METHODOLOGICAL NOTE

World Investment Report 2017
# TABLE OF CONTENTS

A. General definitions ................................................................. 03
   1. Multinational enterprises. ............................................. 03
   2. Foreign direct investment ........................................... 03
   3. Non equity forms of investment. .................................... 04
   4. Methodological changes on FDI. ............................... 04

B. Availability, limitations and estimates of FDI data presented in WIR. .............................. 06
   1. FDI flows ............................................................. 06
   2. FDI stock ............................................................ 07

C. Sources and Methodology of Data on FDI for each country ............................................. 08

D. Data revisions and updates....................................................... 84

E. Data verification ................................................................. 85

F. Definitions and sources of other data........................................ 86
   1. Ratios ................................................................. 86
   2. Cross-border M&As. ............................................... 86
   3. Announced greenfield FDI projects .............................. 88

Notes ................................................................. 88
1. Multinational enterprises

Multinational enterprises (MNEs) are incorporated or unincorporated enterprises comprising parent enterprises and their foreign affiliates. A parent enterprise is defined as an enterprise that controls assets of other entities in countries other than its home country, usually by owning a certain equity capital stake. An equity capital stake of 10 per cent or more of the ordinary shares or voting power for an incorporated enterprise, or its equivalent for an unincorporated enterprise, is normally considered as the threshold for the control of asset.\(^1\)

A foreign affiliate is an incorporated or unincorporated enterprise in which an investor, who is a resident in another economy, owns a stake that permits a lasting interest in the management of that enterprise (an equity stake of 10 per cent for an incorporated enterprise, or its equivalent for an unincorporated enterprise). In *WIR*, subsidiary enterprises, associate enterprises and branches — defined below — are all referred to as foreign affiliates or affiliates.

- A subsidiary is an incorporated enterprise in the host country in which another entity directly owns more than a half of the shareholder’s voting power, and has the right to appoint or remove a majority of the members of the administrative, management or supervisory body.

- An associate is an incorporated enterprise in the host country in which an investor owns a total of at least 10 per cent, but not more than half, of the shareholders’ voting power.

- A branch is a wholly or jointly owned unincorporated enterprise in the host country which is one of the following: (i) a permanent establishment or office of the foreign investor; (ii) an unincorporated partnership or joint venture between the foreign direct investor and one or more third parties; (iii) land, structures (except structures owned by government entities), and /or immovable equipment and objects directly owned by a foreign resident; or (iv) mobile equipment (such as ships, aircraft, gas or oil drilling rigs) operating within a country, other than that of the foreign investor, for at least one year.

2. Foreign direct investment

Foreign direct investment (FDI) is defined as an investment involving a long term relationship and reflecting a lasting interest and control by a resident entity in one economy (foreign direct investor or parent enterprise) in an enterprise resident in an economy other than that of the foreign direct investor (FDI enterprise or affiliate enterprise or foreign affiliate).\(^2\)

FDI implies that the investor exerts a significant degree of influence on the management of the enterprise resident in the other economy. Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates, both incorporated and unincorporated. FDI may be undertaken by individuals as well as business entities.

Flows of FDI comprise capital provided (either directly or through other related enterprises) by a foreign direct investor to an FDI enterprise, or capital received from an FDI enterprise by a foreign direct investor. FDI has three components: equity capital, reinvested earnings and intracompany loans.
• Equity capital is the foreign direct investor’s purchase of shares of an enterprise in a country other than its own.

• Reinvested earnings comprise the direct investor’s share (in proportion to direct equity participation) of earnings not distributed as dividends by affiliates, or earnings not remitted to the direct investor. Such retained profits by affiliates are reinvested.

• Intracompany loans or intracompany debt transactions refer to short or long term borrowing and lending of funds between direct investors (parent enterprises) and affiliate enterprises.

FDI stock is the value of the share of their capital and reserves (including retained profits) attributable to the parent enterprise, plus the net indebtedness of affiliates to the parent enterprise. FDI flow and stock data used in WIR are not always defined as above, because these definitions are often not applicable to disaggregated FDI data. For example, in analysing geographical and industrial trends and patterns of FDI, data based on approvals of FDI may also be used because they allow a disaggregation at the country or industry level. Such cases are denoted accordingly.

3. Non equity forms of investment

Foreign direct investors may also obtain an effective voice in the management of another business entity through means other than acquiring an equity stake. These are non equity forms of investment, and they include, inter alia, subcontracting, management contracts, turnkey arrangements, franchising, licensing and product-sharing. Data on these forms of multinational corporate activity are usually not separately identified in the balance-of-payments statistics. These statistics, however, usually present data on royalties and licensing fees, defined as “receipts and payments of residents and non-residents for: (i) the authorized use of intangible non produced, non financial assets and proprietary rights such as trademarks, copyrights, patents, processes, techniques, designs, manufacturing rights, franchises, etc., and (ii) the use, through licensing agreements, of produced originals or prototypes, such as manuscripts, films, etc.”

4. Methodological changes on FDI in BPM6 and BD4

In 2014, many countries adopted the new guidelines for the compilation of FDI data as part of balance of payments and international investment position statistics based on the sixth edition of IMF’s Balance of Payments and International Investment Position Manual (BPM6) and the fourth edition of OECD’s Benchmark Definition of Foreign Direct Investment (BD4). There are three major changes introduced in BPM6 and BD4 that have the most significant impact on the presentation and interpretation of FDI statistics.

1. Presentation of FDI statistics on an asset/liability basis instead of the directional principle that had been recommended by the previous editions of these international guidelines. On an asset/liability basis, direct investment statistics are organized according to whether the investment relates to an asset or a liability for the reporting country (for example, a country’s assets include not only equity investments by MNEs resident in that country in their foreign affiliates abroad, but also loans made by the resident affiliates to their foreign parents abroad). As a result the asset/liability presentation does not show the direction of influence while the directional presentation does.
Under the directional principle, the direct investment flows and positions are organized according to the direction of the investment for the reporting economy—either inward or outward (i.e., all flows and positions of MNEs in an economy are shown under outward investment and all flows and positions for foreign affiliates resident in that economy are shown under inward investment).

The two presentations differ in their treatment of reverse investment (reverse investment is when an affiliate provides loans or acquires less than 10 per cent equity in its parents). Under the directional presentation, reverse investment is subtracted to derive the total outward or inward investment of the reporting economy. Therefore, FDI statistics on an asset/liability basis tend to be higher than those under the directional principle, but such is not always the case.

While the presentation on an asset/liability basis is appropriate for macroeconomic analysis (i.e., the impact on the balance of payments), the directional principle is more appropriate for analyzing FDI in the context of parent-affiliate relationship. These data will better assist policymakers and government officials to formulate investment policies. This is because this presentation captures the direction and degree of influence, and is useful for identifying the source or destination countries of direct investment in a particular reporting country or for assessing the access to specific markets by direct investors in that country. The absence of information on FDI on the directional basis may even hamper policymakers from making appropriate decisions and formulating investment policies for development.

2. Separately compiling FDI statistics for resident special purpose entities (SPE). BD4 recommends that countries compile their FDI statistics including and excluding resident SPEs. This recommendation provides a more meaningful measure of FDI of an economy by removing FDI that involves funds passing through an SPE on their way to other destinations (outward FDI) and those coming to the country through other economy’s SPE (inward FDI).

