

MULTI-YEAR EXPERT MEETING ON TRADE, SERVICES AND DEVELOPMENT

Geneva, 11–13 May 2015

**BEST PRACTICES FOR TOOLKIT:
TELECOMMUNICATIONS AND IT**

SESSION 6

UNITED NATIONS
UNCTAD

Dr. Bilel Jamoussi
Chief, Study Group Department
Telecommunication Standardization Bureau
International Telecommunication Union

Best Practices For Toolkit

- *Telecommunications and IT*

Dr Bilel Jamoussi,
Chief, Study Groups Department,
Telecommunication Standardization Bureau (TSB)
ITU

Presentation at UNCTAD, 13 May 2015

**ITU is the specialized agency of the UN for
telecommunications and ICTs ...**

... and turns 150 years in 2015

**Theme for all year celebrations:
“Telecommunications and ICTs: drivers of innovation”**

ITU allocates (1) frequency spectrum to different services, (2) satellite orbit assignments, (3) numbers and identifiers

UNITED STATES FREQUENCY ALLOCATIONS THE RADIO SPECTRUM

RADIO SERVICES COLOR LEGEND

Mobile	Mobile-Satellite
Fixed	Fixed-Satellite
Fixed-Mobile	Fixed-Mobile-Satellite
Mobile-Satellite (MS)	Mobile-Satellite (MS)
Fixed-Satellite (FS)	Fixed-Satellite (FS)
Fixed-Mobile-Satellite (FMS)	Fixed-Mobile-Satellite (FMS)
Mobile (M)	Mobile (M)
Fixed (F)	Fixed (F)
Fixed-Mobile (FM)	Fixed-Mobile (FM)
Mobile-Satellite (MS)	Mobile-Satellite (MS)
Fixed-Satellite (FS)	Fixed-Satellite (FS)
Fixed-Mobile-Satellite (FMS)	Fixed-Mobile-Satellite (FMS)

ACTIVITY CODE

Primary	Secondary
Shared	Earth Station

ALLOCATION USAGE DESIGNATION

U.S. DEPARTMENT OF COMMERCE
NATIONAL BUREAU OF STANDARDS
FEDERAL COMMUNICATIONS COMMISSION

ITU develops standards

ITU assists developing countries in building up their ICT infrastructure

ITU's Membership: Public-private partnership

- 193 **Member States** and Regulatory Bodies
- 750 **Sector Members** (Companies, Business Associations, NGOs)

The European Union is a Sector Member since 1988

- 90+ **Academia** (Universities & Research Establishments)

(as of May 2015)

ITU-T Study Groups

- (2) Operational aspects
- (3) Economic and policy issues
- (5) Environment and climate change
- (9) Broadband cable and TV
- (11) Protocols and test specifications
- (12) Performance, QoS and QoE
- (13) Future networks (incl. cloud)
- (15) Transport and access
- (16) Multimedia
- (17) Security

ITU-T Focus Groups

Augment the Study Group system

- Way to quickly react to ICT standardization needs
- Great flexibility of working methods
- Open to non-member participants

Current Focus Groups:

1. 5G
2. Aviation applications of cloud computing for flight data monitoring
3. Digital financial services
4. Smart sustainable cities
5. Bridging the gap: from innovation to standards
6. Smart water management

TELECOMMUNICATIONS & IT

Pervasive Nature Of ICTs

Emergency

Education

Health

Agriculture

Investment

Applications

Policy & Regulation

Governance

Sensor Networks

Universal Broadband

Green ICT & E-Waste

Capacity Building

Transport

Measurements

Electricity

SMART SUSTAINABLE CITIES

Infrastructure Security

Privacy & Security

Water

Digital Inclusion

Standards, Conformity & Interoperability

Spectrum Management

Finance & Payment

DISRUPTIVE TECHNOLOGIES

- IP Convergence
- Cloud Computing
- Internet of Everything
- Digital Finance / Virtual Currency
- E-health
- Wearables
- 5G

