## Product Safety Initiative

(A Saudi Vision 2030 Initiative)

July 2019

- ▶ **Challenges and Initiative Purpose**
- ▶ **Initiative Concept and Fundamentals**
- ▶ **Initiative Deliverables**
- ▶ **Saber**
- ▶ **Partners**
- ▶ **Next Steps**

## Challenges

## Initiative Purpose

1 90% of consumer goods are imported

2 25k registered importers

3 2M kilometers of land with centralized gov't regulator

Protecting safety and public health by addressing and preventing hazards arising from the introduction of unsafe products in the Kingdom, whether locally produced or imported\*.

\* it includes all products or categories of products except food, animal feed and pharmaceutical products.

# The main concept of the initiative, is to shift Saudi conformity model into trust-based model

## Conformity Model

## Conformity Model

## Fundamentals

### Legal pillar

consolidate the legal basis available by adopting a law on general product safety

### Institutional pillar

strengthen the institutional structure competent to deal with product safety in the Kingdom

### Technical pillar

develop efficient procedures for standards, technical regulations, sampling of products, market survey, etc.

# Tangible deliverables were developed with Quality Infrastructure System (QIS) experts from all over the world based on best practices

## Initiative Deliverables

65%

Drafts of **new laws** on **product safety** and **market surveillance**, law on **standards** and **quality**, law on **accreditation**, law on **metrology**)

90%

Design of a **national web-based system** for the rapid exchange of **information on dangerous products** (so-called RASID)