3. Flows and positions between fellow enterprises. Transactions and positions between fellow enterprises are part of FDI statistics as they are likely to be influenced by their common direct investors. BD4 recommends that recording flows and positions in a reporting country depends on the residency of the ultimate controlling parent.

FDI data in this report are based on the directional principle, unless otherwise indicated.
FDI data have a number of limitations. This section therefore spells out how UNCTAD collects and reports such data. These limitations need to be kept in mind also when dealing with the size of MNE activities and their impact.

1. FDI flows

FDI are on a net basis (capital transactions’ credits less debits between direct investors and their foreign affiliates), or net acquisitions of assets (outward FDI) and net incurrence of liabilities (inward FDI). Thus, decreases of net acquisitions of assets in the case of outward FDI or decreases of net incurrence in liabilities in the case of inward FDI are recorded as negative FDI. Hence, FDI flows with a negative sign in WIR indicate that FDI is in such cases. In this case, at least one of the three components of FDI (equity capital, reinvested earnings or intracompany loans) is negative and is not offset by positive amounts of the other components. These are instances of reverse investment or disinvestment.

UNCTAD regularly collects published and unpublished national official FDI data flows directly from central banks, statistical offices or national authorities on an aggregated and disaggregated basis for its FDI/MNE database (www.unctad.org/fdistatistics). These data constitute the main source for the reported data on FDI. These data are further complemented by data obtained from: (i) other international organizations such as the International Monetary Fund (IMF), the World Bank and the Organisation for Economic Co-operation and Development (OECD); (ii) regional organizations such as the ASEAN Secretariat, European Bank for Reconstruction and Development (EBRD), Banque Centrale des États de l’Afrique de l’Ouest, Banque des États de l’Afrique Centrale and Eastern Caribbean Central Bank; and (iii) UNCTAD’s own estimates.

For those economies for which data were not available from national official sources, or for those for which data were not available for the entire period of 1980–2016 covered in the World Investment Report 2017 (WIR17), data from the IMF were obtained using the IMF’s Balance of Payments and International Investment Position Statistics (BOP/IIP), May 2017. If the data were not available from the above IMF data source, data from the IMF’s World Economic Outlook, April 2017 or Country Report, under Article IV of the IMF’s Articles of Agreements, were also used.

Data from the EBRD were utilized for those economies in the Commonwealth of Independent States for which data were not available from one of the above-mentioned sources.
Furthermore, data on the FDI outflows of the OECD, as presented in its publication, *Geographical Distribution of Financial Flows to Developing Countries*, and as obtained from its online databank, were used as a proxy for FDI inflows. As these OECD data are based on FDI outflows to developing economies from the member countries of the Development Assistance Committee (DAC) of OECD, inflows of FDI to developing economies may be underestimated.

Finally, in those economies for which data were not available from either of the above-mentioned sources, or only partial data (quarterly or monthly) were available, estimates were made by:

a. annualizing the data, if they are only partially available (monthly or quarterly) from either the national official source or the IMF;

b. using the mirror data of FDI of major economies from UNCTAD’s FDI/MNE database as proxy;

c. using national and secondary information sources;

d. using data on cross-border mergers and acquisitions (M&As) and their growth rates; and

e. using specific factors.

2. FDI stock

Data on FDI stock are presented at book value or historical cost, reflecting prices at the time when the investment was made.

As in the case of flow data, UNCTAD regularly collects published and unpublished national official FDI stock data directly from central banks, statistical offices or national authorities on an aggregated and disaggregated basis for its FDI/MNE database (www.unctad.org/fdistatistics). These data constitute the main source for the reported data on FDI. These data are further complemented by data obtained from (i) other international organizations such as the IMF; (ii) regional organizations such as the ASEAN Secretariat; and (iii) UNCTAD’s own estimates.

For those economies for which data were not available from official national sources, or for those for which data were not available for the entire period of 1980–2016 covered in the *WIR17*, data from the IMF were obtained using the IMF’s *Balance of Payments and International Investment Position Statistics (BOP/IIP)*, May 2017. Finally, for those economies for which data were not available from either of the above-mentioned sources, estimates were made by either adding up FDI flows over a period of time, or adding or subtracting flows to an FDI stock that had been obtained for a particular year from official national sources, or the IMF data series on assets and liabilities of direct investment.

C. SOURCES AND METHODOLOGY OF DATA ON FDI FOR EACH COUNTRY

The following section provides details on sources and methodology of data on FDI, as well as the estimation methods of these data, for each of the economies used in the Report or contained in the UNCTAD FDI/MNE database 1980–2016.

Afghanistan
- National institution reporting FDI:
  - Da Afghanistan Bank
- Data source used in the report:
  - Inflows
  - Outflows
    The national institution mentioned above.
  - Inward stock
    Data prior to 2008 are estimated by accumulating inflows since 1970. Data from 2008 are from the national institution mentioned above.
  - Outward stock
    Data from 2009 are from the national institution mentioned above.
- Availability of all FDI flows and stock components:
  - Not available.

Albania
- National institution reporting FDI:
  - Bank of Albania
- Reporting system used:
  - Surveys.
- Data source used in the report:
  - Flows
    The national institution mentioned above.
  - Inward stock
    Data prior to 2000 are estimated by accumulating inflows since 1992. Data for 2000–2016 are from the national institution.
  - Outward stock
    The national institution.
- Availability of all FDI flows and stock components:
  - Inward flows and stock from 2001
  - Outward flows and stock from 2004
Algeria

- National institution reporting FDI:
  - Banque d’Algérie

- Data source used in the report:

  **Flows**
  The national institution mentioned above.

  **Stock**
  Data up to 2013 are estimated by accumulating flows since 1970. Data thereafter are from the national institution mentioned above.

- Availability of all FDI flows and stock components:
  - Not available.

Angola

- National institution reporting FDI:
  - Banco Nacional de Angola

- Data source used in the report:

  **Inflows**

  **Outflows**

  **Inward stock**
  Data up to 2000 are estimated by accumulating inflows since 1970. Data from 2000 to 2015 are from the national institution mentioned above. 2016 data is estimated by adding flows to the 2015 stock.

  **Outward stock**
  Data up to 2000 are estimated by accumulating outflows since 1990. Data from 2000 to 2015 are from the national institution mentioned above. 2016 data is estimated by adding flows to the 2015 stock.

- Availability of all FDI flows and stock components:
  - Only inflows from 2008.

Anguilla, Antigua and Barbuda, Dominica, Grenada, Montserrat, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines

- National institution reporting FDI:
  - Eastern Caribbean Central Bank (ECCB)

- Reporting system used:
  - Surveys, administrative sources and interviews with some of the foreign direct investment enterprises.

- Valuation system used:
  - Current price.

- Data source used in the report:

  **Inflows**
  Anguilla: The national institution mentioned above.

Inward stock
Anguilla: Estimated by accumulating inflows since 1990.
Antigua and Barbuda: Estimated by accumulating inflows since 1977.
Dominica: Estimated by accumulating inflows since 1977.
Grenada: Estimated by accumulating inflows since 1977.
Montserrat: Estimated by accumulating inflows since 1986.
Saint Kitts and Nevis: Estimated by accumulating inflows since 1980.
Saint Lucia: Estimated by accumulating inflows since 1976.

Outward flows and stock
Not available.

