to the Commodity Internet

### International Women's Day celebrates 100 years

3 March 2011 - Over the last 100 years many advances have significantly improved the health of women but there is still more to be done. This year International Women's Day focuses on access to science and technology. New technology empowers women to take control of their health and enables them to benefit from innovative health campaigns often disseminated through online or mobile phone technology.

**Top stories**

- International Women's Day celebrates 100 years
- WHO supplies arrive for Libyans
- Tackling drug resistance

Cancer	Cardiovascular diseases	Diabetes
<b>7.6 million</b> deaths from cancer worldwide in 2008.	<b>29%</b> of global deaths due to cardiovascular diseases	<b>220 million</b> people have diabetes worldwide.
<a href="#">Read the cancer fact sheet</a>	<a href="#">Read the cardiovascular diseases fact sheet</a>	<a href="#">Read the diabetes fact sheet</a>

**WHO highlights**

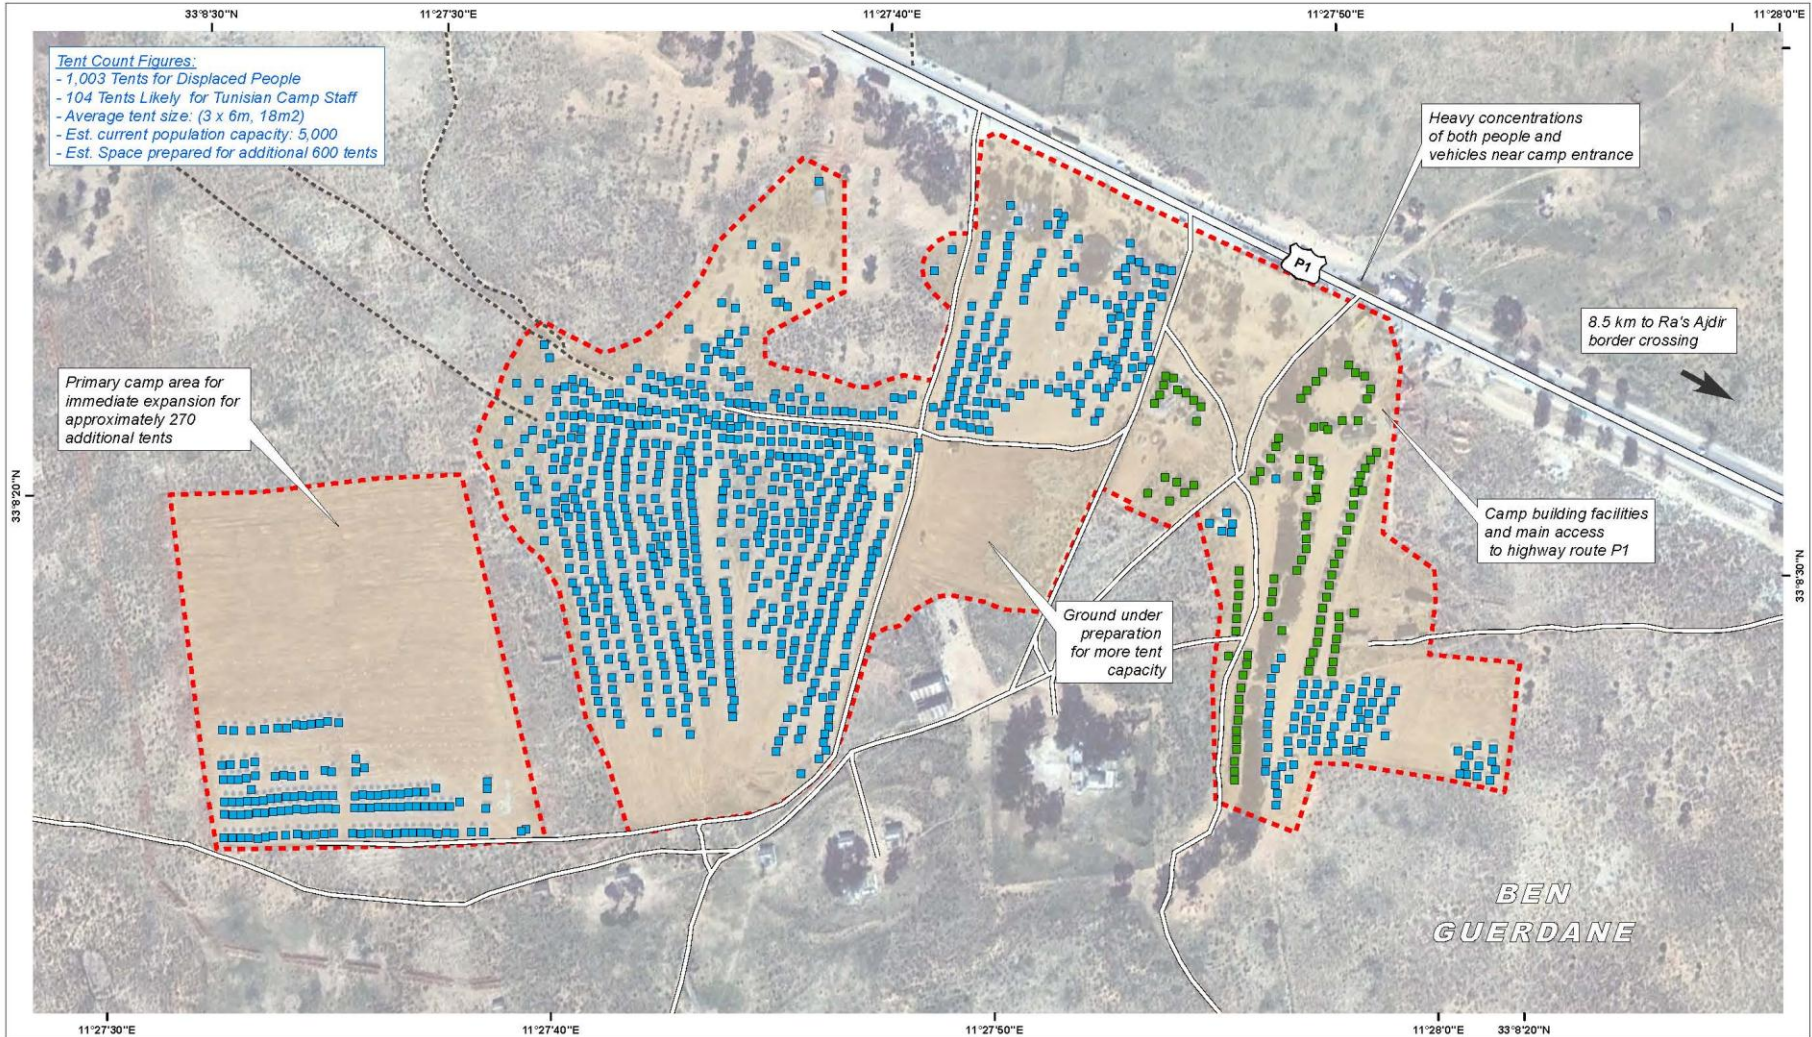

- 8 March 2011 **Health risk assessment and interventions: the Libyan Arab Jamahiriya**  
This public health risk assessment for the Libyan Arab Jamahiriya provides health professionals in United Nations agencies, NGOs, donor agencies and local authorities, with up-to-date guidance on the major public health threats faced by the displaced population.
- 1 March 2011 **Chinese vaccines meet international regulatory standards**  
The State Food and Drug Administration of China's vaccine regulatory system meets international compliance standards. Vaccine manufacturers in China are now eligible to apply for WHO prequalification of specific products.

**Events**

- WHO International Conference on Environmental and Occupational Determinants of Cancer: interventions for Primary Prevention  
17-18 March 2011
- World Water Day  
22 March 2011
- World TB Day  
24 March 2011

— Full events calendar

UNOSAT staff and servers hosted at CERN

UNITAR / UNOSAT  
