Space Technology Contributes to the Sustainable Development Goals

Danielle Wood, PhD
Assistant Professor, MIT Media Lab
Director, Space Enabled Research Group
Mission Statement:

Advancing justice in Earth's complex systems using designs enabled by space
Space technology supports the global effort to reach the United Nations’ Sustainable Development Goals

Advancing justice in Earth's complex systems using designs enabled by space
Six space technologies currently support the Sustainable Development Goals

- Satellite Earth Observation
- Satellite Positioning & Navigation
- Human Space Flight & Microgravity Research
- Satellite Communication
- Space Technology Transfer
- Inspiration from Research & Education

Advancing justice in Earth's complex systems using designs enabled by space
Space Enabled applies the six Research Methods and the six Space Technologies in collaborative projects with organizations at four levels:

1. Multilateral Organizations
2. National Governments
3. Regional and City Governments
4. Universities, non-profits and companies

Advancing justice in Earth's complex systems using designs enabled by space.
Space Enabled employs six research methods in support of the Sustainable Development Goals.

- Design
- Art
- Social Science
- Complex Systems Modeling
- Satellite Engineering
- Data Science

Advancing justice in Earth's complex systems using designs enabled by space.
Advancing justice in Earth's complex systems using designs enabled by space

Applying the Space Enabled Design Cycle with Green Keeper Africa in Cotonou, Benin
