# SCOPE

All statistics compiled and published by UNCTAD on UNCTADstat or on the UNCTAD website (i.e. either as a statistical database or report) are considered official international statistics, unless clearly stated otherwise. In practice, this means that statistical outputs listed below are covered by the SQAF. This list may not be exhaustive. Therefore, any statistics compiled and disseminated by UNCTAD are governed by the SQAF (unless explicitly stated otherwise). The scope of the SQAF should be reviewed regularly, at least every 2 years, to ensure any new statistics in regular production are included.
