NOTES .............................................................................................................................................. 62
A. General definitions

1. Transnational corporations

Transnational corporations (TNCs) are incorporated or unincorporated enterprises comprising parent enterprises and their foreign affiliates. A parent enterprise is defined as an enterprise that controls assets of other entities in countries other than its home country, usually by owning a certain equity capital stake. An equity capital stake of 10% or more of the ordinary shares or voting power for an incorporated enterprise, or its equivalent for an unincorporated enterprise, is normally considered as the threshold for the control of assets.1 A foreign affiliate is an incorporated or unincorporated enterprise in which an investor, who is a resident in another economy, owns a stake that permits a lasting interest in the management of that enterprise (an equity stake of 10% for an incorporated enterprise, or its equivalent for an unincorporated enterprise). In WiIR, subsidiary enterprises, associate enterprises and branches — defined below — are all referred to as foreign affiliates or affiliates.

- A subsidiary is an incorporated enterprise in the host country in which another entity directly owns more than a half of the shareholder's voting power, and has the right to appoint or remove a majority of the members of the administrative, management or supervisory body.
- An associate is an incorporated enterprise in the host country in which an investor owns a total of at least 10%, but not more than half, of the shareholders' voting power.
- A branch is a wholly or jointly owned unincorporated enterprise in the host country which is one of the following: (i) a permanent establishment or office of the foreign investor; (ii) an unincorporated partnership or joint venture between the foreign direct investor and one or more third parties; (iii) land, structures (except structures owned by government entities), and/or immovable equipment and objects directly owned by a foreign resident; or (iv) mobile equipment (such as ships, aircraft, gas- or oil-drilling rigs) operating within a country, other than that of the foreign investor, for at least one year.

2. Foreign direct investment

Foreign direct investment (FDI) is defined as an investment involving a long-term relationship and reflecting a lasting interest and control by a resident entity in one economy (foreign direct investor or parent enterprise) in an enterprise resident in an economy other than that of the foreign direct investor (FDI enterprise or affiliate enterprise or foreign affiliate).2 FDI implies that the investor exerts a significant degree of influence on the management of the enterprise resident in the other economy. Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates, both incorporated and unincorporated. FDI may be undertaken by individuals as well as business entities.

Flows of FDI comprise capital provided (either directly or through other related enterprises) by a foreign direct investor to an FDI enterprise, or capital received from an FDI enterprise by a foreign direct investor. FDI has three components: equity capital, reinvested earnings and intra-company loans.

- Equity capital is the foreign direct investor's purchase of shares of an enterprise in a country other than its own.
- Reinvested earnings comprise the direct investor's share (in proportion to direct equity participation) of earnings not distributed as dividends by affiliates, or earnings not remitted to the direct investor. Such retained profits by affiliates are reinvested.
- Intra-company loans or intra-company debt transactions refer to short- or long-term borrowing and lending of funds between direct investors (parent enterprises) and affiliate enterprises.
FDI stock is the value of the share of their capital and reserves (including retained profits) attributable to the parent enterprise, plus the net indebtedness of affiliates to the parent enterprise. FDI flow and stock data used in WIR are not always defined as above, because these definitions are often not applicable to disaggregated FDI data. For example, in analysing geographical and industrial trends and patterns of FDI, data based on approvals of FDI may also be used because they allow a disaggregation at the country or industry level. Such cases are denoted accordingly.

3. Non-equity forms of investment

Foreign direct investors may also obtain an effective voice in the management of another business entity through means other than acquiring an equity stake. These are non-equity forms of investment, and they include, inter alia, subcontracting, management contracts, turnkey arrangements, franchising, licensing and product-sharing. Data on these forms of transnational corporate activity are usually not separately identified in the balance-of-payments statistics. These statistics, however, usually present data on royalties and licensing fees, defined as “receipts and payments of residents and non-residents for: (i) the authorized use of intangible non-produced, non-financial assets and proprietary rights such as trademarks, copyrights, patents, processes, techniques, designs, manufacturing rights, franchises, etc., and (ii) the use, through licensing agreements, of produced originals or prototypes, such as manuscripts, films, etc.”

B. Availability, limitations and estimates of FDI data presented in WIR

FDI data have a number of limitations. This section therefore spells out how UNCTAD collects and reports such data. These limitations need to be kept in mind also when dealing with the size of TNC activities and their impact.

1. FDI flows

Annex table 1 in the Report (annex tables 1 and 2 in the UNCTAD website and the WIR-CD), as well as in most of the tables in the text, are on a net basis (capital transactions’ credits less debits between direct investors and their foreign affiliates), or net acquisitions of assets (outward FDI) and net incurrence of liabilities (inward FDI). Thus decreases of net acquisitions of assets in the case of outward FDI or decreases of net incurrence in liabilities in the case of inward FDI are recorded as negative FDI. Hence, FDI flows with a negative sign in WIR indicate that FDI is in such cases. In this case at least one of the three components of FDI (equity capital, reinvested earnings or intra company loans) is negative and is not offset by positive amounts of the other components. These are instances of reverse investment or disinvestment.

UNCTAD regularly collects published and unpublished national official FDI data flows directly from central banks, statistical offices or national authorities on an aggregated and disaggregated basis for its FDI/TNC database (www.unctad.org/fdistatistics). These data constitute the main source for the reported data on FDI. These data are further complemented by data obtained from: (i) other international organizations such as the International Monetary Fund (IMF), the World Bank and the Organisation for Economic Co-operation and Development (OECD); (ii) regional organizations such as the ASEAN Secretariat, European Bank for Reconstruction and Development (EBRD), Banque Centrale des Etats de l’Afrique de l’Ouest, Banque des Etats de l’Afrique Centrale and Eastern Caribbean Central Bank; and (iii) UNCTAD’s own estimates.

For those economies for which data were not available from national official sources, or for those for which data were not available for the entire period of 1980-2013 covered in the World Investment Report 2014 (WIR14), data from the IMF were obtained using the IMF’s International Financial Statistics and Balance of Payments Statistics Online, May 2014. If the data were not available from the above IMF data source, data from the IMF’s Country Report, under Article IV of the IMF’s Articles of Agreements, were also used.

Data from the EBRD were utilized for those economies in the Commonwealth of Independent States for which data were not available from one of the above-mentioned sources.
Furthermore, data on the FDI outflows of the OECD, as presented in its publication, *Geographical Distribution of Financial Flows to Developing Countries*, and as obtained from its online databank, were used as a proxy for FDI inflows. As these OECD data are based on FDI outflows to developing economies from the member countries of the Development Assistance Committee (DAC) of OECD, inflows of FDI to developing economies may be underestimated.

Finally, in those economies for which data were not available from either of the above-mentioned sources, or only partial data (quarterly or monthly) were available, estimates were made by:

(a) annualizing the data, if they are only partially available (monthly or quarterly) from either the national official source or the IMF;

(b) using the mirror data of FDI of major economies from UNCTAD’s FDI/TNC database as proxy;

(c) using national and secondary information sources;

(d) using data on cross-border mergers and acquisitions (M&As) and their growth rates; and

(e) using specific factors.

### 2. FDI stock

Annex table 2 in the Report (annex tables 3 and 4 in the UNCTAD website and the WIR-CD), as well as some tables in the text, present data on FDI stock at book value or historical cost, reflecting prices at the time when the investment was made.

As in the case of flow data, UNCTAD regularly collects published and unpublished national official FDI stock data as well directly from central banks, statistical offices or national authorities on an aggregated and disaggregated basis for its FDI/TNC database (www.unctad.org/fdistatistics). These data constitute the main source for the reported data on FDI. These data are further complemented by data obtained from (i) other international organizations such as the IMF; (ii) regional organizations such as the ASEAN Secretariat; and (iii) UNCTAD’s own estimates.

For those economies for which data were not available from national official sources, or for those for which data were not available for the entire period of 1980-2013 covered in the WIR14, data from the IMF were obtained using the IMF’s *Balance of Payments Statistics Online*, May 2014. Finally, for those economies for which data were not available from either of the above-mentioned sources, estimates were made by either adding up FDI flows over a period of time, or adding or subtracting flows to an FDI stock that had been obtained for a particular year from national official sources, or the IMF data series on assets and liabilities of direct investment, or by using the mirror data of FDI stock of major economies as proxy.

### C. Sources and methodology of data on FDI for each country

The following section provides details on sources and methodology of data on FDI, as well as estimation method of these data, for each of the economies used in the Report or contained in the UNCTAD FDI/TNC database from 1980 to 2013.

- **Afghanistan**
  - National institution reporting FDI:
    - Da Afghanistan Bank
  - Data source used in the report:
    - **Inflows**
    - **Inward stock**
      - Estimated by accumulating inflows since 1970.
    - **Outward FDI**
      - Not available.
  - Availability of all FDI flows and stock components:
    - **Not available.**

- **Albania**
  - National institution reporting FDI:
    - Bank of Albania
Reporting system used:
- Surveys.

Data source used in the report:
- Flows:
  - The national institution mentioned above.
- Inward stock:
  - Data prior to 2000 are estimated by accumulating inflows since 1992. Data for 2000-2012 are from the national institution. 2013 is estimated by adding 2013 flows to the 2012 stock.
- Outward stock:
  - The national institution. 2013 is estimated by adding 2013 flows to the 2012 stock.

Availability of all FDI flows and stock components:
- Outward stock from 2008.
- Not available for outflows.

Algeria
- National institution reporting FDI:
  - Banque d’Algérie
- Data source used in the report:
  - Flows:
    - The national institution mentioned above.
  - Stock:
    - Estimated by accumulating flows since 1970.
- Availability of all FDI flows and stock components:
  - Not available.