100%

Developing the notification scheme for conformity assessment bodies

100%

Launching the enhancements of Electronic Systems

---

## What is Saber?

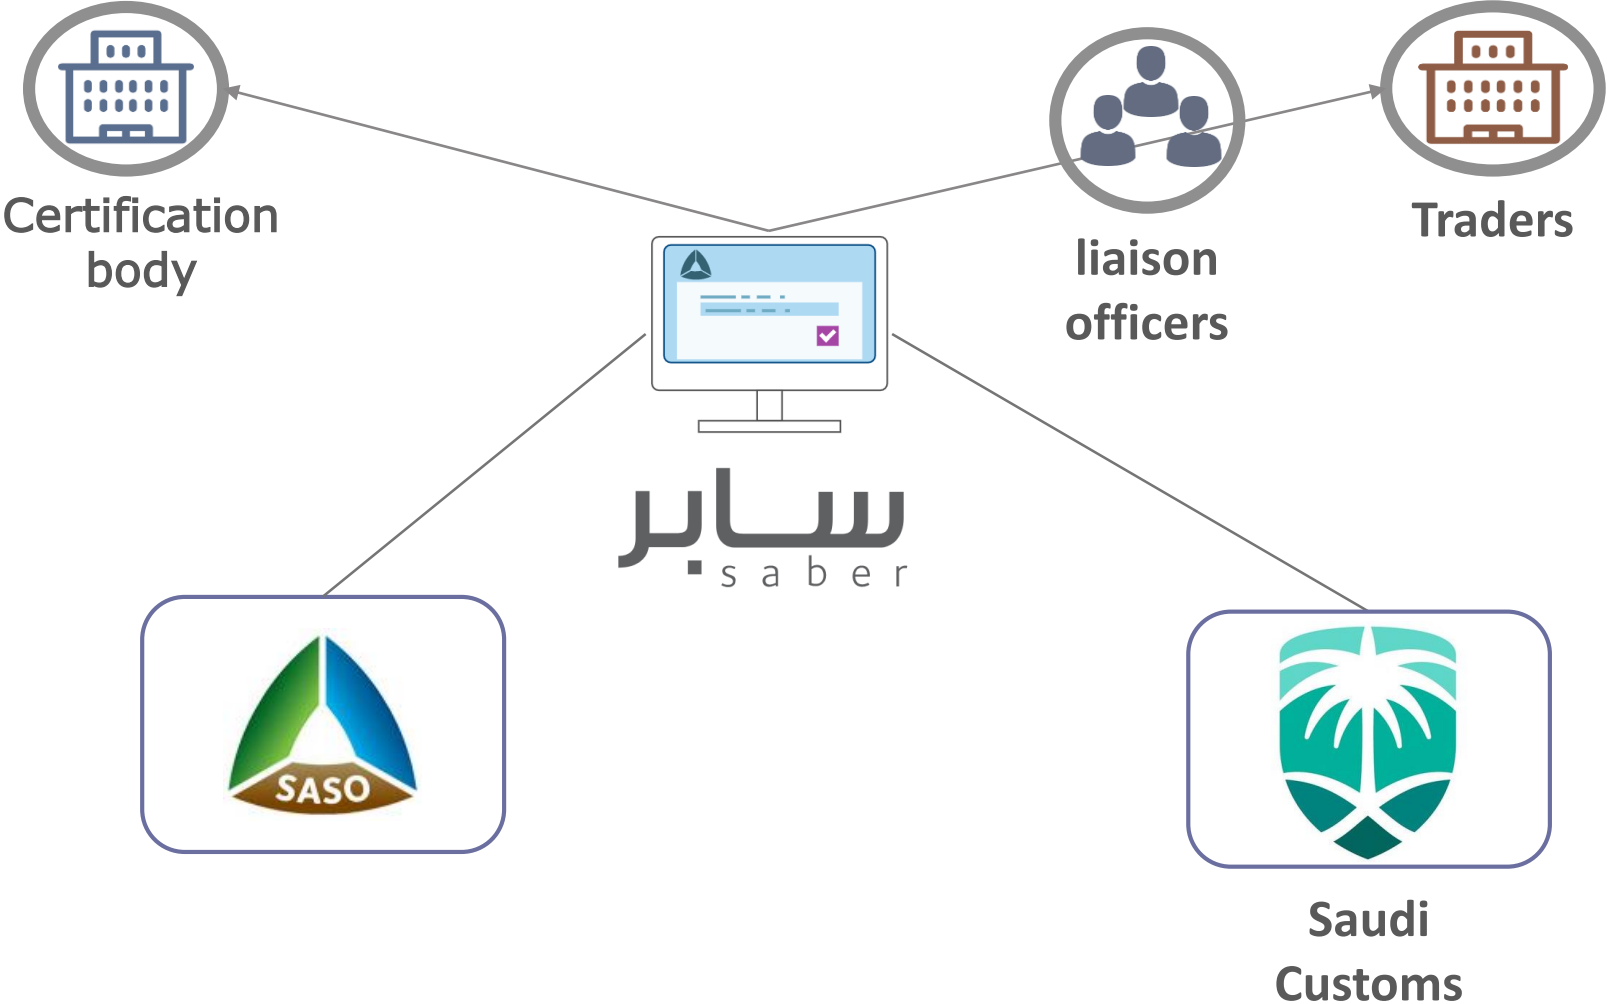

---

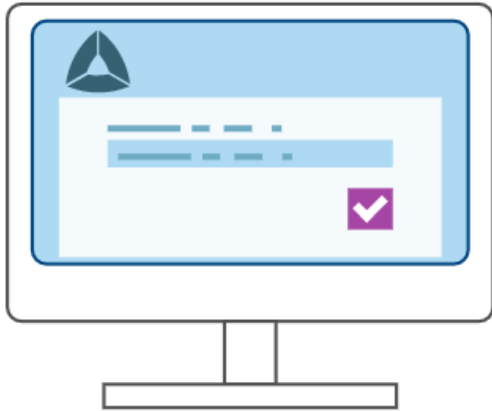

- A Web-based Applications designed by SASO for registering Certificate of Conformity for Products and generating shipments certificate . Further, it enables the CBs to submit their application to SASO through electronic system .
- Saber system provides integration(real synchronization) with related entities such as Customs .
- It helps traders and importers to build database for their products.