Will redefine business models for the industry

EXPLOSIVE GROWTH OF DATA

Key Drivers:

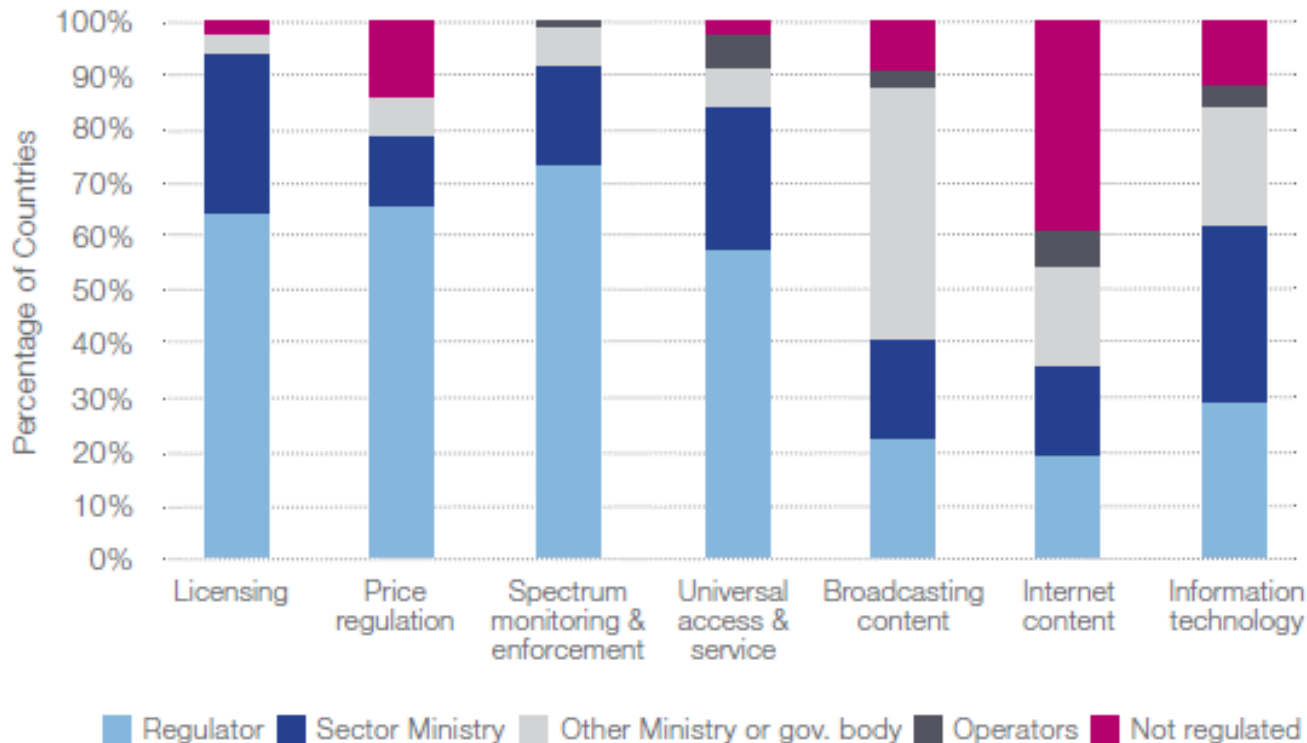

- IP enabled networks are at the core.
- Billions more people, things, places, processes and devices will come online.
- Extensive digitization of information.
- Internet Protocol version 6 (IPv6)