Angola
- National institution reporting FDI:
  - Banco Nacional de Angola
- Data source used in the report:
  - Inflows:
  - Outflows:
  - Note: Proxy is based on investments reported by the following economies:
- Inward stock:
  - Data prior to 2003 are estimated by accumulating inflows since 1970. 2003-2013 are from the national institution.
- Outward stock:
  - Data prior to 2003 are estimated by accumulating outflows since 1986. 2003-2013 data are from the national institution.

Anguilla, Antigua and Barbuda, Dominica, Grenada, Montserrat, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines
- National institution reporting FDI:
  - Eastern Caribbean Central Bank (ECCB)
- Reporting system used:
  - Surveys, administrative sources and interviews with some of the foreign direct investment enterprises.
- Valuation system used:
  - Current price.
- Data source used in the report:
  - Inflows:
    - 1. Anguilla: The national institution mentioned above.
  - Outflows:
    - Note: Proxy is based on investments reported by the following economies:

- **Inward stock**

- **Outward stock**

- **Stock**
  Data prior to 1991 are estimated by subtracting flows from the stock of 1991. 1991-2013 are from the national institution.
  - Availability of all FDI flows and stock components:
    - Inward stock from 1991.
    - Not available for outward stock.

- **Argentina**
  - National institution reporting FDI:
  - Data source used in the report:

- **Inflows**

- **Outflows**
  - Note: Proxy is based on investments reported by the following economies:
    1984 Brazil, Chile and the United States.
    1985 Belgium and Luxembourg, Brazil and the United States.
    1986 Belgium and Luxembourg, Bolivia, Brazil, Ecuador, France, the Netherlands and the United States.
    1987 Brazil, Chile, Ecuador, France, Germany, the Netherlands, the United States and the Bolivarian Republic of Venezuela.
    1988 Brazil, Chile, France, Germany, the Netherlands, the United States and the Bolivarian Republic of Venezuela.
    1989 Belgium and Luxembourg, Bolivia, Brazil, Chile, Ecuador, France, Germany, the Netherlands, Peru, the United States and the Bolivarian Republic of Venezuela.
    1990 Belgium and Luxembourg, Bolivia, Brazil, Chile, France, the Netherlands, Paraguay, Peru, the United States and the Bolivarian Republic of Venezuela.
    1991 Belgium and Luxembourg, Brazil, Chile, Ecuador, France, Germany, the Netherlands, Paraguay, the United States and the Bolivarian Republic of Venezuela.

- **Stock**
  Data prior to 1991 are estimated by subtracting flows from the stock of 1991. 1991-2013 are from the national institution.
  - Availability of all FDI flows and stock components:
    - Inward stock from 1991.
    - Not available for outward stock.

- **Armenia**
  - National institution reporting FDI:
    - National Statistical Service
  - Data source used in the report:
    - Inflows
      - The national institution mentioned.
    - Outflows
      - Note: Proxy is based on investments reported by the following economies:
        1997 France.
        1999 Bulgaria and Kazakhstan.
        2000 Kazakhstan.
- **Inward stock**
  Data prior to 1997 are estimated by subtracting inflows from the stock of 1997. 1997-2013 data are from the national institution.

- **Outward stock**
  Data prior to 1998 are estimated by subtracting outflows from the stock of 1998. Since 1998 data are from the national institution.

- **Availability of all FDI flows and stock components:**
  - Inward stock from 1997.

- **Aruba**
  - National institution reporting FDI: Centrale Bank van Aruba
  - Data source used in the report:
    - **Inflows**
      Proxy for 1987-1988 based on investments reported by the Netherlands, OECD for 1989 and the national institution mentioned above thereafter.
    - **Outflows**
      *Note:* Proxy is based on investments reported by the following economies:
      - 1989 Belgium and Luxembourg.

- **Azerbaijan**
  - National institution reporting FDI: Central Bank of Azerbaijan
  - Data source used in the report:
    - **Inflows**
      EBRD for 1993 and the national institution mentioned above thereafter.
    - **Outflows**
      Proxy based on investments reported by Germany for 1996. IMF for 1997 and the national institution thereafter.

  - Inward stock
    The national institution.

  - Outward stock
    Data prior to 2000 are estimated by accumulating outflows from 1996. 2000-2013 data are from the national institution.

  - Availability of all FDI flows and stock components:

- **Australia**
  - Reporting system used:
    - Surveys.
  - Valuation system used:
    - Current price.
  - Data source used in the report:
    - The national institution mentioned above. Stock for 1980-1987 are on a fiscal year basis (as at June).

- **Bahamas**
  - National institution reporting FDI: Central Bank of the Bahamas
  - Reporting system used:
    - International Transaction Reporting System (ITRS).
  - Valuation system used:
    - Current Price.
  - Data source used in the report:
    - **Inflows**
Notes:
- Reinvested earnings are currently included under Other Capital.
- After 1997, data were revised to include loans and repayments of loans between direct investors and their direct investment enterprises.

- **Outflows**
  Note: Proxy is based on investments reported by the following economies:
  1985 Belgium and Luxembourg and the United States.
  1988 Belgium and Luxembourg, France and the United States.

- **Inward stock**
  Estimated by accumulating inflows since 1980.

- **Outward stock**
  Estimated by accumulating outflows since 1998.

- Availability of all FDI flows and stock components:
  - Not available.

- **Bahrain**
  - National institution reporting FDI:
    - Central Bank of Bahrain
  - Reporting system used:
    - Surveys.
    Note: For the first time in 2004, after technical cooperation was given by the Economic and Social Commission for Western Asia (ESCWA) and UNCTAD, a survey on inward FDI was undertaken. Stock data from this survey were used.
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
      The national institution.
  - **Stock**
    Data prior to 1997 are estimated by subtracting flows from the stock of 1997. 1997-2013 are from the national institution.

- Availability of all FDI flows and stock components:
  - Inward flows from 1995.
  - Inward stock from 1997.
  - Outward flows and stock from 2000.

- **Barbados**
  - National institution reporting FDI:
    - Central Bank of Barbados
  - Reporting system used:
    - Surveys.
  - Valuation system used:
    - Book value.
  - Data source used in the report:
    - **Flows**
      The national institution mentioned above. 2013 data are estimated.
    - **Stock**
      1980-2002 and 2009-2011 are from the national institution. 2003-2008 are estimated by adding flows to the 2002 stock. 2012-2013 data are estimated by adding flows to the 2011 stock.

- Availability of all FDI flows and stock components:
  - Flows from 1980.
  - Stocks from 2009.
Belarus
- National institution reporting FDI:
  ○ National Bank of the Republic of Belarus (NBB).
- Reporting system used:
  ○ Surveys and Bilateral sources. Inflows are further complemented by data from the NBB’s Banking Supervision department report.
- Valuation system used:
  ○ Book value.
- Data source used in the report:
  ▪ Inflows
    The national institution mentioned above.
  ▪ Outflows
    Proxy for 1993-1996 and the national institution thereafter.
  Note: Proxy is based on investments reported by the following economies:
    1993 China and Germany.
    1994 China and France.
    1995 China.
    1996 Austria, Germany and Poland.
- Stock
  Data prior to 1996 are estimated by subtracting flows from the stock of 1996. 1996-2013 are from the national institution.
- Availability of all FDI flows and stock components:
  ▪ Inflows from 2000.
  ▪ Outflows from 2007.
  ▪ Inward stock from 2002.

Belgium
- National institution reporting FDI:
  ○ National Bank of Belgium.
- Reporting system used:
  ○ Flows: data on equity and other capital are based on ITRS whereas data on reinvested earnings are based on surveys.
  ○ Stock: data are accumulated flows of equity and other capital based on ITRS whereas data on reinvested earnings are based on surveys.
- Valuation system used:
  ○ Current price.
- Data source used in the report:
  The national institution mentioned above.
- Availability of all FDI flows and stock components:
  ▪ All components of FDI flows and stock are available for the reporting period.

Belize
- National institution reporting FDI:
  ○ Central Bank of Belize.
- Data source used in the report:
  ▪ Inflows
  ▪ Outflows
    The national institution.
  ▪ Inward stock
    Data prior to 2000 are estimated by accumulating inflows since 1970; 2000-2013 are from the national institution,
  ▪ Outward stock
    Data prior to 2000 are estimated by accumulating outflows since 1984; 2000-2013 are from the national institution.
- Availability of all FDI flows and stock components:

Benin, Burkina Faso, Côte d’Ivoire, Guinea-Bissau, Mali, Niger, Senegal and Togo
- National institution reporting FDI:
  ○ Banque Centrale de l’Afrique de l’Ouest (BCEAO).
- Data source used in the report:
  ▪ Inflows
  ▪ Outflows
Note: Proxy is based on investments reported by the following economies:
1990 and 1994 Belgium and Luxembourg and France.
Note: Proxy is based on investments reported by the following economies:
1988-1990 Belgium and Luxembourg.
Note: Proxy is based on investments reported by the following economies:
1986-1987 Belgium and Luxembourg.
1997 France and Germany.
1998 France.
Note: Proxy is based on investments reported by the following economies:
1987-1989 Belgium and Luxembourg.
1990 France.

- **Inward stock**
  1. Benin: Data prior to 1996 are estimated by subtracting inflows from the stock of 1996. 1996-1997 data are based on the IMF. 1998-2013 data are from the national institution.
  2. Burkina Faso: Data prior to 1999 are estimated by accumulating inflows since 1970. 1999-2013 data are from the national institution.
  3. Côte d’Ivoire: Data prior to 1998 are estimated by accumulating inflows since 1970. 1998-2013 data are from the national institution.
  5. Mali: Data prior to 1997 are estimated by subtracting inflows from the 1997 stock. 1997-1998 are based on the IMF. 1999-2013 data are from the national institution.

