

UNCTAD REFORM TRACKER

for National Trade Facilitation Committees

A web-based project management and monitoring tool for trade facilitation Reforms

Designed by UNCTAD to empower National Trade Facilitation Committees (NTFCs) in their role as coordinators of trade facilitation initiatives

PROJECT MANAGEMENT TOOL

As a project-management tool, the Reform Tracker is a platform where National Trade Facilitation Committees Teams collaborate and reach goals on time while managing resources. It automates task distribution, resource planning, Team collaboration, reporting and many more

TRACKING OF PRIORITY ACTIONS

The Reform Tracker allows for a coordinated interagency implementation of priority trade facilitation initiatives through the involvement of all cross-border stakeholders from the public and private sectors

MONITORING OF RESULTS

The Reform Tracker provides a platform that allows the National Trade Facilitation Committees and its working groups to monitor progress in implementation, and to take necessary measures in case of setbacks

TEAM MANAGEMENT TOOL

The Reform Tracker allows the National Trade Facilitation Committee to organize information about its members and other trade facilitation practitioners, such as their contact information, roles, and systematically inform them on the latest updates related to international trade and trade facilitation

SUSTAINABILITY

The Reform Tracker assures sustainability of the National Trade Facilitation Committees, as it facilitates project documentation and allows for systematic knowledge transfer. New members of the National Trade Facilitation Committees have access to current and past projects and can get acquainted with their new role in no time!

KEY BENEFITS FOR NATIONAL TRADE FACILITATION COMMITTEES

- Making accountable each person involved in the concrete implementation of the reforms
- Access to a shared workspace
- Simplified access to senior management to monitor the progress of the reforms

KEY FEATURES

- Automatic creation of reports and statistics
- Notifications and alerts to make sure deadlines are not missed
- Personalized space showing to each stakeholder what is important to them
- UNCTAD Implementation Score for the WTO Trade Facilitation Agreement (TFA)

The score determines the effort still needed for carrying out effectively the different Provisions of the TFA. It shows how far a country is from full compliance with the Agreement, taking into consideration that some TFA measures are more difficult to implement than others

The Reform Tracker with your own words

The platform offers the NTFC a suitable instrument for the inclusive and comprehensive monitoring of NTFC activities in real time, a task which was previously not always possible to perform.

Joeline Modeste HARINIAINA
Permanent Secretariat of NTFC Madagascar, Ministry of Industry, Commerce and Consumer Affairs

A critical area where NTFCs have often been found wanting is with regards to monitoring and evaluation of implementation of their work plans. The introduction of the Reform Tracker as a tailor-made solution is therefore a laudable development, worthy to be taken advantage of.

Gofaone Gabositwe
Director Botswana United Revenue Service and Member of Botswana Technical Committee on Trade Facilitation

The Reform Tracker offers the NTFC a window to document and monitor implementation of the TFA in a way that is accessible to all members.

Mathew Kamau
Kenya NTFC Secretariat

I think UNCTAD is outshining in terms of supporting the National Trade Facilitation Committees. Each organization should identify one area where they can outperform themselves and I think this is what UNCTAD is doing here with the Reform Tracker.

Gugu Dlamini-Zwane
Member of the Secretariat of Eswatini Trade Facilitation Committee
