TECHNOLOGY AND INNOVATION REPORT 2021

Innovation with equity

Roundtable with 10 Member Group
Taking recommendations forward

UNITED NATIONS
UNCTAD

What is the impact of frontier technologies on inequalities?

How can governments and other stakeholder can minimize risks and maximize opportunities?

And how can international cooperation help?

The answer to these questions is critical for the achievement of the Sustainable Development Goals.

The Technology and Innovation Report 2021 critically examines the possibility that frontier technologies such as artificial intelligence, robotics and gene editing could widen existing inequalities and create new ones.

The roundtable discussion by 10 Member Group representatives will be centered around the implementation of the recommendations from the report and ways of moving forward with the policy options for countries to strategically position themselves to take advantage of new waves of technological change for inclusive and sustainable development.

The 10-Member Group appointed by the Secretary-General is mandated to work with the IATT to prepare the annual STI Forum and to support the development and operationalization of the online platform.
