Landlocked Developing Countries: **FACTS AND FIGURES, 2014**

NOTE

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Material in this publication may be freely quoted or reprinted, but acknowledgement is requested, together with a reference to the document number. A copy of the publication containing the quotation or reprint should be sent to the UNCTAD secretariat.

UNCTAD/ALDC/2014/1

FOREWORD

There are 32 landlocked developing countries (LLDCs): 16 are located in Africa; 10 in Asia, 4 in Central and Eastern Europe and 2 in Latin America. As diverse as these countries are, they share one common feature, namely the lack of direct territorial access to the sea, often coupled with remoteness from major markets.

This locational factor has a profound impact on the scope and the dynamics of these countries' integration in the global trading system. Their dependence on transit transport routes and transit facilities for merchandise trade increases transaction costs, reduces international competitiveness and discourages foreign investors. Consequently, transit dependence and market distance limit the classic development choices — the production of labour-intensive, low-value and bulky goods — of these countries.

However, as empirical evidence from developed landlocked countries demonstrates, these limitations are not an insurmountable obstacle to economic growth and development. The building of supply capacities for goods and services that are less sensitive to transportation and distance, as well as the promotion of stronger regional trade expansion are development options that could also help LLDCs to mitigate the adverse impact of their geographical location.

Still, many LLDCs stagnate at the bottom end of international rankings of income levels and social development indicators. In fact, 17 of the LLDCs are classified as least developed countries (LDCs). Responding to the specific problems of LLDCs requires a multidimensional approach to being landlocked as a development challenge. This notably implies the implementation of policies and measures aimed at economic restructuring and specialization that take into account the transport-related obstacles facing their economies.

The international community has expressed in many ways its resolve to assist these countries in their efforts to overcome the impediments of geography.

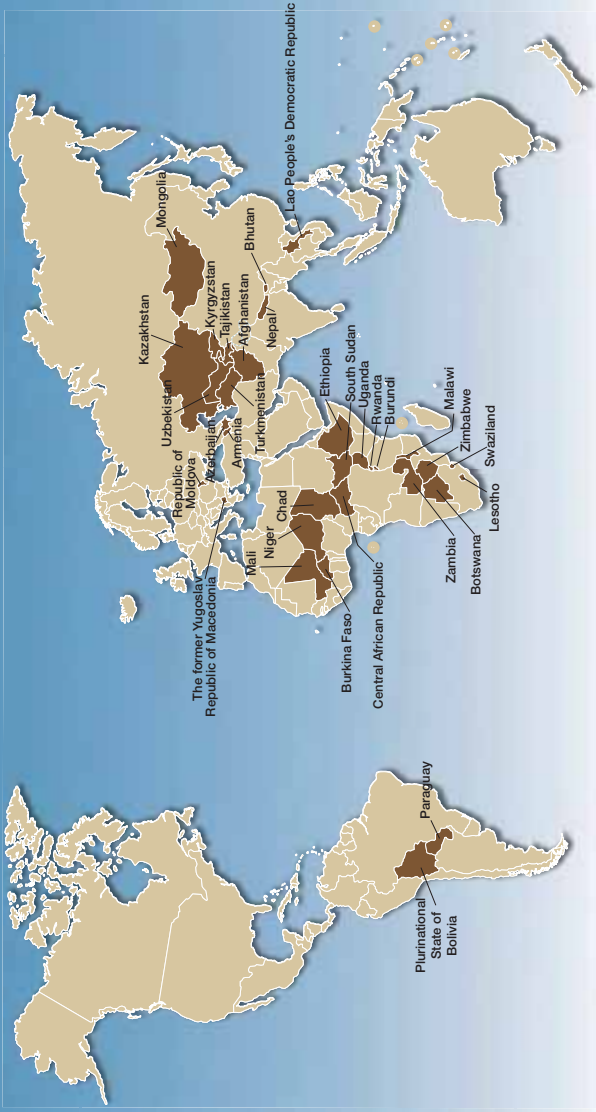

The Almaty Programme of Action, adopted in 2003 at the International Ministerial Conference of Landlocked and Transit Developing Countries and Donor Countries and International Financial and Development Institutions on Transit Transport Cooperation, was a hallmark of these global efforts. During the past decade, awareness and recognition of the special needs of LLDCs have risen at the international level and, despite large differences among individual LLDCs, there are encouraging signs of economic and social improvements in these countries. Nevertheless, laying the foundation for sustainable development continues to be work in progress for many, if not most, LLDCs.

The Second United Nations Conference on Landlocked Developing Countries, which will take place in Vienna from 3 to 5 November 2014, provides an opportunity to reaffirm the global commitment to addressing the special needs of these countries and renew the partnership between LLDCs, their transit neighbours and their development partners.

This publication is prepared as part of UNCTAD's contribution to this global gathering. It presents key economic, social and trade information on all 32 LLDCs with the aim of underpinning the dimension of their development challenge with facts and figures.

Landlocked Developing Countries (32 countries)

Africa 16, Asia 12, Latin America 2, Central and Eastern Europe 2

Note: The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

EXPLANATORY NOTES

The term "dollars" (\$) refers to United States dollars.

A hyphen (-) indicates that the amount is nil or negligible.

Two dots indicate that the data are not available, or are not separately reported.