# Stakeholders

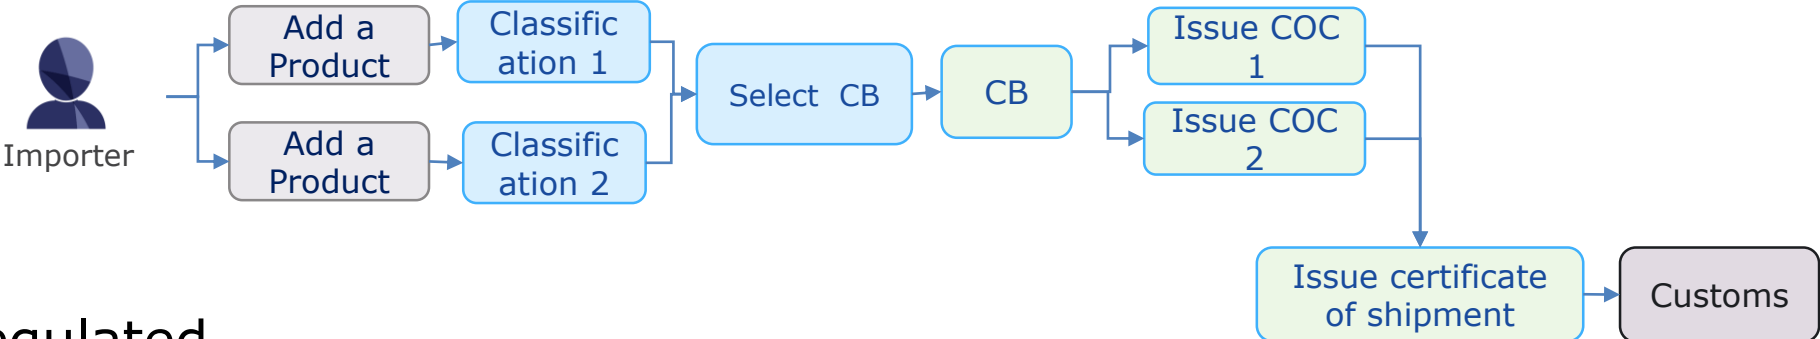

- Registration of installations and addition of products.
- Registration of certificates of conformity for local and imported products that are regulated.
- Registration of consignment certificates for regulated and non-regulated products.
- Issuing a self-certification certificate for non-regulated products.

# Current situation with Saber

## Regulated

## Not Regulated

# The key success of developing and implementing an effective product safety methodology is to work closely with the related government agencies

## Partners

الهيئة السعودية للمواصفات والمقاييس والجودة  
Saudi Standards, Metrology and Quality Org.

