

Presentation at Trade and Development Board

Sixty-sixth Annual Session

Geneva, 25 June 2019

Digital Development: Opportunities and Challenges

Introduction

Innovation is the driver of productivity, value creation, wealth distribution and is essential for sustainable growth and economic development. From the rise of mobile technology for information access and communication, to the application of digital technologies across various sectors, cross border trade, e-government integration, building communities and increasing inclusiveness, we have seen the power of digital transformation in Africa and its ability to leapfrog development in areas where we lag behind.

AFRILABS

The EdTech Hub

proteach

AFRILABS

AgriTech, mCommerce
