

reddforests

BIOTRADE & REDD+

1. Forest Carbon Projects in Practice
2. BioTrade & Forest Carbon Projects
3. Proposed Activities

Forest Carbon Projects

What are they for?

1. Protect and/or restore native forests
2. Reduce GHG emissions
3. Remunerate project proponents
1. Protect other environmental assets

Forest Carbon Projects

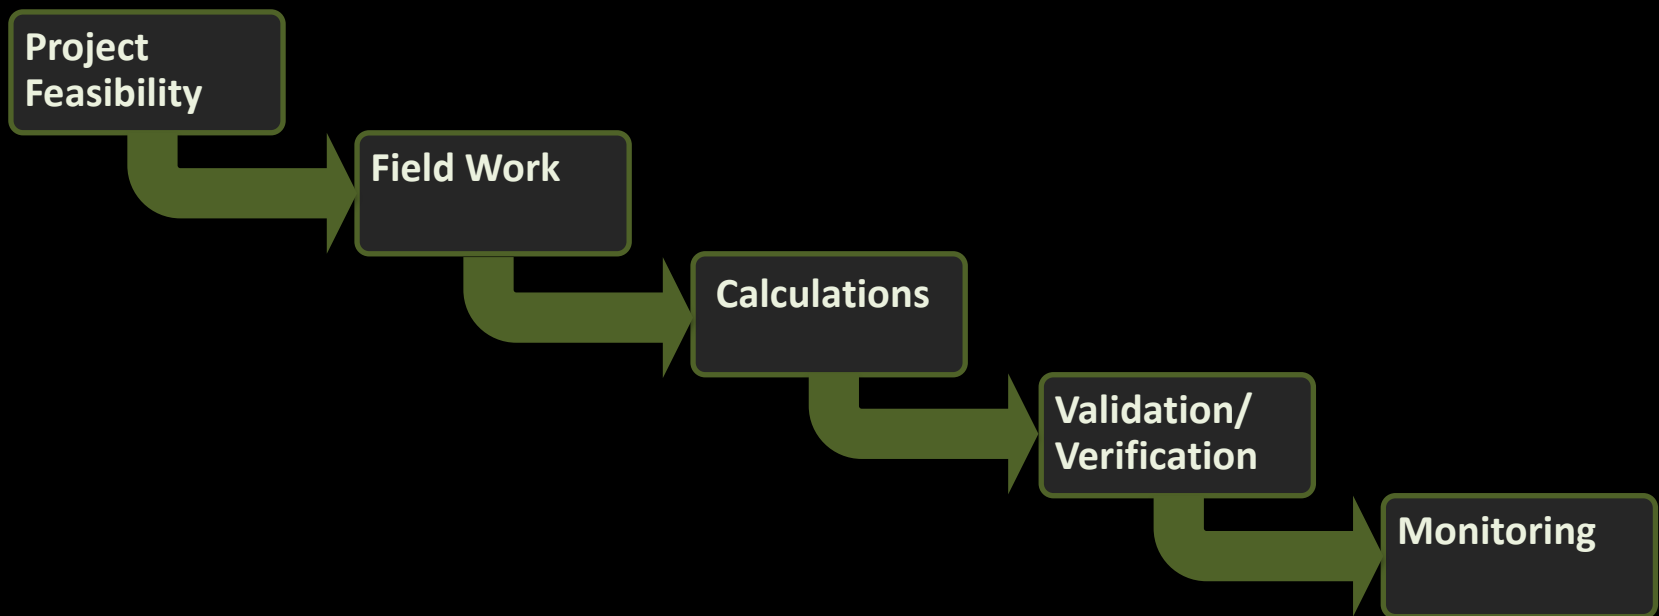

What Type of Projects?

Baseline Scenario	Methodology
Illegal deforestation and degradation	VCS REDD REDD+
Sanctioned logging	VCS-IFM
Re-establish forest areas	UNFCCC-CDM

Forest Carbon Projects

How are they Implemented?

