

**Opening** 

12-13 September 2019

Palais des Nations, Geneva

# **Opening Session**

FORUM

#### Chair:

 Ms. Pamela Coke Hamilton, Director, Division on International Trade and Commodities, UNCTAD

## Speakers:

- Mr. Martin Saladin, Head of Operations, State Secretariat for Economic Affairs SECO, Switzerland
- Dr. Didacus Jules, Director General, Organisation of East Caribbean States (OECS)
- Ms. Stéphanie Bouziges-Eschmann, Secretary General, French Facility for Global Environment (FFEM)

Session 1: Setting the scene: Sustainable trade for biodiversity –reality or fiction?

12-13 September 2019

Palais des Nations, Geneva

# Session 1: Setting the scene: Sustainable trade for biodiversity – reality or fiction?

#### Chair:

 Ms. Pamela Coke Hamilton, Director, Division on International Trade and Commodities, UNCTAD

#### Keynote speaker:

Ms. Ana Maria Hernández, Chair, IPBES

### Speakers:

- Mr. Juan Carlos Vasquez, Chief, Legal Affairs and Compliance, CITES
- Mr. René Gómez-García Palao, Director, Sustainability, Inclusion and Climate Change,
   CAF development bank of Latin America
- Mr. João Teixeira, Senior Sustainability Coordinator, Natura Cosmetics, Brazil

# Fifth BioTrade Congress: Linking trade and biodiversity

12–13 September 2019 | Palais des Nations, Geneva

How wildlife trade can support biodiversity conservation and the post-2020 global biodiversity framework?

## CITES is a wildlife treaty that regulates trade

- ✓ Signed in Washington D.C. in March 1973, 183 Parties.
- ✓ Its focused, targeted and legally binding <u>rules</u> combine **science-based** management and trade regulations
- ✓ Underpinned by quota & permit systems, trade controls and effective compliance mechanisms
- ✓ Aimed at achieving tangible conservation and sustainable use goals

## CITES is a wildlife treaty that regulates trade

"CITES conserves our natural world by ensuring that international trade in wild plants and animals is legal, sustainable and traceable. Well-managed trade also contributes to human wellbeing, livelihoods and the achievement of the 2030 Sustainable Development Goals," said CITES Secretary-General Ivonne Higuero.

# 7.7 billion people consuming biodiversity products and interacting with nature daily

Current World Population 7,729,624,199 September 11, 2019, 15:20 (CEST) TODAY THIS YEAR Births today Births this year 245,455 97,330,216 Deaths today Deaths this year 103,048 40.861.556 Population Growth today Population Growth this year 56,468,659 142,407

A million animal and plant species threatened with extinction - a simple calculation with a scary answer (Andy Purvis - IPBES).

#### How did we estimate 1 million threatened species?

PERCENTAGE THREATENED	х	NUMBER OF SPECIES	=	NUMBER THREATENED	
About <b>25%</b> of species are threatened with extinction on average across many animal & plant groups, except insects		There are ~2.5 million animal and plant species that are not insects	i	25% of 2.5 million is <b>~0.5 million</b> non-insect species threatened	
The proportion of threatened insects may not be so high; but is unlikely to be below ~10%		There are about <b>5.5</b> million species of insects		10% of 5.5 million is <b>~0.5 million</b> insect species threatened	
				0.5 million + 0.5 million = ~1 million threatened animal & plant species	

"Humanity needs to respond to the growing extinction crisis by transforming the way we manage the world's wild animals and plants. Business as usual is no longer an option," said CITES Secretary-General Ivonne Higuero.