- **Outward stock**
  1. Benin: Data prior to 1998 are estimated by accumulating outflows since 1979. 1998-2013 data are from the national institution.
  2. Burkina Faso: Data prior to 1999 are estimated by accumulating outflows since 1974. 1999-2013 data are from the national institution.
  3. Côte d’Ivoire: Data prior to 1999 are estimated by accumulating outflows since 1974. 1999-2013 data are from the national institution.
  4. Guinea-Bissau: Data are from the national institution.

- Availability of all FDI flows and stock components:
• Stock from 1999.

6. **Niger:****
• Outflows for 1999-2012.
• Stock for 1999-2012.

7. **Senegal:**
• Inflows for 1980-2012.
• Outflows for 1982 and 1996-2012.
• Stock for 1999-2013.

8. **Togo:**
• Outflows for 1996-2012.
• Stock for 1999-2013.

**Bermuda**
- National institution reporting FDI:
  - Bermuda Government Department of Statistics
- Reporting system used:
  - ITRS.
- Valuation system used:
  - Current prices.
- Data source used in the report:
  - **Flows**
    The national institution mentioned above.
  - **Stock**
- Availability of all FDI flows and stock components:
  - From 2007.

**Bhutan**
- National institution reporting FDI:
  - Royal Monetary Authority of Bhutan
- Data source used in the report:
  - **Inflows**
    **Note:** Data from the national institution are on fiscal year basis.
  - **Outward FDI**
    Not available.
  - **Inward stock**
    Data prior to 2006 are estimated by accumulating inflows since 1974. 2006-2011 data are from the national institution. 2013 stock are estimated by adding 2013 flows to the 2012 stock.
- Availability of all FDI flows and stock components:
  - Inward FDI for 2006-2012.

**Bolivia, Plurinational State of**
- National institution reporting FDI:
  - Banco Central de Bolivia
- Reporting system used:
  - Surveys and central bank’s estimates.
  **Note:** From 2000 data on inflows are net values as the FDI survey has started the collection of information on disinvestment (capital withdrawal, equity sale to local investors and amortisation of intra-company loans).
- Valuation system used:
  - Book value.
- Data source used in the report:
  - **Flows and Inward stock**
    The national institution mentioned above.
  - **Outward stock**
    Data prior to 1997 are estimated by subtracting outflows from the stock of 1997, 1997-2013 data are from the national institution.
- Availability of all FDI flows and stock components:
  - Inflows from 1987.
  - Inward stock from 1997.

**Bosnia and Herzegovina**
- National institution reporting FDI:
  - Central Bank of Bosnia and Herzegovina
- Data source used in the report:
  - **Flows**
    The national institution mentioned above.
  - **Inward stock**
    Data prior to 2003 are estimated by subtracting inflows from the stock of 2003. 2003-2012 data are from the national institution. 2013 is estimated by adding flows to the 2012 stock.
  - **Outward stock**
    The national institution. 2013 is estimated by adding flows to the 2012 stock.
- Availability of all FDI flows and stock components:
METHODOLOGICAL NOTE

• Botswana
  - National institution reporting FDI:
    ○ Bank of Botswana
  - Data source used in the report:
    • Flows
      The national institution mentioned above.
    • FDI stock
      Data prior to 1990 are estimated by subtracting inflows from the stock of 1990. 1990-2013 data are from the national institution.
  - Availability of all FDI flows and stock components:
    • Outflows for 1993-2000.
    • Inward stock from 1996.
    • Outward stock from 1997.

• Brazil
  - National institution reporting FDI:
    ○ Banco do Brasil
  - Data source used in the report:
    • Flows
      The national institution mentioned above.
    • Inward stock
      The national institution.
    • Outward stock
      Data prior to 1998 are estimated by subtracting outflows from the stock of 1998. 1998-2013 data are from the national institution.
  - Availability of all FDI flows and stock components:
    • Inward stock from 1992.
    • Outward stock from 2001.

• British Virgin Islands
  - Data source used in the report:
    • Inflows
      Note: Proxy is based on investments reported by the following economies:
      1992 Brazil, France, Thailand, United States and the Bolivarian Republic of Venezuela.
      1993 Belgium and Luxembourg, Brazil, France, Thailand, the United States and the Bolivarian Republic of Venezuela.
      1994 Belgium and Luxembourg, Brazil, France, Germany, Kazakhstan and the United States.
      1995 Belgium and Luxembourg, Estonia, France, Germany, Kazakhstan and the United States.
      1996 Belgium and Luxembourg, Bulgaria, Estonia, France, Germany, Kazakhstan, Portugal and the United States.
      1997 Belgium and Luxembourg, Estonia, France, Germany, Kazakhstan, Malaysia, Portugal and the United States.
      1998 Belgium and Luxembourg, Croatia, Estonia, Germany, Hong Kong (China), Kazakhstan, Portugal and the United States.
      1999 Belgium and Luxembourg, Croatia, Czech Republic, Estonia, France, Hong Kong (China), Kazakhstan, Lithuania, New Zealand, Philippines and the United States.
      2000 Belgium and Luxembourg, Bulgaria, Croatia, Czech Republic, Estonia, France, Hong Kong (China), Kazakhstan, Latvia, Lithuania, New Zealand, Portugal, Sweden and the United States.
      2001 Belgium and Luxembourg, Brazil, Bulgaria, Croatia, Czech Republic, Estonia, France, Germany, Hong Kong (China), Kazakhstan, Latvia, Lithuania, Philippines, Portugal, Russian Federation and the United States.
      2002 Brazil, Bulgaria, Croatia, Cyprus, El Salvador, Estonia, France, Germany, Hong Kong (China), Iceland, Kazakhstan, Latvia, Lithuania, Portugal, Russian Federation and the United States.

- Curaçao
  - National institution reporting FDI:
    ○ Centrale Bank van Curacao en Sint Maarten
  - Data source used in the report:
      The national institution mentioned above.
  - Availability of all FDI flows and stock components:

- Cyprus
  - National institution reporting FDI:
    ○ Central Bank of Cyprus
  - Reporting system used:
    As of 1st January 2002, when the new reporting system was introduced, balance of payments statistics are being compiled on the basis of the BPM5 definition of residency whereby natural persons are considered to be residents when they reside (or intend to reside) for more than a year in a country, while legal entities are considered to be residents of a country when they have a physical presence in that country (e.g. operating through own office).
    In 2004, the Central Bank of Cyprus has estimated annual past data consistent with the BPM5 residency definition for the years 1995 to 2001. For the years from 1995 to 2001, annual data in line with the BPM5 presentation, but based on the old exchange control definition of residency, are available. As from 2001, quarterly data in line with the BPM5 methodology, based on the new definition of residency, are also available.
    Data on Flows are obtained from the settlement system, from the accounts and other reports submitted by the international business companies and from the returns submitted to the Banking Supervision and Regulation Division (concerning banks’ own investments); data on inward investment in real estate (purchases and sales) are collected from the Department of Land and Surveys. Data obtained from different sources are checked for consistency. Information on the initiation of an FDI relationship is obtained from the statistical declarations submitted by resident direct investors to the domestic banks and forwarded to the Central Bank of Cyprus (CBC) and the statistical declaration submitted by representatives (lawyers and accountants) of non-resident direct investors to the CBC.
    Concerning stock data, as of 2006, actual FDI stock data, both inward and outward, will be collected through the new comprehensive questionnaire for resident direct investors and resident direct investment. For the 2002 and 2005 data, a simple accumulation of flows supplemented by stock figures as shown in the annual accounts of FDI companies, were used to estimate FDI positions.
  - Data source used in the report:
    - Flows
      The national institution mentioned above.
    - Inward stock
      Data prior to 2002 are estimated by subtracting inflows from the stock of 2002. 2002-2013 data are from the national institution.
    - Outward stock
      Data prior to 2002 are estimated by accumulating outflows since 1985. 2002-2013 data are from the national institution.
  - Availability of all FDI flows and stock components:
    - Outflows from 1997.
    - Stock from 2002.

  - **Stock**
    - The national institution.

- Availability of all FDI flows and stock components:
  - **Inward stock** 2004-2013.

- **Hong Kong, China**
  - National institution reporting FDI:
    - Census and Statistics Department
  - Reporting system used:
    - Surveys.
  - Valuation system used:
    - Current price for flows.
    - Market value for stock.
      - **Note:** Data on inward stock are based on market value, in accordance with international standards and practices. Thus, the inward Stock for 1997 onwards are not directly comparable to that of previous years.
      - Figures before 1998 are not available. Individual figures may not add up exactly to the total due to rounding.
      - As from reference year 1998, inward direct investment statistics have been enhanced in coverage in accordance with international standards and practices and they are valued at market value. The inward direct investment stock for 1997 (i.e. beginning of 1998) and 1998 presented in this table are therefore not directly comparable to previously released figures.

- Data source used in the report:
  - **Inflows**
    - Data prior to 1998 are estimated using investment from major economies. Data are
from the national institution mentioned above thereafter.

- **Outflows**
  *Notes:*
  * 2007 data is preliminary.
  * Proxy is based on investments reported by the following economies:
    1997 China, Germany, Sweden and the United States.

- **Inward stock**
  Data prior to 1997 are estimated by subtracting inflows from the stock of 1997. 1997-2013 data are from the national institution.

- **Outward stock**
  Data prior to 1995 are estimated by subtracting outflows from the stock of 1995. 1995-2013 data are from the national institution.

- **Availability of all FDI flows and stock components:**
  * From 1998.

