Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

General disclaimer

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Where the designations "economy" or "country or area" appear in tables, they cover countries, territories, cities and areas.

The designations "developing", "transition" and "developed" are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process.

Material in this publication may be freely quoted or reprinted, but acknowledgement is obligatory, together with a reference to the document number (TD/STAT.35). A copy of the publication containing the quotation or reprint should be sent to the UNCTAD secretariat.

La cote des documents de l'Organisation des Nations Unies se compose de lettres majuscules et de chiffres. La mention d'une telle cote indique qu'il est fait référence à un document de l'Organisation.

Déni de responsabilité

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent, de la part du secrétariat de l'Organisation des Nations Unies, aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

Les appellations «économie» ou «pays ou zone» figurant dans certaines rubriques des tableaux désignent des pays, des territoires, des villes ou des zones.

Les termes «en développement», «en transition» et «développés» sont utilisés pour plus de commodité dans la présentation des statistiques et n'impliquent pas nécessairement un jugement quant au stade de développement atteint par un pays ou une zone donnée.

The *UNCTAD Handbook of Statistics* provides essential data for analyzing and measuring world trade, investment, international financial flows and development. Reliable statistical information is often considered as the first step during the preparation of making recommendations or taking decisions that countries will commit for many years as they strive to integrate into the world economy and improve the living standards of their citizens. Whether it is for research, consultation or technical cooperation, UNCTAD requires comparable, often detailed economic, demographic and social data, over several decades and for as many countries as possible.

In addition to facilitating the work of the secretariat's economists, the *UNCTAD Handbook of Statistics* also enables other users, such as policy-makers, research specialists, academics, officials from national governments or international organizations, executive managers or members of nongovernmental organizations (NGOs) from developing, transition or developed countries to have access to this rich statistical information. The *Handbook* further offers journalists comprehensive information in a presentation that meets their needs.

This publication is available in printed copy and DVD. In deviation to earlier editions, the online edition of the *Handbook* (www.unctad.org/statistics/handbook) is discontinued and replaced with a new data dissemination system *UNCTADstat* <http://unctadstat.unctad.org>. Not like the *Handbook* which captures statistics at one point of time, *UNCTADstat* will be continuously updated, enriched and providing users with the latest available data. In this regard, users should take caution when comparing data between the *Handbook* and *UNCTADstat*, as the date of update may differ.

Particular acknowledgement is due to the Statistics Division of the Department of Economic and Social Affairs of the United Nations, as well as to other international organizations, for its help in preparing this publication.

Le but du *Manuel de statistiques de la CNUCED* est de fournir les données statistiques essentielles à l'analyse du commerce mondial, de l'investissement, des flux financiers internationaux et du développement. Une information statistique fiable est souvent le préalable à la formulation de recommandations et à la prise de décisions qui engageront les pays pour de longues années dans leur processus d'intégration dans l'économie mondiale et l'amélioration des conditions de leurs peuples. Que ce soit pour la recherche, la concertation ou la coopération technique, la CNUCED a besoin de données économiques, démographiques et sociales comparables et souvent détaillées, disponibles si possible sur plusieurs décennies et sur un maximum de pays.

Au-delà de la mobilisation et de la vérification des données, du calcul d'indicateurs dérivés qui alimentent les travaux des économistes du secrétariat, le *Manuel de statistiques de la CNUCED* est l'occasion de partager une base statistique riche avec les décideurs et les chercheurs, qu'ils soient universitaires, fonctionnaires d'administrations nationales ou d'organisations internationales, cadres d'entreprises ou membres d'organisations non gouvernementales de pays en développement, en transition ou développés. Les journalistes trouvent aussi dans ce manuel une information synthétique dans une présentation bien adaptée à leurs préoccupations.

Le *Manuel* est disponible en version imprimée et DVD. La version en ligne (www.unctad.org/statistics/handbook) qui était disponible les années précédentes, disparaît au profit d'une nouvelle plateforme pour la diffusion des données, *UNCTADstat* <http://unctadstat.unctad.org>. À la différence du *Manuel* qui présente des statistiques figées à un moment donné, *UNCTADstat* sera actualisé et enrichi régulièrement pour mettre à la disposition des utilisateurs les données les plus récentes. À cet égard, il est important de signaler que les données d'*UNCTADstat* et du *Manuel* ne pourront être comparées systématiquement en raison de la différence de date de leur mise à jour et de publication.

Le secrétariat de la CNUCED tient à remercier la Division de statistique du Département des affaires économiques et sociales de l'ONU et diverses organisations internationales du concours qu'elles ont apporté à la préparation de cette publication.

EXPLANATION OF SYMBOLS

| | |
|-----|---|
| 0 | Zero means that the amount is nil or negligible. |
| — | The symbol underscore indicates that the item is not applicable. |
| .. | Two dots indicate that the data are not available or are not separately reported. |
| - | Use of a hyphen between years (e.g. 1985-1990) signifies the full period involved, including the initial and final years. |
| (b) | Break in the series |
| (e) | Estimate |
| (f) | Forecast |
| (p) | Provisional data |
| (r) | Revised data |

Some exceptions are indicated in footnotes.

SIGNIFICATION DES SYMBOLES

| | |
|-----|---|
| 0 | Un zéro signifie que le montant est nul ou négligeable. |
| — | Un tiret signifie que la rubrique est sans objet. |
| .. | Deux points signifient que les données ne sont pas disponibles ou ne sont pas communiquées séparément. |
| - | Le trait d'union entre deux millésimes (par exemple 1985-1990) indique qu'il s'agit de la période tout entière, y compris la première et la dernière année mentionnées. |
| (b) | Interruption de la série |
| (e) | Estimation |
| (f) | Prévision |
| (p) | Donnée provisoire |
| (r) | Donnée révisée |

Les exceptions sont indiquées dans les notes en bas de page.

These notes summarize the content of each part of the *Handbook* according to the revised Table of Contents of the present issue of the *Handbook of Statistics*.

The tables included in this book represent analytical summaries of the full time series contained in the *UNCTAD Handbook of Statistics 2010* on DVD.

PART ONE

International merchandise trade

Tables 1.1 show the value of total exports (f.o.b.) and imports (c.i.f.), expressed in millions of dollars and percentages of the world total, of individual countries and geographical regions (1.1.1), economic groupings (1.1.2), and trade groups (1.1.3). The trade flows shown in table 1.1.1 refer to the General Trade System except for the countries which employ the Special Trade System and which are marked with an asterisk. The General Trade System is used when the statistical territory of a compiling country coincides with its economic territory. Consequently, imports include all goods entering the economic territory of a compiling country and exports include all goods leaving the economic territory of the compiling country. The Special Trade System is used when the statistical territory comprises only a particular part of the economic territory within which "goods may be disposed of without customs restriction". In such a case, imports include all goods entering the free circulation area of the compiling country, which means cleared through customs for home use, and exports include all goods leaving the free circulation area of a compiling country.

Average annual growth rates of international trade derived from table 1.1 are presented in tables 1.2.

Tables 1.3 contain trade balances (exports f.o.b. minus imports c.i.f.) and these balances, as a percentage of imports of individual countries, geographical regions and economic groupings.

Table 1.4 shows the relative importance of trade among group members as compared to the regional or total trade of that group.

PART TWO

International merchandise trade by region

Table 2.1 shows the export and import structure of individual countries by main regions of origin and destination. Data are presented for as many individual countries as possible, while trade partners are grouped in 14 major clusters.

Table 2.2 presents the structure of exports by destination and imports by origin by major commodity groups for 12 selected country groups. The table provides detailed information on the world trade network for 19 regions of origin and destination and six commodity groups.

Totals of international merchandise trade presented in the tables found in parts one and two are not strictly comparable due to complementary but different sources and remaining unallocated trade flows, despite efforts to distribute trade flows by destination, origin and commodity group.

Exports by destination may differ considerably in some cases from data on imports as reported by countries of destination for a variety of factors, among which the following may be of particular importance:

- Most import data are reported on a c.i.f. rather than an f.o.b. basis;
- There is a time lag between the date on which goods are recorded as exports and their arrival at their destination;
- There may be considerable differences between the recorded destination of exports and the actual destination as shown in import statistics.

PART THREE

International merchandise trade by product

Table 3.1 shows the export and import structure of individual economies by commodity groups for selected years for nine commodity groups (total, all food items, agricultural raw materials, fuels, ores and metals, manufactured goods, including chemical products, machinery and transport equipment and other manufactured goods).

Tables 3.2 (A, B and C, respectively) present the structure of exports for the world, for developing and developed economies, by product, at the SITC group (Revision 3, 3-digit) level. Each product share of world exports is calculated for each economic grouping as well as the average annual growth rate and the latter's deviation in relation to the world growth rate.

Table 3.2D establishes for each economy the list of main products exported (SITC group, Revision 3, 3-digit level). Each product's share of total exports of individual countries, geographical regions and the world is also indicated.

Table 3.2E lists major exporters of 70 leading products among developing economies at the SITC group (Revision 3, 3-digit) level as well as corresponding shares in world trade.

Table 3.3 provides concentration indices and structural change indices for exports and imports by product group at SITC (Revision 3, 3-digit) level. The first indicator shows how a product market is concentrated in a few countries or homogeneously distributed among several countries. The structural change indicator shows whether the market share for a given product among export countries has changed significantly when compared with a reference year.

Totals of international merchandise trade presented in the tables of this third part may also differ from the data contained in the first and second parts for the above reasons, to which must be added margins of exports and imports not distributed by commodity group or the use of different product nomenclatures by the exporting and importing countries.

