At the end of the workshop you will:

- Have an appreciation of the importance of customer/supplier relationships
- Have an understanding of the importance of quality
- Have a clearer understanding of trends and changes in the market place
- Have an understanding of a range of marketing concepts, organisations and tools.
- Think about how these can be used to improve your business

Program

- Introduction - *marketing one of the keys to success*
- Marketing - *Satisfying the Customer*
- Quality is King
- Who is the Customer?
- Marketing trends - *The Present situation*
- Organic Trends
- Marketing concepts and tools for analysis
- Traditional Organic Markets
- Marketing plans
- Review and resolutions

There is no point of going to the expense of growing and harvesting a crop if it cannot be sold at a price that makes the farm economically viable.
**Marketing: Satisfying the Customer**

The most important Rule in marketing:

*Find a need in the market and fill it.*

Successful producers **work from the market backwards**

---

**Quality is King**

**Consistent Quality**

**Presentation**

People buy with their eyes - they return for the taste

**Quality Assurance**

---

**Who is the Customer?**

**Marketing is a Supply Chain**

The wholesaler, The retailer and The consumer.

Each of these are customers

Each of these customers has different needs

---

**Marketing Trends - The Present situation**

2 supermarkets 85% of retail shelf space for sale of products.

Have about 40% of the fresh fruit, vegetables and meat

Increase significantly as consumers find it convenient

Require products that will sell to as many people as possible.

No longer content to just purchase what is available on the market and hope it sells.

Restructured their businesses to reflect this change in thinking.

They are calling it *category management.*
Changing marketing systems

The Four P's

Price, Place, Product and Promotion

- What is my **Product**?
- Where is my **Place**?
- What **Price** do I receive for my product?
- How is my product **Promoted**?

Product and Market Diversity

“Never put all your eggs in one basket”

- Successful farming needs good business principles.
- Always utilise a range of markets.
- Diversity is the key to marketing.

Opportunities

- **General:** Contacts with large packing shed operation
- Son is keen to try new crops
- **Tomatoes:** Increasing market for speciality tomatoes
- Supplying central packing shed operation

Threats

- **Tomatoes:** Limited capital available for grading equipment
- Difficulty in obtaining reliable staff
- **General:** Food safety issues (lack of QA system)
- Power of supermarkets want consistent, volume supply
- **Tomatoes:** Volatile prices
- High costs of production
- Oversupply
Organic Marketing Models

- Relationship marketing
- Competitive advantage
- Product differentiation
- Niche marketing

Traditional Organic Markets

- Local markets
- Farmers markets
- Local shops, restaurants, hotels etc
- Farm Gate Sales
- Home delivery
- CSA
- Food Coops
- Agents and Merchants at Wholesale Markets

Producer Marketing Organisations

The key to developing successful supply chains is establishing successful producer marketing organisations.

Marketing groups
This is a method used by a number of farmers and producers to market commodities.

Marketing Coops
Consist of producer members and are oriented towards national and international marketing.
Can be multi commodity

Organic Valley Family of Farms
1992 $2 million US Dollars
1997 $20 million
2002 $125 million
2003 $200 million

Organic Valley was able to pay price of $20.02 per hundredweight while the conventional pay price was about $11 per hundredweight.

Organic Valley 2002 Accomplishments
- Brought 94 farmers into the Cooperative,
- a nationwide total of 515 farmers.
- Added 3,810 cows being raised organically
- a national total of 17,800 cows.
- Added 15,000 acres into the organic system
- a national total of 75,000 acres.
Emerging Markets
- Marketing groups
- Marketing Coops
- Internet
- Supermarkets
- Agribusiness Chains
- Exports

The Ansoff matrix
Ansoff's matrix provides a framework for analysing market and growth opportunities.

