ICC/BASIS

- ICC founded in 1919 with national Committees in over 90 countries provides a global forum for businesses and other organizations to examine and better comprehend the nature and significance of the major shifts taking place in the world economy and business leadership to help governments manage those shifts in a collaborative manner for the benefit of the world economy as a whole.

- ICC launched the Business Action to Support the Information Society (BASIS) in 2006 after the UN World Summit on the Information Society (WSIS Geneva 2003, Tunis 2005) at the request of companies and organizations that saw the importance of global business coordination on Internet and Information and Communication Technologies (ICT) policy issues.

- BASIS members are companies and business associations from across sectors and from both developed and developing countries.