PART FOUR

International merchandise trade indicators

Tables 4.1 include calculation results of concentration and diversification indices for individual countries, geographical regions and economic groupings. This concentration index specifically shows how exports and imports of individual countries or country groupings are concentrated on several products or otherwise distributed in a more homogeneous manner among a series of products. The diversification indicator signals whether the structure of exports or imports by product of a given country or country grouping differs from the structure by product shown for the world.

Tables 4.2 contain volume indices of exports and imports, rounding out the unit values available in tables 1.1 and 1.2, and derived terms of trade and purchasing power of exports calculated at the level of individual countries and geographical regions (4.2.1) and economic groupings (4.2.2).

To improve data coverage, especially for the latest periods, the following procedure was used in the calculation of unit value indices:

- A set of average prices indices at SITC (Revision 3, 3-digit) group level was constructed using *UNCTADstat* Commodity Price Statistics, international and national sources and UNCTAD secretariat estimates;
- At the country level, unit value indices were calculated using current year's trade values as weights at the SITC (Revision 3, 3-digit) level. Trade values are available in table 3.2.

In some instances these indices may differ from the estimates published in official sources, since the main aim is to provide tentative estimates for most developing countries on a comparable basis.

Table 4.3 presents average applied import MFN tariff rates for major categories of non-agricultural and non-fuel products by individual markets.

PART FIVE**International trade in services**

Tables 5.1.1, 5.1.2, and 5.1.3 present the value of total trade in services by individual country, geographical region, economic grouping and trade group. The tables show values of exports (credits) and imports (debits) of services that were derived from statistics on international service transactions as presented in the International Monetary Fund's (IMF's) *Balance of Payments Statistics*. Services are defined as the economic output of intangible commodities that may be produced, transferred and consumed at the same time. However, services cover a heterogeneous range of intangible products and activities that are difficult to capture within a single definition and are sometimes hard to separate from goods. Services are outputs produced to order, and they typically include changes in the condition of the consumers realized through the activities of the producers at the demand of customers. By the time production of a service is completed, it must have been provided to a consumer.

Services figures shown here comprise 11 principal services categories according to the concepts and definitions of the IMF *Balance of Payments Manual (BPM5, 1993)*. These categories cover transport; travel; communications; construction; insurance; financial services; computer and information services; royalties and license fees; other business services; personal, cultural and recreational services; and government services n.i.e. Given the general difficulties involved in statistically capturing certain aspects of the trade in services, the balance-of-payments figures presented here may be somewhat downward-biased as compared with the actual value of the international trade in services. The aggregate data from tables 5.1 include the UNCTAD secretariat's estimates of missing values that are not shown separately.

Table 5.2 indicates 20 major exporters and importers, among developing economies, for each of the 10 principal services sectors as defined in the IMF *Balance of Payments Manual (BPM5, 1993)*, which are transport; travel; communication; construction; computer and information services; insurance; financial services; royalties and licence fees; other business services; and personal, cultural and recreational services. Government services n.i.e. are not included.

Table 5.3 focuses on tourism services in individual countries in recent years. It presents the following statistics: value of total expenditure of visitors, value of visitors' expenditure excluding transportation, number of tourists' overnight stays, and number of arrivals of visitors. All figures refer to non-resident visitors (inbound tourism). The international (non-resident) visitor is an international traveller travelling to a place other than her/his usual environment for a stay of less than 12 months and whose main purpose of a trip is other than exercise an activity remunerated from within the place visited. This includes all persons who arrive in a particular economy to stay for less than a year for business purposes or personal reasons. Tourists are those who stay at least one night in a collective or private accommodation in the country visited. Same-day visitors are persons who do not stay overnight in a country visited.

Table 5.4 concerns international maritime transport. It contains data on the world merchant fleet by flag of registration and by type of ship by region and economy, highlighting the group of major open-registry countries. A ship owner who registers his or her vessel in an open-registry country does not need to have any connection with a country of registry. The number of open-registry countries has varied over the years. The group in this table includes 10 countries. Table 5.4 contains consolidated time series from various issues of the UNCTAD *Review of Maritime Transport*. The Review reports on the worldwide evolution of shipping, ports and multimodal transport related to the major traffics of liquid bulk, dry bulk and containers.

PART SIX**Commodities**

Table 6.1 includes aggregated price indices for primary commodity groups such as food, tropical beverages, vegetable oilseeds and oils, agricultural raw materials and minerals, ores and metals, as well as an all groups price index in current United States dollars. Also included are the annual and quarterly free-market price indices for selected commodities exported by developing economies. The weight of price indices for the above mentioned commodity groups (2000=100) are based on the value of exports of developing countries from 1999 to 2001.

Table 6.2 presents instability indices and trends in free-market prices for selected primary commodities that are of particular interest to developing economies.

PART SEVEN**International finance**

Table 7.1 presents summaries of the current account of the balance of payments for individual countries and territories. Balance-of-payments current account data cover all transactions between residents and non-residents of a reporting economy, involving economic values and mainly concerning goods, services, income and current transfers. Data on these principal categories, with an additional detail on direct investment income, are covered in the table. For information about the concepts regarding the categories mentioned, please see the IMF *Balance of Payments Manual (BPM5, 1993)*.

Table 7.2 contains summaries of the capital and financial account of the balance of payments for individual economies. Capital and financial account figures cover transactions in foreign assets and liabilities. Assets represent claims on non-residents, while liabilities are indebtedness to non-residents of the reporting economy. No valuation changes or other non-transaction modifications of net foreign assets are reflected in these accounts. Capital account includes capital transfers and acquisition and disposal of non-produced, non-financial assets. Financial account covers investments (direct, portfolio and other) and reserve assets (comprised of monetary gold, SDRs, foreign exchange and others). Statistics on these principal categories of the capital and financial account are included in the *Handbook*. Detailed notes with explanations of categories and terminology used are provided after the table. For more information, see the IMF *Balance of Payments Manual (BPM5, 1993)*.

Tables 7.3.1, 7.3.2 and 7.3.3 contain information on foreign direct investment (FDI) inflows and outflows by individual country, geographical region, economic grouping and trade group. These figures correspond to the Statistical Annexes of the UNCTAD *World Investment Report 2010*. FDI is defined as an investment involving a long-term relationship and reflecting a lasting interest in and control by a resident entity in one economy (foreign direct investor or parent enterprise) of an enterprise resident in a different economy (FDI enterprise or affiliate enterprise or foreign affiliate). Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates. A direct investment enterprise is defined as an incorporated or unincorporated enterprise in which the direct investor, resident in another economy, owns 10 percent or more of the ordinary shares or voting power (or the equivalent).

Table 7.4 presents values of receipts and payments of total remittances for individual developing economies. It also shows total remittances as percentage of international trade (exports and imports, balance-of-payments data). The *Balance of Payments Manual (BPM5, 1993)* classifies workers' remittances, compensation of employees and migrants' transfers separately. In this table, their sum is given in order to present a clearer picture of the flows that enter or exit economies via transactions by migrants and temporary or cross-border workers. *BPM5* defines workers' remittances as goods and financial instruments transferred by migrants living and working (being residents) in a new economy to residents of the economy in which the migrants formerly resided. A migrant must live and work in the new economy for more than one year to be considered a resident there. Compensation of employees includes wages, salaries and other benefits, in cash or in kind, earned by individuals – in economies where they are not residents – for work performed for residents of those economies. It covers seasonal and other short-term workers and border workers. Migrants' transfers cover flows of goods and changes in financial items that arise from migration (change of residence for at least one year).

Table 7.5 presents data on total international reserves (including gold) of developing countries by country, region and economic grouping. Other calculations included show months of imports that these reserves could finance at current import levels, as well as the annual change in total reserves. According to the IMF definition, international reserves consist of the sum of the country's foreign exchange, its reserve position in the IMF, the monetary gold reserves, and the United States dollar value of SDR holdings by its monetary authorities.

Tables 7.6 give a summary of official financial flows by type of flow, country, region and economic grouping. Flows from bilateral and multilateral sources are shown, as recorded by the Organization for Economic Cooperation and Development (OECD) Development Assistance Committee (DAC).

Tables 7.7 present time series on the external long-term indebtedness of developing economies. They also provide a detailed breakdown of public and publicly guaranteed debt by source of lending. External debt data in this table are based on the Debtor Reporting System (DRS) maintained by the World Bank.

PART EIGHT

Development indicators

Tables 8.1 provide information on total and per capita nominal gross domestic product (GDP) (in United States dollars) by individual country, geographical region and economic grouping. The GDP figures in dollars are derived from GDP data provided in national currencies. The prevailing annual average market exchange rates, as reported by IMF, have been used for the conversion from national currencies to dollars.

Tables 8.2 contain annual average growth rates of total and per capita real GDP by individual country, geographical region and economic grouping. The growth rates are based on GDP in United States dollars at constant 1990 prices.

Tables 8.3 provide data on GDP by type of expenditure and kind of economic activity by country, geographical region and economic grouping.

Tables 8.4.1 and 8.4.2 provide some estimates on population and labour force: total population, urban population (as a percentage of total population), total labour force, female labour force (as a percentage of total labour force), total agriculture labour force and female labour force (as a percentage of total agriculture labour force). The figures for certain groups may be different from those published by the sources cited when the UNCTAD definitions for those groups are different.

Basic population and labour data are rounded out by the demographic indicators in tables 8.5.1 and 8.5.2: population growth rate, natural increase rate per 1 000 inhabitants, net migration rate per 1 000 inhabitants, crude birth and death rate per 1 000 inhabitants, infant mortality rate per 1 000 live births and life expectancy at birth. The figures for certain groups may be different from those published by the sources cited when the UNCTAD definitions for those groups are different.