Availability of all FDI flows and stock components:
- Antigua and Barbuda: Only inflows from 1986.
- Dominica: Only inflows from 1986.
- Grenada: Only inflows from 1986.
- Saint Kitts and Nevis: Only inflows from 1986.

Argentina

- National institution reporting FDI:
- Data source used in the report:
  - Inflows
  - Outflows
  - Stock
    - Data prior to 1991 are estimated by subtracting flows from the stock of 1991. Data from 1991 are from the national institution.

Availability of all FDI flows and stock components:
- Inward stock from 1991.
- Not available for outward stock.

Armenia

- National institution reporting FDI:
  - National Statistical Service
- Data source used in the report:
  - Inflows
    - The national institution mentioned.
Outflows

Inward stock
Data prior to 1997 are estimated by subtracting inflows from the stock of 1997. Data from 1997 are from the national institution.

Outward stock
The national institution.
• Availability of all FDI flows and stock components:
   Inflows from 2002.
   Outflows from 2011.
   Inward stock from 2002.
   Outward stock from 2011.

Aruba
• National institution reporting FDI:
   Centrale Bank van Aruba
• Data source used in the report:
  Inflows
Proxy for 1987–1988 based on investments reported by the Netherlands, OECD, DAC for 1989 and the national institution mentioned above thereafter.

Outflows

Inward stock
Data prior to 1998 are estimated by accumulating inflows since 1987. Since 1998 data are from the national institution.

Outward stock
Data prior to 1998 are estimated by subtracting outflows from the stock of 1998. Since 1998 data are based on the national institution.
• Availability of all FDI flows and stock components:
   Inward stock from 1999.

Australia
• National institution reporting FDI:
   Australian Bureau of Statistics.
• Reporting system used:
   Surveys.
• Valuation system used:
   Current price.
• Data source used in the report:
  The national institution mentioned above.
  Stock for 1980–1987 are on a fiscal year basis (as at June).
• Availability of all FDI flows and stock components:
   All.

Austria
• National institution reporting FDI:
   Austrian National Bank.
Methodological Note

• Reporting system used:
  ➢ Surveys.
    ➢ The Austrian National Bank publishes FDI data statistics including and excluding SPEs.
    ➢ Data in the Report exclude SPEs.
  ➢ Data source used in the report:
    The national institution mentioned above.
  ➢ Availability of all FDI flows and stock components:
    ➢ Stock from 1980.

Azerbaijan

• National institution reporting FDI:
  ➢ Central Bank of Azerbaijan.
• Data source used in the report:
  Inflows
    EBRD for 1993 and the national institution mentioned above thereafter.
  Outflows
    Proxy based on investments reported by Germany for 1996, IMF for 1997 and the national institution thereafter.
  Inward stock
    The national institution.
  Outward stock
    Data prior to 2000 are estimated by accumulating outflows from 1996. Data from 2000 are from the national institution.
• Availability of all FDI flows and stock components:
  ➢ Not available.

Bahamas

• National institution reporting FDI:
  ➢ Central Bank of the Bahamas
• Reporting system used:
  ➢ International Transaction Reporting System (ITRS).
• Valuation system used:
  ➢ Current Price.
• Data source used in the report:
  Inflows
    ➢ Reinvested earnings are currently included under Other Capital.
    ➢ After 1997, data were revised to include loans and repayments of loans between direct investors and their direct investment enterprises.
  Outflows
  Inward stock
    Estimated by accumulating inflows since 1970.
  Outward stock
    Estimated by accumulating outflows since 1980.
• Availability of all FDI flows and stock components:
  ➢ Not available.
**Bahrain**

- National institution reporting FDI:
  - Central Bank of Bahrain
- Reporting system used:
  - Surveys.
- For the first time in 2004, after technical cooperation was given by the Economic and Social Commission for Western Asia (ESCWA) and UNCTAD, a survey on inward FDI was undertaken. Stock data from this survey were used.
- Data source used in the report:
  - **Inflows**
    - Flows cover only the financial sector.
  - **Outflows**
  - **Stock**
    - Data prior to 1989 are estimated by subtracting flows from the stock of 1989. 1989 data are based on the IMF. 1990–2016 data are from the national institution.
- Availability of all FDI flows and stock components:
  - Not available.

**Bangladesh**

- National institution reporting FDI:
  - Bangladesh Bank.
- Reporting system used:
  - Surveys.
- Valuation system used:
  - Book value.
- Data source used in the report:
  - **Inflows**
  - **Outflows**
    - The national institution.
  - **Stock**
    - Data prior to 1997 are estimated by subtracting flows from the stock of 1997. Data from 1997 are from the national institution.
- Availability of all FDI flows and stock components:
  - Inward flows from 1995.
  - Inward stock from 1997.
  - Outward flows and stock from 2000.

**Barbados**

- National institution reporting FDI:
  - Central Bank of Barbados
- Reporting system used:
  - Surveys.
- Valuation system used:
  - Book value.
• Data source used in the report:

**Flows and Stock**
The national institution mentioned above.

• Availability of all FDI flows and stock components:
  ➢ Flows from 1980.
  ➢ Stock from 2009.

**Belarus**
• National institution reporting FDI:
  ➢ National Bank of the Republic of Belarus (NNB).
• Reporting system used:
  ➢ Surveys and Bilateral sources. Inflows are further complemented by data from the NBB’s Banking Supervision department report.
• Valuation system used:
  ➢ Book value.
• Data source used in the report:

  **Inflows**
The national institution mentioned above.

  **Outflows**

  **Stock**
Data prior to 1996 are estimated by subtracting flows from the stock of 1996. From 1996 data are from the national institution.

• Availability of all FDI flows and stock components:
  ➢ Inflows from 2000.
  ➢ Outflows from 2007.
  ➢ Inward stock from 2002.

**Belgium**
• National institution reporting FDI:
  ➢ National Bank of Belgium
• Reporting system used:
  ➢ Surveys.
• Valuation system used:
  ➢ Current price.
• Data source used in the report:
  ➢ The national institution mentioned above.
• Availability of all FDI flows and stock components:
  ➢ All.

**Belize**
• National institution reporting FDI:
  ➢ Central Bank of Belize
• FDI principle used:
  ➢ Data from 2000 are on an asset/liability basis.
• Data source used in the report:

  **Inflows**
Outflows
The national institution.

Inward stock
Data prior to 2000 are estimated by accumulating inflows since 1970. Data from 2000 are from the national institution.

Outward stock
Data prior to 2000 are estimated by accumulating outflows since 1984. Data from 2000 are from the national institution.

- Availability of all FDI flows and stock components:
  - Inward stock from 2010.

Benin, Burkina Faso, Côte d’Ivoire, Guinea-Bissau, Mali, Niger, Senegal and Togo

- National institution reporting FDI:
  - Banque Centrale de l’Afrique de l’Ouest (BCEAO).

- Data source used in the report:

Inflows

Outflows

Inward stock
Benin: Data prior to 1996 are estimated by subtracting inflows from the stock of 1996. 1996–1997 data are based on the IMF. 1998–2016 data are from the national institution.

Burkina Faso: Data prior to 1999 are estimated by accumulating inflows since 1970. Data are from the national institution thereafter.

