# Goals of the pilot project

## **Why participate?**

Safaricom joined the UNCTAD pilot project to report on its contribution to implementing the SDG agenda based on the Guidance on Core indicators (GCI) for entity reporting on the contribution towards the attainment of the Sustainable Development Goals proposed by UNCTAD.

## **Safaricom joined the project:**

- to support the UN efforts towards achieving the SDGs and promote SDG reporting,
- to demonstrate the ability of business entities to report on their SDG activity based on the GCI,
- to improve the GCI quality,
- to demonstrate its leadership in sustainability reporting.

# Sustainability reporting framework

# Lessons learnt

- The GCI is an important tool to entrench business reporting on the contribution towards the achievement of the SDGs
- GCI is based on sustainability reporting frameworks most widely used across the globe, thus for the average users of the existing frameworks, the disclosure of GCIs does not present significant difficulties
- The training manual proved to be a crucial tool in understanding the CGI and their disclosure

# Lessons learnt

- Data for use in reporting based on GCI is readily available for most of the GCIs, hence no difficulties in reporting using the GCI framework
- Safaricom appreciates GCI and plans to continue making efforts towards disclosing GCIs in subsequent sustainability reporting cycles

Thank You!