OTHER NOTES

Unless otherwise specified, country aggregates are the sums of the relevant country data by group. Calculations of aggregates may in some cases include data estimated by the UNCTAD secretariat that are not necessarily all reported separately.

Because of rounding, details and percentages in tables do not necessarily add up to totals.

Data were collected and checked to ensure that they matched the geographical coverage of the countries, as described at the beginning of the *Handbook*. However, some gaps could not be avoided due to data unavailability and are described in the notes at the end tables.

Unless otherwise stated, dollars (\$) refer to United States dollars and data in dollars are expressed in current United States dollars of the year to which they refer.

Average annual growth rates are defined as the coefficient b in the exponential trend function $y = ae^{bt}$ where t stands for time. This method takes all observations in a period into account. Therefore, the resulting growth rates reflect trends that are not unduly influenced by exceptional values.

The country distributions presented are for statistical convenience only and follow those used by the Statistics Division, Department of Economic and Social Affairs (DESA), of the United Nations. They are grouped by economic criteria or by adhesion to commercial agreements for the purpose of statistical analysis and research.

The term “economies”, as used in this publication, refers to regions, countries and territories.

Country-level data are included where statistics have been reported or where it was possible to make an estimate.

1. Geographical regions

This section includes all countries and territories divided into three major categories: developing countries, transition economies and developed economies. Each category is further divided by geographical regions.

1) Developing economies:

This category includes countries and territories in America, Africa, Asia and Oceania not specified below. The geographical regions are further subdivided into subregions in order to present more detailed statistics. Exceptions are specified in table footnotes.

2) Transition economies

3) Developed economies:

This category is subdivided into 4 geographical regions: America, Asia, Europe and Oceania.

World' total represents the sum of the figures of the three above-mentioned groups plus the figures of a group of territories and partners not elsewhere classified, whose composition is detailed below.

Data of these territories are included in the world total if they have been reported but are not presented individually or in any group, either by geography, economy or trade.

The composition of the group is as follows:

- Territories: Antarctica, Bouvet Island, British Antarctic Territory, British Indian Ocean Territory, Christmas Island, Cocos (Keeling) Islands, French Southern Territories, Heard and McDonald Islands, Norfolk Island, Pitcairn, Saint Barthélemy, Saint Martin (French part), South Georgia and South Sandwich Islands, United States Minor Outlying Islands, and United States Miscellaneous Pacific Islands.
- Partners: 'Confidential information and differences', 'Neutral zone', 'Free zones', 'Bunkers', and 'ship stores'. These specific partners are only used in the merchandise trade tables.

The total of each group presented in the *Handbook* is also completed, should the case arise, with data that have not been allocated to the different elements composing the group.

2. Economic groupings of developing countries

The *Handbook* provides numerous and varied groups of countries and territories in order to provide easy access to the statistics necessary for socio-economic analysis and development research.

Developing economies are presented at three levels of aggregation: the total group, the group excluding China (referring to continental China) and the group excluding the least developed countries.

The category of heavily indebted poor countries (those economies benefiting from the HIPC debt reduction initiative of the World Bank and the International Monetary Fund) includes 40 countries.

LDCs and landlocked developing countries are recognized by the United Nations as categories that require special attention from the international community.

Since 1994, the United Nations recognize has recognized the particular problems of the Small Island Developing States (SIDS), even though the criteria for drawing up an official list of SIDS have not yet been determined. The unofficial list is used by UNCTAD for analytical purposes only.

The developing economies are also categorized into three subgroups according to their per capita GDP in 2000: high-income, middle-income and low-income. This breakdown is based on GDP and population data available in 2009.

The group of major petroleum exporters consists of countries whose share of petroleum and petroleum products was not less than 50 per cent of their total exports, and whose exports of these products amounted to a minimum average of \$2 billion for the period 2003–2005. This group is divided into three geographical zones: Africa, America and Asia.

The group of major manufactured goods exporters, divided into two geographical zones, America and Asia, consists of economies whose share of manufactured products was not less than 50 per cent of their total exports, and whose exports of these products amounted to a minimum average of \$22 billion for the period 2003–2005.

The composition of the groups of emerging economies (in America and Asia) and newly industrialized economies (composed of first and second tier) corresponds to UNCTAD's *Trade and Development Report*.

The different geographical regions are also presented at various levels of aggregation:

- Africa: Northern Africa excluding Sudan, sub-Saharan Africa, including Sudan, including and excluding South Africa.
- America: Central America and Greater Caribbean Islands excluding Puerto Rico, including and excluding Mexico, South America and Central America, and South America excluding Brazil.
- Asia: Eastern and South-Eastern Asia excluding China, and Southern Asia excluding India.

3. Trade groups and interregional groupings

Statistics of trade groups with special analytic interest are presented according to their pertinence. These groupings include all relevant economies and are subclassified by geographical regions, with the exception of following interregional groups: African, Caribbean and Pacific Group of States; Asia–Pacific Economic Cooperation; Black Sea Economic Cooperation; and Commonwealth of Independent States.

Ces notes générales présentent le contenu de chaque tableau du *Manuel de statistiques* ainsi que les modifications introduites dans cette nouvelle édition, s'il y a lieu.

Les tableaux inclus dans cette publication constituent un résumé analytique des séries chronologiques complètes publiées dans le *Manuel de statistiques 2010 de la CNUCED* sur DVD.

PREMIÈRE PARTIE

Commerce international des marchandises

Les tableaux 1.1 donnent la valeur des exportations (f.a.b.) et des importations (c.a.f.) totales de marchandises, exprimée en millions de dollars et en pourcentage du monde, des pays et régions géographiques (1.1.1), groupements économiques (1.1.2) et groupements commerciaux (1.1.3). Les flux du commerce présentés dans le tableau 1.1.1 se réfèrent au Système du Commerce Général, à l'exception des pays et territoires qui utilisent le Système du Commerce Spécial et qui sont munis d'un astérisque. Le Système du Commerce Général est utilisé lorsque le territoire statistique d'un pays coïncide avec son territoire économique, et en conséquence, les importations comprennent tous les biens admis sur le territoire du pays déclarant et les exportations tous les biens qui le quittent. Le Système du Commerce Spécial est utilisé lorsque le territoire statistique ne comprend qu'une partie du territoire économique à l'intérieur de laquelle « les biens peuvent être écoulés librement sans restriction douanière ». Dans ce cas, les importations comprennent tous les biens qui entrent dans la zone de libre circulation du pays déclarant, c'est-à-dire qui ont été dédouanés pour mise à la consommation et les exportations comprennent tous les biens qui quittent la zone de libre circulation du pays déclarant.

Les taux d'évolution annuels moyens du commerce international des marchandises, calculés à partir des valeurs des tableaux 1.1, figurent dans les tableaux 1.2.

Les tableaux 1.3 présentent les balances commerciales (exportations f.a.b. moins importations c.a.f.), ainsi que ces mêmes balances en pourcentage des importations des pays, régions géographiques et groupements économiques.

Le tableau 1.4 indique l'importance des échanges entre pays membres de groupements commerciaux par rapport aux exportations régionales et totales de ces groupements.

DEUXIÈME PARTIE

Commerce international des marchandises par régions

Le tableau 2.1 présente la structure des exportations et des importations des pays par régions de destination et d'origine. Le plus grand nombre possible de pays en développement sont inclus tandis que les partenaires commerciaux sont regroupés en 14 groupes considérés comme particulièrement importants pour l'analyse du commerce international.

Le tableau 2.2 indique la structure des exportations par destination ainsi que des importations par origine et par groupes de produits pour le monde et une sélection de 12 groupements de pays. Le tableau fournit une information détaillée sur le réseau du commerce international avec le monde, 19 régions d'origine et de destination, et pour six différents groupes de produits.

Les totaux du commerce international des marchandises présentés dans les tableaux des première et deuxième parties ne sont pas strictement comparables en raison de sources complémentaires mais différentes et d'une marge d'exportations et d'importations non distribuées, en dépit des efforts déployés pour répartir les flux commerciaux par destinations et origines.

Les exportations ventilées par destinations peuvent accuser un écart parfois considérable par rapport aux importations déclarées par les pays destinataires en raison de divers facteurs dont les plus importants sont les suivants :

- Les importations sont déclarées en principe "valeur c.a.f." plutôt que "valeur f.a.b".;
- Les importations de marchandises peuvent arriver à destination et être enregistrées longtemps après la date de leur enregistrement à l'exportation ;

- D'importantes différences peuvent exister entre la destination des exportations déclarée par les pays exportateurs et la destination réelle telle qu'indiquée dans les statistiques d'importation.

TROISIÈME PARTIE

Commerce international des marchandises par produits

Le tableau 3.1 fournit la structure des exportations et des importations des pays par produits classés en 9 groupes (total, produits alimentaires, matières premières d'origine agricole, combustibles, minerais et métaux, produits manufacturés, dont produits chimiques, machines et matériel de transport, articles manufacturés divers) pour plusieurs années.

Les tableaux 3.2A, B et C présentent respectivement les exportations par produits du monde, des économies en développement et développées, à un niveau très détaillé (CTCI révision 3, position à trois chiffres). Les parts que représente chaque produit dans les exportations du monde et de la région, sont calculées pour chaque groupe d'économies, ainsi que le taux annuel de croissance et l'écart de ce dernier par rapport au taux de croissance mondial.

Le tableau 3.2D établit, pour chaque économie, la liste des principaux produits qu'elle exporte (CTCI révision 3, position à trois chiffres). La part de chaque produit dans le total des exportations du pays, de la région et du monde est également indiquée.