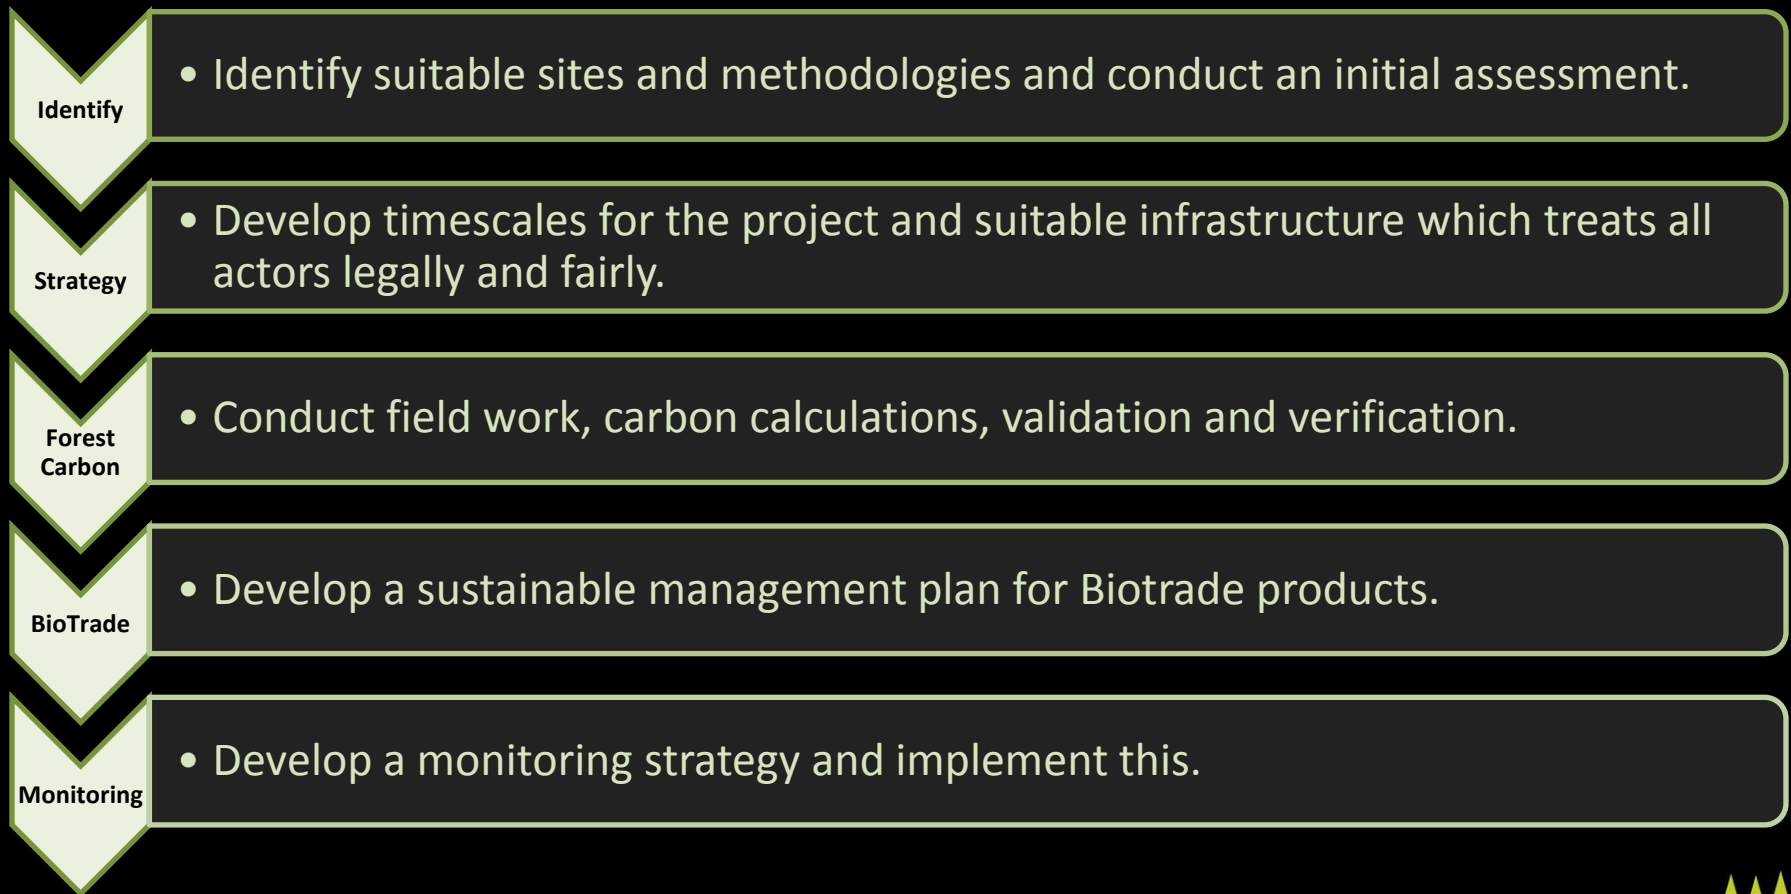

BIOTRADE & REDD+

1. Forest Carbon Projects in Practice
2. BioTrade & Forest Carbon Projects
3. Proposed Activities

BioTrade & REDD+

BIOTRADE & REDD+

1. Forest Carbon Projects in Practice
2. BioTrade & Forest Carbon Projects
3. Proposed Activities

Proposed Activities

Feasibility Study

Pilot BT-FC Project

1. Potential areas
1. Methodology & assessment
2. Opportunities and threats/Monitoring plan
3. Requirements (legal and technical)

Company Profile

Main Achievements

1. 36,000ha forests protected, 280,000 VCU per year
1. First to validate VCS-IFM projects
2. First to sell VCS-IFM credits
3. Technical expertise
4. Carbon market and biodiversity opportunities
