IFPRI's Flagship Report puts into perspective the major food policy issues, developments, and decisions of 2015 and highlights challenges and opportunities for 2016. This year's report takes a special look at how food systems can best contribute to meeting the UN Sustainable Development Goals.

Drawing on rigorous research, IFPRI researchers and other distinguished food policy experts consider a wide range of crucial questions to support a new global food system that is efficient, inclusive, climate-smart, sustainable, nutrition- and health-driven, and business-friendly.