Le tableau 3.2E liste les plus gros exportateurs de 70 produits parmi les produits les plus exportés par les économies en développement (CTCI révision 3, position à trois chiffres), ainsi que les parts correspondantes dans le commerce mondial.

Le tableau 3.3 fournit les indices de concentration et de changements structurels des exportations et des importations des produits au niveau de la CTCI (révision 3, position à trois chiffres). Le premier indicateur a vocation à montrer comment le marché d'un produit est concentré sur quelques pays ou réparti de façon plus homogène entre les pays. L'indicateur de changement structurel indique si la répartition du commerce d'un produit entre les pays exportateurs ou importateurs a connu une évolution importante par rapport à une année de référence.

Les totaux du commerce international des marchandises présentés dans les tableaux de cette troisième partie peuvent aussi être différents des données des première et deuxième parties pour les raisons précédemment citées, auxquelles il convient d'ajouter des marges d'exportations et d'importations non distribuées par groupes de produits ou l'utilisation de nomenclatures différentes de produits par le pays exportateur et le pays importateur.

QUATRIÈME PARTIE

Indicateurs du commerce international des marchandises

Les tableaux 4.1 contiennent les résultats du calcul des indices de concentration et de diversification des pays, régions géographiques et groupements économiques. Cet indice de concentration a vocation à montrer comment les exportations et importations d'un pays ou groupe de pays sont concentrées sur quelques produits ou réparties de façon plus homogène sur une gamme de produits. L'indicateur de diversification indique si la structure par produits des exportations ou importations d'un pays ou groupe de pays diverge de la structure par produits observée au niveau du monde.

Les tableaux 4.2 fournissent les indices de volume des exportations et des importations complétant ainsi l'information en valeur disponible dans les tableaux 1.1 et 1.2, les indices de la valeur unitaire des exportations et importations ainsi que les indices de termes de l'échange et le pouvoir d'achat des exportations dérivés des indices de valeur unitaire. Ces indices sont calculés au niveau des pays et régions géographiques (4.2.1) et des groupements économiques (4.2.2).

Afin d'améliorer la couverture des données et spécialement pour les années récentes, la méthode suivante a été utilisée pour le calcul des valeurs unitaires :

- Un ensemble d'indices de prix moyens au niveau des groupes de la CTCI (révision 3, position à 3 chiffres) a été construit en utilisant des données provenant de *UNCTADstat* Statistiques des produits de base, des sources internationales et nationales ainsi que des estimations du secrétariat de la CNUCED.

- Au niveau des pays individuels, les indices de la valeur unitaire ont été calculés en utilisant comme pondération les valeurs des exportations et des importations de l'année courante disponibles dans la table 3.2 au niveau de la CTCI (révision 3, position à 3 chiffres).

Dans certains cas ces indices peuvent différer des estimations publiées dans les sources officielles, le but principal étant de fournir des estimations approximatives et comparables pour la plupart des pays en développement.

Le tableau 4.3 contient les données sur les droits de douane NPF moyens appliqués à l'importation des principales catégories de produits non-agricoles et non-pétroliers, par marchés individuels.

CINQUIÈME PARTIE

Commerce international des services

Les tableaux 5.1.1, 5.1.2 et 5.1.3 présentent la valeur des exportations et des importations totales des services par pays, par régions géographiques, groupements économiques et groupements commerciaux. Les tableaux incluent les valeurs des exportations (crédits) et des importations (débits) des services qui proviennent des statistiques sur les transactions internationales de services, telles qu'elles sont présentées dans les *Statistiques de la balance des paiements* du FMI. Les services sont définis comme rendements économiques de produits intangibles qui peuvent être produits, transférés et consommés au même moment. Cependant, les services recouvrent un groupe large et hétérogène de produits et d'activités que l'on peut difficilement englober dans une définition. Parfois, la démarcation entre services et marchandises n'est pas aisée. Les services sont produits sur commande et ont généralement pour résultat un changement des conditions des consommateurs qui ont demandé ces services. Pour que la production d'un service soit terminée, il doit être fourni au consommateur.

Les chiffres couvrent les 11 catégories principales de services conformément à la définition du *Manuel de la balance des paiements* du FMI (*MBP5, 1993*). Ces catégories comprennent : les transports; les voyages; les communications; le bâtiment et les travaux publics; les assurances; les services financiers; l'informatique et l'information; les redevances et droits de licence; les autres services aux entreprises; les services personnels, culturels et relatifs aux loisirs; et les services fournis ou reçus par les administrations publiques. De manière générale, les difficultés à mesurer statistiquement la valeur du commerce des services persistent et les données de la balance des paiements sur les services peuvent être inférieures à la valeur des transactions réelles. Les agrégats inclus dans le tableau 5.1 comprennent les valeurs manquantes, estimées par le secrétariat de la CNUCED, qui ne sont pas présentées séparément.

Le tableau 5.2 liste, parmi les économies en développement, les 20 plus gros exportateurs et importateurs pour chacun des 10 secteurs principaux du commerce des services, c'est-à-dire les transports; les voyages; les communications; le bâtiment et les travaux publics; l'informatique et l'information; les assurances; les services financiers; les redevances et droits de licence; autres services aux entreprises; et les services personnels, culturels et relatifs aux loisirs. Les services fournis ou reçus par les administrations publiques ne sont pas inclus.

Le tableau 5.3 fait apparaître les données sur les services liés au tourisme en présentant, par pays et pour les années récentes, les statistiques suivantes: valeur des dépenses totales des visiteurs, valeur des dépenses des visiteurs sans le coût du transport, nombre de nuitées des touristes et nombre d'arrivées des visiteurs. Tous les indicateurs se réfèrent aux visiteurs non-résidents (visiteurs internationaux). Le visiteur international est un voyageur voyageant dans une économie où il n'est pas résident, pour y rester moins de 12 mois et dont le but principal du voyage est d'exercer une activité qui n'est pas rémunérée par une entité résidente dans l'économie visitée. Cela inclut des personnes qui

arrivent sur le territoire d'une économie pour y rester moins d'une année pour affaires ou pour des raisons personnelles. Les touristes sont ceux qui séjournent dans le pays visité au moins une nuit dans un logement collectif ou privé. Les visiteurs d'une journée sont des personnes qui ne passent pas la nuit dans le pays visité.

Le tableau 5.4 concerne le transport maritime international. Il contient des données sur la flotte marchande mondiale par pavillons d'immatriculation et par types de navires et fait spécialement ressortir le groupe des principaux pays de libre immatriculation. Un propriétaire qui enregistre son navire dans un pays "libre d'immatriculation" ne doit avoir aucune relation avec ce pays. Le nombre de pays de libre immatriculation a changé au cours des années. Dans le tableau 5.4, le groupe comprend 10 pays. Le tableau incorpore les informations consolidées provenant des différentes éditions de la publication *Review of Maritime Transport*. Elle rend compte de l'évolution mondiale du transport multimodal, portuaire et maritime concernant les principaux trafics de vrac liquides, de vrac secs et de conteneurs.

SIXIÈME PARTIE

Produits de base

Le tableau 6.1 donne les indices annuels et trimestriels de prix en dollars courants sur le marché libre d'une sélection de produits de base exportés par les économies en développement. Ces indices sont aussi disponibles au niveau des groupes de produits de base suivants : produits alimentaires, boissons tropicales, huiles et graines oléagineuses, matières premières d'origine agricole, minéraux, minerais et métaux ainsi qu'un indice de l'ensemble. Les pondérations ont été calculées à partir de la valeur des exportations des pays en développement de 1999 à 2001 et les indices en utilisant 2000=100 comme année de base.

Le tableau 6.2 complète l'information sur les prix des produits de base par les indices d'instabilité et les tendances de prix sur le marché libre d'une sélection de produits de base ayant une importance particulière pour les économies en développement.

SEPTIÈME PARTIE

Finance internationale

Le tableau 7.1 contient un état récapitulatif du «compte courant» de la balance des paiements des pays et territoires individuels. Les données du compte des transactions courantes de la balance des paiements recouvrent toutes les transactions, entre entités résidentes et non-résidentes, portant sur des valeurs économiques, concernant notamment les biens, les services, les revenus et les transferts courants. Ce tableau comprend les statistiques sur ces catégories principales, y compris le détail additionnel sur les revenus d'investissement direct étranger. Pour l'information sur les concepts concernant les catégories mentionnées, veuillez vous référer au *Manuel de la balance des paiements* du FMI (*MBP5, 1993*).

Le tableau 7.2 fait apparaître l'état récapitulatif du «compte de capital et d'opérations financières» de la balance des paiements des économies individuelles. Les chiffres des comptes de capital et des comptes financiers couvrent les transactions en avoirs et engagements étrangers. Les avoirs représentent des créances sur les non-résidents et les engagements des dettes envers les non-résidents. Toutes les réévaluations et autres variations d'avoirs et d'engagements qui ne reflètent pas des transactions sont exclues du compte de capital et d'opérations financières. Le compte de capital est subdivisé en transferts de capital et en acquisitions et cessions d'avoirs non-financiers non produits. Le compte financier recouvre les investissements (directs, de portefeuille et autres) et les avoirs de réserve (or monétaire, DTS, devises et autres créances). Ce tableau comprend les statistiques sur ces catégories principales du «compte de capital et d'opérations financières».

Pour plus d'information sur les concepts concernant les catégories mentionnées, veuillez vous référer au *Manuel de la balance des paiements* du FMI (MBP5, 1993).

