Purpose: Highlighting (existing and potential) transformative actions in emerging markets for net zero finance and to build momentum towards joint ambitions to scale public and private climate finance to “shift the trillions” at COP28.

Background: The COP27 outcome acknowledged the need to dramatically scale climate finance. Considering insights from the Global Stocktake (GST) process, discussions around Art 2.1c and the New Collective Quantified Goal on Climate Finance (NCQG), as well as emerging financing partnerships, this event will explore the most promising actions Parties can pursue to meet collective goals, including multiplying efforts to mobilize private capital.

Session Format:
