

# PLATFORM CAPITALISM

Dr. Nick Srnicek  
King's College London

Platforms are the business model adequate to the digital age

As intermediaries and infrastructures they are positioned to capture and control data

# Advertising Platforms

---

Imperative: to expand  
its data collection on  
users

The Google logo, consisting of the word "Google" in its signature multi-colored font (blue, red, yellow, green, red).

Concerns about  
privacy will always take  
a backseat

The Facebook logo, featuring the word "facebook" in white lowercase letters on a dark blue rectangular background.

# Cloud Platforms

---

Provide the hardware,  
development tools,  
and software for other  
companies

Profit is dependent on  
renting out their  
platform

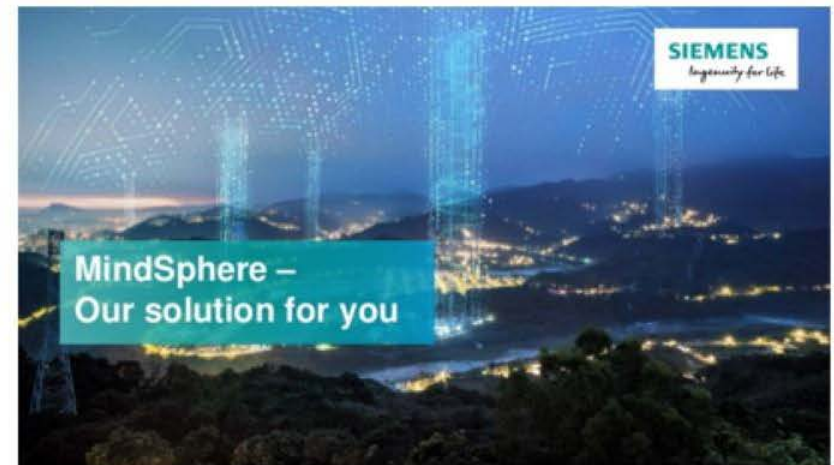

# (Industrial) Cloud Platforms

---

Industrial internet of things: connecting materials and factories to a local internet

Power lies with the platform providers of the industrial internet

# Product Platforms

---

Transforms goods into  
services that can be  
rented

# Product Platforms

---

Rolls Royce rents thrust, rather than selling jet engines

Platform collects immense amounts of data

Uber, the world's largest taxi company, owns no vehicles.

Facebook, the most popular media owner, creates no content.

Alibaba, the most valuable retailer, has no inventory.

Airbnb, the largest accommodation provider, owns no real estate.

# Lean Platforms

---

Own as little as possible: virtually asset-less companies

Business sustained by outsourcing costs and through venture capital welfare

Which platforms are  
sustainable?

Uber is buying 24,000 cars.

Facebook is spending \$1 billion on original TV shows.

Alibaba is spending \$2.6 billion on physical stores.

Airbnb is opening branded apartment buildings.

Are e-commerce  
monopolies turning  
into infrastructures?

How can we tame  
platform monopolies?