- Over 36,000 species are protected by CITES. Around 100 were included at COP18 (tropical timber trees, 18 more shark species, sea cucumbers, giraffes, etc.)
- Vast majority (97%) of CITES species can be commercially traded (App. II)
- Over 1m CITES permits issued per year, controlling a multi billion USD legal trade

## A few examples of wildlife trade

Food
Queen conch \$60 million/year

**Leather & Fibers**Pythons = \$1 billion/year

Cosmetics & pharma

Tourism, zoos & pets

Housing & Furniture, Musical instruments

Collections

## **CITES** and Livelihoods case studies

Aloe ferox (South Africa)

Nile crocodile (Kenya)

Vicunas (Bolivia, Peru)

Polar bears (Canada)

Markhor (Tajikistan)

Pirarucu (Brazil)

# CITES Strategic Vision: 2021-2030

GOAL 4 - CITES POLICY DEVELOPMENT ALSO CONTRIBUTES TO AND LEARNS FROM INTERNATIONAL EFFORTS TO ACHIEVE SUSTAINABLE DEVELOPMENT

- ✓ Objective 4.1 Parties support sustainable wildlife trade policies, especially these that increase the capacity of Indigenous peoples and local communities to pursue livelihoods.
- ✓ Objective 4.2 The importance of achieving CITES' aim as a contribution to achieving the relevant Sustainable Development Goals, as well as the post-2020 global biodiversity framework, is recognized.

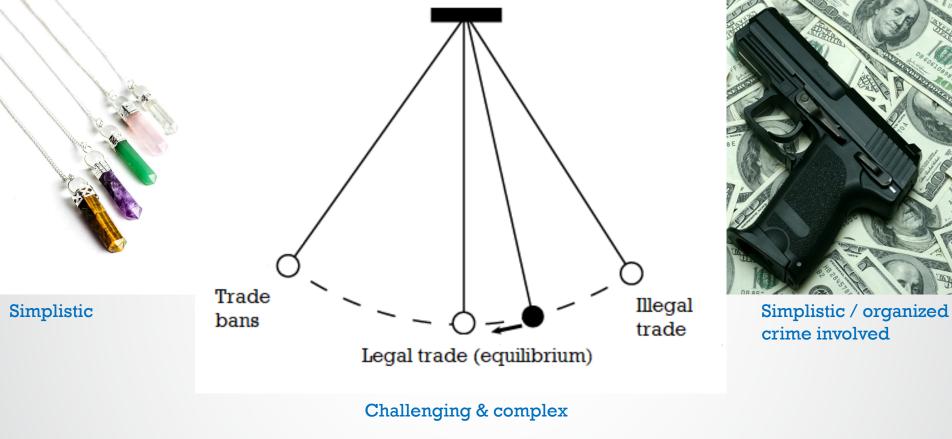

# CITES Strategic Vision: 2021-2030

# GOAL 5 DELIVERY OF THE CITES STRATEGIC VISION IS IMPROVED THROUGH COLLABORATION

- ✓ Objective 5.1 Parties and the Secretariat support and enhance existing cooperative partnerships in order to achieve their identified objectives.
- ✓ Objective 5.2 Parties encourage the formation of new, innovative and mutually sustainable alliances between CITES and relevant international partners, where appropriate to advance CITES' objective and mainstream conservation and of sustainable use of biodiversity.

# How do we get smarter together?

## Collective intelligence to develop:

- ✓ A new narrative (language for sustainability, hope and trust trust is everything)
- ✓ Applied science (science relevant for sustainability)
- ✓ A platform to bring together businesses, communities and regulators
- ✓ Technologies, best practices, biz cases, etc.