Côte d’Ivoire: Data prior to 1998 are estimated by accumulating inflows since 1970. 1998 data are based on the IMF. Data from 1999 are from the national institution.
**Guinea-Bissau**: Prior to 2000 estimated by accumulating inflows since 1975. Data are from the national institution thereafter.

**Mali**: Data prior to 1997 are estimated by subtracting inflows from the 1997 stock. 1997–1998 are based on the IMF. 1999–2016 data are from the national institution.

**Niger**: Data prior to 1999 are estimated by accumulating inflows since 1970. Data are from the national institution thereafter.

**Senegal**: Data prior to 1999 are estimated by accumulating inflows since 1970. Data are from the national institution thereafter.

**Togo**: Prior to 1999 estimated by accumulating inflows since 1970. Data are from the national institution thereafter.

### Outward stock

**Benin**: Data prior to 1998 are estimated by accumulating outflows since 1979. Data from 1998 are from the national institution.

**Burkina Faso**: Data prior to 1999 are estimated by accumulating outflows since 1974. Data are from the national institution thereafter.

**Côte d’Ivoire**: Data prior to 1999 are estimated by accumulating outflows since 1986. Data are from the national institution thereafter.

**Guinea-Bissau**: Data are from the national institution.

**Mali**: Data prior to 1999 are estimated by accumulating outflows since 1975. Data are from the national source thereafter.

**Niger**: Data prior to 1999 are estimated by accumulating outflows since 1974. Data are from the national source thereafter.

**Senegal**: Data prior to 2000 are estimated by accumulating outflows since 1974. Data are from the national institution thereafter.

**Togo**: Data prior to 1999 are estimated by accumulating outflows since 1995. Data are from the national institution thereafter.

- Availability of all FDI flows and stock components:
  - **Benin**:
    - Inflows from 1989.
    - Outflows from 1996.
    - Inward stock from 1996.
    - Outward stock from 1999.
  - **Burkina Faso**:
    - Outflows 2006 and from 2009.
    - Stock from 1999.
  - **Côte d’Ivoire**:
    - Inflows from 1980.
    - Outflows from 2009.
    - Inward stock from 2000.
    - Outward stock from 1999.
  - **Guinea-Bissau**:
    - Inflows from 2002.
  - **Mali**:
    - Inflows from 1996.
    - Stock from 1999.
Niger:
- Stock from 1999.

Senegal:
- Inflows from 1980.
- Outflows for 1982 and from 1996.
- Stock from 1999.

Togo:
- Inflows from 1980.
- Outflows from 1996.
- Stock from 1999.

Bermuda
- National institution reporting FDI:
  - Bermuda Government Department of Statistics
- Reporting system used:
  - ITRS.
- Valuation system used:
  - Current prices.
- FDI principle used:
  - Data from 2010 are on an asset/liability basis.
- Data source used in the report:
  - Flows
    - The national institution mentioned above. 2016 is estimated by annualizing the first three quarters.
  - Inward stock
    - Data prior to 2007 are estimated by accumulating flows since 1997. Data from 2007 are based on the national institution. 2016 is estimated by adding flows to the 2015 stock.
  - Outward stock
    - Data prior to 2005 are estimated by accumulating flows since 1997. Data from 2005 are based on the national institution. 2016 is estimated by adding flows to the 2015 stock.
- Availability of all FDI flows and stock components:
  - From 2007.

Bhutan
- National institution reporting FDI:
  - Royal Monetary Authority of Bhutan
- Data source used in the report:
  - Inflows
    - Data from the national institution are on a fiscal year basis.
  - Outward FDI
    - Not available.
**Inward stock**
Data prior to 2006 are estimated by accumulating inflows since 1974. Data from 2006 are from the national institution.

- Availability of all FDI flows and stock components:
  - Inward FDI from 2006.

**Plurinational State of Bolivia**
- National institution reporting FDI:
  - Banco Central de Bolivia
- Reporting system used:
  - Surveys and central bank’s estimates.
    - Since 2000, data on inflows are net values because the FDI survey has started the collection of information on disinvestment (capital withdrawal, equity sale to local investors and amortisation of intra company loans).
- Valuation system used:
  - Book value.
- Data source used in the report:
  - Flows and Inward stock
    - The national institution mentioned above.

**Outward stock**
Data prior to 1997 are estimated by subtracting outflows from the stock of 1997. Data from 1997 are from the national institution.

- Availability of all FDI flows and stock components:
  - Inflows from 1987.
  - Inward stock from 1997.
  - Outward stock for 2013.

**Bosnia and Herzegovina**
- National institution reporting FDI:
  - Central Bank of Bosnia and Herzegovina
- Data source used in the report:
  - Flows
    - The national institution mentioned above.

**Inward Stock**
Data prior to 2000 are estimated by subtracting flows from the 2000 stock. Data from 2000–2015 are from the national institution mentioned above. 2016 is estimated by adding flows to the 2015 stock.

**Outward Stock**
Data prior to 2000 are estimated by subtracting flows from the 2000 stock. Data for 2000–2015 are from the national institution mentioned above. 2016 is estimated by adding flows to the 2015 stock.

- Availability of all FDI flows and stock components:
  - Inflows from 2004.
  - Outflows from 2006.
  - Inward stock from 2003.
  - Outward stock from 2004.

**Botswana**
- National institution reporting FDI:
  - Bank of Botswana
• Data source used in the report:
  
  **Flows**
  The national institution mentioned above.

  **FDI stock**

**Hong Kong, China**

• National institution reporting FDI:
  ▸ Census and Statistics Department

• Reporting system used:
  ▸ Surveys.

• Valuation system used:
  ▸ Current price for flows.
  ▸ Market value for stock.
  ▸ Data on inward stock are based on market value, in accordance with international standards and practices. Thus, the inward stock data for 1997 onwards are not directly comparable to those of previous years.
  ▸ Figures before 1998 are not available. Individual figures may not add up exactly to the total due to rounding.
  ▸ As from reference year 1998, inward direct investment statistics have been enhanced in coverage in accordance with international standards and practices and they are valued at market value. The inward direct investment stock for 1997 (i.e. beginning of 1998) and 1998 presented in this table are therefore not directly comparable to previously released figures.

• FDI principle used:
  ▸ Data are on a directional basis calculated from asset/liability basis.

• Data source used in the report:
  **Inflows**
  Data prior to 1998 are estimated using investment from major economies. Data from 1998 are from the national institution mentioned above.

  **Outflows**

**Inward stock**
Data prior to 1997 are estimated by subtracting inflows from the stock of 1997. Data from 1997 are from the national institution.

**Outward stock**
Data prior to 1997 are estimated by using a proxy (the United States for 1980–1983 and China and the United States for 1984–1996). Data from 1997 are from the national institution.

• Availability of all FDI flows and stock components:
  ▸ From 1998.

• Data source used in the report:
  **Inflows**

**Outflows**
The national institution.

**Inward stock**
Data prior to 1989 are estimated by subtracting inflows from the stock of 1989. 1989 data is based on the IMF. Data from 1990 are from the national institution.

**Outward stock**
1989 data is based on the IMF. Data from 1990 are from the national institution.
• Availability of all FDI flows and stock components:
  ▶ Flows from 1990.
  ▶ Stock from 1998.
Nepal

- National institution reporting FDI:
  - Nepal Rasta Bank

- Data source used in the report:
  - Inflows

Outward FDI
Not available.