- **Hungary**
  - National institution reporting FDI:
    - Central Bank of Hungary (MNB)
  - Reporting system used:
    - Surveys.
  *Notes:
    * FDI statistics has been compiled on the basis of corporate questionnaires including reinvested earnings since 1999 and the MNB has estimated comparable data for the period 1995–1998. The estimation based on the corporate tax return database as well as publicly available information on enterprises quoted on the stock exchange for direct investment by non-residents in Hungary. For estimating stock data on direct investment by Hungarian residents abroad in the absence of other meaningful information, the Bank has used the aggregated settlements data.
    * As announced in the MNB’s press release of June 30, a methodological change was introduced in the recording and publishing of data on FDI flows and stock. As of 2006, the MNB data series present in addition statistics on SPEs.

- **India**
  - National institution reporting FDI:
    - Reserve Bank of India

  - 1981: Brazil.
  - 1982: Brazil and the United States.
  - 1984: Brazil, United States and the Bolivarian Republic of Venezuela.
  - 1985-1986: Belgium and Luxembourg, Brazil, United States and the Bolivarian Republic of Venezuela.
  - 1987: Belgium and Luxembourg, Brazil and the United States.
  - 1992: Belgium and Luxembourg, Brazil, China, France, Malaysia, Tunisia and the United States.
  - 1993: Belgium and Luxembourg, Brazil, France, Malaysia and the United States.
  - 1996: Belgium and Luxembourg, France, Malaysia and the United States.
- **Inward stock**
- **Outward stock**
  - Data prior to 1998 are estimated by accumulating outflows since 1982. Data for 1998-2012 are from the national institution. 2013 is estimated by adding flows to the 2012 stock.
- **Availability of all FDI flows and stock components**:
  - Not available.

### Lesotho
- National institution reporting FDI:
  - Central Bank of Lesotho
- Data source used in the report:
  - **Inflows**
    - **Note**: Investment in the Lesotho Highland Water Project is excluded from its FDI statistics as they are not considered as foreign investment by UNCTAD. Investment in this project is reported as “other capital” by the Central Bank of Lesotho and the IMF.
  - **Outflows**
- **Inward stock**
  - Data prior to 2000 are estimated by accumulating inflows since 1977. Data for 2000-2013 are from the national institution.
- **Outward stock**
  - Data prior to 2000 are estimated by accumulating outflows since 1988. Data for 2000-2013 are from the national institution.
  - **Availability of all FDI flows and stock components**:
    - Inflows from 2005.
    - Inward stock from 2010.

### Liberia
- National institution reporting FDI:
  - Central Bank of Liberia
- Data source used in the report:
  - **Inflows**
  - **Outflows**
    - **Note**: Proxy is based on investments reported by the following economies:
      - 1992-1993: Belgium and Luxembourg, Brazil, China, France and the United States.
      - 1994: Belgium and Luxembourg, Brazil, China, France, Malaysia, Pakistan and the United States.
1995 Belgium and Luxembourg, China, France, Germany, Malaysia and the United States
1996 France, Germany, Malaysia, Portugal and the United States
1997 Belgium and Luxembourg, France, Portugal and the United States

- **Inward stock**
  Data prior to 2008 are estimated by accumulating inflows since 1970. Data for 2008-2010 and 2012-2013 are from the national institution. 2011 is estimated by adding flows to 2010 stock.

- **Outward stock**
  Data prior to 1998 are proxy. Data for 1998-2010 and 2012-2013 are from the national institution. 2011 is estimated by adding flows to 2010 stock.

  **Note:** Proxy is based on investments reported by the following economies:
  - 1994 Chile, Colombia, Indonesia, the United States and Venezuela.
  - 1995 Brazil, Chile, Colombia, Indonesia, United States, Venezuela.
  - 1996 Chile, Colombia, Indonesia, Portugal, the United States and Venezuela.
  - 1997 Chile, Colombia, Portugal, the United States and Venezuela.

- Availability of all FDI flows and stock components:

- **Libya**
  - National institution reporting FDI:
    - Central Bank of Libya
  - Reporting system used:
    - Surveys.
  - Valuation system used:
    - Current prices.
  - Data source used in the report:
    - **Flows**
      The national institution mentioned above.
    - **FDI stock**
      Data prior to 1986 are estimated by subtracting flows from the stock of 1986. 1986-1988 data are based on the IMF. 1989-1999 data are estimated by adding flows to the stock. National source for 2000-2013.
  - Availability of all FDI flows and stock components:
    - Not available.

- **Lithuania**
  - National institution reporting FDI:
    - Bank of Lithuania
  - Reporting system used:
    - Surveys.
  - Valuation system used:
    - Market price for listed companies and book value for non-listed companies.
  - Data source used in the report:
    - The national institution mentioned above.
  - Availability of all FDI flows and stock components:
    - Stock from 1996.

- **Luxembourg**
  - National institution reporting FDI:
    - Service Central de la Statistique et des Etudes Economique du Luxembourg (STATEC)
    - Banque Centrale du Luxembourg
  - Reporting system used:

- **New Zealand**
  - National institution reporting FDI:
    - Statistics New Zealand
  - Reporting system used:
    - **Surveys**
      Notes: * Up to 1999 the annual data are as at March and as at December thereafter.  
      * Flows for 2000 is exceptional. New Zealand Statistics derived the data by adding the last 3 quarters of the calendar year 2000 to the estimated first quarter (estimated by dividing by 4 year 1999 and 2000 as at March)  
      * Total inflows for 2001 and total outflows for 2000 and 2001 have been suppressed for
confidentiality reasons by New Zealand Statistics.

- Valuation system used:
  - Market prices.

Notes:
* Where financial instruments are denominated in a foreign currency, they are converted at spot exchange rates.
* The time of ownership change are the basis of recording financial transactions and stock.
* Transactions are recorded on an accrual basis. This requires that some items, representing the difference between the accrual and cash record, have to be recorded as components of the financial account. For example, income in the current account is recorded when earned. The difference between income earned and cash settlement when payment becomes due is included in the accounts as a net financial transaction in the underlying instrument. Similarly, the prepaid premiums and unpaid claims on insurance (i.e. the difference between premiums earned and claims payable on the one hand and premium and claim payments on the other) should be recorded as financial transactions. Every effort is made in data collections to adhere to these principles, and data in the financial account and the IIP are considered to approximate them.

- Data source and used in the report:
  - Flows
    The national institution mentioned above.
  - Inward stock
  - Outward stock
    Data prior to 1992 are estimated by subtracting outflows from the stock of 1992. 1992 data is based on the IMF. 1993-2013 data are from the national institution.

- Availability of all FDI flows and stock components:

      Proxy and estimates for 2012-2013.  
      Note: Proxy is based on investments reported by the following economies:  
        1996 Portugal.  

  - Valuation system used:  
    ○ Current price for flows.  
    ○ Book value for stock.  
  - Data source used in the report:  

• Norway  
  - National institution reporting FDI:  
    ○ Statistics Norway  
  - Reporting system used:  
    ○ ITRS for flows.  
    ○ Surveys for inward stock.  
  - Administrative sources for outward stock.  
    Notes: The outward FDI position statistics reported by Statistics Norway is a continuation of Norges Bank’s statistics from 1988 to 2000 and replaces previous estimates for the years 1999, 2000, 2001 and 2002. The major upward shift in stock position is due to new methods, from 1997 to 1998. The figures presented are based on data from the Directorate of Taxes. Until the publishing in 2006, the figures on stock of direct investments abroad (the special statistics) included both direct and indirect equity in the investment objects. Since the publishing in 2007, the equity has been limited to directly owned/associated enterprises. Other capital (mainly loans), however, still includes all direct relations between Norwegian investors and directly and indirectly owned/associated enterprises abroad. However, the source for other capital is now Reporting balance of payments data (BoP reporting) instead of the separate collection of data for direct investments. This has resulted in the scope of other capital being extended to include loans between fellow companies. All of these changes have been dated back to 1998. There were therefore major revisions for the figures during the period 1998-2006. The changes also mean that there will be consistency in the methodology between the stock statistics on Norwegian direct investments abroad and foreign direct investments in Norway. Figures for households’ investment in holiday homes have been calculated and included.”  

  - Valuation system used:  
    ○ Current price for flows.  
    ○ Book value for stock.  
  - Data source used in the report:
- **Flows**
  IMF for 1980 and the national institutions mentioned above thereafter.

- **Inward stock**
  Data prior to 1987 are estimated by subtracting inflows from the stock of 1987. 1987-2012 data are from the national institution. 2013 is estimated by adding flows to the 2012 stock.

- **Outward stock**

- Availability of all FDI flows and stock components:
  - Stock for 1990-2012.

- **Oman**
  - National institution reporting FDI:
    - Central Bank of Oman
  - Reporting system used:
    - Surveys.
  - Notes:
    - * For the first time in 2004, after technical cooperation was given by the Economic and Social Commission for Western Asia (ESCWA) and UNCTAD, a survey on inward FDI was undertaken.
    - * A survey of the foreign investments enterprises has been undertaken jointly by Ministry of national Economy, Ministry of Commerce and Industry and the Central Bank of Oman.

- Data source used in the report:
  - **Inflows**
  - **Outflows**
    The national institution.
  - **Inward stock**
    Data prior to 2002 are estimated by accumulating inflows since 1970. Data are from the national institution thereafter.
  - **Outward stock**
    The national institution.

- Availability of all FDI flows and stock components:
  - Not available.

- **Pakistan**
  - National institution reporting FDI:
    - State Bank of Pakistan
  - Reporting system used:
    - ITRS.

- Data source used in the report:
  - **Inflows**
  - **Outflows**
    IMF for 1984 and the national institution thereafter.
  - **Stock**
    The national institution.

- Availability of all FDI flows and stock components:
  - Inflows from 1993-2013.
  - Outward stock from 2008.

- **Palau**
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
      The national institution.

- Availability of all FDI flows and stock components:
  - Not available.

- **Panama**
  - National institution reporting FDI:
    - Instituto Nacional de Estadística y Censo
  - Data source used in the report:
    - **Inflows**
- **Outflows**
  IMF for 2005-2009 and the national institution thereafter.

- **Inward stock**
  Data prior to 1990 are estimated by subtracting flows from 1990 stock. Data for 1995-2000 are based on the IMF. Data for 1990-1994 and 2001-2013 are from the national institution.

- **Outward stock**
  The national institution.

- Availability of all FDI flows and stock components:
  - Inflows from 1980.
  - Inward stock from 2000.

- **Papua New Guinea**
  - National institution reporting FDI:
    - Bank of Papua New Guinea
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
      
      **Note:** Proxy is based on investments reported by the following economies:
      - 1995: Australia, Chile, China, Fiji, Malaysia and New Zealand.
      - 1996: Australia, Malaysia and New Zealand.
    - **Inward stock**
      Data prior to 1995 are estimated by accumulating inflows since 1970. Data are from the national institution thereafter.
    - **Outward stock**
      Data prior to 1995 are estimated by subtracting outflows from the stock of 1995. 1995-2012 data are from the national institution. 2013 is estimated by adding flows to the 2012 stock..

- **Peru**
  - National institution reporting FDI:
    - Banco Central de Reserva del Perú
  - Data source used in the report:
    - **Flows**
      The national institution mentioned above.
    - **Inward stock**
      The national institution. 2012-2013 are estimated by adding flows to the 2011 stock.
    - **Outward stock**
      The national institution. 2013 is estimated by adding flows to the 2012 stock.

- **Philippines**
  - National institution reporting FDI:
    - Bangko Sentral ng Pilipinas
  - Reporting system used:
    - ITRS serves as the primary database on the placement and withdrawal of investment in equity capital (including the purchase and sale of condominiums)
with funds coursed through the banking system.

- Cross Border Transactions Survey complements ITRS as it captures those transactions coursed through banks abroad and inter-company accounts, both of which are missed out in the ITRS.
- BSP Investment Registration Records serve as the database for non-cash transactions such as technical fees, equipment and debt that are converted to equity. Registration with the BSP of both cash and non-cash investment is optional and the incentive to register lies in the assurance from the banking system of the availability of foreign exchange for repatriation of profit and dividend and capital withdrawal.
- External Debt Statistics serve as the database for inter-company borrowings. The data collection functions under a debt registration system similar to registration of investment. Debt registration is also optional and offers the same incentive as the investment registration system.
- Banking Statistics data source for all investment-related transactions of banks.
- Other administrative records - e.g., financial statements and balance sheets, news articles.

Notes: The 5th edition of the Balance of Payments Manual (BPM5) was adopted in 2000 covering data starting 1999. There is a difference in coverage of data on direct investment flows from 1999 onwards compared to those of prior years. In particular, the change in coverage pertains to inter-company loans. From 1999 onwards, direct investment flows include intra-company loans under the “other capital” component of direct investment, as spelled out in the BPM5 manual. Previously, intra-company loans were not part of direct investment but classified under the medium-and long-term loan accounts. However, data for 2011 and 2012 are now based on the Balance of Payments and International Investment Position Manual, 6th edition (BPM6) which was adopted last March 2013.

FDI stock data started only in 2002 when the Bangko Sentral ng Pilipinas (BSP) compiled the international investment position statistics in compliance with the Special Data Dissemination Standard (SDDS) requirement of the IMF.

Valuation system used:

- Valuation is a mixture of market price and historical cost depending on the source. Cash transactions based on ITRS are likely to reflect market price while non-cash transactions are likely valued at historical cost particularly machinery and equipment converted to equity.

- Data source used in the report:
  - Flows
    The national institution mentioned above.
  - Inward stock
    Data prior to 2001 are estimated by accumulating flows since 1973. Data are from the national institution thereafter. 2013 is estimated by adding flows to the 2012 stock.
  - Outward stock
    Data prior to 2001 are estimated by accumulating flows since 1980. Data are from the national institution thereafter. 2013 is estimated by adding flows to the 2012 stock.

- Availability of all FDI flows and stock components:
  - Inflows from 1999.
  - Outflows from 2011.
  - Inward stock for 2001-2012.
  - Outward stock from 2011.

- Poland
  - National institution reporting FDI:
    - National Bank of Poland
  - Data source used in the report:
    - Inflows
    - Outflows
    - Inward stock
      The national institution.
    - Outward stock
      Data prior to 1991 are estimated by subtracting outflows from the stock of 1992. Data are from the national institution thereafter.

- Availability of all FDI flows and stock components:
  - Inflows from 1991.
  - Outflows from 1996.
  - Outward stock from 1996.
• Portugal
  - National institution reporting FDI:
    ○ Banco de Portugal
  - Reporting system used:
    ○ ITRS and surveys for flows.
    ○ Surveys for Stock.
  - Valuation system used:
    ○ Current price for flows.
    ○ Market value for stock.
  - Data source used in the report:
    ▪ Flows
      The national institution mentioned above.
    ▪ Stock
      Data prior to 1990 are estimated by subtracting flows from the stock of 1990. Data are from the national institution thereafter.
  - Availability of all FDI flows and stock components:
    • Flows from 1980.
    • Stock from 1995.

• Qatar
  - Data sources used in the report:
    ▪ Inflows
    ▪ Outflows
      Proxy and estimates until 2007; the national institution for 2008-2013.
  - Note: Proxy is based on investments reported by the following economies:
    1986 Belgium and Luxembourg and Pakistan.
    1988 Belgium and Luxembourg, France, Pakistan and the United States.
    1989 Belgium and Luxembourg, France, Pakistan and Tunisia.
    1990 Belgium and Luxembourg, France, Pakistan, Thailand and Tunisia.
    1991 Pakistan and Tunisia.
    1992 Belgium and Luxembourg, Pakistan and Tunisia.
    1993 France and Pakistan.
    1994 Belgium and Luxembourg, France and Pakistan.
    1998 Algeria, Pakistan and the United States.
    2001 Algeria, Brazil, France, Pakistan and the United States.
    2002 France, Pakistan and the United States.
    2003 France, Germany, Morocco, Pakistan, Saudi Arabia and the United States.
  - Inward stock
    Data prior to 2008 are estimated by accumulating inflows since 1970. Data are from the national institution for 2008-2009. Data after 2009 are estimated by adding flows to 2009 stock.
  - Outward stock
    Data prior to 2008 are estimated by accumulating flows since 1995. Data are from the national institution for 2008-2009. Data after 2009 are estimated by adding flows to 2009 stock.
  - Availability of all FDI flows and stock components:
    • Not available.

• Reunion
  - Data source used in the report:
    ▪ Inflows
      Proxy.
      Note: Proxy is based on investments reported by the following economies:
        1990 and
        1991 Sweden.
        1992, 1998 and
        2001-2002 Mauritius.
        1999 Belgium and Luxembourg and Mauritius.
    ▪ Outflows and FDI stock
      Not available.
  - Availability of all FDI flows and stock components:
    • Not available.

• Romania
  - National institution reporting FDI:
    ○ National Bank of Romania
  - Reporting system used:
    ○ Surveys for inflows and outward stock.
    ○ ITRS for outflows.
    ○ ITRS and administrative sources for inward stock.

    - Banque Nationale du Rwanda
  - Data source used in the report:
    - Inflows
    - Outflows
      - The national institution mentioned.
    - Inward stock
      - Data prior to 1998 are estimated by subtracting inflows from the stock of 1998. Data are from the national institution thereafter.
    - Outward stock
      - Data are from the national institution.
  - Availability of all FDI flows and stock components:

- **Saint Helena**
  - Data source used in the report:
    - Inflows
      - OECD.

- **Samoa**
  - National institution reporting FDI:
    - Central Bank of Samoa
  - Data source used in the report:
    - Inflows
    - Outflows
      - The national institution.
    - Inward stock
      - Data prior to 2000 are estimated by accumulating inflows since 1970. Data are from; national institution thereafter.
    - Outward stock
      - National institution.
  - Availability of all FDI flows and stock components:
    - Inflows for 2013.

- **São Tomé and Príncipe**
  - National institution reporting FDI:
    - Banco Central de São Tomé e Príncipe
  - Data source used in the report:
    - Inflows
    - Outflows
      - The national institution for 2005-2011.
    - Inward stock
      - Estimated by accumulating inflows since 1987.
    - Outward stock
      - Not available.
  - Availability of all FDI flows and stock components:
    - Not available.

- **Saudi Arabia**
  - National institutions reporting FDI:
    - Saudi Arabian General Investment Authority (SAGIA); Saudi Arabia Monetary Agency

- Outflows and FDI stock
  - Not available.
- Reporting system used:
  - Surveys.
    - Note: * For the first time in 2004, after technical cooperation was given by the Economic and Social Commission for Western Asia (ESCWA) and UNCTAD, a survey on inward FDI was undertaken. Stock data from this survey were used.
    - ** Data for 2008 were expanded to include GCC countries which was not captured in the past.