Juan Carlos Vasquez Chief, Legal Affairs & Compliance CITES Secretariat juan.vasquez@cites.org

## THANK YOU FOR YOUR ATTENTION

Session 2: Applying Principles and Criteria

12-13 September 2019

Palais des Nations, Geneva

**FORUM** 

## **Session 2: Applying Principles and Criteria**

#### Chair:

 Mr. Lucas Assunção, Head Trade, Environment, Climate Change and Sustainable Development Branch, DITC, UNCTAD

### Speakers:

- Ms. Lorena Jaramillo, Economic Affairs Officer, UNCTAD
- Ms. Martha Negumbo, Factory Manager, Eudafano Women's Co-operative, Namibia
- Mr. Omar Malagón, Professor researcher specialized on Bioeconomy and biodiversitybased businesses and BioTrade, Bioemprende/Universidad Técnica Particular de Loja (UTPL), Ecuador
- Mr. Mathieu Lamolle, Senior Advisor, Sustainability Standards and Value Chains, ITC

Fifth BioTrade Congress: Linking trade and biodiversity

12–13 September 2019 | Palais des Nations, Geneva

# Participate in our Post-2020 Board!

# BioTrade Principles and Criteria: from concept to practice

Lorena Jaramillo, UNCTAD biotrade@un.org

BioTrade is supported by the Swiss State Secretariat for Economic Affairs SECO, Governments of Norway, Spain, The Netherlands, as well as the UN Foundation and UN development account

12–13 September 2019 | Palais des Nations, Geneva

**BioTrade**: activities of collection, production, transformation, and commercialization of products & services derived from <u>biodiversity (BD)</u> under the <u>criteria of environmental, social and economic sustainability (BioTrade P&C)</u>

#### How we translate this to practice..

**Mandates** 

BioTrade Principles and Criteria (P&C) (2007)

P1. Conservation

P2. Sustainable use

P3. Fair & equitable sharing of benefits

P4. Socio-economic sustainability

P5. Legal compliance

P6. Respect for actors' rights

P7. Clarity about land tenure & resources access

## **Updating of the BioTrade P&C**

International agreements and development processes have emerged since 2007 and there is a need for alignment

- Agenda 2030 and SDGs
- Paris Agreement on Climate Change
- Nagoya Protocol on Access and Benefit-Sharing

Lessons learned from BioTrade P&C implementation by partners in variety of sectors and value chains in terrestrial and marine ecosystems

Market trends: Growth in consumer demand/awareness

Tools to raise awareness and understanding of BioTrade and the P&C

- Terrestrial & marine ecosystems
- Comply with legal requirements on access and benefit sharing
- Climate resilience
- Traceability

# **Current and next steps**

Compile comments and propose updated Principles and Criteria

Public consultation and incorporation of comments

Publish the updated Principles and Criteria

Develop the company self assessment tool for the Principles and Criteria and enable benchmarking with other standards

Promote the use of the tool to other partners and stakeholders

## Thank you very much

BioTrade is supported by the Swiss State Secretariat for Economic Affairs SECO, Governments of Norway, Spain, The Netherlands, as well as the UN Foundation and UN development account

BioTrade in Ecuador has developed in two stages:

- 1. Through the National Sustainable BioTrade Program (2001-2010)
- 2. Developed over 3 years, with the CAF (Corporación Andina de Fomento) Andean
  BioTrade GEF project (2011-2014) that ran in parallel and very successfully in Colombia, Ecuador and Peru.

# 2017 – Present BIOEMPRENDE -FCUADOR

## Case: Bursera graveolens forests at Loja - Ecuador

The essential oil of *B. graveolens*, fruit of local research, became a natural ingredient for cosmetic and cosmeceutical products, creating benefits for the communities that inhabit the area. The community has continued to produce and generate products based on this natural ingredient.

#### Benefits

- 1. P&C is a evaluation of the obtention of sustainable benefits from BioTrade.
- 2. Ecuador developed and adjusted a methodology applied to tourism based on P&C of BioTrade.

## Challenges

- 1. Local and international regulations
- 2. Quality and certifications
- 3. Market stability
- 4. Autonomy of communities and funding
- 5. Land use and communities development plan

**BioTrade** is a key factor to sustainably preserve ecosystems and offer benefits to local communities... and the P&C assure measurement with an external guide to evaluate sustainable benefits.

Partnerships (P+P+A) favours the achievement of positive results in BioTrade