Inward stock
Data prior to 2001 are estimated by accumulating inflows since 1972. 2001 data is from the national institution. 2002–2011 data are estimated by adding inflows to the stock of 2001. 2012–2016 data are from the IMF. 2016 is based on the stock of the second quarter.

- Availability of all FDI flows and stock components:
  - Not available.

Netherlands

- National institution reporting FDI:
  - De Nederlandsche Bank

- Reporting system used:
  - Surveys.
    - De Nederlandsche Bank publishes FDI data statistics including and excluding SPEs.
    - Data in the Report exclude SPEs.

- Data source used in the report:
  - Flows
    The national institution mentioned above. 2016 is estimated by annualizing the first three quarters.

  - Stock
    The national institution. 2016 are estimated by adding flows to the stock of 2015.

- Availability of all FDI flows and stock components:
  - Stock from 1980.

New Caledonia

- National institution reporting FDI:
  - Institut d’émission d’outre-mer (IEOM)

- Data source used in the report:
  - Inflows

Outflows
The national institution mentioned. 2016 is estimated.

- Inward stock
  Estimated by accumulating inflows since 1972.

- Outward stock
  Estimated by accumulating inflows since 2000.
• Availability of all FDI flows and stock components:
  ➢ Not available.

**New Zealand**

• National institution reporting FDI:
  ➢ Statistics New Zealand

• Reporting system used:
  ➢ Surveys.

  ➢ Up to 1999 the annual data are as at March and as at December thereafter.
  ➢ Flows for 2000 is exceptional. New Zealand Statistics derived the data by adding the last 3 quarters of the calendar year 2000 to the estimated first quarter (estimated by dividing by 4 years 1999 and 2000 as at March).

• Valuation system used:
  ➢ Market prices.

  ➢ Where financial instruments are denominated in a foreign currency, they are converted at spot exchange rates.
  ➢ The time of ownership change is the basis of recording financial transactions and stock.
  ➢ Transactions are recorded on an accrual basis. This requires that some items, representing the difference between the accrual and cash record, have to be recorded as components of the financial account. For example, income in the current account is recorded when earned. The difference between income earned and cash settlement when payment becomes due is included in the accounts as a net financial transaction in the underlying instrument. Similarly, the prepaid premiums and unpaid claims on insurance (i.e. the difference between premiums earned and claims payable on the one hand and premium and claim payments on the other) should be recorded as financial transactions. Every effort is made in data collections to adhere to these principles, and data in the financial account and the IIP are considered to approximate them.

• Data source and used in the report:
  ➢ Flows
    The national institution mentioned above.

  ➢ Inward stock

  ➢ Outward stock
    Data prior to 1992 are estimated by subtracting outflows from the stock of 1992. 1992 data is based on the IMF. 1993–2016 data are from the national institution.

• Availability of all FDI flows and stock components:
  ➢ Flows from 1980.
  ➢ Inward stock from 1990.
  ➢ Outward stock from 1997.

**Nicaragua**

• National institution reporting FDI:
  ➢ Banco Central de Nicaragua

• Reporting system used:
  ➢ Surveys, administrative sources, and secondary sources (magazines, newspapers, etc.).

• Valuation system used:
  ➢ Market value.
• Data source used in the report:

**Inflows**

**Outward FDI**
The national institution.

**Inward stock**
Data prior to 1998 are estimated by accumulating inflows since 1970. Data from 1998 are from the national institution.

• Availability of all FDI flows and stock components:
  ▶ Not available.

**Nigeria**

• National institution reporting FDI:
  ▶ Central Bank of Nigeria

• Data source used in the report:

  **Inflows**

  **Outflows**

  **Inward stock**
  Data prior to 2000 are estimated by accumulating inflows since 1970. Data from 2000 are from the national institution.

  **Outward stock**
  Data prior to 2000 are estimated by accumulating outflows since 1978. Data from 2000 are from the national institution.

• Availability of all FDI flows and stock components:
  ▶ Flows from 1990.
  ▶ Inward stock from 2005.

**Norway**

• National institution reporting FDI:
  ▶ Statistics Norway

• Reporting system used:
  ▶ ITRS for flows.
  ▶ Surveys for inward stock.
  ▶ Administrative sources for outward stock.

  ▶ The outward FDI position statistics reported by Statistics Norway is a continuation of Norges Bank’s statistics from 1988 to 2000 and replaces previous estimates for the years 1999, 2000, 2001 and 2002. The major upward shift in stock position is due to new methods, from 1997 to 1998. The figures presented are based on data from the Directorate of Taxes.

  ▶ Until the publishing in 2006, the figures on stock of direct investments abroad (the special statistics) included both direct and indirect equity in the investment objects. Since the publishing in 2007, the equity has been limited to directly owned/associated enterprises. Other capital (mainly loans), however, still includes all direct relations between Norwegian investors and directly and indirectly owned/associated enterprises abroad. However, the source for other capital is now Reporting balance of payments data (BoP reporting) instead of the separate collection of data for direct
investments. This has resulted in the scope of other capital being extended to include
loans between fellow companies. All of these changes have been dated back to 1998.
There were therefore major revisions for the figures during the period 1998–2006.
The changes also mean that there will be consistency in the methodology between
the stock statistics on Norwegian direct investments abroad and foreign direct
investments in Norway. Figures for households’ investment in holiday homes have
been calculated and included.

• Valuation system used:
  ▶ Current price for flows.
  ▶ Book value for stock.
• Data source used in the report:

  **Flows**
  IMF for 1980 and the national institutions mentioned above thereafter.

  **Inward stock**
  Data prior to 1987 are estimated by subtracting inflows from the stock of 1987. Data
  from 1987 are from the national institution. 2016 data is estimated by adding flows to
  the stock of 2015.

  **Outward stock**
  Data prior to 1988 are from the IMF. Data from 1988 are from the national institutions.
  2016 data is estimated by adding flows to the stock of 2015.
• Availability of all FDI flows and stock components:
  ▶ Stock from 1990.

**Oman**

• National institution reporting FDI:
  ▶ Central Bank of Oman
• Reporting system used:
  ▶ Surveys.
    ▶ For the first time in 2004, after technical cooperation was given by the Economic and
    Social Commission for Western Asia (ESCWA) and UNCTAD, a survey on inward FDI
    was undertaken.
    ▶ A survey of the foreign investments enterprises has been undertaken jointly by
    Ministry of national Economy, Ministry of Commerce and Industry and the Central
    Bank of Oman.
• FDI principle used:
  ▶ Data from 2000 are on an asset/liability basis for flows.
• Data source used in the report:

  **Inflows**
  Data prior to 1997 are from the IMF. Data from 1997 are from the national institution.
  2016 data is estimated.

  **Outflows**
  The national institution. 2016 data is estimated.

  **Inward stock**
  Data are estimated by accumulating inflows since 1970.

  **Outward stock**
  Data are estimated by accumulating inflows since 2003.
• Availability of all FDI flows and stock components:
  ▶ Not available.
Pakistan

- Availability of all FDI flows and stock components:
  - Stock from 1983.

