

INVESTMENT COUNTRY PROFILES LITHUANIA

October 2011

NOTE

The Division on Investment and Enterprise of UNCTAD is a global centre of excellence, dealing with issues related to investment and enterprise development in the United Nations System. It builds on three and a half decades of experience and international expertise in research and policy analysis, intergovernmental consensus building, and provides technical assistance to developing countries.

The terms country/economy as used in this investment country profile also refer, as appropriate, to territories or areas; the designations employed and the presentation of the material do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. In addition, the designations of country groups are intended solely for statistical or analytical convenience and do not necessarily express a judgment about the stage of development reached by a particular country or area in the development process. The major country groupings used in this investment country profile follow the classification of the United Nations Statistical Office. These are:

Developed countries: the member countries of the OECD (other than Chile, Mexico, the Republic of Korea and Turkey), plus the new European Union member countries which are not OECD members (Bulgaria, Cyprus, Latvia, Lithuania, Malta, and Romania), plus Andorra, Liechtenstein, Monaco and San Marino.

Transition economies: South-East Europe and the Commonwealth of Independent States.

Developing economies: in general all economies not specified above. For statistical purposes, the data for China do not include those for Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.

Reference to companies and their activities should not be construed as an endorsement by UNCTAD of those companies or their activities.

The boundaries and names shown and designations used on the maps presented in this publication do not imply official endorsement or acceptance by the United Nations.

The following symbols have been used in the tables:

- Two dots (..) indicate that data are not available or are not separately reported. Rows in tables have been omitted in those cases where no data are available for any of the elements in the row;
- A dash (–) indicates that the item is equal to zero or its value is negligible;
- A blank in a table indicates that the item is not applicable, unless otherwise indicated;
- A slash (/) between dates representing years, e.g., 1994/95, indicates a financial year;
- Use of an en dash (–) between dates representing years, e.g., 1994–1995, signifies the full period involved, including the beginning and end years;
- Reference to “dollars” (\$) means United States dollars, unless otherwise indicated;
- Annual rates of growth or change, unless otherwise stated, refer to annual compound rates;

Details and percentages in tables do not necessarily add up to totals because of rounding.

Only tables shaded in the Table of Contents are available in this investment country profile.

The material contained in this study may be freely quoted with appropriate acknowledgement.

Highlights

Lithuania has attracted relatively modest foreign direct investment (FDI) flows, despite its membership in the European Union (EU). At the end of 2010, its inward FDI stock totalled 35 billion Litas (LTL) (\$13.4 billion). Similarly to Latvia, but unlike Estonia, the outward FDI stock was very small (LTL 5.5 billion i.e. \$2.1 billion).

Before surging in 2006 as a result of the sale of the Mazeikiu Nafta refinery to PKN Orlen (Poland), FDI inflows were fluctuating in the 2000s, reflecting privatization trends. While the rise in greenfield projects and reinvested earnings kept FDI inflows above \$2 billion in 2004–2008, they declined significantly (by 91 per cent) in 2009, as the country suffered from the global crisis. In 2010, FDI recovered slightly reaching LTL 1.6 billion (\$629 million). Outward FDI flows have been modest and in 2010 followed a downward trend, declining to LTL 334 million (\$128 million).

The EU countries of Poland, Sweden, Denmark and Germany, in that order, account for the bulk of the inward FDI stock in Lithuania. Investment from the two other Baltic States, Latvia and Estonia has recently grown rapidly. The lion's share of FDI outward stock is directed to EU countries, while close to one quarter is in the CIS (the Russian Federation, Ukraine and Belarus, in that order).

In 2010 the services sector, including telecommunications, real estate and finance, accounted for almost 70 per cent of the inward FDI stock of Lithuania. In variation from the two other Baltic States, 29 per cent of the inward FDI stock was in manufacturing, although down from 40 per cent in 2005. The outward FDI stock is mainly in the services sector, which accounted for 85 per cent of the total in 2010.

In 2009, more than 126,000 people were employed in the 2,685 foreign affiliates registered in the country; their sales reached LTL 72 billion (\$28 billion) and their value added almost LTL 10 billion (\$4.1). Lithuanian TNCs had only 438 affiliates abroad, employing 24,614 people.

A. Definitions and sources of data

Data on FDI in Lithuania are reported by the Bank of Lithuania and the Department of Statistics of the Government of Lithuania. Since Lithuania regained its independence in 1990, market-oriented reforms were implemented to encourage foreign investment. The introduction of a new currency (the litas) in 1994, (which was pegged to the United States dollar and from 2002 to the euro) and the restructuring of the banking system created a stable and favourable business climate since 1995. The country joined the European Union in 2004.

The Lithuanian Development Agency, a non-governmental body, acts as a one-stop shop to foreign investors that provides information on investment opportunities, procedures and conditions, business and legal environment, and helps them to

identify joint venture partners for project implementation. According to the Law on Investment, there is no special permit required from the authorities to invest foreign capital and there are no limitations to foreign ownership. Protection against expropriation is available, and guarantee of unrestricted transfer of invested capital and profits is provided. Foreign nationals have the right to open foreign currency accounts in any local bank. The investment of foreign-origin capital, movable or immovable assets, and intellectual or industrial property is considered as FDI. Foreign investors may be foreign persons or entities, persons without citizenship permanently living abroad, foreign states and international organizations. They must set up subsidiaries, or engage in any of the following forms of business: sole trader, partnership, public private stock company,

cooperative society and company. Prior to operating a business, registration has to be made with the Ministry of Economy and the business name recorded at the State Patent Bureau. The Bank of Lithuania is, however, responsible for the registration of foreign banks or branches.

Corporate income tax and personal income tax are at a flat rate of 15 per cent while the VAT rate is currently set at 21 per cent.

Data reported by the Bank of Lithuania are in accordance with the methodology set out in the Balance of Payments Manual, 5th edition, of the International Monetary Fund, and FDI definitions used by the OECD Benchmark Definition of Foreign Direct Investment. They reflect an ownership of 10 per cent or more of a foreign investor in ordinary shares, or voting rights, of an incorporated or unincorporated company.

FDI comprises not only the primary investment, but also all subsequent transactions between the direct investor and the direct investment company. The components of FDI capital are equity capital (shares valued at market prices), reinvested earnings and other capital (intra-company loans). Breakdown of flow and stock data, by components, are available. Inward and outward investment data, both by geographical and industrial sector breakdown, are also available and presented in this country profile.

B. Statistics on FDI and the operations of TNCs

Table 1. Summary of FDI

(Millions of Litass and percentage)

Variable	Inward	Outward