unosat@unitar.org  
Palais des Nations  
Geneva, Switzerland  
T: +41 22 767 4020  
24/7 hotline: +41 76 487 4998

Note: Map has been rotated 20 degrees from North to improve map visualization

The depiction and use of boundaries, geographic names and related data shown here are not warranted to be error-free nor do they imply official endorsement or acceptance by the United Nations. UNOSAT is a program of the United Nations Institute for Training and Research (UNITAR), providing satellite imagery and related geographic information, research and analysis to UN humanitarian & development agencies & their implementing partners.

- Transitional Camp Extent
- Transitional Camp Tent by Type:**
  - Likely Tents for Displaced People
  - Likely Tunisian Authority Tent
- Functional Road Class**
  - Highway
  - Tertiary
  - Trail

# Collaboration: Citizen Cyberscience Centre

- **Philosophy:** promote web-based citizen participation in science projects as an appropriate low cost technology for scientists in the developing world.
- **Partners:** CERN, UN Institute for Training and Research, University of Geneva
- **Technology:** open source platforms for internet-based distributed collaboration
- **Projects:**
  - **Computing for Clean Water** optimizing nanotube based water filters by large scale simulation on volunteer PCs
  - **AfricaMap** volunteer thinking to generate maps of regions of Africa from satellite images, with UNOSAT
  - **LHC@home** new volunteer project for public participation in LHC collision simulations, using VM technology

# In conclusion

---

- Large research infrastructure can play a significant role in facilitating development through the spread of IT based solutions, by providing:
  - Tools
  - Training
  - Demonstrator projects
- ....but it is clear: **we are a tool, not the solution**

---

In order to have sustainable solutions, we will need

- **Coordination**
- **Flexibility**
- **Visionary global policies**

---

**Thank you!**