<table>

<th>New</th>
</tr>
</thead>
<tbody>
<tr>
<td>Existing</td>
<td>Focus on current business</td>
<td>Cut production costs, increase yields, become more effective, increase scale of production, shorten marketing chain</td>
<td>Product differentiation Introduce new varieties, change packaging to suit customer, branding, extend seasons (by linking with others)</td>
</tr>
<tr>
<td>New</td>
<td>New markets for existing product</td>
<td>Export markets, food processing, niche markets, food service sector</td>
<td>Try something new Farm stays, chutneys, yabbies</td>
</tr>
</tbody>
</table>

Window of Opportunity
The window of opportunity is another tool
- Market growth, market size, and positive trends
- Business capabilities, quality, packaging
- Capital available, natural resource base

Marketing Plan
A marketing plan should be a living document. This means that it should be adaptable to change and a process of continuous improvement.

What products are needed by the market?
What are the prices being paid for those products?
Who are my customers?
What are the quality specifications they require so that I will get the best prices?
Can I produce it to these quality specifications?
Can I get the product to the customer without a deterioration of quality?
Most importantly - after doing all this - Can I produce it profitably?
The four most important things to obtain a benefit from these workshops

1. Do
2. Do
3. Do
4. Do

Start doing it today
The information from these workshops is worthless unless it is put into practice

World Overview of Organic Markets

- Organic product sales continue to increase despite the global slowdown trade
- Market information from most countries showing a consistent trend of a dynamic and growing industry
- Asia is the fastest growing region in the world
- China and India are fuelling Asia’s growth

Main Growth Areas

- Alcoholic beverages (wine, beer)
- Whole meals (ready to eat takeaway and restaurants)
- Kids food, especially prepared children's snacks
- Fibre products
- Cosmetics and body care products
Potential for High Value Markets

Organic Laos as a Brand
- Sell the concept of an Organic Country – clean environment
- Will have much appeal, credibility and brand recognition

Exports
- Find high value niche rather than low value commodity
- Research products that can be grown easily with high market value

Potential for Laos to Export
- Rice – especially Red Rice and Black Rice
- Fruit & Vegetables - processed and in season
- Fibre products (cotton, alternative fibres including bamboo)
- Essential oils
- Food Herbs and Spices
- Medicinal Herbs
- Coffee, Tea and Wine
- Wild collected – honey, herbs, spices, bamboo shoots, flowers etc
- Organic timber
- Whole prepared meals
- Main limiting factor: Quarantine restrictions

Potential for High Value Markets Laos
- Import replacement – local food at local markets stop foreign debts
- Local Markets – lower costs for producers
- Hotels and restaurants
- Incoming ecotourism opportunity (visitors to food producing areas, farm stays and food markets)

Producer Marketing Organisations
The key to developing successful supply chains is establishing successful producer marketing organisations

Marketing Coops
Consist of producer members and are oriented towards national and international marketing.
Can be multi commodity

Marketing groups
Tend to be less formal/complex than Coops
This is a method used by a number of farmers and producers to market commodities
Farmer Cooperatives

**Organic Valley – the worlds largest organic business**
- Starts January of 1988—a time when family farms were on the brink of extinction.
- A handful of farmers in Southwestern Wisconsin’s coulee region

**Farmer-Owned Cooperative**
- The key to their success is the cooperative business model

**Organic Valley Family of Farms**
- 1992 $2 million US Dollars
- 1997 $20 million
- 2002 $125 million
- 2003 $200 million - Organic Valley was able to pay price of $20.02 per hundredweight while the conventional pay price was about $11 per hundredweight
- 2010 More than $1 billion

**Organic Valley 2002**
- Nationwide total of 515 farmers.

**Organic Valley 2010**
- The 1624 farm families who produce premium quality food products share a voice in the future of the business—because they own it

**Conclusion**
- Fast Growing Market
- High Value Market
- Need for Multiple Markets
- Domestic, Retail, Local and Export
- Need Multiple Products
- Find high value niche rather than low value commodity
- Research products that can be grown easily with high market value
- Need to identify customers

**Thank You**
