Investing in Artisanal and Small Scale Mining: A Catalyst for Socio - Economic Development

17th Africa OilGasMine Trade & Finance Conference & Exhibition Sudan | 24 November 2015
Small Mining can be Beautiful

The Artisanal and Small Scale Mining Sector has generally been viewed as an area plagued with challenges more than one ripe with opportunities.

As many African Governments review their policies on artisanal and small scale mining with the African Mining Vision being the overarching framework, the economic importance of the sector for rural and national economies cannot be ignored.

Innovative financing solutions and cross sector linkages are key in building the responsible mining capacity, increasing efficient production / processing and creating job opportunities.
Policy & Legal Frameworks

- Global Sustainable Development Goals
- Agenda 2063
- African Mining Vision
- Country Mining Vision
- Country Mining Policies and Regulatory Frameworks
Global Sustainable Goals Agenda 2030

“...All countries and all stakeholders, acting in collaborative partnership ... to free the human race from the tyranny of poverty and want and to heal and secure our planet.

The 17 Sustainable Development Goals and 169 seek to realize the human rights of all and to achieve gender equality and the empowerment of all women and girls. They are integrated and indivisible and balance the three dimensions of sustainable development: the economic, social and environmental.”
Aiming to encourage discussion among all stakeholders, “Agenda 2063” is an approach to how the continent should effectively learn from the lessons of the past, build on the progress now underway and strategically exploit all possible opportunities available in the immediate and medium term, so as to ensure positive socioeconomic transformation within the next 50 years."
Agenda 2063 - Critical Success Factor

“Agenda 2063 must be seen as a part of the African Renaissance which calls for changes in attitudes, mindsets to inculcate the right set of African values, i.e., discipline, focus, honesty, integrity, transparency, hard work and love for Africa and its people.

Agenda 2063 provides the opportunity for Africa to break away from the syndrome of “always coming up with new ideas but no significant achievements” and set in motion high levels of productivity, growth, entrepreneurship and transformation.”
Africa Mining Vision

“Transparent, equitable and optimal exploitation of mineral resources to underpin broad-based sustainable growth and socio-economic development”
Action Plan for Implementation of the African Mining Vision

**Goal:**
To create a mining sector that harnesses the potential of artisanal and small-scale mining to advance integrated and sustainable rural socio-economic development.

- Improve ASM policies
- Promote a viable ASM
- Upgrade skills and technologies.
Action Plan for Implementation of the African Mining Vision

**Goal:**

To create an investment-friendly mining sector that is a key component of a diversified, vibrant and globally-competitive industrial African economy.

**Linkages, investment & diversification**

- Improve R & D
- Enhance mineral value added
- Promote private sector investment
- Explore SD corridors
The Numbers

ASM provides 13 to 20 million jobs worldwide while a further 80-100 million depend on it for their livelihoods.

In Africa, about 3.7 million are directly engaged in this sub-sector and about 30 million depend on it.

ICMM: Working Together How large-scale mining can engage with artisanal and small-scale miners
ASM Mineral Production

- 15 to 20% of the world’s non-fuel minerals,
- Approximately 18% of Africa’s gold and
- Over 80% of Africa’s gemstones, except diamonds
Mining by any other name ...
The Poverty Trap Vicious Cycle

- Limited Funds for Investment
- Poverty and Unemployment
- Poverty Exacerbation
- Low Earnings
- Equipment Rental & Sponsor Dependence
- Poor Recovery & Low Productivity
- Dependence on Foreign Equipment

Poverty Trap Vicious Cycle
Policy to Action and Implementation

What measures need to be taken to grow the Artisanal and Small Scale Mining Sector sustainably and responsibly?
Figure 2: Indicative prioritization of SDGs for mining companies globally based on aggregating, for each goal, the relevance of each of its targets to mining. Individual cases may deviate from this categorization. Three horizontal categories = degree of impact mining has on goal: very direct, moderately direct, and indirect. Within each category, the farther right a goal is, the greater the impact mining has on its accomplishment. Two vertical categories = predominant focus for making positive impact (enhancement of positive impacts; mitigation of negative impacts). Asterisked icons in practice have greater relevance for mining than the scoring suggests. Icons modified from http://www.globalgoals.org/.
Mining and the 17 SDGs:
Possible Impacts from the perspective of Artisanal and Small Scale Mining*

Enhancement

Indirect

Moderately Direct

Very Direct

Mitigation

*This is a hypothesis. No concrete research or data exists to support this theory. Yet.
Changing Lenses

- Local Investment vs Foreign Direct Investment
- Shift focus from export oriented promotion of Mineral Economy
- Linkages into Domestic Economy e.g.
  - Construction
  - Growing Middle Class and Aesthetic Needs
- Shared Infrastructure Development
Development Minerals

- Construction materials (gravel, sand, clay, limestone etc.)
- Dimension stones (marble, granite, slate, sandstone etc.)
- Industrial minerals (gypsum, potash, salt, bauxite, graphite)
- Low-grade metals, semi-precious and precious stones
The Business of Artisanal & Small Scale Mining

Market Access
- Analysing Local and Cross Border Trade Demands
- Local Market Demand e.g. construction materials

Financial Investment
- Licensing Security of Tenure
- Innovating Finance Products
- Cooperative Schemes
- Credit Lines

Mineral Value Chains
- R&D on Mineral Usage
- Beneficiation Stages and
- Value Added Products

Technical Capacity
- Geological
- Business Management
- Financial Management
- Health & Safety
- Global Protocols
Technical Capacity

- Providing technical assistance to ASM Operators for Geological Mapping and Analysis
- Developing professional Exploration techniques and Mineral Deposit Quantification
- Increasing reporting quality as an input into Investment Feasibility Studies
- Better Mineral Processing Techniques
Financing & Investment

- Equipment and Heavy Machinery
- Working Capital
- Joint Ventures
- Government Policy Shifts
  - Longer Licence Tenure for ASM
  - Upgrade Mechanisms
- Tax & Financial Incentives
Mineral Value Chains

- Research and Development
- Cross – Sector Linkages
  - Agricultural
  - Industrial
- Mineral Usage
Market Access

- International Market Linkages
- Valuation and Quality Information
- Market Trends & Business Intelligence

Telmer K. (2011, May 4) Lecture presented at the first meeting of the OECD hosted working group on gold. "OECD due diligence guidance for responsible supply chains of minerals from conflict affected and high-risk areas."
Thank you for your attention.
