

**INTERSESSIONAL PANEL OF THE UNITED NATIONS COMMISSION  
ON SCIENCE AND TECHNOLOGY FOR DEVELOPMENT (CSTD)**

**Geneva, Switzerland  
25-26 October 2022**

Contribution by Guinea

to the CSTD 2022-2023 priority theme on “Technology and innovation for cleaner  
and more productive and competitive production”

DISCLAIMER: The views presented here are the contributors' and do not necessarily reflect the views and position of the United Nations or the United Nations Conference on Trade and Development

**PRIORITY THEME 1:** *Technology and innovation for cleaner and more productive and competitive production*

1. *Use of renewable energies and waste recycling in the agricultural and industrial sector in order to protect the environment.*
2. *No particular visible strategy apart from that advocated by the Bangui Agreement which is the national law in the matter. It is about encouraging creativity, innovation as well as their protection and promotion. Support is needed from development partners and specialized international institutions.*
3. *Unable to answer.*
4. *The challenge is immense and complete. As a solution, it is necessary to establish and develop cooperative relations with development partners.*
5. *Mobilization of the various components concerned for the appropriation and exercise of the activity. Strengthening cooperation is necessary in this context.*
6. *Projects in the dissemination of technical information are imperative, otherwise the establishment of a support center for technical information and the training of young people experienced in searching for information in these databases on behalf of those who need it, in particular researchers, industrialists, students, lawyers, traders, etc. Cooperation should be developed in this direction.*
7. *Important actions are to be taken because the question is open. In this regard there is a strong need for cooperation with development partners.*
8. *People to suggest probably exist.*
9. *No references from the Department of Industry and SMEs, but very likely from the others.as the Ministry of Health, Agriculture and at Gamal Abdel Nasser University in Conakry.*

**PRIORITY THEME 2:** *Ensuring safe water and sanitation for all: a solution by science, technology and innovation*

1. *The challenges are complete.*
2. *Not able to answer.*
3. *Unable to answer.*
4. *Not able to answer.*