**Syrian Arab Republic**
- National institution reporting FDI:
  - Central Bank of Syria
- Reporting system used:
  - Surveys.
    - Note: For the first time in 2004, after technical cooperation was given by the Economic and Social Commission for Western Asia (ESCWA) and UNCTAD, a survey on inward FDI was undertaken. Stock data from this survey were used.
- Data source used in the report:
  - Inflows
    - OECD, DAC for 1980–1984 and the national institution mentioned above for thereafter.
  - Outflows
    - Proxy and estimates for 1984–2008. 2001–2015 are from the national institution

**Taiwan Province of China**
- National institution reporting FDI:
  - Central Bank of China
- Reporting system used:
  - ITRS and administrative sources.
- Valuation system used:
  - Current prices for flows.
  - Book value and current price for stock.
  - Notes:
    - Because the following invested targets are calculated differently, inward stock for (a) listed companies is based on market value and (b) unlisted companies is based on the net worth.
    - Outward FDI is based on book value because Taiwan’s companies invest mostly in unlisted companies abroad.
- FDI principle used:
  - Data from 2000 are on an asset/liability basis.
- Data source used in the report:
Flows
The national institution mentioned above.

Inward stock

Outward stock
Data prior to 1998 are estimated by subtracting outflows from the stock of 1998. 1998–2015 are from the national institution. 2016 is estimated by adding flows to the 2015 stock.

Availability of all FDI flows and stock components:
- Inflows from 1984.
- Outflows from 1989.
- Stock from 2000.

Tajikistan
- National institution reporting FDI:
  - National Bank of Tajikistan
- Data source used in the report:
  - Inflows
  - Outward FDI
    - Not available
  - Inward stock
    - Data prior to 1999 are estimated by accumulating inflows since 1992. Data are from the national institution thereafter.
  - Availability of all FDI flows and stock components:
    - Inward stock from 2005.

Thailand
- National institution reporting FDI:
  - Bank of Thailand
- Data source used in the report:
  - The national institution mentioned above.
- Availability of all FDI flows and stock components:
  - Stock from 2000.

The former Yugoslav Republic of Macedonia
- National institution reporting FDI:
  - National Bank of the Republic of Macedonia
- Data source used in the report:
  - Flows
    - The national institution mentioned above.
  - Inward stock
    - Data prior to 1997 are estimated by subtracting inflows from the stock of 1997. Data from 1997 are from the national institution.
Outward stock
The national institution
• Availability of all FDI flows and stock components:
  ▸ Inflows and inward stock from 1997.
  ▸ Outflows from 2012.
  ▸ Outward stock from 1998.

Timor-Leste
• National institution reporting FDI:
  ▸ Central Bank of Timor-Leste
• Data source used in the report:
  Inflows

Outward FDI
The national institution.

Inward stock
Data prior to 2007 are estimated by subtracting inflows from the 2007 stock. Data are
from the national institution thereafter.

Outward stock
The national institution.
• Availability of all FDI flows and stock components:
  ▸ Inward stock from 2008.

Tonga
• National institution reporting FDI:
  ▸ Tonga Department of Statistics
• Data source used in the report:
  Inflows

Outflows

Inward stock
Estimated by accumulating inflows since 1977.

Outward stock
Estimated by accumulating outflows since 1990.
• Availability of all FDI flows and stock components:
  ▸ Not available.

Trinidad and Tobago
• National institution reporting FDI:
  ▸ Central Bank of Trinidad and Tobago
    • The Central Bank of Trinidad and Tobago undertook an extensive revision of the
      Balance of Payments from 2011, which in addition to the implementation of the
      International Monetary Fund’s Balance of Payments and International Investment
      Position Manual, Sixth Edition (BPM6), includes the introduction of new data sources
      and correction of past source data.
      Data for inflows and outflows of FDI previously showed gross credit and debit entries.
      With the revision these data correctly reflect the net incurrence of liabilities (inflows)
      and the net acquisition of assets (outflows).
With respect to the inward and outward stock positions, these data have also been revised from 2011 as we have now constructed an International Investment Position for the country. It should be noted that:

- Data do not currently capture data on reverse investment.
- Data prior to 2011 have not been revised or converted to BPM6 and therefore are not consistent with the current series.

FDI principle used:
- Data from 2011 are on an asset/liability basis.

Data source used in the report:

**Inflows**
The national institution mentioned above. 2016 is estimated by annualizing the first quarter.

**Outflows**

**Inward stock**
Data prior to 2011 are estimated by accumulating inflows since 1970. 2011–2015 are from the national institution. 2016 is estimated by adding flows to the 2015 stock.

**Outward stock**
Data prior to 2011 are estimated by accumulating inflows since 1983. 2011–2015 are from the national institution. 2016 is estimated by adding flows to the 2015 stock.

Availability of all FDI flows and stock components:
- Inflows from 1980.
- Outflows from 2011.
- Stock from 2011.

**Tunisia**
- National institution reporting FDI:
  - Banque Centrale de Tunisie
- Data source used in the report:
  - The national institution mentioned above.
- Availability of all FDI flows and stock components:
  - Not available.

**Turkey**
- National institution reporting FDI:
  - Central Bank of the Republic of Turkey
- Reporting system used:
  - ITRS for flows – reinvested earnings are obtained through surveys.
  - Surveys for inward stock.
  - Administrative sources for outward stock.
- Data source used in the report:
  - Flows
    - The national institution mentioned above.
  - Stock
    - Data prior to 2000 are estimated by subtracting flows from the stock of 2000. Data are from the national institution thereafter.
• Availability of all FDI flows and stock components:
  ▶ Inflows from 2003.
  ▶ Outflows from 2010.
  ▶ Inward stock from 2001.
  ▶ Outward stock from 2009.

**Turkmenistan**

• Data source used in the report:
  • **Inflows**
    EBRD.
  • **Outward FDI**
    Not available.
  • **Inward stock**
    Estimated by accumulating inflows since 1993.

• Availability of all FDI flows and stock components:
  ▶ Not available.

• Data source used in the report:
  • **Inflows**
  • **Outward FDI and FDI stock**
    Not available.

• Availability of all FDI flows and stock components:
  ▶ Not available.

**Uganda**

• National institution reporting FDI:
  ▶ Bank of Uganda
  • Reporting system used:
    ▶ Surveys.
  • Valuation system used:
    ▶ Current prices.

• Data source used in the report:
  • **Inflows**
  • **Outflows**
    The national institution.
  • **Inward stock**
    Data prior to 1999 are estimated accumulating inflows since 1970. Data are from the national institution thereafter.
  • **Outward stock**
    The national institution.

• Availability of all FDI flows and stock components:
  ▶ Inward stock from 1999.
  ▶ Outward FDI from 2009.
Ukraine
- National institution reporting FDI:
  - National Bank of Ukraine
- Data source used in the report:
  - The national institution mentioned above.
- Availability of all FDI flows and stock components:
  - Inflows from 2003.
  - Outflows for 2008.
  - Inward stock from 2002.
  - Outward stock from 2005.

United Arab Emirates
- National institution reporting FDI:
  - National Bureau of Statistics
- Data source used in the report:
  - **Inflows**
  - **Outflows**
  - **Inward stock**
    - Data prior to 2008 are estimated by accumulating inflows since 1970. Data are from the national institution thereafter. 2013–2016 are estimated by adding flows to the 2012 stock.
  - **Outward stock**
    - Data prior to 2008 are estimated by accumulating outflows since 1980. Data are from the national institution thereafter. 2013–2016 are estimated by adding flows to the 2012 stock.
- Availability of all FDI flows and stock components:
  - Not available.

