- ✓ 14 integrations with third-party systems. Verification of the fact of customs clearance by VIN-code

2021

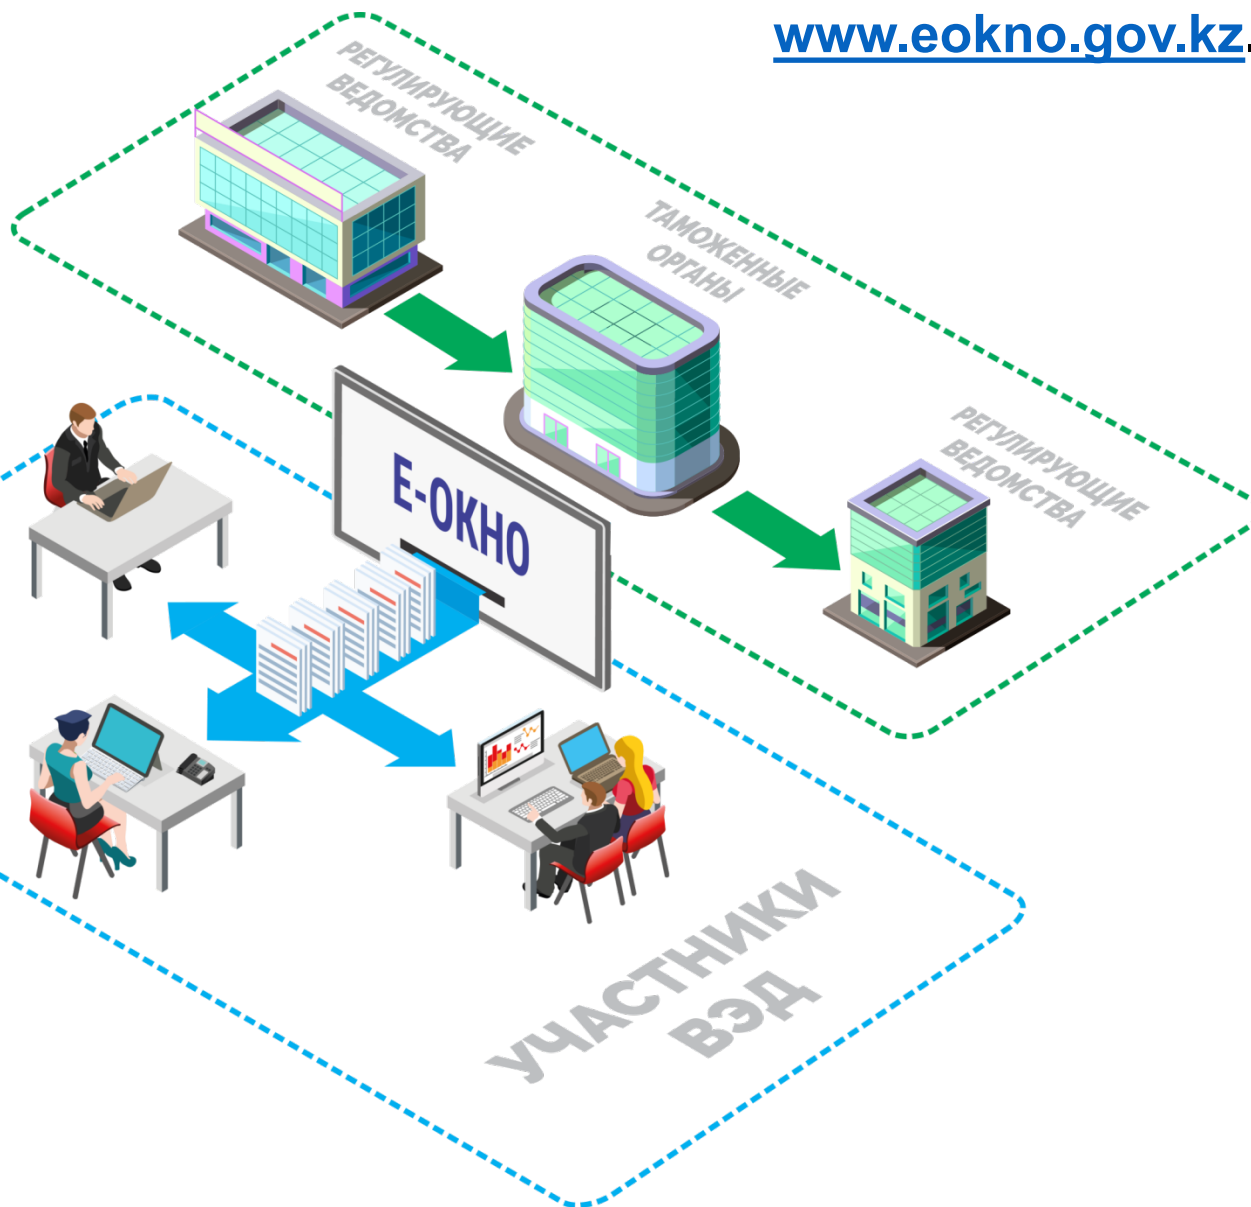

- ✓ Component for issuing certificates and declarations of conformity. Component of the Preliminary Decision on Customs Value. Component for payment of all types of payments and taxes;

PRINCIPLES

www.eokno.gov.kz.

BASIC PRINCIPLES

Information should move, not people.

No special training is required to receive public services.

The state should never request information and documents that it has created itself.

EO ALLOWS

Hide from the OVED the complexity of intra- and interdepartmental processes for obtaining RD.

To save the Department of Foreign Economic Activity from the need for personal contact with representatives of different departments.

Reduce the cost and labor costs for conducting foreign economic activity.

Increase the transparency of the state system and reduce the possibility of corruption.

Eliminate duplication of functions, repeated submission of the same information and provision to one GO of documents issued by other GO.

INTEGRATED WITH 15 INFORMATION SYSTEMS

IS "ASTANA-1"

State database "Individuals"

State database "Legal entities"