الهيئة العامة للدواء والدواء  
Saudi Food & Drug Authority

الجمارك السعودية  
SAUDI CUSTOMS

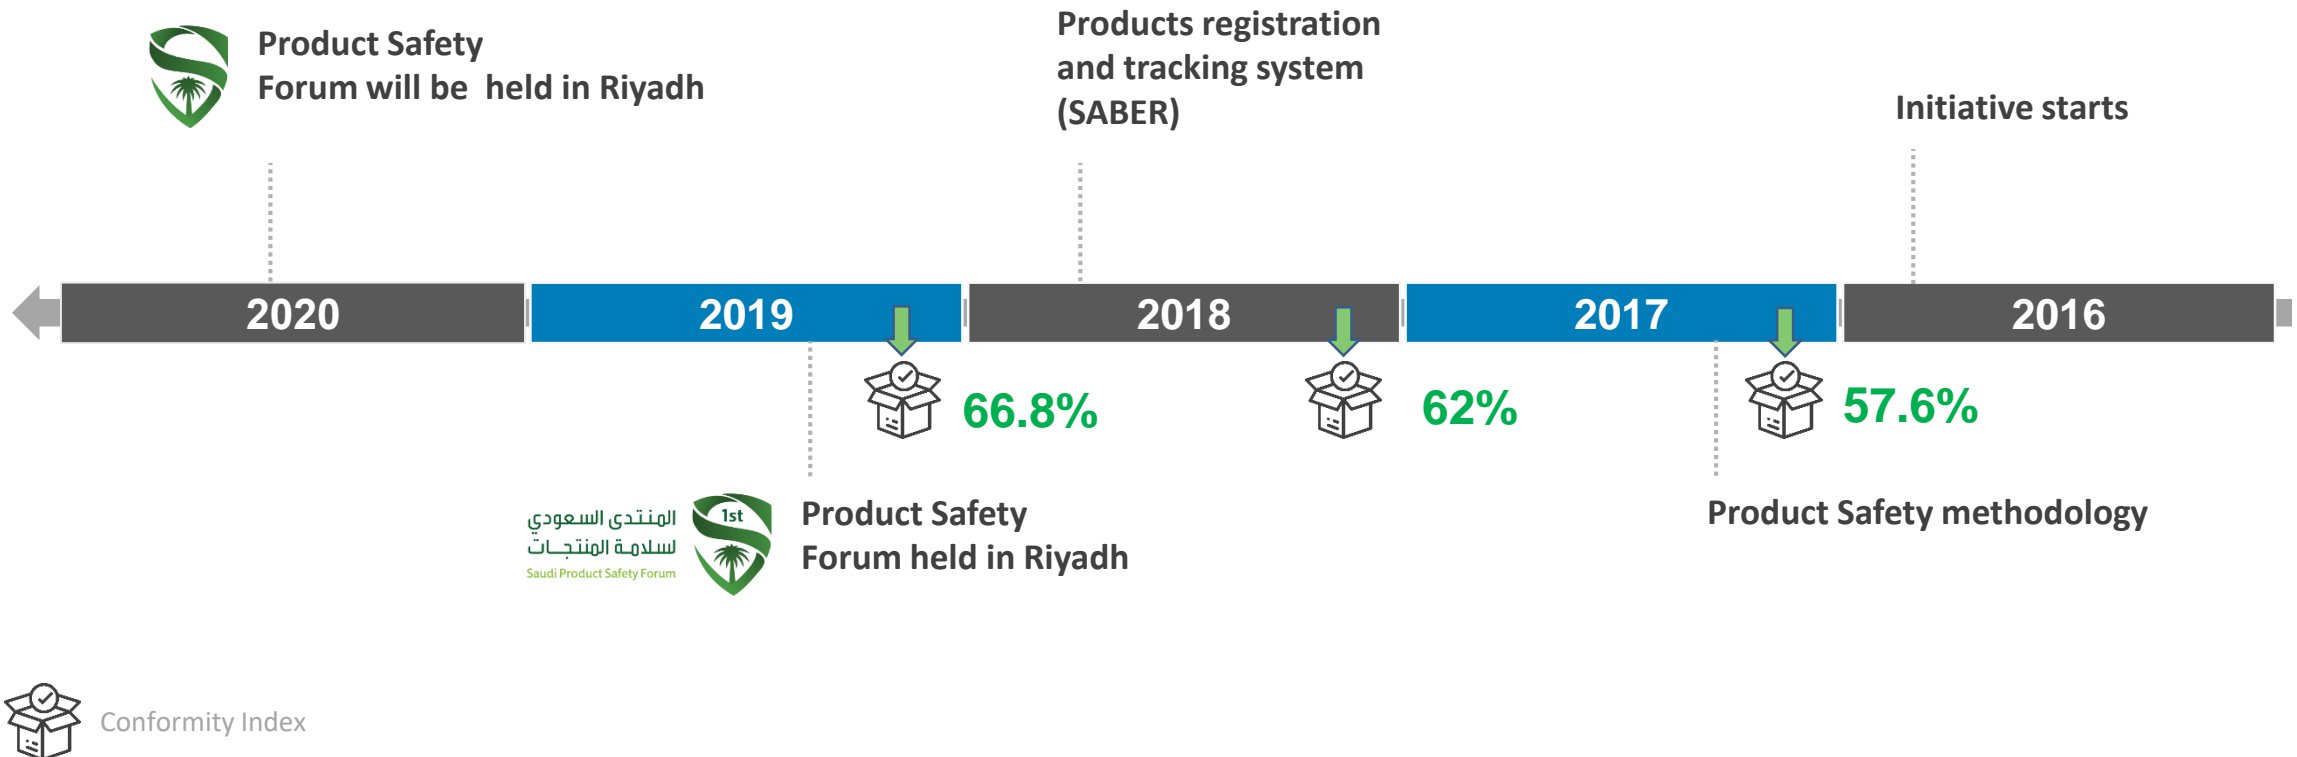

وزارة التجارة والاستثمار  
Ministry of Commerce and Investment

# The initiative started lately in 2016, and our target is to reach 80% of products conforming to standards by 2020

## Time Line & Next Steps

Thank you, ..... next product safety forum