Les tableaux 7.3.1, 7.3.2 et 7.3.3 sont consacrés aux investissements directs en provenance de l'étranger (IED). Ils représentent les flux entrants et sortants de l'IED par pays et régions géographiques, groupements économiques et groupements commerciaux. Les chiffres correspondent aux données contenues dans l'Annexe statistique du *World Investment Report 2010* de la CNUCED. L'investissement étranger direct (IED) est un investissement impliquant une relation à long terme et témoignant de l'intérêt durable d'une entité résidant dans un pays (investisseur étranger direct ou société mère) à l'égard d'une entreprise résidant dans un autre pays (entreprise bénéficiaire, entreprise affiliée, ou encore filiale étrangère). Cet investissement englobe à la fois la transaction initiale entre les deux entités et toutes les transactions ultérieures entre elles et entre filiales étrangères, qu'elles soient constituées ou non en sociétés. L'entreprise d'investissement direct est définie comme une entreprise dotée ou non de la personnalité morale, dans laquelle un investisseur direct qui est résident d'une autre économie détient au moins 10% des actions ordinaires ou des droits de vote (ou l'équivalent).

Le tableau 7.4 fournit les informations sur les envois de fonds des travailleurs pour les principales économies en développement concernées. Ces données sont également communiquées en pourcentage du commerce international (total des exportations et importations). Le *Manuel de la balance des paiements* du FMI (MBP5, 1993) classe séparément les envois de fonds des travailleurs, la rémunération des salariés et les transferts des migrants. Dans ce tableau leur somme est présentée afin de mieux cerner les flux entrants dans - ou sortants d' - une économie à travers les transferts liés aux travailleurs migrants ou autres travailleurs employés à l'étranger à court-terme. Selon la définition du MBP5 les envois de fonds des travailleurs sont les transferts de biens ou d'actifs financiers effectués par les migrants qui vivent et travaillent (considérés comme résidents) dans une économie en faveur des résidents de leur ancien pays de résidence. Un migrant doit vivre et travailler dans une nouvelle économie durant plus d'une année pour y être considéré résident. La rémunération des salariés comprend les salaires, traitements et autres prestations, en numéraire ou en nature, gagnés par les particuliers - dans une économie où ils ne sont pas résidents - pour un travail exécuté au profit d'une économie de cette économie. Les salariés peuvent être des travailleurs saisonniers ou d'autres travailleurs à temps limité ou encore des travailleurs frontaliers. Les transferts des migrants couvrent les flux de biens et les variations des actifs financiers qui résultent de la migration (changement de résidence pour une durée d'un an au moins).

Le tableau 7.5 fait apparaître les données relatives aux réserves internationales (y compris l'or) des économies en développement par pays, par régions et par groupements économiques. Les mois d'importation que ces réserves peuvent financer, dans la situation actuelle du commerce international du pays, sont également indiqués, ainsi que la variation annuelle des réserves totales. Selon la définition du FMI, les réserves totales représentent la somme des avoirs du pays en devises, la position de ses réserves au FMI, les réserves de l'or monétaire, et la valeur en dollars des États-Unis des avoirs en DTS de ses autorités monétaires.

Les flux financiers publics sont présentés dans les tableaux 7.6 par catégories de flux, pays, régions géographiques et groupements économiques. La définition des flux bilatéraux et multilatéraux est conforme aux publications du Comité d'aide au développement (CAD) de l'OCDE.

Les tableaux 7.7 contiennent les données sur la dette extérieure à long terme des principaux groupes d'économies en développement, en particulier la ventilation détaillée de la dette publique ou garantie par l'État par sources d'emprunt. Les données de la dette extérieure présentées dans ces tableaux se basent sur le Système de notification des pays débiteurs (SNPD), géré par la Banque mondiale.

HUITIÈME PARTIE

Indicateurs du développement

Les tableaux 8.1 fournissent le produit intérieur brut (PIB) nominal total et par habitant des pays, régions géographiques et groupements économiques. Les données de PIB en dollars ont été obtenues à partir des valeurs de PIB exprimées à l'origine en monnaies nationales. Les taux de change moyens annuels sur le marché libre, obtenus des séries statistiques du FMI, ont été utilisés pour la plupart des pays lors de la conversion en dollars.

Les taux annuels moyens de variation du PIB réel total et du PIB réel par habitant des pays, régions géographiques et groupements économiques sont disponibles dans les tableaux 8.2. Les taux de croissance se basent sur le PIB aux prix constants en dollars de l'année 1990.

Le PIB total est décomposé par catégories de dépenses et la valeur ajoutée totale par branches d'activité économique dans les tableaux 8.3 pour les pays, régions géographiques et groupements économiques.

Les tableaux 8.4.1 et 8.4.2 présentent des estimations sur la population et la main-d'œuvre : population totale, population urbaine (en pourcentage de la population totale), main-d'œuvre totale, main-d'œuvre féminine (en pourcentage de la main-d'œuvre totale), main-d'œuvre dans l'agriculture, main-d'œuvre féminine (en pourcentage de la main-d'œuvre totale dans l'agriculture). Les chiffres pour certains groupes peuvent être différents de ceux publiés par la Division de la population lorsque les définitions de la CNUCED de ces groupes sont différentes.

Les données de base sur la population et la main-d'œuvre sont complétées par les indicateurs sur la démographie des tableaux 8.5.1 et 8.5.2 : taux d'accroissement de la population, taux d'évolution naturelle par 1 000 habitants, taux net de migration par 1 000 habitants, taux de natalité et de mortalité bruts pour 1 000 habitants, taux de mortalité infantile pour 1 000 naissances vivantes, espérance de vie à la naissance. Ces données estimées pour certains groupes peuvent être différentes de celles publiées par la Division de la population lorsque les définitions de la CNUCED de ces groupes sont différentes.

AUTRES NOTES

Sauf indication contraire, les agrégats de pays sont obtenus en sommant les données des pays composant le groupe. Les calculs d'agrégats peuvent dans certains cas inclure des données estimées par le secrétariat de la CNUCED qui ne sont pas nécessairement toutes rapportées séparément.

Par ailleurs, la somme des chiffres et des pourcentages indiqués dans les tableaux ne correspond pas nécessairement aux totaux en raison des arrondis.

Les données ont été collectées et vérifiées pour qu'elles correspondent à la couverture géographique des pays, telle qu'elle est décrite en début de *Manuel*. Toutefois certains écarts n'ont pu être évités en fonction de la disponibilité des données. Ils sont alors décrits dans les notes de fin de tableau.

Sauf indication contraire, le terme «dollar» s'entend du dollar des États-Unis d'Amérique et les données en dollars sont exprimées en dollars courants de l'année à laquelle elles se réfèrent.

Les taux moyens d'évolution annuelle sont définis par le coefficient b de la fonction exponentielle de tendance $y = ae^{bt}$, où t représente le temps. Cette méthode permet de prendre en compte toutes les observations concernant une période donnée sans que le taux de croissance obtenu ne soit trop affecté par des valeurs exceptionnelles.

Les pays et territoires sont présentés suivant des critères géographiques conformes à ceux de la Division de statistique, Département des affaires économiques et sociales (DAES) de l'ONU. Les pays et territoires sont aussi regroupés suivant des critères économiques ou d'adhésion à des accords commerciaux à des fins d'analyse statistique et de recherche.

Dans cette publication, le terme «économie» couvre les régions, les pays et les territoires.

Les pays sont présentés dans les tableaux s'ils ont communiqué des données ou si des estimations ont pu être calculées.

1. Régions géographiques

Les pays et territoires sont répartis en trois grandes catégories, les économies en développement, les économies en transition et les économies développées, elles-mêmes subdivisées suivant des critères géographiques.

1) Économies en développement :

Ces économies sont réparties entre quatre grandes régions géographiques : Afrique, Amérique, Asie et Océanie elles-mêmes subdivisées en sous-régions pour permettre la présentation de statistiques plus détaillées. Les exceptions à ce classement que l'on retrouve dans certains tableaux sont indiquées dans des notes.

2) Économies en transition

3) Économies développées :

Ces économies sont réparties entre quatre grandes régions géographiques : Amérique, Asie, Europe et Océanie.

Le total 'Monde' inclut la somme des données de ces trois groupes à laquelle s'ajoutent les données d'un groupement 'Autres territoires' (territoires ou partenaires non classés ailleurs), dont la composition est détaillée ci-dessous. Lorsqu'elles sont rapportées, les données relatives à ces territoires ne sont pas présentées individuellement.

La composition du groupement 'Autres territoires' est la suivante:

-Territoires non-classés ailleurs : Antarctique, île Bouvet, Territoire britannique de l'Antarctique, Territoire britannique de l'océan Indien, île Christmas, îles des Cocos (Keeling), Terres australes et antarctiques françaises, îles Heard et McDonald, île Norfolk, Pitcairn, Saint-Barthélemy, Saint-Martin (partie française), Géorgie du Sud et îles Sandwich méridionales, îles mineures éloignées des États-Unis et îles du Pacifique sous administration des États-Unis.

- Partenaires non classés ailleurs : 'combustibles de soute et provisions de bord', 'informations confidentielles et différences', 'zone neutre', 'zones franches' qui sont utilisés exclusivement dans les tableaux du commerce de marchandises.

Les statistiques présentées au niveau de chacun des groupements précédemment décrits sont calculées à partir des valeurs des économies qui entrent dans la composition du groupement et complétées le cas échéant par un reliquat qu'il n'a pas été possible de répartir entre les éléments du groupement.

2. Groupements économiques des économies en développement

Dans le *Manuel de statistiques de la CNUCED*, les regroupements des pays et territoires en développement sont nombreux et variés afin de disposer facilement des données statistiques nécessaires à l'analyse socio-économique et aux recherches sur le développement.

