

# Next steps in global pilot testing

**Training workshop**

Regional Commissions

6 June 2024

# Inter-regional expert meeting on the measurement of South-South cooperation

## Next Steps in Global Pilot Testing

Presenter: Alfonso Zerón Marmolejo  
Economic Statistics Unit  
Statistics Division

ECLAC

# Presentation Objective

- Present the next steps to initiate phase OC2 (master) in Peru and Ecuador (pilot countries) and Dominican Republic from the perspective of the Economic Commission for Latin America and the Caribbean (ECLAC).

# Specific Objectives of OC2

Strengthen the capacity of statisticians, development experts, and policymakers in beneficiary countries to measure and report SSC.

Implement and adapt the conceptual framework and measurement tools to the specific national contexts of Peru and Ecuador (DR).

Compile and report the first SSC estimates to inform and guide policy actions.

# What is the challenge?

# Risk in the reports

OECD

UNITED NATIONS  
UNCTAD

# Involved Parties

# Next Steps in Ecuador and Peru

## Preparing the Ground

- Mapping of National Agencies
- Data Availability and Quality Review

## Establishment of an inter-agency coordination committee

- Create a coordination committee to oversee the SSC measurement process.
- Memorandum of understanding

## Training and Capacity Building

- Organize national and regional workshops.
- Conduct study tours to countries pioneering in SSC measurement.

## Pilot Testing of the Conceptual Framework

- Implement pilot studies to test the framework and measurement tools.
- Identify and address specific challenges in each country.

## Compilation of Initial Estimates

- Collect and compile the first SSC estimates.

## Dissemination and Expansion of Knowledge

- Share tools, resources, and findings at national and international events.

# Roles and Responsibilities

## Int. Agencies

### UNCTAD

- Develops and validates the conceptual framework, provides guidelines for data submission and receipt formats, and facilitates dissemination and reporting to the SDGs. Governance.

### ECLAC

- Provide technical support and coordinate activities at the regional level.
- Facilitate training and capacity building.

## Pilot Countries

### National focal point institution

- Ministries of Foreign Affairs
  - Coordinate data collection and compilation.
  - Facilitate access to administrative data.

### National Statistics Offices

- Support with statistical expertise, including the integration of SSC data into official statistics.

### Regional consultant

- Working as link between UN Agencies and country actors, training and implementing framework.

### Key national stakeholders

- Actively engage in the process.

# Conclusion

**Expected Impact:** Improved capacity of Peru and Ecuador to measure and report SSC.

---

Reliable and relevant data to inform decision-making and policies.

---

Significant contribution to achieving SDG 17.3.1 and other related goals.
