

INVESTMENT COUNTRY PROFILES FRANCE

February 2012

NOTE

The Division on Investment and Enterprise of UNCTAD is a global centre of excellence, dealing with issues related to investment and enterprise development in the United Nations System. It builds on three and a half decades of experience and international expertise in research and policy analysis, intergovernmental consensus building, and provides technical assistance to developing countries.

The terms country/economy as used in this investment country profile also refer, as appropriate, to territories or areas; the designations employed and the presentation of the material do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. In addition, the designations of country groups are intended solely for statistical or analytical convenience and do not necessarily express a judgment about the stage of development reached by a particular country or area in the development process. The major country groupings used in this investment country profile follow the classification of the United Nations Statistical Office. These are:

Developed countries: the member countries of the OECD (other than Chile, Mexico, the Republic of Korea and Turkey), plus the new European Union member countries which are not OECD members (Bulgaria, Cyprus, Latvia, Lithuania, Malta, and Romania), plus Andorra, Liechtenstein, Monaco and San Marino.

Transition economies: South-East Europe and the Commonwealth of Independent States.

Developing economies: in general all economies not specified above. For statistical purposes, the data for China do not include those for Hong Kong Special Administrative Region (Hong Kong SAR), Macao Special Administrative Region (Macao SAR) and Taiwan Province of China.

Reference to companies and their activities should not be construed as an endorsement by UNCTAD of those companies or their activities.

The boundaries and names shown and designations used on the maps presented in this publication do not imply official endorsement or acceptance by the United Nations.

The following symbols have been used in the tables:

- Two dots (..) indicate that data are not available or are not separately reported. Rows in tables have been omitted in those cases where no data are available for any of the elements in the row;
- A dash (–) indicates that the item is equal to zero or its value is negligible;
- A blank in a table indicates that the item is not applicable, unless otherwise indicated;
- A slash (/) between dates representing years, e.g., 1994/95, indicates a financial year;
- Use of an en dash (–) between dates representing years, e.g., 1994–1995, signifies the full period involved, including the beginning and end years;
- Reference to “dollars” (\$) means United States dollars, unless otherwise indicated;
- Annual rates of growth or change, unless otherwise stated, refer to annual compound rates;

Details and percentages in tables do not necessarily add up to totals because of rounding.

Only tables shaded in the Table of Contents are available in this investment country profile.

The material contained in this study may be freely quoted with appropriate acknowledgement.

Highlights

In 2010, the outward stock of foreign direct investment (FDI) from France stood at €1.14 trillion (\$1.52 trillion) compared to an inward stock of €755 billion (\$1.01 trillion). In the context of the European Union (EU), the size of both inward and outward FDI stocks of France is largely in line with the size of its economy, which is one of the important FDI determinants: in 2010, while France accounted for 16 per cent of the EU's GDP, its shares of outward and inward stocks in the EU's totals were 17 per cent and 15 per cent, respectively.

FDI outflows exceeded inward flows in all but one year (1995) since 1990. In the period 2007–2010, the annual average of FDI outflows (€91 billion or \$127 billion) was more than twice the average for FDI inflows (€41 billion or \$57 billion).

France's outward FDI is regionally concentrated. The countries of the EU are host to 63 per cent of France's outward stock, although the single largest recipient country is the United States followed by Belgium, the Netherlands and the United Kingdom. Outside the developed countries, Brazil, China and Morocco are the major recipients of FDI from France.

On the inward side, the four largest sources of FDI – the Netherlands, the United Kingdom, Luxembourg and Belgium – account for over half of inward FDI stock in France. Outside the EU, the United States and Switzerland rank as the fifth and seventh largest sources of FDI to France.

The sectoral composition of the inward and outward stocks is similar. In both cases, over two thirds of the stock is in the services sector and just under a quarter is in manufacturing.

Foreign affiliates in France employed 939,000 people in 2006, generated sales of €287 billion (\$360 billion) and exports of €139 billion (\$175 billion). In 2009, the foreign affiliates of French transnational corporations employed 4.5 million people abroad and had sales of €961 billion (\$1,335 billion).

A. Definitions and sources of data

Data on foreign direct investment (FDI) are compiled by the Banque de France, the central bank of France, for balance of payments (BOP) and international investment position (IIP) purposes. Data on FDI flows are released monthly on the Banque de France website, about 40 to 45 days after the reference month.