Les économies en développement sont présentées à trois niveaux d'agrégation : le groupe dans son intégralité, puis sans la Chine continentale et enfin sans les pays les moins avancés.

Le groupe des pays pauvres très endettés inclut 40 pays. Ces pays bénéficient de l'initiative de désendettement de la Banque mondiale et du Fonds monétaire international.

Les PMA et les pays en développement sans littoral sont des groupes de pays qui requièrent une attention particulière de la communauté internationale. Les PMA sont présentés aux niveaux d'agrégation suivants : Afrique et Haïti, Asie et les îles.

Depuis 1994, les Nations Unies ont également pris en compte les problèmes particuliers des petits États insulaires en développement mais n'ont pas établi de liste officielle de ces États. La liste présentée dans le *Manuel de statistiques* est utilisée par la CNUCED à des fins analytiques uniquement.

Les économies en développement sont également réparties en trois groupes de revenu en fonction du PIB par habitant en 2000 : revenu élevé, revenu intermédiaire et revenu faible. Cette répartition est basée sur les données de PIB et de population qui étaient disponibles en 2009.

Le groupement des principaux exportateurs de pétrole comprend les pays, dont la part du pétrole et des produits pétroliers, ne représentait pas moins de 50 % de leurs exportations totales, et les exportations de ces produits s'élevaient à au moins 2 milliards de dollars en 2003-2005 en moyenne. Les pays composant ce groupement sont répartis en trois zones géographiques : Afrique, Amérique et Asie.

Le groupement des principaux exportateurs d'articles manufacturés, répartis entre Amérique et Asie, comprend les économies dont la part d'articles manufacturés ne représentait pas moins de 50 % de leurs exportations totales, et leurs exportations d'articles manufacturés avaient une valeur moyenne d'au moins 22 milliards de dollars en 2003-2005.

La composition des groupements des économies émergentes (réparties entre Amérique et Asie) et des économies nouvellement industrialisées (première et deuxième génération) correspond à celle utilisée dans le Rapport sur le commerce et le développement de la CNUCED.

Les différentes régions géographiques sont également présentées à différents niveaux d'agrégation :

- Afrique : Afrique septentrionale sans le Soudan, Afrique subsaharienne, Soudan compris, avec et sans l'Afrique du Sud.
- Amérique : Amérique centrale et Grandes Antilles sans Porto Rico, avec et sans le Mexique, Amérique du Sud et centrale, Amérique du Sud sans le Brésil.
- Asie : Asie orientale et du Sud-Est sans la Chine et Asie méridionale sans l'Inde.

3. Groupements commerciaux et interrégionaux

Les statistiques des groupements commerciaux sont présentées dès lors qu'elles sont pertinentes et présentent un intérêt analytique. Ces groupements englobent toutes les économies concernées et sont classés selon les grandes régions géographiques utilisées précédemment, à l'exception des groupements interrégionaux suivants : le groupe des États d'Afrique, des Caraïbes et du Pacifique, le groupe de Coopération économique de l'Asie et du Pacifique, le groupe de Coopération économique de la mer Noire et la Communauté des États indépendants.

| 571 | Polymers of ethylene, in primary forms | | Polymères de l'éthylène, sous formes primaires |
| 572 | Polymers of styrene, in primary forms | | Polymères du styrène, sous formes primaires |
| 573 | Polymers of vinyl chloride or of halogenated olefins | | Polymères du chlorure de vinyle ou d'autres oléfines halogènes |
| 574 | Polyacetals, other polyethers and epoxide resins, polyesters | | Polyacétals, autres polyéthers et résines époxydes, polyesters |
| 575 | Other plastics, in primary forms | | Autres matières plastiques, sous formes primaires |
| 579 | Waste, parings and scrap, of plastics | | Déchets, rognures et débris de matières plastiques |
| 58 | Plastics in non-primary forms | | Matières plastiques sous formes autres que primaires |
| 581 | Tubes, pipes and hoses of plastics | | Tubes et tuyaux en matières plastiques |
| 582 | Plates, sheets, films, foil and strip, of plastics | | Plaques, feuilles, rubans en matières plastiques |
| 583 | Monofilament, cross-sectional dimension > 1 mm, rods, sticks, profile shapes, of plastics | | Monofilaments, coupe transversale > 1mm (monofils), joncs, bâtons et profils, en matières plastiques |
| 59 | Chemical materials and products, n.e.s. | | Matières et produits chimiques, n.d.a. |
| 591 | Insecticides and similar products, for retail sale | | Insecticides, produits similaires, pour la vente au détail |
| 592 | Starches, wheat gluten; albuminoidal substances; glues | | Amidons, féculs, gluten de froment; matières albuminoïdes; colles |
| 593 | Explosives and pyrotechnic products | | Explosifs et articles de pyrotechnie |
| 597 | Prepared additives for mineral oils; lubricating preparations; | | Additifs pour huiles minérales |
| 598 | Miscellaneous chemical products, n.e.s. | | Produits chimiques divers, n.d.a. |
| 6 | Manufactured goods classified chiefly by material | | Articles manufacturés classés principalement d'après la matière première |
| 61 | Leather, leather manufactures, n.e.s. and dressed furskins | | Cuirs et peaux, préparés et ouvrages en cuir, n.d.a.; et pelleteries apprêtées |
| 611 | Leather | | Cuirs et peaux préparés |
| 612 | Manufactures of leather, n.e.s.; saddlery and harness | | Ouvrages en cuir, n.d.a.; articles de bourrellerie ou de sellerie |
| 613 | Furskins, tanned or dressed, excluding those of 8483 | | Pelleteries tannées ou apprêtées (sauf 8483) |
| 62 | Rubber manufactures, n.e.s. | | Caoutchouc manufacturé, n.d.a. |
| 621 | Materials of rubber (e.g. pastes, plates, sheets, bods, etc.) | | Produits en caoutchouc (pâtes, plaques, feuilles, fils, tubes, etc.) |
| 625 | Rubber tyres, interchangeable tyre treads, tyre flaps and inner tubes for wheels of all kinds | | Pneumatiques, en caoutchouc; bandes de roulement amovibles pour pneumatiques, "flaps" et chambres à air pour tous types de roues |
| 629 | Articles of rubber, n.e.s. | | Ouvrages en caoutchouc, n.d.a. |
| 63 | Cork and wood manufactures (excluding furniture) | | Ouvrages en liège et en bois (à l'exclusion des meubles) |
| 633 | Cork manufactures | | Ouvrages en liège |
| 634 | Veneers, plywood, and other wood, worked, n.e.s. | | Placage, contre-plaqué et autres bois travaillés, n.d.a. |
| 635 | Wood manufacture, n.e.s. | | Ouvrages en bois, n.d.a. |
| 64 | Paper, paperboard, articles of paper pulp, of paper, or of paperboard | | Papiers, cartons et ouvrages en pâte de cellulose, en papier ou en carton |
| 641 | Paper and paperboard | | Papiers et cartons |
| 642 | Paper and paperboard, cut to shape or size, and articles of paper or paperboard | | Papiers et cartons découpés en vue d'un usage déterminé; ouvrages en papier ou carton |
| 65 | Textile yarn, fabrics, made-up articles, n.e.s., and related products | | Fils, tissus, articles textiles façonnés, n.d.a. et produits connexes |
| 651 | Textile yarn | | Fils textiles |
| 652 | Cotton fabrics, woven (excluded narrow or special fabrics) | | Tissus de coton (sauf petites largeurs ou spéciaux) |
| 653 | Fabrics, woven, of man-made fabrics | | Tissus en matières textiles synthétiques ou artificielles |
| 654 | Other textile fabrics, woven | | Autres tissus |
| 655 | Knitted or crocheted fabrics, n.e.s. | | Étoffes de bonneterie (dont velours), n.d.a. |
| 656 | Tulles, trimmings, lace, ribbons and other small wares | | Tulles, dentelles et autres articles de mercerie |
| 657 | Special yarn, special textile fabrics and related | | Fils spéciaux, tissus spéciaux et produits connexes |
| 658 | Made-up articles, wholly or chiefly of textile materials, n.e.s. | | Articles confectionnés entièrement ou principalement en matières textiles, n.d.a. |
| 659 | Floor coverings, etc. | | Revêtements de sols, etc. |
| 66 | Non metallic mineral manufactures, n.e.s. | | Articles minéraux non métalliques manufacturés, n.d.a. |
| 661 | Lime, cement and fabricated construction materials (excluding glass and clay materials) | | Chaux, ciments et matériaux de construction fabriqués (sauf argile et verre) |
| 662 | Clay construction and refractory construction materials | | Matériaux de construction réfractaires, en argile |
| 663 | Mineral manufactures, n.e.s. | | Articles minéraux manufacturés, n.d.a. |
| 664 | Glass | | Verre |
| 665 | Glassware | | Ouvrages en verre |
| 666 | Pottery | | Poterie |

