

Trade Facilitation Innovation Days 2023

19-20 September 2023

Pitch for Trade Facilitation Innovation

Title of TFID 2023 Session	Trade Tech - Seizing the future
Title of Innovation	Docloop : AI-Powered Interoperability in Transport and Logistics
Name of the Innovator and Designation	Aymeric LE PAGE Co Founder and CEO
Contact details of the Innovator (Tel, email)	aymeric@docloop.io +33.6.74.74.64.90
Description of the Innovation (max 1,000 words)	<p>Docloop uses artificial intelligence to accelerate the decarbonization and digitization of the world of goods transportation and logistics. The start-up specifically addresses the lack of interoperability of systems in document management.</p> <p>The platform allows sending any data of any format to any system, such as automatic classification of documents, extraction, automatic structuring and enrichment of data, standardization to international formats & documents, interfaces.</p> <p>Docloop is funded by the French Agency for Ecological Transition (ADEME) for its ability to reduce paper consumption, improve the adoption of standards, reduce low-value-added tasks, and empower SMBs in the digital transformation of the industry.</p> <p>With its communitarian approach – the platform is neutral and flexible, aimed at stakeholders of all sizes in the transport and logistics industry – Docloop participates in pilot groups for the implementation of emerging standards such as the new eFTI pilot and the European Electronic Invoicing working group.</p> <p>Docloop is AI-powered leveraging the most recent breakthrough developments in AI. It automatically converts unstructured data from PDFs/printed paper (invoices, packing lists, bill of lading, customs declaration, order forms, ...), or e-mails into organized, actionable formats ready to be integrated into the industry’s key systems: from Transportation Management Systems to Financial Systems, to Authorities Platforms.</p>

	<p>Operational tasks like document verification and customs clearance are routine yet critical. Docloop automates these tasks, emphasizing both speed and accuracy. This heightened efficiency allows teams to concentrate on core, high-impact tasks, driving overall productivity gains.</p> <p>The platform also acts as a catalyst for the adoption of emerging standards such as eFTI, as it can automatically translate data from one referential to the other, allowing systems to communicate in their own language/standards.</p> <p>For more info https://www.docloop.io https://www.linkedin.com/company/docloop/ Aymeric Le Page : aymeric@docloop.io</p>
