Coordination and digitalization as a
means to accelerated and climate-smart
trade facilitation

17–19 July 2023

Facilitating
Small Scale Cross Border Trade:
Insights from ITC’s field work

Presentation by

Mr. Pierre Bonthonneau
Senior Trade Facilitation Adviser
International Trade Centre
Facilitating Small Scale Cross Border Trade
Insights from ITC’s field work

10th Multi-Year Expert Meeting on Transport, Trade Logistics and Trade Facilitation, 18 July 2023
Pierre Bonthonneau, Senior Trade Facilitation Adviser
Bonthonneau@intracen.org

1  Context

2  Our service offer to support SSCBT

3  Importance of Border Cooperation
Small-Scale Cross-Border Trade (SSCBT) is a prevalent issue all over Africa

SSCBT is a prominent feature of intra-African trade

- SSCBT accounts for as much as 42% and 80%, of total trade between some countries.
- SSCBT accounts for the employment of about 20 to 75% of the total active population in African countries.
- SSCBT is serving as a source of income for about 43 percent of the African population.

Profile: SSCBT are vulnerable economic operators

SSCBTs are low-income individuals who make a living by carrying small volumes of goods across borders, for direct sale to consumers in a neighboring country.

Over representation of middle-aged women and youth of various ethnic and linguistic backgrounds who depend entirely on small-scale cross-border trade for their livelihoods. Around 70 to 80% of informal cross-border traders in the Southern Africa region are women.

Food items and manufactured goods dominate SSCBT in Africa, but the type of food items varies significantly from one border to the next.
**What is Small-Scale Cross-Border Trade**

- SSCBT refers to **trade in legitimately produced goods and services**, which **escapes the regulatory framework**, as such avoiding certain tax and regulatory burdens.

- SSCBT refers to goods traded by formal and informal firms that are **unrecorded on official government records** and that fully or partly evade payment of duties and charges.

**Going beyond the legal vs. illegal divide**

From a Customs law perspective, SSCBT can be considered as illegal trading practices:

- Unrecorded transactions
- Partial or complete avoidance of duties and taxes

However, to understand the phenomenon and design appropriate solution, we should distinguish SSCBT:

- SSCBT act in good faith to earn a livelihood
- SCBT trade in unorthodox ways because of lack of skills or cost issues
- SSCBT contribute to local economy
- They aspire to formalize

...from smuggling activities:

- Smuggles act in bad faith to avoid legitimate border controls
- Pose a threat to security and / or public health
1. Context

2. ITC experience supporting SSCBT

3. Importance of Border Cooperation

Helping border associations to advocate and to support SSCBT trade formally

- Build capacity of CBTAs on best-practices in facilitating small-scale cross border trade
- Help CBTAs in collecting data on SSCBT to inform the policy process
- Support CBTAs in drafting position paper and advocate towards policy makers
- Enhance CBTAs service towards SSCBT: trainings, creation of Trade information and Border Assistance Desks
Facilitating trade procedures with the Simplified Trade Regime (STR) for SSCBTs

STR: a best-practice from EAC and COMESA regions

STR alleviates border requirements for products listed on a common list below a specific price threshold

Changing the narrative on informal cross-border trade

• Provide sensitization programs for border officials towards SSCBT and women traders

• Develop communication campaigns to change border officials perspective on SSCBT
Trade Information and Border Assistance Desks

TIBAD: building infrastructures, empowering people

TIBAD built at Dan Issa border between Niger and Nigeria

Dedicated training package developed for TIBAD staffs

Empowering vulnerable communities to trade formally

COMESA Trade Facilitation Training Programme for SSCBT

Why Should You Use the Border Post?
Crossing the Border Formally
Dealing with Corruption and Harassment
Working as a Group: the CBT Association
Formalizing Your Business to Grow
Working with Customs authority to enhance risk-management practices at border crossings

Build synergies: intelligence sharing for targeted and efficient controls

16 certified trainers on three ITC modules

What to control and why?

How to collaborate with the private sector and why?

How to make it work at the borders?

Developing Sustainable Energy Solutions for Enhanced Cross-Border Trading
Facilitating and formalizing SSCBT requires “whole-of-the-border” coordination

- **Alignment of policies and regulations** across border regulatory agencies ensures consistency and clarity for traders.
- **Collaborative risk assessment** and mitigation strategies enhance border security and protect legitimate traders from illicit activities.
- Strengthened border control measures through the integration of **local knowledge** and professional expertise.
- **Improves transparency**, reduces administrative burdens, and fosters trust between traders and regulatory agencies.
Fostering collaboration between border authorities and CBTAs to improve border conditions

- Reflect SSCBT specific requirements
- Advocate for SSCBT sensitive schemes
- Support SSCBT compliance with border requirements
- Reduce risk of harassment and corruption at the border

Working with migration agencies to jointly address trade in goods and human mobility issues

- Understanding the profile of small-scale cross-border trader and the nature of small-scale cross-border trade
- Pinpointing the key obstacles faced by SSCBT going through borders
- Formulating key recommendations to facilitate SSCBT and provide incentives towards enhanced formalization
Harnessing SSCBT to respond to food security shocks

SSCBT helps ensure Food Security in remote border communities

• SSCBT traders can adapt quickly to changing market conditions and respond promptly to food crises
• They are well-connected to local producers, suppliers, and consumers, enabling rapid mobilization of resources during food crises.

Need for deeper coordination between national and international agencies in charge of food security and the SSCBT community

Rethinking borders as “hubs” for achieving broader human development objectives

Border environments can be strong catalysts to providing health services, such as mobile clinics, for accessible primary healthcare and health education

SADC Secretariat has taken the lead in the fight against communicable diseases, including COVID-19 and cholera, through the installation of handwashing facilities at border crossings.
Thank you for your attention