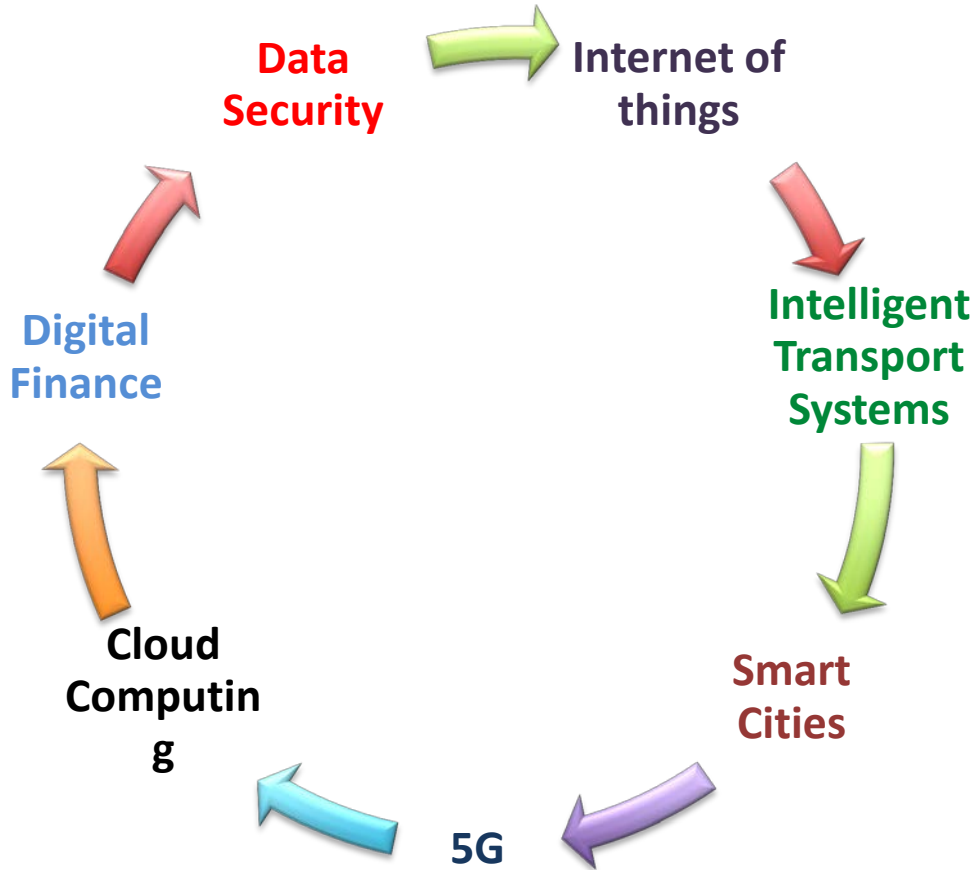

Trend of IP Enabled Regulation

ICT Regulation: Who regulates what?

EMERGING STANDARDS IN ICT

REGULATORY BEST PRACTICES

- Adopt a “light-touch” regulatory approach and in favour of innovation
- Ensure principles of fair, equal and non-discriminatory treatment of all market players
- Streamline procedures to facilitate market entry and stimulate competition and innovation;
- Conduct market analysis to assess the market situation in a converged environment;
- Adopt a regulatory framework that eliminates barriers to new entrants;

REGULATORY BEST PRACTICES

- Level playing field for market stakeholders (operators, Internet providers, OTT providers, etc.);
- Empower consumers to make informed decisions through the development of online tools to check download speeds, quality-of service and prices for access and data plans;
- Monitor the use of traffic management techniques to ensure they do not unfairly discriminate between market players;
- Ensure transparency and openness (e.g. by making market data and regulations available).

REGULATORY BEST PRACTICES

- Encourage network and facility sharing through “soft” measures (e.g. cross-sector mapping of infrastructure that enables the coordination of civil works).
- Encourage multi-stakeholder consultation on policy and regulatory matters;
- Continue to ensure regulatory predictability and foster co-regulation wherever possible; and
- Work with all stakeholders to reduce or remove practical barriers to broadband deployment.

CRITICAL SUCCESS FACTORS

Policy and regulatory framework for broadband deployment

E-government strategy

National Cybersecurity Strategy

Policy and Strategy for ICT Standards and Innovation

Policy and regulatory framework for data protection

Thank You