Use of a dash (–) between dates representing years, for example, 2010–2012, signifies the full period involved, including the initial and final years except for “adult literacy rate 2005–2011” where latest data available within this period are taken.

Unless otherwise specified, data refers to data available at the UNCTAD secretariat up to March 2014.

COUNTRY GROUPS

Developed economies: Andorra, Austria, Australia, Belgium, Bulgaria, Bermuda, Canada, Cyprus, Czech Republic, Denmark, Estonia, Faeroe Islands, Finland, France, Germany, Gibraltar, Greece, Greenland, Holy See, Hungary, Iceland, Ireland, Italy, Israel, Japan, Latvia, Lithuania, Luxembourg, Malta, Netherlands, New Zealand, Norway, Poland, Portugal, Romania, Saint Pierre and Miquelon, San Marino, Slovakia, Slovenia, Spain, Sweden, Switzerland, United Kingdom, United States of America.

European Union: EU27: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom of Great Britain and Northern Ireland.

Transition economies: Albania, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Croatia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Montenegro, Russian Federation, Serbia, Tajikistan, The former Yugoslav Republic of Macedonia, Turkmenistan, Ukraine, Uzbekistan.

Developing economies: All other countries, territories and areas in Africa, Asia, America, Europe and Oceania not specified above.

Other developed economies: Term used to describe developed economies other than those contained in relevant charts on merchandise exports and imports.

Other developing economies: Term used to describe developing economies other than those contained in relevant charts on merchandise exports and imports.

DEFINITIONS

Official language: The official language(s) of the country.

National currency: Legal tender issued by the country's central bank or monetary authority.

Population: Refers to total population.

Density: Population divided by land area in square kilometres.

Urban population: People living in urban areas as defined by national statistical offices.

Surface area: country's total area, including inland bodies of water and coastal waterways.

Life expectancy at birth: Indicates the average number of years a newborn infant would live.

Infant mortality rate: Number of infants dying before reaching one year of age, per 1,000 live births in a given year.

Adult literacy rate: Percentage of the population age 15 and above who can, with understanding, read and write a short, simple statement on their everyday life.

National poverty rate: Percentage of the population living below the national poverty line. National estimates are based on population-weighted subgroup estimates from household surveys.

Human development index (HDI): A yearly composite index produced by the United Nations Development Programme to measure human development, based on health, education and income indices.

Economic vulnerability index (EVI): A composite index produced by the United Nations Committee for Development Policy as part of the methodology to identify the least developed countries (vulnerability criterion), based on indicators the size of the population, remoteness, economic concentration in primary activities (agriculture, forestry, fisheries), merchandise export concentration, the share of population in low-lying coastal zones, the share of population that suffered from natural disasters, instability of agricultural production, and instability of exports of goods and services.

Human asset index (HAI): A composite index produced by the UN Committee for Development Policy as part of the methodology to identify the least developed countries (human asset criterion), based on indicators for undernourishment, child mortality, secondary school enrolment and adult literacy.

Foreign direct investment (FDI): Net inflows of investment to exercise management control by acquiring 10 per cent or more of voting stock in an enterprise operating in a country other than the country of origin of the investor.

Net official development assistance (ODA): Disbursed loans made on concessional terms (net of repayments of principal) and grants by official agencies of members of the Development Assistance Committee (DAC) of

OECD, by multilateral institutions, and by non-DAC countries to promote economic development and welfare in recipient countries.

Total external debt: Debt owed to non-residents repayable in currency, goods, or services. Total external debt is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of credit from the International Monetary Fund (IMF), and short-term debt.

External reserves: Total reserves minus gold, comprising special drawing rights, reserves of IMF members held by IMF, and holdings of foreign exchange under the control of monetary authorities. Gold holdings are excluded.

Gross domestic product (GDP): Total market value of all final goods and services produced within a country in a year.

GDP growth: Rate of growth of GDP at constant prices (base period 2005)

Structure of GDP: It measures the value added in the different sectors of the economy. Agriculture covers agriculture, hunting, forestry and fisheries. Industry comprises manufacturing, electricity, gas and water supply, mining and quarrying and construction; services comprise market services and non-market services.

Merchandise and services exports: Sum of f.o.b. value of goods and services exported to the rest of the world.

Merchandise and services imports: Sum of c.i.f. value of goods and services imported from the rest of the world.

Trade deficit: Merchandise and services exports value less merchandise and services imports value.

Total road network: Includes motorways, highways, and all other national and regional roads in a country.

Road density: Ratio of the length of a country's total road network to a country's land area.

Paved roads: Roads surfaced with crushed stone (macadam) and hydrocarbon binder or bituminized agents, with concrete, or with cobblestones, as a percentage of total road length in a country.

Vehicles: Include cars, buses, and freight vehicles, not including two-wheelers.

Railway lines: Length of railway route available for train service, irrespective of the number of parallel tracks.

Railway density: Ratio of the length of the country's total railway network to the country's land area

Mobile phone subscriptions: Number of individual subscriptions to a mobile telephone service using cellular technology. Post-paid and prepaid subscriptions are included.

Internet users: Individuals who have used the Internet (from any location) in the last 12 months. Internet can be used via a computer, mobile phone, personal digital assistant, games machine, digital TV, etc.