United Kingdom
- National institution reporting FDI:
  - Office for National Statistics
- Data source used in the report:
  - **Inflows**
  - **Outflows and Stock**
    - The national institution.
- Availability of all FDI flows and stock components:
  - Inflows from 1984.
  - Outflows from 1990.
  - Stock from 1993.

United Republic of Tanzania
- National institution reporting FDI:
  - Bank of Tanzania
• Data source used in the report:

  **Inflows**

  **Outflows**

  **Inward stock**
  Data prior to 1995 are estimated by subtracting inflows from the stock of 1995. Data are from the national institution thereafter. 2016 are estimated by adding flows to the 2015 stock.

  **Outward stock**
  Not available.

• Availability of all FDI flows and stock components:
  - Inflows from 1999.
  - Inward stock from 1995.

**United States**

• National institution reporting FDI:
  - Bureau of Economic Analysis, United States Department of Commerce

• Reporting system used:
  - Surveys.

• Valuation system used:
  - Data on FDI used in this Report do not include current cost adjustments.
  - Data on FDI stock are based on market value. The Bureau of Economic Analysis prepares estimates of the positions that are valued on three bases—historical cost, current cost, and market value.

• Data source used in the report:
  - The national institution mentioned above.

• Availability of all FDI flows and stock components:
  - Flows from 1980.
  - Stock from 2000.

**Uruguay**

• National institution reporting FDI:
  - Banco Central del Uruguay

• Data source used in the report:

  **Inflows**

  **Outflows**

  **Inward stock**
  Data prior to 1998 are estimated by subtracting inflows from the stock of 1999. Data from 1999 are from the national institution.

  **Outward stock**
  Data prior to 1996 are estimated by subtracting outflows from the stock of 1996. Data from 1996 are from the national institution.

• Availability of all FDI flows and stock components:
  - Inflows from 1986.
Uzbekistan

- Data source used in the report:
  
  **Inflows**
  EBRD.

  **Outward FDI**
  Not available.

Vanuatu

- National institution reporting FDI:
  - Reserve Bank of Vanuatu

- FDI principle used:
  - Data from 2010 are on an asset/liability basis.

- Data source used in the report:
  
  **Inflows**

  **Outflows**
  The national institution. 2016 is estimated by annualizing the first three quarters.

  **Inward stock**
  Data prior to 2002 are estimated by subtracting inflows from the stock of 2002. Data are from the national institution thereafter. 2016 data is estimated by adding flows to the 2015 stock.

  **Outward stock**
  Data are from the national institution. 2016 data is estimated by adding flows to the 2015 stock.

- Availability of all FDI flows and stock components:
  - Outflows from 2002.
  - Stock from 2002.

Bolivarian Republic of Venezuela

- National institution reporting FDI:
  - Banco Central de Venezuela

- Data source used in the report:
  
  **Inflows**
  The national institution mentioned above. 2016 is estimated by annualizing the first three quarters.

  **Outflows**

  **Stock**
  The national institution. 2016 data is estimated by adding flows to the 2015 stock.
Availability of all FDI flows and stock components:

- Inward stock from 1997.
- Outward stock from 1996.

Viet Nam

- National institution reporting FDI:
  - State Bank of Viet Nam
- Data source used in the report:

  **Inflows**

  **Outflows**

- **Inward stock**
  Estimated by accumulating flows since 1970.

- **Outward stock**
  Estimated by accumulating flows since 2005.

Availability of all FDI flows and stock components:

- Not available.

Yemen

- National institution reporting FDI:
  - Central Bank of Yemen
- Data source used in the report:

  **Inflows**

  **Outflows**

- **Inward stock**
  Data prior to 1990 are estimated by subtracting inflows from the stock of 1990. 1990–1997 and 2004–2015 data are from the national institution. 1998–2003 data are based on the IMF. 2016 is estimated by adding inflows to the 2015 stock.

  **Outward stock**
  Estimated by accumulating outflows since 1982.

- Availability of all FDI flows and stock components:

Zambia

- National institution reporting FDI:
  - Bank of Zambia
- FDI principle used:
  - Data from 2007 are on an asset/liability basis for flows.
• Data source used in the report:

  **Inflows**

  **Outflows**
  The national institution.

  **Inward stock**
  Data prior to 2006 are estimated by subtracting inflows from the stock of 2006. Data are from the national institution thereafter. 2016 is estimated by adding flows to the 2015 stock.

  **Outward stock**
  The national institution. 2014–2016 are estimated by adding flows to the 2013 stock.

• Availability of all FDI flows and stock components:
  - Inflows from 2000.
  - Stock from 2006.

**Zimbabwe**

• National institution reporting FDI:
  - Reserve Bank of Zimbabwe

• Data source used in the report:

  **Flows**
  The national institution mentioned above. 2016 is estimated by annualizing the first three quarters.

  **Inward stock**
  Data prior to 2001 are estimated by accumulating inflows since 1970. Data are from the national institution thereafter. 2016 is estimated by adding flows to the 2015 stock.

  **Outward stock**
  Data prior to 2001 are estimated by accumulating outflows since 1983. Data are from the national institution thereafter. 2016 is estimated by adding flows to the 2015 stock.

• Availability of all FDI flows and stock components:
  - Not available.

---

**Memorandum:**

**Belgium and Luxembourg**

• National institution reporting FDI:
  - National Bank of Belgium
    - Up to 2001, the Belgium National Bank reported FDI data for the Belgium and Luxembourg Economic Union. As of 2002, this economic union is no longer in effect. Consequently, FDI data are reported separately by the respective national authorities. Therefore, data for 2002 onwards are not comparable to the combined flows as reported in previous years because of different methodologies.

• Data source used in the report:

  **Flows**

  **Inward stock**
Outward stock
- Availability of all FDI flows and stock components:

Netherlands Antilles (This economy was dissolved on 10 October 2010)
- National institution reporting FDI:
  - Bank van de Nederlandse Antillen
- Data source used in the report:
  Flows

Inward stock
Prior to 1998, estimated by accumulating inflows since 1970; national institution thereafter.

Outward stock
Prior to 1998, estimated by accumulating outflows since 1976; national institution thereafter.
- Availability of all FDI flows and stock components:

Serbia and Montenegro
- National institution reporting FDI:
    - Up until the establishment of the Central Bank of Montenegro, March 15, 2001, the National Bank of Serbia reported FDI statistics for the State Union of Serbia and Montenegro.
    From 2002, the two central banks started reporting separate FDI statistics. Now, FDI statistics for Serbia and Montenegro are calculated as the sum of data for Serbia, obtained from the National Bank of Serbia, and for Montenegro, obtained from the Central Bank of Montenegro.
    The state union effectively came to an end after Montenegro’s formal declaration of independence on June 3, 2006 and Serbia’s formal declaration of independence on June 5 of the same year.
  - Data source used in the report:
    - The national institutions mentioned above.
  - Availability of all FDI flows and stock components:
    - Not available.
D. DATA REVISIONS AND UPDATES

All FDI data and estimates in WIR are continuously revised. Because of ongoing revisions, FDI data reported in WIR17 may differ from those reported in earlier Reports or other publications of UNCTAD or any other international or regional organizations. In particular, recent FDI data are being revised in many economies according to the fifth edition of the *Balance of Payments Manual of the IMF* and in some cases, according to the sixth edition. Because of this, the data reported in last year’s Report may be completely or partly changed in this Report.
E. DATA VERIFICATION

In compiling data for this year’s Report, requests were made to national official sources of all economies for verification and confirmation of the latest data revisions and accuracy. In addition, websites of national official sources were consulted. This verification process continued until 5 May 2017. Any revisions made after this process may not be reflected in the Report. Below is a list of economies for which data were checked using either of these methods. For the economies which are not mentioned below, the UNCTAD secretariat could not have the data verified or confirmed by their respective governments.

