Mr Martin Labbé,
Senior Officer,
Trade Institutional Development,
International Trade Centre (ITC)
In 2011, the Broadband Commission agreed a set of four Targets:

1. “by 2015, all countries should have a National Broadband Plan or strategy or include broadband in their UAS Definition”
2. “by 2015, entry-level broadband services should be made affordable in developing countries. (<5% of monthly GNI per capita)”
3. “by 2015, 40% of households in developing countries should have Internet access”
4. “by 2015, Internet user penetration should reach 60% worldwide, 50% in developing countries and 15% in LDCs”

In 2013, Commissioners gathered for the 7th meeting and agreed to a new target designed to spur female access to the power of ICT’s:

5. “Achieving gender equality in access to broadband by 2020”
New Framework of Targets

In January 2018, during the World Economic Forum, the Broadband Commission actualized its framework of Targets:

1. **By 2025**, all countries should have a funded National Broadband Plan or strategy, or include broadband in their Universal Access and Service (UAS) Definition.
2. **By 2025**, entry-level Broadband services should be made affordable in developing countries, at less than 2% of monthly Gross National Income (GNI) per capita.
3. **By 2025** Broadband / Internet user penetration should reach: 75% worldwide, 65% in developing countries, and 35% in least developed countries.
4. **By 2025**, 60% of youth and adults should have achieved at least a minimum level of proficiency in sustainable digital skills.
5. **By 2025**, 40% of the world's population should be using digital financial services.
7. **By 2025**, gender equality should be achieved across all targets.