- Data source used in the report:
  - Inflows
  - Outflows
    - Note: Proxy is based on investments reported by the following economies:
      - 1984 Brazil, the Netherlands, Thailand and the United States.
      - 1985 Belgium and Luxembourg, Brazil, the Netherlands, Pakistan, Thailand and the United States.
      - 1986-1988 Belgium and Luxembourg, Brazil, France, the Netherlands, Pakistan, Thailand and the United States.
      - 1989-1990 Belgium and Luxembourg, France, the Netherlands, Pakistan, Thailand, Tunisia and the United States.
      - 1991-1992 Belgium and Luxembourg, France, Malaysia, the Netherlands, Pakistan, Thailand, Tunisia and the United States.
      - 1993 Belgium and Luxembourg, France, Malaysia, the Netherlands, Pakistan, Sweden, Tunisia, Turkey and the United States.
      - 1994 Belgium and Luxembourg, France, Kazakhstan, Malaysia, the Netherlands, Pakistan, Sweden, Tunisia and the United States.
      - 1995 Azerbaijan, Belgium and Luxembourg, France, Japan, Kazakhstan, Malaysia, the Netherlands, Pakistan, Sweden, Tunisia and the United States.
      - 1996 Azerbaijan, Belgium and Luxembourg, France, Japan, Kazakhstan, Malaysia, the Netherlands, Pakistan, Sweden, Tunisia and the United States.
      - 1997 Azerbaijan, France, Japan, Kazakhstan, Malaysia, Morocco, the Netherlands, Pakistan, Sweden, Tunisia and the United States.
      - 1998 Azerbaijan, Belgium and Luxembourg, France, Japan, Kazakhstan, Malaysia, Morocco, the Netherlands, Pakistan, Sweden, Tunisia and the United States.
      - 1999 Azerbaijan, Belgium and Luxembourg, France, Japan, Kazakhstan, Malaysia, Morocco, the Netherlands, Pakistan, Sweden, Tunisia and the United States.

- Inward stock
  - Data prior to 1998 are estimated by subtracting flows from the 1998 stock.
  - 1998-2006 data are from the national institutions. 2007-2012 data are from IMF. 2013 is estimated by adding flows to the 2012 stock.

- Outward stock
  - Data prior to 2007 are based on the accumulation of outflows since 1980. 2007-2012 data are from IMF. 2013 is estimated by adding flows to the 2012 stock.

- Availability of all FDI flows and stock components:
  - Inward FDI from 2007.

- Serbia
  - National institution reporting FDI:
    - o National Bank of Serbia
  - Data source used in the report:
    - Flows
      - The national institution mentioned above.
    - Inward stock
      - Data prior to 2008 are estimated by accumulating inflows since 1997. Data are from the national institution thereafter.
    - Outward stock
      - The national institution.
  - Availability of all FDI flows and stock components:
    - FDI flows from 2007.
    - FDI stock from 2008.

- Seychelles
  - National institution reporting FDI:
    - o Central Bank of Seychelles
  - Reporting system used:
    - Administrative sources obtained from the Seychelles Investment Bureau (SIB) and enterprise surveys.
  - Valuation system used:
    - Book value is the adopted system. However, in some cases, current prices are used for companies that report in this system.
  - Data source used in the report:
    - Flows
    - Stock
      - Data prior to 1990 are estimated by subtracting flows from 1990 stock. Data are from the national institution thereafter.
- Availability of all FDI flows and stock components:
  - Inflows from 1993.

- Sierra Leone
- National institution reporting FDI:
  - Bank of Sierra Leone
- Data source used in the report:
  - Inflows
  - Outflows
    - Note: Proxy is based on investments reported by the following economies:
      - 1988 France
      - 1989 Belgium and Luxembourg and France
      - 1990 and 1992 Belgium and Luxembourg
      - 1993-1995 China
      - 1999 Czech Republic
  - Inward stock
    - Data prior to 2004 are estimated by subtracting inflows from the stock of 2004. 2004 is from the national institution. 2005-2012 data are based on IMF. 2013 is estimated by adding flows to the 2012 stock.
  - Outward stock
    - Not available.

- Singapore
- National institution reporting FDI:
  - Singapore Department of Statistics
- Reporting system used:
  - Surveys and administrative sources for flows.
  - Surveys for stock.
- Notes:
  * Prior to 1998 inward stock comprise foreign direct equity investment (i.e. paid-up shares and reserves) only. From 1998 onwards, data incorporate net lending from foreign investors to their affiliates in Singapore.
  * Prior to 1990 outward stock comprise paid-up shares of overseas affiliates only. From 1990 onwards, data incorporate reserves of overseas affiliates attributable to their Singapore parent companies. With effect from 1994, data also includes net lending from Singapore companies to their overseas affiliates. The coverage of the survey was also extended to financial institutions (i.e. banks, finance and insurance companies) from 1994 onwards.
- Data source used in the report:

  - Data source used in the report:
    - The national institution mentioned above.
  - Availability of all FDI flows and stock components:
    - Stock from 1983.

• **Syrian Arab Republic**
  - National institution reporting FDI:
    - Central Bank of Syria
  - Reporting system used:
    - Surveys.
    - Note: For the first time in 2004, after technical cooperation was given by the Economic and Social Commission for Western Asia (ESCWA) and UNCTAD, a survey on inward FDI was undertaken. Stock data from this survey were used.
  - Data source used in the report:
    - Inflows
    - Outflows
        - Note: Proxy is based on investments reported by the following economies:
          - 1984 Germany.
          - 1993 France and the United States.
          - 1999 Morocco and Saudi Arabia.
          - 2003 Bulgaria, Cyprus, France, Romania and Saudi Arabia.
          - 2004-2005 Bulgaria, Cyprus, Morocco, Romania and Saudi Arabia.
    - Inward stock
      - Data prior to 2000 are estimated by subtracting inflows from the stock of 2000. 2000-2008 are from the national institution. 2009-2013 are estimated by adding flows to 2008 stock.

• **Taiwan Province of China**
  - National institution reporting FDI:
    - Central Bank of China
  - Reporting system used:
    - ITRS and administrative sources.
  - Valuation system used:
    - Current prices for flows.
    - Book value and Current price for stock.
    - Note: * Because the following invested targets are calculated differently, inward stock for (a) listed companies is based on market value and (b) unlisted companies is based on the net worth.
  - Data source used in the report:
    - Flows
      - The national institution mentioned above.
    - Inward stock
    - Outward stock
      - Data prior to 1998 are estimated by subtracting outflows from the stock of 1998. 1998-2012 are from the national institution. 2013 is estimated by adding flows to the 2012 stock.
  - Availability of all FDI flows and stock components:
    - Inflows from 1984.
    - Outflows from 1989.
    - Stock from 2000.

• **Tajikistan**
  - National institution reporting FDI:
    - National Bank of Tajikistan
  - Data source used in the report:
    - Flows
    - Outward FDI
      - Not available.
Inward stock
Data prior to 1999 are estimated by accumulating inflows since 1992. Data are from the national institution thereafter.

- Availability of all FDI flows and stock components:
  • Inward stock from 2005.

Thailand
- National institution reporting FDI:
  ○ Bank of Thailand
- Data source used in the report:
  • Flows
    The national institution mentioned above.
  • Stock
    The national institution. 2013 is estimated by adding flows to the 2012 stock.
- Availability of all FDI flows and stock components:
  • Stock for 2000-2012.

The Former Yugoslav Republic of Macedonia
- National institution reporting FDI:
  ○ National Bank of the Republic of Macedonia
- Data source used in the report:
  • Flows
    The national institution mentioned above.
  • Inward stock
    Data prior to 1997 are estimated by subtracting inflows from the stock of 1997. 1997-2013 data are from the national institution.
  • Outward stock
    The national institution
- Availability of all FDI flows and stock components:
  • Inflows and inward stock from 1997.
  • Outward stock from 1998.

Timor-Leste
- National institution reporting FDI:
  ○ Central Bank Timor-Leste
- Data source used in the report:
  • Inflows
  • Outward FDI
    The national institution.
  • Inward stock
    Data prior to 2007 are estimated by subtracting inflows from 2007 stock. Data are from the national institution thereafter.
- Availability of all FDI flows and stock components:
  • Not available.

Tonga
- National institution reporting FDI:
  ○ Tonga Department of Statistics
- Data source used in the report:
  • Inflows
  • Outflows
  • Inward stock
    Estimated by accumulating inflows since 1977.
  • Outward stock
    Not available.
- Availability of all FDI flows and stock components:
  • Not available.

Trinidad and Tobago
- National institution reporting FDI:
  ○ Central Bank of Trinidad and Tobago
- Data source used in the report:
  • Inflows
    The national institution mentioned above.
  • Outflows
  • Inward stock
    Estimated by accumulating inflows since 1970.
  • Outward stock
    Estimated by accumulating outflows since 1983.
- Availability of all FDI flows and stock components:
• **Tunisia**
  - National institution reporting FDI:
    ○ Banque Centrale de Tunisie
  - Data source used in the report:
    ○ The national institution mentioned above.
  - Availability of all FDI flows and stock components:

• **Turkey**
  - National institution reporting FDI:
    ○ Central Bank of the Republic of Turkey
  - Reporting system used:
    ○ ITRS for flows - reinvested earnings are obtained through surveys.
    ○ Surveys for inward stock.
    ○ Administrative sources for outward stock.
  - Data source used in the report:
    - Flows
      The national institution mentioned above.
    - Stock
      Data prior to 2000 are estimated by subtracting flows from the stock of 2000. Data are from the national institution thereafter.
  - Availability of all FDI flows and stock components:
    - Outward stock from 2009.

• **Turkmenistan**
  - Data source used in the report:
    - Inflows
      EBRD.
    - Outward FDI
      Not available.
    - Inward stock
      Estimated by accumulating inflows since 1993.
  - Availability of all FDI flows and stock components:
    - Not available.

