

First Workshop on Eco-Tanning Processes In Kenya and East African Region

Participant Feedback

Dr. Richard Oruko Ongong' (MoALD), Dr. Henry JO Ogola (JOOUST), & Dr. George Okwadha (TUK)

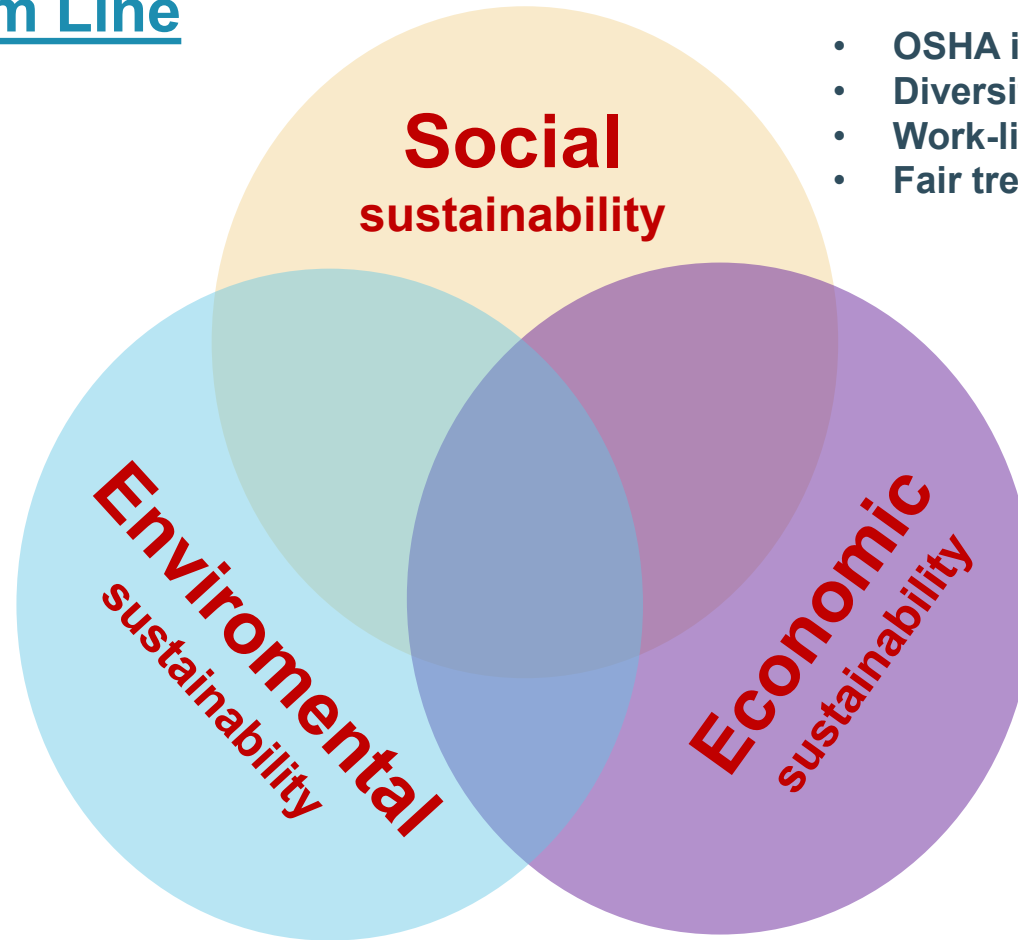

Overarching themes and challenges

- Improved Quality for International Markets
- Environmental Sustainability
- Capacity Building
- Engagement and Stakeholder Involvement
- Industry Awareness and Promotion
- Alignment with Kenya's Vision 2030 Initiative
- Synergy Between Livestock and Leather Industries
- Combatting Illicit Trade
- Regulatory Challenges:
- Import Tariffs
- Innovation and Research

