N O T E

This document contains the third of a selected series of statistics compiled on the economy of the occupied Palestinian territory as part of the data base of the UNCTAD Special Economic Unit (Palestinian people). It updates, complements and further develops information presented in earlier documents in this series, namely, UNCTAD/ST/SEU/1 and UNCTAD/ST/SEU/4. In the absence of reliable alternative sources, these tables are largely based on official data published by the Israel Central Bureau of Statistics. The information contained in this document will be updated as and when new data becomes available. For an analysis of some of the data contained, reference may be made to "Recent economic developments in the occupied Palestinian territories, with special reference to the external trade sector" (TD/B/1183).

ABBREVIATIONS AND SYMBOLS

- The term dollar (\$) refers to United States dollars.
- The term NIS refers to new Israeli shekels.
- The term OPT refers to the occupied Palestinian territory; WB refers to the West Bank and GS refers to the Gaza Strip.
- An oblique stroke (/) between two years, e.g. 1980/1981, signifies a fiscal or crop year.
- Two dots (..) indicate that the data are not available, or are not separately reported.
- A dash (-) indicates that the amount is nil or negligible.
- The symbol (%) indicates figures in percentages.

All figures originally expressed in Israeli currency have been converted into United States dollars using the average annual exchange rate as quoted in, International Monetary Fund, International Financial Statistics (Washington D.C., IMF 1987). Repeated devaluation of the Israeli currency has brought the exchange rate down from the equivalent of NIS 0.00035 = US\$1 in 1968 to NIS 1.4878 = US\$1 in 1986.

<sup>a/</sup> Decimal percentage points are rounded up to the nearest figure.

All figures originally expressed in Israeli currency have been converted into United States dollars using the average annual exchange rate as quoted in, International Monetary Fund, International Financial Statistics (Washington D.C., IMF 1987). Repeated devaluation of the Israeli currency has brought the exchange rate down from the equivalent of NIS 0.00035 = US\$1 in 1968 to NIS 1.4878 = US\$1 in 1986.

a/ Figures have been revised from previously published estimates for years prior to 1985.  
 b/ Includes changes in stock. Except for 1980 and 1982, there has been a net decrease in stock in the West Bank.

All figures for 1977-83 originally expressed in Israeli currency have been converted into United States dollars using the average annual exchange rate as quoted in International Monetary Fund, International Financial Statistics (Washington D.C., IMF 1987). Repeated devaluation of the Israeli currency has brought the exchange rate down from the equivalent of NIS 0.00035 = US\$1 in 1968 to NIS 1.4878 = US\$1 in 1986.

a/ Figures have been rounded to the nearest decimal; thus the totals are not necessarily equal to the sum of the separate items.

b/ Figures in parentheses indicate a negative (deficit) balance

c/ Figures for balance of payments with Israel for 1987 are preliminary estimates.

All figures for 1984-1986 (and for Israel and other countries in 1983) were originally expressed in United States dollars; all other figures originally expressed in Israel currency were converted to United States dollars using the average annual exchange rate as quoted in International Monetary Fund, International Financial Statistics (Washington D.C., IMF 1987). Repeated devaluation of the Israeli currency has brought the exchange rate down from the equivalent of NIS 0.00035 = US\$1 in 1968 to NIS 1.4878 = US\$1 in 1986. The values of export totals in this table diverge slightly with some totals in Tables 10 and 11 because of differences in the original sources between aggregate and disaggregated figures and the conversion of Israeli shekels to U.S. dollars.
