

# Transport & Trade connectivity in the age of pandemics: Project closing event

UNECE/CEFACT Contribution

June 20th 2022

**Sue Probert**

Chair, UN/CEFACT

[suesiprobert@live.com](mailto:suesiprobert@live.com)

# UN/CEFACT

## Objectives

- Simple, transparent and effective processes for global business
- Efficient and automated exchange of information

## Outputs

- Global Trade Facilitation and Electronic Business Recommendations and Standards

## Means

- Public Private Sector Partnership
  - over 1000 experts from government and business
- Experts meet via internet every week plus two Face-to-Face Forums per year (hopefully)

**Global Remit**

# Cooperation / Collaboration

UN / CEFACT

EEC

EU  
DG-MOVE  
DG-TAXUD  
DG-MARE  
DG-DEVCO  
DG-DIGIT  
...

ISO  
IEC  
ITU  
WTO  
ITC  
IATA  
WCO  
OECD

GS1  
IPCSA  
PROTECT  
FIATA  
SMDG  
...

# One link in a global supply chain

- Most dematerialization projects are only looking at one sectoral view
  - Almost all sectoral views are just one part of a global supply chain
  - The international supply chain is very complex (multiple actors and multiple relations in data exchanges)
- A holistic view and approach are needed
  - Information will not be related purely to goods or purely to transport or purely to regulatory
  - There are clear links between the information in each part of the global supply chain
- UN/CEFACT deliverables all take this holistic approach

# UNTTC

## Transport & Trade Connectivity in the age of pandemics

- UN New York launched **COVID-19 initiative to encourage exchange of digitised electronic data** rather than paper documents in transport contract related data exchanges
- **UNECE and UN/CEFACT joint contribution:**
  - Cross-modal project to develop modal guides on reuse of the UN/CEFACT MMT Reference Data Model to support digitised data exchanges between transport modes
  - **7 Heads of Delegation** supported the Project  
(Germany, Spain, Greece, Russia, Italy, US and Ukraine)

# Phase 2 - Modal Specific Customisation

Air Freight

Road Freight

Sea Freight

Rail

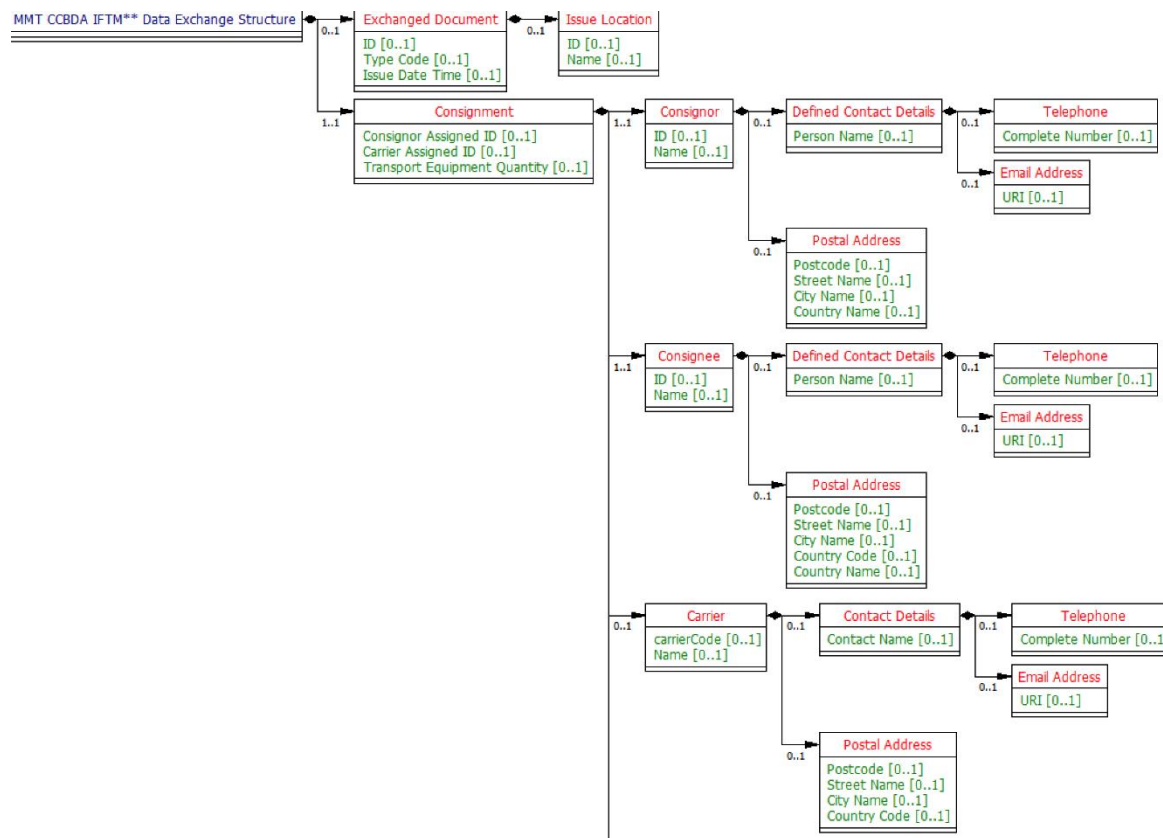

Inland Waterway  
(tbc)

- Analysis of the CIM/SMGS ECN data structure in preparation for the mapping to IFTM subset
- Identified potential issue for mapping between the railway ECN and IFTM due to different structural representation
- Open discussion to describe and understand the issue
- Proposals for the next phase to reach a mapping exercise
  - Rearrange the structure of the railway ECN in the manner of MMT for seamless mappings and multimodal interoperability
  - Map only the possible data elements for the purpose of achieving multimodality

- Maritime specific subset of MMT created and re-used to model the **Ocean Bill of Lading**
- Project calls concluded last week on this work, results to be published good basis for industry eBill of Lading projects

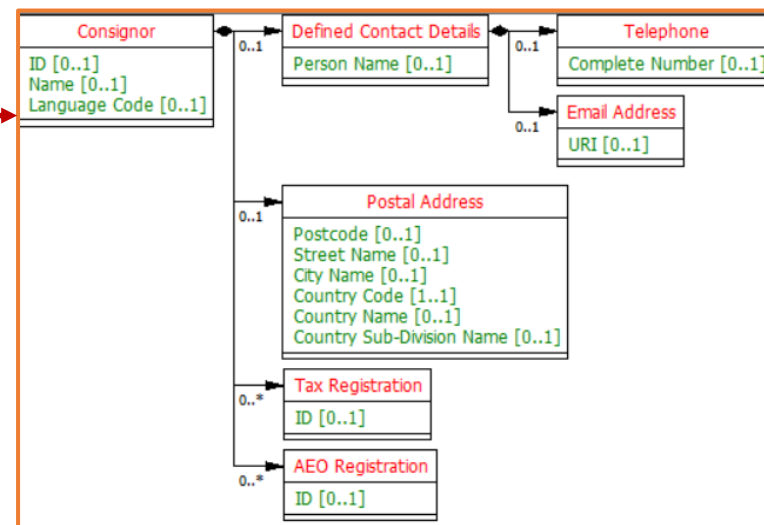

# Road Freight

e-CMR model: CMR Convention data, taken into account

Each object in the eCMR structure has a unique Dictionary Entry Name plus a business short name for readability.

Based upon the UN/CEFACT Core Component Library (CCL), the MultiModal Transport Reference Data Model (MMT) and the Supply Chain Reference Data Model (SCRDM).

# Inter Modal Matrix with MMT as Reference Model (Auto-generated)
