

G7 ICT Priorities:

Technology, Innovation and the Global Economy

John S. Miller

Vice President for Global Policy and Law,
Cybersecurity and Privacy

18 April 2016

Welcome

- Today's Programme
 - Overview of G7 ICT Priorities
 - Keynote Remarks
 - Panel Presentations – G7 ICT Priorities in Depth
 - Michikazu Chihara, Senior Manager, Global Relations at NEC Corporation
 - Danielle Kriz, Senior Director, Global Policy, Palo Alto Networks
 - Maximilian Keller, Mobile Software Engineer for DB Systel
 - Moderated Discussion and Q&A

Overview of the G7

- What is the G7?
 - Informal group of 7 countries that have met annually since 1975
 - G7 leaders discuss major economic and political issues at summit
 - Japan is hosting G7 this year – Leaders Summit in May
 - Japan is emphasizing ICT policy issues this year, hosting ICT ministerial on April 29-30
- Beyond the G7
 - G7 presents a critical opportunity for those governments to frame the evolving international discussion on addressing global ICT policy challenges faced by both developed (G20 meets later this year) and developing countries
 - Getting ICT policy issues right is important to grow the global economy for all

Overview of G7 ICT Priorities

- Recommended Outcomes for Promoting Innovation, Development and the Digital Economy
 - Data flows and localization measures
 - Cybersecurity
 - Privacy/data protection
 - Standards and technical regulations
 - Transparency and stakeholder consultation
 - Commitment to open markets

Introduction

- Keynote Speaker
 - Mr. Joakim Reiter, Deputy Secretary-General of UNCTAD

THANK YOU!

John S. Miller