| 687 | Tin | Étain |
| 689 | Miscellaneous non-ferrous base metals for metallurgy | Autres métaux communs non ferreux utilisés en métallurgie |
| 69 | Manufactures of metal, n.e.s. | Articles manufacturés en métal, n.d.a. |
| 691 | Structures and parts, n.e.s., of iron, steel, aluminium | Constructions et parties, n.d.a. en fonte, fer, acier ou aluminium |
| 692 | Metal containers for storage or transport | Récipients métalliques pour le stockage ou le transport |
| 693 | Wire products (excluding electrical) and fencing grills | Ouvrages en fils métalliques (sauf électriques), grillages |
| 694 | Nails, screws, nuts, bolts, rivets and the like, of iron, steel, copper or aluminium | Pointes, clous, vis, écrous, boulons, rondelles, rivets et aricles similaires, en fer, en acier, en cuivre ou en aluminium |
| 695 | Tools for use in the hand or in machine | Outils à main et outils pour machines |
| 696 | Cutlery | Coutellerie |
| 697 | Household equipment of base metal, n.e.s. | Articles d'économie domestique en métaux communs, n.d.a. |
| 699 | Manufactures of base metal, n.e.s. | Articles manufacturés en métaux communs, n.d.a. |
| 7 | Machinery and transport equipment | Machines et matériel de transport |
| 71 | Power generating machinery and equipment | Machines génératrices, moteurs et leur équipement |
| 711 | Steam or other vapour generating boilers, super-heated water boilers and auxiliary plant for use therewith; parts | Chaudières à vapeur, chaudières dites "à eau surchauffée", et leurs appareils auxiliaires, leurs parties et pièces détachées |
| 712 | Steam turbines and other vapour turbines, parts thereof, n.e.s. | Turbines à vapeur, leurs parties et pièces détachées, n.d.a. |
| 713 | Internal combustion piston engines and parts thereof, n.e.s. | Moteurs à explosion ou à combustion interne, n.d.a. |
| 714 | Engines and motors, non-electric; parts, n.e.s. | Moteurs et machines motrices, non électrique; leurs parties n.d.a. |
| 716 | Rotating electric plant and parts thereof, n.e.s. | Appareils électriques rotatifs, leurs pièces détachées, n.d.a. |
| 718 | Other power generating machinery and parts thereof, n.e.s. | Moteurs et machines motrices, leurs parties et pièces, n.d.a. |
| 72 | Machinery specialized for particular industries | Machines et appareils spécialisés pour industries particulières |
| 721 | Agricultural machinery (excluding tractors) and parts | Machines agricoles (sauf tracteurs), parties, pièces |
| 722 | Tractors (excluding those of 71414 and 74415) | Tracteurs (sauf 74414 et 74415) |
| 723 | Civil engineering and contractors' plant and equipment | Appareils et matériel de génie civil et de construction; parties |
| 724 | Textile and leather machinery, and parts thereof, n.e.s. | Machines pour l'industrie textile, cuir et peaux, n.d.a. |
| 725 | Paper mill and pulp mill machinery; paper cutting machines and other machinery; parts thereof | Machines et appareils pour la fabrication de la pâte à papier et du papier; coupeuses et autres appareils; leurs parties et pièces |
| 726 | Printing and bookbinding machinery, and parts thereof | Machines pour imprimerie, brochage, reliure; parties |
| 727 | Food-processing machines (excluding domestic) | Machines pour industrie alimentaire (appareils ménagers exclus) |
| 728 | Other machinery and equipment specialized for particular industries, and parts thereof, n.e.s. | Autres machines et appareils spécialisées pour industries particulières, et leurs parties et pièces détachées, n.d.a. |
| 73 | Metal working machinery | Machines et appareils pour le travail des métaux |
| 731 | Machine-tools working by removing metal or other material | Machines-outils travaillant par enlèvement de métal/autres matières |
| 733 | Machine.-tools for working metal (without removing material) | Machines pour travail des métaux (sans enlèvement de matière) |
| 735 | Parts, n.e.s., and accessories for machines of 731, 733 | Pièces et accessoires, n.d.a., des machines des groupes 731, 733 |
| 737 | Metalworking machinery (excluding machine tools) and parts | Machines pour travail des métaux, n.d.a.; pièces détachées |
| 74 | General industrial machinery and equipment, n.e.s. and machine parts, n.e.s. | Machines et appareils industriels d'application générale, n.d.a.; parties et pièces détachées de machines, d'appareils, d'engins |
| 741 | Heating and cooling equipment and parts thereof, n.e.s. | Appareils de chauffage et de réfrigération, n.d.a.; pièces détachées |
| 742 | Pumps for liquids; liquid elevators; parts for such pumps | Pompes pour liquides; élévateurs à liquides; parties et pièces |

| PRODUCT CLASSIFICATION FOR INTERNATIONAL TRADE | CLASSIFICATION DES PRODUITS POUR LE COMMERCE INTERNATIONAL |
|--|--|
| 743 Pumps (excluding liquid), air and gas compressors, and fans; centrifuges; filtering or purifying apparatus; parts | Pompes (sauf pour liquides), compresseurs; ventilateurs; hottes aspirantes; centrifugeuses; appareils pour la filtration, l'épuration |
| 744 Mechanical handling equipment, and parts, n.e.s. | Équipement mécanique de manutention, pièces, n.d.a. |
| 745 Other non-electrical machinery, tools and mechanical apparatus, and parts thereof, n.e.s. | Machines, appareils et outils non électriques et leurs parties et pièces détachées, n.d.a. |
| 746 Ball or roller bearings | Roulements à billes, à galets, à rouleaux ou à aiguilles |
| 747 Taps, cocks, valves and similar appliances, for pipes, boiler shells, tanks, vats and the like | Articles de robinetterie, oragnes similaires pour tuyauteries, chaudières, réservoirs, cubes ou contenants similaires |
| 748 Transmission shafts and cranks; bearings housings; gears and gearing; flywheels and pulleys; clutches, shaft couplings | Arbres de transmission et manivelles; engrenages et roues de friction; volants et poulies; embrayages, organes d'accouplement |
| 749 Non-electric parts and accessories. of machinery, n.e.s. | Parties, non électriques d'appareils mécaniques, n.d.a. |
| 75 Office machines and automatic data processing machines | Machines et appareils de bureau ou pour le traitement automatique de l'information |
| 751 Office machines | Machines et appareils de bureau |
| 752 Automatic data processing machines and units thereof; magnetic or optical readers | Machines automatiques de traitement de l'information et leurs unités; lecteurs magnétiques ou optiques |
| 759 Parts, accessories for machines of groups 751, 752 | Parties et pièces détachées pour groupes 751, 752 |
| 76 Telecommunications and sound recording apparatus and reproducing apparatus and equipment | Appareils et équipements de télécommunication et pour l'enregistrement et la reproduction du son |
| 761 Television receivers, whether or not combined | Téléviseurs, même combinés à d'autres appareils |
| 762 Radio-broadcast receivers, whether or not combined | Appareils de radiodiffusion, même combinés à d'autres appareils |
| 763 Sound recorders or reproducers; television image and sound recorders or reproducers, prepared unrecorded media | Appareils d'enregistrement ou de reproduction du son; appareils d'enregistrement/reproduction de l'image et du son en télévision |
| 764 Telecommunication equipment, n.e.s.; and parts, n.e.s. | Équipements de télécommunication, n.d.a. et parties |
| 77 Electrical machinery, apparatus and appliances, n.e.s. and electrical parts thereof | Machines et appareils électriques, n.d.a.; et leurs parties et pièces détachées électriques |
| 771 Electric power machinery, and parts thereof | Appareils pour production, transformation de l'électricité |
| 772 Apparatus for switching or protecting electrical circuits or for making connections; switchboard, control panels | Appareils pour la coupure, la protection, le branchement la connexion des circuits électriques; tableaux de commande |
| 773 Equipment for distributing electricity, n.e.s. | Équipement pour la distribution d'électricité, n.d.a. |
| 774 Electro-diagnostic apparatus for medical or veterinary sciences and radiological apparatus | Appareils d'électrodiagnostic à usage médical ou vétérinaire et appareils de radiologie |
| 775 Household type, electrical and non-electrical equipment, n.e.s. | Machines et appareils, électriques ou non, à usage domestique, n.d.a. |
| 776 Thermionic, cold cathode or photo-cathode valves and tubes; diodes, transistors and similar; | Lampes, tubes, valves électroniques à cathode chaude, froide ou à photocathode; diodes, transistors et dispositifs similaires |
| 778 Electrical machinery and apparatus, n.e.s. | Machines et appareils électriques, n.d.a. |
| 78 Road vehicles (including air-cushion vehicles) | Véhicules routiers (y compris les véhicules à coussin d'air) |
| 781 Motor cars and other motor vehicles principally designed for the transport of persons | Véhicules de tourisme et autres véhicules automobiles principalement conçus pour le transport de personnes |
| 782 Motor vehicles for the transport of goods and special purposes | Véhicules automobiles pour le transport de marchandises et pour usages spéciaux |
| 783 Road motor vehicles, n.e.s. | Véhicules routiers, n.d.a. |
| 784 Parts and accessories of the motor vehicles of groups 722, 781, 782, and 783 | Parties, pièces détachées et accessoires des véhicules automobiles des groupes 722, 781, 782 et 783 |
| 785 Motorcycles and cycles, motorized or not; invalid carriages | Motocycles et cycles, avec ou sans moteur; fauteuils roulants |
| 786 Trailers and semi-trailers; other vehicles, not mechanically propelled; specially designed & equipped transport containers | Remorques et semi-remorques; autres véhicules non automobiles; cadres et conteneurs conçus et équipés pour le transport |
| 79 Other transport equipment | Autres matériels de transport |
| 791 Railway vehicles and associated equipment | Véhicules et matériel pour chemin de fer |
| 792 Aircraft and associated equipment; spacecraft and spacecraft launch vehicles, parts thereof | Aéronefs et matériels connexes; véhicules spatiaux et leurs véhicules lanceurs; leurs parties et pièces détachées |
| 793 Ships, boats (including hovercrafts) and floating structures | Navires, bateaux (y compris les aéroglisseurs) et engins flottants |
| 8 Miscellaneous manufactured articles | Articles manufacturés divers |
| 81 Prefabricated buildings, sanitary plumbing, heating and lighting fixtures and fittings, n.e.s. | Constructions préfabriquées, appareils sanitaires et appareillage de plomberie, de chauffage et d'éclairage, n.d.a. |
| 811 Prefabricated buildings | Constructions préfabriquées |
| 812 Sanitary, plumbing and heating fixtures, and fittings, n.e.s. | Appareils sanitaires et appareillage de plomberie, chauffage, n.d.a. |
| 813 Lighting fixtures and fittings, n.e.s. | Appareillages d'éclairage, n.d.a. |
| 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings | Meubles et leurs parties; articles de literie; matelas, sommiers coussins, articles similaires rembourrés/garnis intérieurement |

