Rules of origin self assessment tool

DG TRADE
Bert Floryn

Access2Markets

- [Access2Markets](#) was created by combining the old tools *Market Access Database* (MADB) and *EU Trade Helpdesk*
- *The website contains information and interactive tools on*
 - tariffs
 - rules of origin
 - taxes and additional duties
 - import procedures and formalities
 - product requirements
 - trade barriers
 - trade flow statistics

Rules of origin self assessment tool

- The **Rules of Origin Self-Assessment tool** in Access2Markets guides businesses throughout the rules of origin applicable to their product in a particular Trade Agreement.
- User friendly tool to check whether you can benefit from **preferential tariff treatment** under a particular EU trade agreement.
- Available in **all EU languages** for the majority of EU Trade Agreements
- Links:

Access2Markets: <https://trade.ec.europa.eu/access-to-markets/en/home>

ROSA: <https://trade.ec.europa.eu/access-to-markets/en/content/how-use-rules-origin-self-assessment-tool-rosa>

From a simple question/answer tool

1 Is my product originating in the EU or Japan?

- i If your product has been produced using any non-originating materials, the product has to fulfil the following **product specific rule** to be considered originating in the EU or Japan (if there are alternative rules, your product needs to comply with only one of them):

Production from <u>non-originating materials</u> of any <u>sub-heading</u>, except that of the product (CTSH);	Rule explained ▾
or	
A chemical reaction, purification, a change in particle size, production of standard materials, isomer separation or biotechnological processing is undergone;	Rule explained ▾

Does my product comply with the rule?

☐ Yes ☐ No

☐ Yes ☐ No

2 How to document that the product is originating

Please choose the case that applies to you

To benefit from preference, originating products need to be accompanied by the appropriate proof of origin confirming their origin

- If you are an exporter/producer located in the EU, you can self-declare that the product originates in the EU by making out a statement on origin. This statement can be made out:

- by any EU exporter provided that the total value of the consignment is below €6,000

☐

- by EU exporters that are registered in the Registered Exporter System (REX) for consignments of €6,000 and above.

☐

- If you are an exporter/producer in Japan, you need to check the requirements for making out a statement on origin with your local customs authorities.

☐

3 How to transport the originating products via third countries

- Originating products transported from the EU to Japan (and vice-versa) cannot be further processed in a third country.

However, some operations such as preserving products in good conditions, storage, splitting of consignments can be conducted in a third country if the products are kept under customs supervision. This is set out by the non-alteration rule.

Have you complied with the transport conditions?

☐ Yes ☐ No

☐ N.A.

* [If you do not know how the product will be transported between the EU and Japan, please click NA]

Assessment

 **Check if my product is originating in the EU.**

Please select the option that applies to your product:

My product is wholly obtained in the EU. This concerns agricultural products, fish, minerals and waste and scrap, that have been obtained entirely by for example agriculture, fishing, and mining in the EU and products made from such materials.

☐

Rule explained

My product is produced incorporating non-originating materials (such as imported parts and components, or materials of unknown origin). This concerns mainly manufactured or processed products.

☐

Proof of origin

Transport

Assessment

 **Other applicable requirements**

Finally, please confirm whether your product complies with the following requirements to know if it is originating in the EU.

Does the production process (which confers originating status to your product) take place in the territory of the EU (up to 10% value added outside of that territory is allowed if certain conditions are met)? See more details about this [territoriality principle](#).

☒ Yes ☐ No

Relevant information to bear in mind when assessing the origin of your product:

Refunding of duties previously paid or exemption of duties (duty drawback) on imported materials used to produce a product that is exported under preference is allowed under the EU-Southern African Development Community (SADC) Economic Partnership Agreement (EPA).

If you use both originating and non-originating fungible materials, you need to store them separately. However, fungible materials may be stored together using accounting segregation under certain conditions. See more information about [accounting segregation](#).

Result of the self assessment

The origin of your product

You have answered that your product HS 850760:

- is wholly obtained;
- fulfils [the principle of territoriality](#);

Based on those answers, your product is originating in the EU.

Documentation on Origin

You need to document that your product is originating.

You have chosen to self-declare that your product is originating. Therefore you need to make out an origin declaration to indicate that your product is originating. Find details and practical information about how to make this [self-declaration](#). Given that your consignment is 6000 Euro or above, you need to be an [Approved Exporter](#) according to the legislation of your country before you can make this declaration. As an exporter you are responsible for the correctness of the declaration and the information provided.

Transport conditions

You comply with the transport conditions for originating products. Therefore, the importer of your product can claim the preferential tariff.

▲ ROSA is a support tool offered by the European Commission and the result of your self-assessment is not a binding determination of the origin of your product.

[95.03 - 95.05](#)

A change from any other heading;

or

A change from within any one of these headings, whether or not there is also a change from any other heading, provided that the value of non-originating materials classified in the same heading as the final product does not exceed 50 per cent of the transaction value or ex-works price of the product.

Egypt

[See detailed information of Egypt](#)

Toys, games and sports requisites; parts and accessories thereof; except for:

[ex Chapter 95](#)

Manufacture from materials of any heading, except that of the product

Other toys; reduced-size ('scale') models and similar recreational models, working or not; puzzles of all kinds
Manufacture:

[ex9503](#)

- from materials of any heading, except that of the product, and
- in which the value of all the materials used does not exceed 50 % of the ex-works price of the product

Ideas to improve the tool

- Improve the comparison tool:
 - Develop it for all agreements and make it multilanguage
 - Include the comparison of other provisions
 - Allow for the selection of multiple agreements at once
- Make ROSA more visible in A2M