• **Uganda**
  - National institution reporting FDI:
    ○ Bank of Uganda
  - Reporting system used:
    ○ Surveys.
  - Valuation system used:
    ○ Current prices.
  - Data source used in the report:
    - Inflows
    - Outflows
      The national institution.
    - Inward stock
      Data prior to 1999 are estimated accumulating inflows since 1970. Data are from the national institution thereafter.
    - Outward stock
      The national institution.
  - Availability of all FDI flows and stock components:
    - Inflows for 1997-2013.
    - Inward stock from 1999.

• **Ukraine**
  - National institution reporting FDI:
    ○ National Bank of Ukraine
  - Data source used in the report:
    ○ The national institution mentioned above.
  - Availability of all FDI flows and stock components:
    - Inward FDI from 2002.
    - Outward stock from 2004.
    - Outflows from 2005.

• **United Arab Emirates**
  - National institution reporting FDI:
    ○ National Bureau of Statistics
  - Data source used in the report:
    - Inflows
    - Outflows
      Note: Proxy is based on investments reported by the following economies:
        1988 Belgium and Luxembourg, France, Netherlands, Thailand and United States.
        1989 Belgium and Luxembourg, China, France, Netherlands, Thailand and the United States.
        1990 Belgium and Luxembourg, China, France, Thailand and United States.
        1991 Belgium and Luxembourg, France, Malaysia, Thailand and United States.
        1992 Belgium and Luxembourg, China, France, Malaysia, Thailand and the United States.
1993  Belgium and Luxembourg, China, France, Malaysia, Netherlands, Thailand and the United States.
1994  Belgium and Luxembourg, China, France, Malaysia, Netherlands, Saudi Arabia and the United States.
1995  Bangladesh, Belgium and Luxembourg, China, France, Japan, Malaysia, Pakistan, Portugal, Saudi Arabia and the United States.
1996  Azerbaijan, Bangladesh, Belgium and Luxembourg, France, Kazakhstan, Malaysia, Mauritius, Morocco, Netherlands, Pakistan, Portugal, Saudi Arabia and the United States.
1997  Azerbaijan, Bangladesh, Belgium and Luxembourg, France, Japan, Kazakhstan, Malaysia, Mauritius, Morocco, Netherlands, Pakistan, Portugal, Saudi Arabia and the United States.
1988  Azerbaijan, Bangladesh, Belgium and Luxembourg, France, Japan, Kazakhstan, Malaysia, Mauritius, Morocco, Netherlands, Pakistan, Portugal, Saudi Arabia and the United States.

- **Inward stock**
  Data prior to 2008 are estimated by accumulating inflows since 1970. Data are from the national institution thereafter.

- **Outward stock**
  Data prior to 2008 are estimated by accumulating outflows since 1980. Data are from the national institution thereafter. 2013 is estimated by adding flows to the 2012 stock.

- **Availability of all FDI flows and stock components:**

- **United Kingdom**
  - National institution reporting FDI:
    - Office for National Statistics
  - Data source used in the report:
    - Inflows
    - Outflows and Stock
      The national institution.
  - Availability of all FDI flows and stock components:
    - Inflows from 1984.
    - Outflows from 1990.
    - Stock from 1993.

- **United Republic of Tanzania**
  - National institution reporting FDI:
    - Bank of Tanzania
  - Data source used in the report:

- **Inflows**

- **Outflows**
  Proxies.
  Note: Proxy is based on investments reported by the following economies:
  - 1994  Belgium and Luxembourg and China.
  - 1996  Belgium and Luxembourg.
  - 1997  France and Germany.
  - 2001  Australia and Germany.
  - 2002  Sweden.

- **Inward stock**
  Data prior to 1995 are estimated by subtracting inflows from the stock of 1995. Data are from the national institution thereafter.

- **Outward stock**
  Not available.

- **Availability of all FDI flows and stock components:**

- **United States**
  - National institution reporting FDI:
    - Bureau of Economic Analysis, United States Department of Commerce
  - Reporting system used:
    - Surveys.
  - Valuation system used:
    - Data on FDI used in this Report do not include current cost adjustments, in other words they are on a historical-cost basis.
  - The Bureau of Economic Analysis prepares estimates of the positions that are valued on three bases—historical cost, current cost, and market value. Unlike the positions on a current-cost and market-value basis, the historical-cost position is not ordinarily adjusted to account for changes in the replacement cost of the tangible assets of affiliates or in the market value of foreign parent companies’ equity in United States’ affiliates. Here we report the market-value.
  - Data source used in the report:
    - The national institution mentioned above.
  - Availability of all FDI flows and stock components:
    - Flows from 1980.
• **Uruguay**
  - National institution reporting FDI:
    • Banco Central del Uruguay
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
    - **Inward stock**
      Data prior to 1998 are estimated by subtracting inflows from the stock of 1999. 1999-2012 data are from the national institution. 2013 is estimated by adding flows to the 2012 stock.
    - **Outward stock**
      Data prior to 1996 are estimated by subtracting outflows from the stock of 1996. 1996-2012 data are from the national institution. 2013 is estimated by adding flows to the 2012 stock.
  - Availability of all FDI flows and stock components:
    • Flows for 1997-2012.

• **Uzbekistan**
  - Data source used in the report:
    - **Inflows**
      EBRD.
    - **Outward FDI**
      Not available.
    - **Inward stock**
      Estimated by accumulating inflows since 1992.
  - Availability of all FDI flows and stock components:
    • Not available.

• **Vanuatu**
  - National institution reporting FDI:
    • Reserve Bank of Vanuatu
  - Data source used in the report:
    - **Inflows**
    - **Outward FDI**
      The national institution.

• **Inward stock**
  - Data prior to 2002 are estimated by subtracting inflows from the stock of 2002. Data are from the national institution thereafter.

• **Venezuela, Bolivarian Republic of**
  - National institution reporting FDI:
    • Banco Central de Venezuela
  - Data source used in the report:
    - **Inward FDI**
      The national institution mentioned above.
    - **Outflows**
    - **Stock**
      The national institution.
  - Availability of all FDI flows and stock components:
    • Flows from 1994.
    • Inward stock from 1997.
    • Outward stock from 1996.

• **Viet Nam**
  - National institution reporting FDI:
    • State Bank of Viet Nam
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
    - **Inward stock**
      Data prior to 1995 are estimated by subtracting inflows from the stock of 1995. Data are from the national institution thereafter.
METHODOLOGICAL NOTE

- **Outward stock**
  Not available

- **Availability of all FDI flows and stock components:**
  - Not available.

- **Yemen**
  - National institution reporting FDI:
    ○ Central Bank of Yemen
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
      *Note:* Proxy is based on investments reported by the following economies:
      1993 Belgium and Luxembourg.
      1995 France.
      2004 Romania and Saudi Arabia.
  - **Inward stock**
    Data prior to 1990 are estimated by subtracting inflows from the stock of 1990. 1990-1997 data are from the national institution, 1998-2007 data are based on the IMF. 2008-2013 are estimated by adding inflows to the 2007 stock.
  - **Outward stock**
    Estimated by accumulating outflows since 1982.

- **Availability of all FDI flows and stock components:**
  - Inflows for 2010-2011.

- **Zimbabwe**
  - National institution reporting FDI:
    ○ Reserve Bank of Zimbabwe
  - Data source used in the report:
    - **Inflows**
      The national institution mentioned above.
    - **Outward FDI**
      The national institution.

  - **Availability of all FDI flows and stock components:**
    - Inflows from 2000.
    - Outflows from 2007
    - Stocks from 2006.

- **Memorandum:**
  - **Belgium and Luxembourg**
    - National institution reporting FDI:
    - National Bank of Belgium
    - *Note:* Up to 2001, the Belgium National Bank reported FDI data for the Belgium and Luxembourg Economic Union. As of 2002, this economic union is no longer in effect. Consequently, FDI data are reported separately by the respective national authorities. Therefore, data for 2002 onwards are not comparable to the combined flows as reported in previous years because of different methodologies.
    - **Inward stock**
      Data prior to 2001 are estimated by accumulating inflows since 1970. Data are from the national institution thereafter.
    - **Outward stock**
      Data prior to 2001 are estimated by accumulating outflows since 1983. Data are from the national institution thereafter.

  - **Zambia**
    - National institution reporting FDI:
      ○ Reserve Bank of Zambia
    - Data source used in the report:
      - **Inflows**
    - **Outward FDI**
      The national institution.

  - **Inward stock**
    Data prior to 2006 are estimated by subtracting inflows from the stock of 2006. Data are from the national institution thereafter.

  - **Availability of all FDI flows and stock components:**
    - Inflows from 2000.
    - Outflows from 2007
    - Stocks from 2006.
• Outward stock
  - Availability of all FDI flows and stock components:

• Netherlands Antilles (This economy dissolved on 10 October 2010)
  - National institution reporting FDI:
    ○ Bank van de Nederlandse Antillen
  - Data source used in the report:
    • Flows
    • Inward stock
      Prior to 1998, estimated by accumulating inflows since 1970; national institution thereafter.
    • Outward stock
      Prior to 1998, estimated by accumulating outflows since 1976; national institution thereafter.
  - Availability of all FDI flows and stock components:

• Outflows for 1993-2006.

• Serbia and Montenegro
  - National institution reporting FDI:
    Note: Up until the establishment of the Central Bank of Montenegro, March 15, 2001, the National Bank of Serbia reported FDI statistics for the State Union of Serbia and Montenegro. From 2002, the two central banks started reporting separate FDI statistics. Now FDI statistics for Serbia and Montenegro are calculated as the sum of data for Serbia, obtained from the National Bank of Serbia, and for Montenegro, obtained from the Central Bank of Montenegro. The state union effectively came to an end after Montenegro’s formal declaration of independence on June 3, 2006 and Serbia’s formal declaration of independence on June 5.
  - Data source used in the report:
    ○ The national institutions mentioned above.
  - Availability of all FDI flows and stock components:
    • Not available.
D. Data revisions and updates

All FDI data and estimates in *WIR* are continuously revised. Because of ongoing revisions, FDI data reported in *WIR14* may differ from those reported in earlier Reports or other publications of UNCTAD or any other international or regional organizations. In particular, recent FDI data are being revised in many economies according to the fifth edition of the *Balance of Payments Manual of the IMF* and in some cases, according to the sixth edition. Because of this, the data reported in last year’s Report may be completely or partly changed in this Report.