F. DEFINITIONS AND SOURCES OF OTHER DATA

1. Ratios

Ratios of inward and outward FDI flows to gross fixed capital formation and inward and outward FDI stock to GDP are in current prices.

The data on GDP and gross fixed capital formation were obtained from the IMF, World Economic Outlook (WEO) database.

Figures exceeding 100 per cent may result from the fact that, for some economies, the reported data on gross fixed capital formation do not necessarily reflect the value of capital formation accurately, and that FDI flows do not necessarily translate into capital formation.

2. Cross-border M&As

FDI is a balance-of-payments concept involving the cross-border transfer of funds. Cross-border mergers and acquisitions (M&As) statistics shown in the Report are based on information reported by Thomson Reuters. Such M&As conform to the FDI definition as far as the equity share is concerned. However, the data also include purchases via domestic and international capital markets, which should not be considered as FDI flows. Although it is possible to distinguish types of financing used for M&As (e.g. syndicated loans, corporate bonds, venture capital), it is not possible to trace the origin or country-sources of the funds used. Therefore, the data used in the Report include the funds not categorized as FDI.

The UNCTAD database on cross-border M&As contains information on ultimate and immediate target and acquiring countries. To approximate further FDI flows, tables relating to cross-border M&As by region/country are tabulated based on: 1) the immediate target country principle for the sales of equity shares in a resident enterprise; 2) the ultimate acquiring country principle for the purchases of equity shares in a non-resident enterprise; and 3) the ultimate target country principle for the sales of equity shares in a non-resident enterprise, unless otherwise specified. Round tripping cases are also considered on the basis of the immediate acquiring and immediate target country principles.

FDI flows are recorded on a net basis (capital account credits less debits between direct investors and their foreign affiliates) in a particular year. M&A data are also recorded on a net basis, i.e. expressed as differences between gross cross-border acquisitions and divestment by firms in/from a particular country or in/from a particular industry. Transaction amounts recorded in the UNCTAD M&A statistics are those at the time of closure of the deals, and not at the time of announcement. The M&A values are not necessarily paid out in a single year.

There are three main types of cross-border M&A deals: 1) those that involve the sale of a domestic company to a foreign company; 2) those that involve the sale of a foreign affiliate to a domestic company; and 3) those that involve the purchase by a foreign company of another foreign company operating in a host country. Three examples are given to illustrate differences in the three main types of deal, and the way they are recorded:
1. An Argentine domestic company in Argentina is sold to a foreign company. Argentina is the immediate target country, and the foreign country is the ultimate acquiring country. The deal is recorded as the creation of a foreign investment in Argentina (inward investment / positive sale) and the creation of an investment abroad in the foreign country (outward investment / positive purchase).

2. An Argentine domestic company acquires the affiliate of a foreign company operating in Argentina. Argentina is the immediate target country, and the foreign country is the ultimate target country. The deal is recorded as the dissolution of a foreign investment (inward divestment / negative sale) in Argentina and the dissolution of an investment abroad (outward divestment / negative purchase) in the foreign country.

3. A foreign company A acquires an affiliate of foreign company B operating in Argentina. Argentina is the immediate target country, foreign country B is the ultimate target country, and foreign country A is the ultimate acquiring country. The deal is recorded as an inward investment (positive sale) by foreign country A in Argentina and an inward divestment (negative sale) by foreign country B in Argentina, with the net-change being zero in Argentina. It is also recorded as an outward investment (positive purchase) in foreign country A, and as an outward divestment (negative purchase) in foreign country B.

Data showing cross-border M&A activities by industry are also recorded on a net basis as sales and purchases. The UNCTAD database contains information on the industries of both the immediate and ultimate host and home economies. Tables relating to cross-border M&As by sector/industry are tabulated based on the industry of the immediate host economy for sales and the industry of the ultimate home economy for purchases. Following are three illustrative examples:

1. A foreign food MNE acquires, in a given country, a domestic chemical company. This transaction is recorded in the columns on M&As by industry of seller in the chemical industry with positive sign. It is also recorded in the columns on M&As by industry of purchaser in the food industry (with positive sign).

2. A domestic food company acquires, in its own country, the affiliate of a foreign-owned company operating in the chemical industry. This transaction is recorded in the columns on M&As by industry of seller in the chemical industry with a negative sign. It is also recorded in the columns on M&As by industry of purchaser in the chemical industry with a negative sign. (As this database has no information about the industry of the parent company that is divesting its chemical foreign affiliate, the same industry as that of its foreign affiliate is used).

3. A foreign food MNE acquires, in a given country, an affiliate operating in the chemical industry owned by another foreign MNE. This transaction is recorded in the columns on M&As by industry of seller in the chemical industry with both negative and positive signs, with the net-change being zero. It is also recorded in the columns on M&As by industry of purchaser in the food industry (with positive sign) and the chemical industry (with negative sign). (As this database has no information about the industry of the parent company that is divesting its chemical foreign affiliate, the same industry as that of its foreign affiliate is used).
3. Announced greenfield FDI projects

Data on announced greenfield FDI projects used in the Report are based on the information provided by FDI markets of Financial Times. FDI Markets tracks all new investment projects and expansion of existing investments without information on the equity participation by investors. It suggests that data may include investments that are not qualified as FDI. Joint-ventures are also included only where they lead to a new physical operation. While there is no minimum size for a project to be included, as a selection criteria for inclusion in this database, an investment project has to create new direct jobs and capital investment.

Information sources to collate and validate those projects include Financial Times newswires, nearly 9,000 media sources, project data received from over 1,000 industry organizations and investment agencies, data purchased from market research and publication companies. The data are cross-referenced against multiple sources and over 90 per cent of them are validated with company sources. As far as the industry classification is concerned, every FDI project tracked by FDI Markets is classified according to its cluster, sector, and business activity, based on a proprietary industry classification system.

NOTES

1 In some countries, an equity stake of other than 10 per cent is still used. In the United Kingdom, for example, a stake of 20 per cent or more was the threshold used until 1997.

4 SPE are legal entities that have little or no employment, or operations, or physical presence in the jurisdiction in which they are created by their parent enterprises which are typically located in other jurisdictions (economies). They are often used as vehicles to raise capital or to hold assets and liabilities and usually do not undertake significant production (BD4).

5 Fellow enterprises are enterprises, in the same or in different economies, related through the FDI relationship without either being a direct investor in the other, but through being directly or indirectly influenced by the same enterprise in the ownership hierarchy (BD4).

6 The ultimate controlling parent is the entity at the top of the ownership chain that is not controlled by any other entity.

7 Includes Australia, Austria, Belgium, Canada, Czech Republic, Denmark, European Union, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Poland, Portugal, Republic of Korea, Slovakia, Slovenia, Spain, Sweden, Switzerland, United Kingdom and United States.