Notes:

- (d) Consolidated data estimated by other methods than by applying partner data for the entire year; also used in world and area totals.
- (h) Incomplete territories aggregate.
- (1) Include unspecified destinations.
- (2) Estimates. Data are derived from table 1.1 growth rate applied to DOTS mirror structure.
- (3) Estimates. Data are derived from table 1.1 growth rate applied to *COMTRADE* structure.
- (4) Estimates. Data for 1995 and 1996 are derived from Belgium-Luxembourg Economic Union using a simple linear regression method.
- (5) Estimates. Prior to 1995, trade data for this country are included in the trade of SACU. From 1995 to 1999, data are derived from table 1.1 growth rate applied to *COMTRADE* structure. Since 2000, data refer to *COMTRADE*.
- (6) Exports data include a considerable amount of re-exports.
- (7) Estimate. Data are derived by calculating the difference between DOT's aggregate for 'Advanced Economies' and the sum of countries classified in 'Advanced Economies' by the data source.
- (8) Estimates. Data are derived from table 1.1 growth rate applied to *COMTRADE* structure.
- (9) Estimates. France including French Guiana, Guadeloupe, Martinique, Monaco and Reunion (and excluding intra trade)

Notes :

- (d) Données consolidées estimées par d'autres méthodes que l'utilisation des données du partenaire pour l'année complète; également utilisées pour les totaux du monde et des régions.
- (h) Agrégat territoires incomplet.
- (1) Y compris des destinations non-spécifiées.
- (2) Estimation. Les données sont dérivées des déclarations rapportées dans le tableau 1.1 auxquelles on applique la structure miroir de DOTS.
- (3) Estimation. Les données sont dérivées des déclarations rapportées dans le tableau 1.1 auxquelles on applique la structure directe de *COMTRADE*.
- (4) Estimation. Les données de 1995 et 1996 sont dérivées des déclarations rapportées sous l'Union économique belgo-luxembourgeoise par simple régression linéaire.
- (5) Estimation. Avant 1995, les données de ce pays sont comprises dans les données de l'Union douanière d'Afrique du Sud. Sur la période de 1995 à 1999, les données sont dérivées des déclarations rapportées dans la série *COMTRADE* auxquelles on applique le taux d'évolution observé dans le tableau 1.1. Dès 2000, les données sont issues de *COMTRADE*.
- (6) Les données des exportations comprennent une part importante de re-exportations.
- (7) Estimation. Les données sont dérivées par différence entre l'agrégat "Économies avancées" fourni par DOTS et la somme des pays classifiés dans ce groupement dans la source.
- (8) Estimation. Les données sont dérivées des déclarations rapportées dans le tableau 1.1 auxquelles on applique la structure directe de *COMTRADE*.
- (9) Estimation. Les données sont dérivées des déclarations rapportées par la France métropolitaine et les départements d'outre-mer par agrégation diminuée des flux intra.

Notes:

- (d) Consolidated data estimated by other methods than by applying partner data for the entire year; also used in world and area totals.
- (h) Incomplete territories aggregate.
- (1) Include unspecified destinations.
- (2) Estimates. Data are derived from table 1.1 growth rate applied to DOTS mirror structure.
- (3) Estimates. Data are derived from table 1.1 growth rate applied to *COMTRADE* structure.
- (4) Estimates. Data for 1995 and 1996 are derived from Belgium-Luxembourg Economic Union using a simple linear regression method.
- (5) Estimates. Prior to 1995, trade data for this country are included in the trade of SACU. From 1995 to 1999, data are derived from table 1.1 growth rate applied to *COMTRADE* structure. Since 2000, data refer to *COMTRADE*.
- (6) Exports data include a considerable amount of re-exports.
- (7) Estimate. Data are derived by calculating the difference between DOT's aggregate for 'Advanced Economies' and the sum of countries classified in 'Advanced Economies' by the data source.
- (8) Estimates. Data are derived from table 1.1 growth rate applied to *COMTRADE* structure.
- (9) Estimates. France including French Guiana, Guadeloupe, Martinique, Monaco and Reunion (and excluding intra trade)

Notes :

- (d) Données consolidées estimées par d'autres méthodes que l'utilisation des données du partenaire pour l'année complète; également utilisées pour les totaux du monde et des régions.
- (h) Agrégat territoires incomplet.
- (1) Y compris des destinations non-spécifiées.
- (2) Estimation. Les données sont dérivées des déclarations rapportées dans le tableau 1.1 auxquelles on applique la structure miroir de DOTS.
- (3) Estimation. Les données sont dérivées des déclarations rapportées dans le tableau 1.1 auxquelles on applique la structure directe de *COMTRADE*.
- (4) Estimation. Les données de 1995 et 1996 sont dérivées des déclarations rapportées sous l'Union économique belgo-luxembourgeoise par simple régression linéaire.
- (5) Estimation. Avant 1995, les données de ce pays sont comprises dans les données de l'Union douanière d'Afrique du Sud. Sur la période de 1995 à 1999, les données sont dérivées des déclarations rapportées dans la série *COMTRADE* auxquelles on applique le taux d'évolution observé dans le tableau 1.1. Dès 2000, les données sont issues de *COMTRADE*.
- (6) Les données des exportations comprennent une part importante de re-exportations.
- (7) Estimation. Les données sont dérivées par différence entre l'agrégat "Économies avancées" fourni par DOTS et la somme des pays classifiés dans ce groupement dans la source.
- (8) Estimation. Les données sont dérivées des déclarations rapportées dans le tableau 1.1 auxquelles on applique la structure directe de *COMTRADE*.
- (9) Estimation. Les données sont dérivées des déclarations rapportées par la France métropolitaine et les départements d'outre-mer par agrégation diminuée des flux intra.

Notes :

- (1) Y compris les exportations de catégorie spéciale, approvisionnements des navires et combustibles de soute et autres exportations de moindre importance dont la destination n'a pas pu être déterminée.
- (2) Il est reconnu que la structure du commerce et la distribution au niveau partenaire pour certains pays et sur certaines années peuvent varier. À cet égard, le lecteur devrait connaître la couverture ainsi que les limites des données principales utilisées dans ce tableau. Notes :

- (1) Y compris les exportations de catégorie spéciale, approvisionnements des navires et combustibles de soute et autres exportations de moindre importance dont la destination n'a pas pu être déterminée.
- (2) Il est reconnu que la structure du commerce et la distribution au niveau partenaire pour certains pays et sur certaines années peuvent varier. À cet égard, le lecteur devrait connaître la couverture ainsi que les limites des données principales utilisées dans ce tableau. Notes :

- (1) Y compris les exportations de catégorie spéciale, approvisionnements des navires et combustibles de soute et autres exportations de moindre importance dont la destination n'a pas pu être déterminée.
- (2) Il est reconnu que la structure du commerce et la distribution au niveau partenaire pour certains pays et sur certaines années peuvent varier. À cet égard, le lecteur devrait connaître la couverture ainsi que les limites des données principales utilisées dans ce tableau. Notes:

- (1) Includes special category exports, ship stores and bunkers and other exports of minor importance whose destination could not be determined.
- (2) It is recognized that the structure of trade and partner distribution for certain countries and years might vary. In this regard, reader should know the coverage and limitations of the main principal data used in this table. Notes :

- (1) Y compris les exportations de catégorie spéciale, approvisionnements des navires et combustibles de soute et autres exportations de moindre importance dont la destination n'a pas pu être déterminée.
- (2) Il est reconnu que la structure du commerce et la distribution au niveau partenaire pour certains pays et sur certaines années peuvent varier. À cet égard, le lecteur devrait connaître la couverture ainsi que les limites des données principales utilisées dans ce tableau. Notes :

- (1) Y compris les exportations de catégorie spéciale, approvisionnements des navires et combustibles de soute et autres exportations de moindre importance dont la destination n'a pas pu être déterminée.
- (2) Il est reconnu que la structure du commerce et la distribution au niveau partenaire pour certains pays et sur certaines années peuvent varier. À cet égard, le lecteur devrait connaître la couverture ainsi que les limites des données principales utilisées dans ce tableau. Notes:

- (1) Includes special category exports, ship stores and bunkers and other exports of minor importance whose destination could not be determined.
- (2) It is recognized that the structure of trade and partner distribution for certain countries and years might vary. In this regard, reader should know the coverage and limitations of the main principal data used in this table. Notes :

- (1) Y compris les exportations de catégorie spéciale, approvisionnements des navires et combustibles de soute et autres exportations de moindre importance dont la destination n'a pas pu être déterminée.
- (2) Il est reconnu que la structure du commerce et la distribution au niveau partenaire pour certains pays et sur certaines années peuvent varier. À cet égard, le lecteur devrait connaître la couverture ainsi que les limites des données principales utilisées dans ce tableau.