E. Data verification

In compiling data for this year’s Report, requests were made to national official sources of all economies for verification and confirmation of the latest data revisions and accuracy. In addition, websites of national official sources were consulted. This verification process continued until 27 May 2014. Any revisions made after this process may not be reflected in the Report. Below is a list of economies for which data were checked using either of these methods. For the economies which are not mentioned below, the UNCTAD secretariat could not have the data verified or confirmed by their respective governments.

F. Definitions and sources of the data in the UNCTAD website (www.unctad.org/wir) and the WIR-CD

Annex tables 5-8 in the UNCTAD website and the WIR-CD show the ratio of inward and outward FDI flows to gross fixed capital formation and inward and outward FDI stock to GDP. All of these data are in current prices.

The data on GDP were obtained from the UNCTAD GlobStat database.

The data on gross fixed capital formation were obtained from the UNCTAD GlobStat. Data for 2013 are estimated.

Figures exceeding 100% may result from the fact that, for some economies, the reported data on gross fixed capital formation do not necessarily reflect the value of capital formation accurately, and that FDI flows do not necessarily translate into capital formation.

G. Definitions and sources of the data on cross-border M&As

FDI is a balance-of-payments concept involving the cross-border transfer of funds. Cross-border M&As statistics shown in the annex tables 3-5 in the Report (annex tables 9-17 in the UNCTAD website and the WIR-CD) as well as in the tables in the text are based on information reported by Thomson Reuters. Such M&As conform to the FDI definition as far as the equity share is concerned. However, the data also include purchases via domestic and international capital markets, which should not be considered as FDI flows. Although it is possible to distinguish types of financing used for M&As (e.g. syndicated loans, corporate bonds,
venture capital), it is not possible to trace the origin or country-sources of the funds used. Therefore, the data used in the Report include the funds not categorized as FDI.

The UNCTAD database on cross-border M&As contains information on ultimate and immediate target and acquiring countries. To approximate further FDI flows, tables relating to cross-border M&As by region/country are tabulated based on: 1) the immediate target country principle for the sales of equity shares in a resident enterprise; 2) the ultimate acquiring country principle for the purchases of equity shares in a non-resident enterprise; and 3) the ultimate target country principle for the sales of equity shares in a non-resident enterprise, unless otherwise specified. Round tripping cases are also considered on the basis of the immediate acquiring and immediate target country principles.

FDI flows are recorded on a net basis (capital account credits less debits between direct investors and their foreign affiliates) in a particular year. M&A data are also recorded on a net basis, i.e. expressed as differences between gross cross-border acquisitions and divestment by firms in/from a particular country or in/from a particular industry. Transaction amounts recorded in the UNCTAD M&A statistics are those at the time of closure of the deals, and not at the time of announcement. The M&A values are not necessarily paid out in a single year.

There are three main types of cross-border M&A deals: 1) those that involve the sale of a domestic company to a foreign company; 2) those that involve the sale of a foreign affiliate to a domestic company; and 3) those that involve the purchase by a foreign company of another foreign company operating in a host country. Three examples are given to illustrate differences in the three main types of deal, and the way they are recorded:

1) An Argentine domestic company in Argentina is sold to a foreign company. Argentina is the immediate target country, and the foreign country is the ultimate acquiring country. The deal is recorded as the creation of a foreign investment in Argentina (inward investment / positive sale) and the creation of an investment abroad in the foreign country (outward investment / positive purchase).

2) An Argentine domestic company acquires the affiliate of a foreign company operating in Argentina. Argentina is the immediate target country, and the foreign country is the ultimate target country. The deal is recorded as the dissolution of a foreign investment (inward divestment / negative sale) in Argentina and the dissolution of an investment abroad (outward divestment / negative purchase) in the foreign country.

3) A foreign company A acquires an affiliate of foreign company B operating in Argentina. Argentina is the immediate target country, foreign country B is the ultimate target country, and foreign country A is the ultimate acquiring country. The deal is recorded as an inward investment (positive sale) by foreign country A in Argentina and an inward divestment (negative sale) by foreign country B in Argentina, with the net-change being zero in Argentina. It is also recorded as an outward investment (positive purchase) in foreign country A, and as an outward divestment (negative purchase) in foreign country B.

Data showing cross-border M&A activities by industry are also recorded on a net basis as sales and purchases. The UNCTAD database contains information on the industries of both the immediate and ultimate host and home economies. Tables relating to cross-border M&As by sector/industry are tabulated based on: 1) the immediate target country principle for the sales of equity shares in a resident enterprise; 2) the ultimate acquiring country principle for the purchases of equity shares in a non-resident enterprise; and 3) the ultimate target country principle for the sales of equity shares in a non-resident enterprise, unless otherwise specified. Round tripping cases are also considered on the basis of the immediate acquiring and immediate target country principles.

FDI flows are recorded on a net basis (capital account credits less debits between direct investors and their foreign affiliates) in a particular year. M&A data are also recorded on a net basis, i.e. expressed as differences between gross cross-border acquisitions and divestment by firms in/from a particular country or in/from a particular industry. Transaction amounts recorded in the UNCTAD M&A statistics are those at the time of closure of the deals, and not at the time of announcement. The M&A values are not necessarily paid out in a single year.

There are three main types of cross-border M&A deals: 1) those that involve the sale of a domestic company to a foreign company; 2) those that involve the sale of a foreign affiliate to a domestic company; and 3) those that involve the purchase by a foreign company of another foreign company operating in a host country. Three examples are given to illustrate differences in the three main types of deal, and the way they are recorded:

1) An Argentine domestic company in Argentina is sold to a foreign company. Argentina is the immediate target country, and the foreign country is the ultimate acquiring country. The deal is recorded as the creation of a foreign investment in Argentina (inward investment / positive sale) and the creation of an investment abroad in the foreign country (outward investment / positive purchase).

2) An Argentine domestic company acquires the affiliate of a foreign company operating in Argentina. Argentina is the immediate target country, and the foreign country is the ultimate target country. The deal is recorded as the dissolution of a foreign investment (inward divestment / negative sale) in Argentina and the dissolution of an investment abroad (outward divestment / negative purchase) in the foreign country.

3) A foreign company A acquires an affiliate of foreign company B operating in Argentina. Argentina is the immediate target country, foreign country B is the ultimate target country, and foreign country A is the ultimate acquiring country. The deal is recorded as an inward investment (positive sale) by foreign country A in Argentina and an inward divestment (negative sale) by foreign country B in Argentina, with the net-change being zero in Argentina. It is also recorded as an outward investment (positive purchase) in foreign country A, and as an outward divestment (negative purchase) in foreign country B.

Data showing cross-border M&A activities by industry are also recorded on a net basis as sales and purchases. The UNCTAD database contains information on the industries of both the immediate and ultimate host and home economies. Tables relating to cross-border M&As by sector/industry are tabulated based on: 1) the immediate target country principle for the sales of equity shares in a resident enterprise; 2) the ultimate acquiring country principle for the purchases of equity shares in a non-resident enterprise; and 3) the ultimate target country principle for the sales of equity shares in a non-resident enterprise, unless otherwise specified. Round tripping cases are also considered on the basis of the immediate acquiring and immediate target country principles.
about the industry of the parent company that is divesting its chemical foreign affiliate, the same industry as that of its foreign affiliate is used).

3) A foreign food TNC acquires, in a given country, an affiliate operating in the chemical industry owned by another foreign TNC. This transaction is recorded in the columns on M&As by industry of seller in the chemical industry with both negative and positive signs, with the net-change being zero. It is also recorded in the columns on M&As by industry of purchaser in the food industry (with positive sign) and the chemical industry (with negative sign). (As this database has no information about the industry of the parent company that is divesting its chemical foreign affiliate, the same industry as that of its foreign affiliate is used).

Longer time-series data are available on the WIR14-CD, the WIR home page, www.unctad.org/wir or the FDI statistics home page, www.unctad.org/fdistatistics.

H. Definitions and sources of the data on greenfield projects

Data on greenfield investment projects shown in the annex table 6 in the Report (annex tables 18-23 in the UNCTAD website and the WIR-CD) as well as in the table in the text are based on the information provided by FDI markets of Financial Times. FDI Markets tracks all new investment projects and expansion of existing investments without information on the equity participation by investors. It suggests that data may include investments that are not qualified as FDI. Joint-ventures are also included only where they lead to a new physical operation. While there is no minimum size for a project to be included, as a selection criteria for inclusion in this database an investment project has to create new direct jobs and capital investment.

Information sources to collate and validate those projects include Financial Times newswires, nearly 9,000 media sources, project data received from over 1,000 industry organizations and investment agencies, data purchased from market research and publication companies. The data are cross-referenced against multiple sources and over 90% of them are validated with company sources. As far as the industry classification is concerned, every FDI project tracked by FDI Markets is classified according to its cluster, sector, and business activity, based on a proprietary industry classification system.

Notes

1 In some countries, an equity stake of other than 10% is still used. In the United Kingdom, for example, a stake of 20% or more was the threshold used until 1997.
4 Includes Australia, Austria, Belgium, Canada, Denmark, European Union, Finland, France, Germany, Greece, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Republic of Korea, Spain, Sweden, Switzerland, United Kingdom and United States.