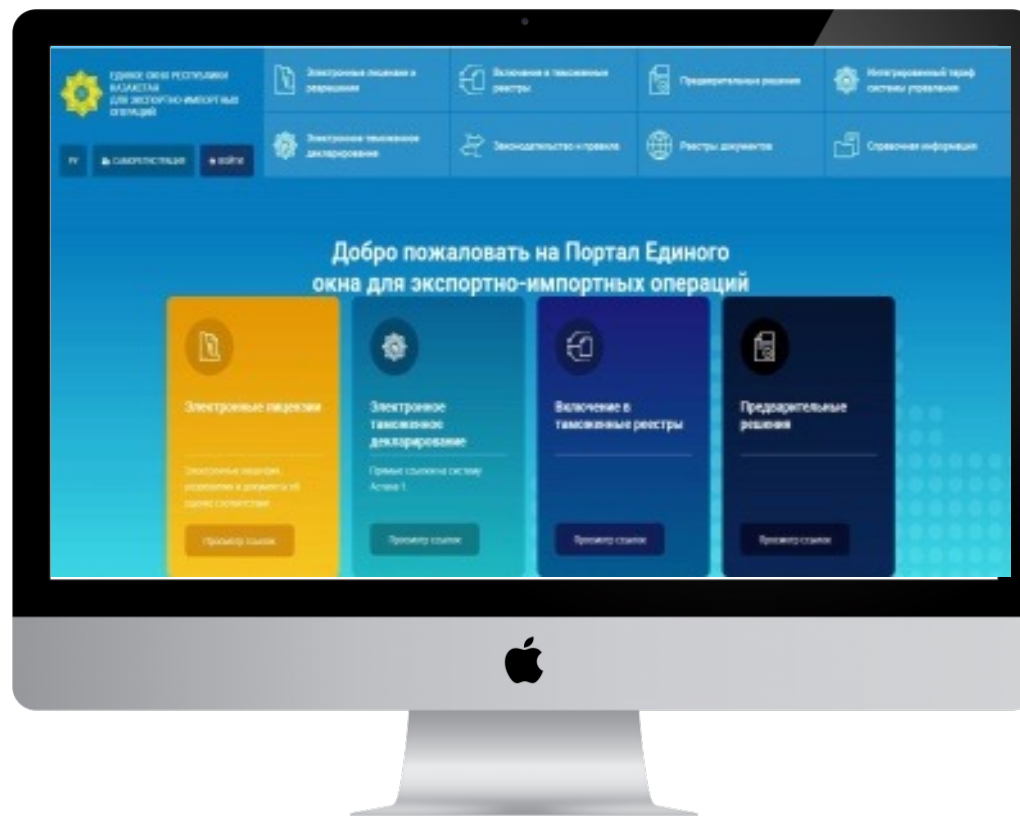

E-government portal «egov.kz»

State database "E-Licensing"

State database "Registration of real estate"

IS NCE of the RK "Atameken"

IS "SIE of LE and SB" of the CLS and SA of the PG's
Office of the RK

IS "NIIP" of the MJ of the RK

IS "CUPA"

IS "Electronic Invoices"

IS "Electronic Invoices"

IS "Unified Data Warehouse"

IS "UID" JSC "State Credit Bureau"
Automated IS"SC" of the APC of the MIA of
the RK

Benefits

Previously, many of the listed services and functions were provided in various disparate systems, in most cases there was no integration with the necessary databases.

"Single window" creates conditions when participants in foreign economic activity do not need to go to different instances to collect certain documents and permits. It will be enough to log in and receive services in electronic form through one portal.

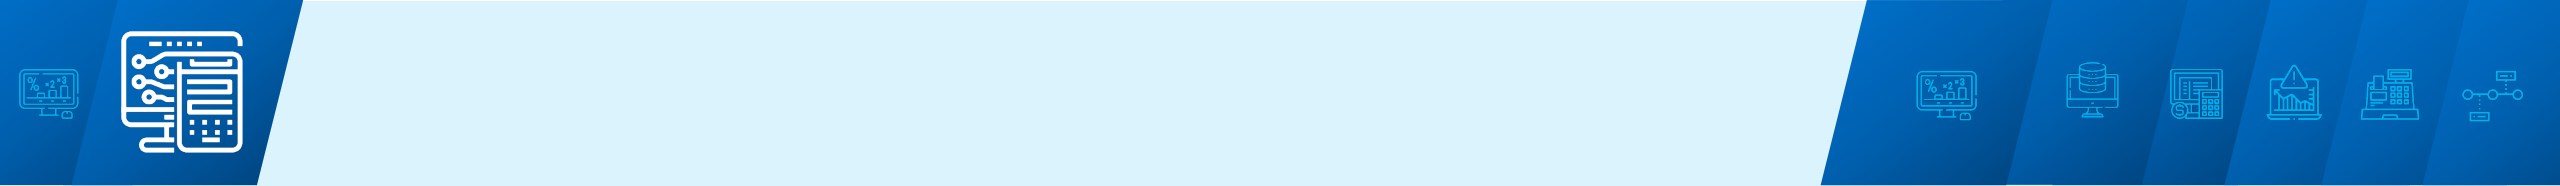

BENEFITS FOR THE STATE:

- Transparency of actions of customs and other state bodies
- Elimination of the human factor in decision-making and minimization of corruption manifestations
- Saving labor costs of employees of state bodies

BENEFITS FOR CITIZENS/BUSINESSES:

- Acceleration of customs procedures
- Reduction of time costs
- No need to provide supporting documents on paper
- Exclusion of contacts with service providers

Thank you!