Data on flows and stocks of FDI with a breakdown by country/region and by industry/sector are published annually on the Banque de France website and in the Statistical Annex to the *Rapport Annuel – La Balance des paiements et la position extérieure de la France* (Annual Report – France's balance of payments and international investment position), with a time lag of six months.

Regarding FDI stocks, in the first annual report published after the reference year, data are only preliminary estimates; they become more reliable 18 months after the reference year.

The compilation of BOP and IIP data by the Banque de France is based on the following laws and regulations: the French law n°2007-212 from 20 February 2007; the Regulation (EC) No 184/2005 of the European Parliament and of the Council of 12 January 2005; the European Central Bank (ECB) Guideline of 16 July 2004 on the statistical reporting requirements of the ECB and the amending ECB Guideline of 31 May 2007; the decisions 2007-01, 2009-04 and 2010-03 taken by the Governor of the Banque de France.

FDI data are compiled in line with the internationally recommended standards. Direct investment refers to investment that adds to, deducts from, or acquires a lasting interest in an enterprise operating in an economy other than that of the investor. The investor's purpose is to have an effective voice in the management of the enterprise, which is interpreted as holding 10 per cent or more of the issued voting share capital or equivalent. Data cover equity, reinvested earnings, short- and long-term intra-company loans. Trade credits between affiliates are not included in FDI statistics, but in statistics on "Other Investment". The directional principle is applied.

Data on FDI flows (equity capital and other capital) are reported monthly to the Banque de France by about 450 direct reporting companies and 40 banks and other financial intermediaries (for their own transactions only). The "Caisse des dépôts et consignations", a State-owned body, reports monthly to the Banque de France the real estate transactions between residents and non-residents. The Banque de France also collects quarterly data on other forms of capital stock of about 800 resident companies. Flows are derived from stocks. On a case-by-case basis, Banque de France collects data by companies involved in FDI transactions. The geographical breakdown of FDI inflows and outflows is based on the residence country of the immediate counterpart. Data are reported with a sectoral breakdown following the NACE (Statistical Classification of Economic Activities in the European Community) Rev.2 and reflect the activities of the resident enterprise, both for FDI inflows and outflows.

Inward and outward stock data are collected through annual surveys. The survey on inward stock comprises all foreign affiliates in France, while information on the ownership of foreign affiliates is derived from various sources, within and outside the Banque de France. The survey on outward stock covers French TNCs with assets of at least €5 millions.

Stock data are collected at book values and are released at book value and at market values. But the latter are only available as aggregate totals. Indirect participation by a French investor in an affiliate abroad or by a foreign investor in an affiliate in France are not covered. The breakdown by economic activity follows NACE Rev. 2 and reflects the activity of the foreign affiliate in France (inward) and the economic activity of the French parent (outward). The breakdown by region and country relates to the immediate counterpart.

The Banque de France publishes aggregated annual data on FDI flows and stocks based on the present international methodological standard (fifth edition of the IMF's *Balance of Payments Manual*) for the most recent period beginning in 1995. Detailed sectoral and geographical data on flows and stocks are available from 1999 onwards, but they are based on the more comprehensive new international methodology (extended directional principle complying with the sixth edition of the IMF's *Balance of Payments Manual* published in 2008).

Data on the operations of the affiliates of foreign TNCs in France as well as the operations of French affiliates abroad are collected by the France's National Institute of Statistics and Economic Studies (Institut National de la Statistique et des Études Économiques: INSEE) and by the Banque de France for the banking industry. Only majority-owned foreign affiliates are included. Data are collected since the reporting year 1994. The compilation of operations data of foreign affiliates in France is based on the balance sheets of about 25,000 firms. The variables covered are sales, employment, value added, imports and exports.

The breakdown by economic activity follows NACE Rev. 1 and reflects the activity of the foreign affiliate in France (inward) and the economic activity of the French parent (outward). The breakdown by geographical origin reflects the immediate counterpart.

B. Statistics on FDI and the operations of TNCs

Table 1. Summary of FDI

(Millions of euros and percentage)

Variable	Inward	Outward
1. FDI flows, 2007-2010 (annual average)	41 054	90 878
2. FDI flows as a percentage of GFCF, 2007-2010 (annual average)	10.1	22.4
3. FDI stocks, 2010	754 661	1139 834
2. FDI stocks as a percentage of GDP, 2010	39.1	59.1
