

The Knowns and the Unknowns: Economic, social, and environmental impacts of NTMs

Researchers discussion

Tuesday, 7 September 2021, WEBINAR, 3:00 – 4:30 p.m. CET

Non-tariff measures (NTMs) aim primarily at protecting public health or the environment. However, they also substantially affect trade through information, compliance and procedural costs.

Understanding the uses and implications of NTMs is essential for the formulation of effective development strategies to meet the Sustainable Development Goals. This webinar is dedicated to cover the status-quo of research on NTMs, to highlight what has been discovered, and to explore what is yet to be uncovered on the topic.

It also serves as a kick-off to an online course on Economic Analysis of NTMs (04 October – 19 November 2021). Interested could apply: <https://www.research.net/r/EconNTMs>

Moderator

Mr. Ralf Peters, Chief, Trade Information Section, and OIC, Trade Analysis Branch, UNCTAD

Discussants:

- Mr. Marc Bacchetta, Chief, Economic Modelling and Quantitative Analysis, Economic Research and Statistics Division, WTO
- Ms. Anne-Celia Disdier, Professor, Paris School of Economics
- Mr. Yann Duval, OIC, Trade, Investment and Innovation Division, UN ESCAP
- Mr. Alessandro Nicita, Senior Economic Affairs Officer, UNCTAD
- Ms. Roberta Piermartini, Chief, Trade Costs Analysis, Economic Research and Statistics Division, WTO