Core Research Themes and Cross-cutting Issues

Triple Bottom Line Theory

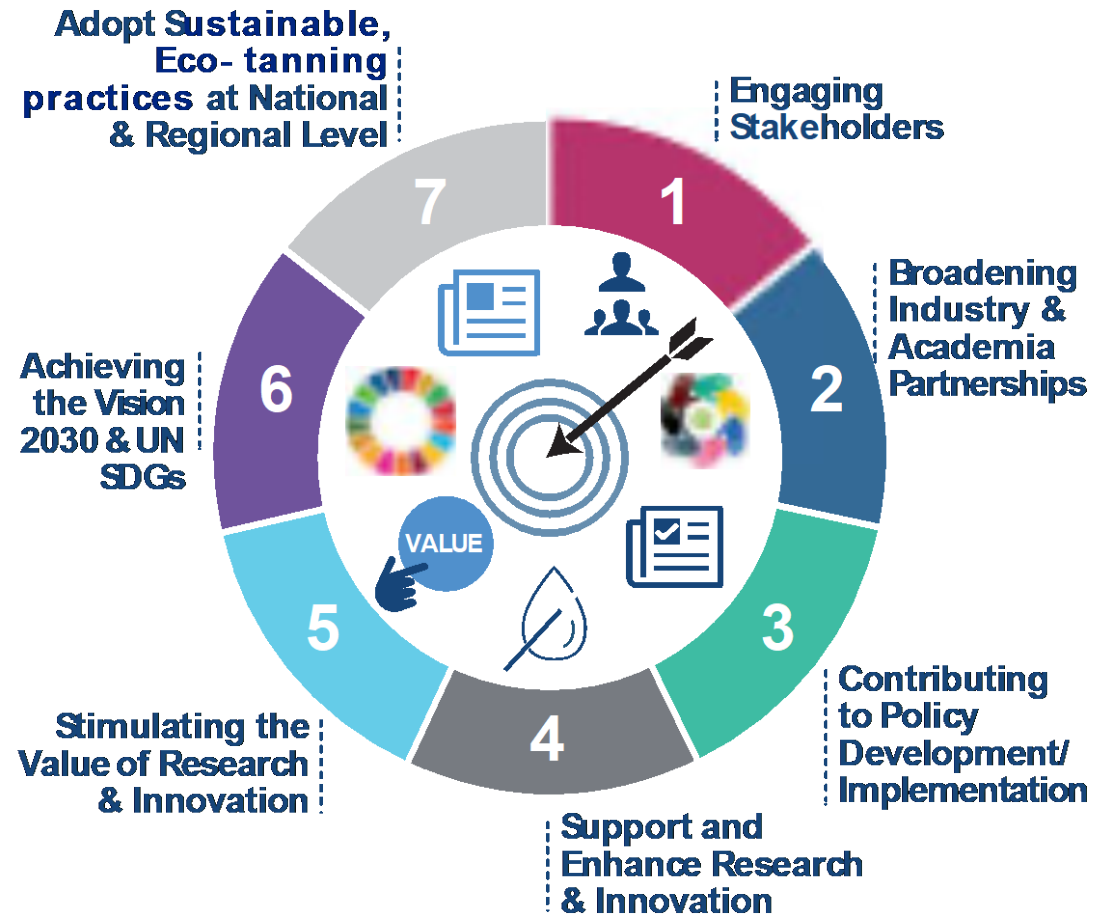

- OSHA issues,
- Diversity /equality,
- Work-life balance,
- Fair treatment

- Competitiveness,
- Consumer perceptions and sustainable behaviors
- Innovation for efficiency
- Supply chain traceability

- Pollution management
- Life cycle analysis
- Green chemistry
- Waste Management and/or Circular economy
- Supply chain traceability
- Sustainable manufacturing techniques
- Energy Efficiency

Future Perspective of Leather Industry

LEATHER INDUSTRY OBJECTIVES

Thank You

Sustainable Manufacturing and Environmental Pollution Programme
