PREFACE

This document is the fifth in the series of selected statistics on the economy of the occupied Palestinian territory (Gaza Strip and the West Bank), compiled by the Special Economic Unit (Palestinian people) of the UNCTAD secretariat. It is devoted to statistical series on the balance of payments, foreign trade, demography and population, and labour force and employment of the occupied Palestinian territory for the period 1968-1987. The irregular and partial publication of official and other statistical series since 1988, has precluded inclusion of data for the 1988-1991 period in the present publication. The series are based on official data published by the Israel Central Bureau of Statistics and exclude East Jerusalem, unless otherwise indicated. They are classified in accordance with the specifications established under the Economic Time Series (ETS) in use in the UNCTAD secretariat. In order to ensure the greatest possible degree of consistency of terminology and definition with established guidelines, relevant United Nations and other statistical publications have also been consulted. For general technical information on the classification of the series, reference is made to the Explanatory Notes on page (v).

These series complement the statistical series on the national accounts of the occupied Palestinian territory, published by the UNCTAD secretariat in UNCTAD/RDP/SEU/6.

EXPLANATORY NOTES

1. Tables are numbered as follows:

The first two letters in a table number, refer to the major topic, as follows:

- 'BP' for Balance of Payments
- 'FT' for Foreign Trade
- 'DP' for Demography and Population
- 'LE' for Labour and Employment

A roman numeral follows the first letters and refers to the geographic area, as follows:

- 'I' for Gaza Strip
- 'II' for the West Bank
- 'III' for the occupied Palestinian territory (i.e., Gaza Strip and West Bank), excluding east Jerusalem
- 'IV' for east Jerusalem
- 'V' for the occupied Palestinian territory, including east Jerusalem.

The Arabic number which follows the roman numerals refers to the specific topic of the tables.

A capital letter follows the Arabic number, and refers to the units used:

- 'A' for the original currency or natural units, depending on the topic of the table;
- 'B' for United States dollars;
- 'C' and 'D' for percentages.

EXAMPLE: Table designation FT/II/1B signifies the following:

- FT: Foreign Trade
- I: Gaza Strip
- 1: Merchandise trade by main markets and commodity groups
- B: U.S. dollars

2. Unless otherwise noted, all statistical series used for the preparation of the tables are based on figures published by the Israel Central Bureau of Statistics (CBS) in the annual Statistical Abstract of Israel and the periodic Judea, Samaria and Gaza Area Statistics (published prior to 1984 under the title The Administered Territories Statistical Quarterly). These publications are referred to in the sources of separate tables as SAI and JSGAS, respectively.
3. The figures used are the latest available estimates for the 1968-1987 period. In many cases these are revised versions of earlier published estimates.
4. In cases where figures were misprinted in the original published source, the sums of components were computed or other published versions of the misprinted figures were substituted.
5. Unless otherwise indicated, all "total" series have been generated from their components in order to ensure consistency between series and tables and greater accuracy than in previously published totals.
6. Unless otherwise indicated, variables are defined as in the original sources.
7. Whenever possible, the titles of variables and layout of tables have been streamlined in accordance with standard international terminology.
8. The "Occupied Territory" (III) tables were prepared by adding up the figures for the West Bank and for Gaza Strip. These tables do not incorporate statistics on occupied east Jerusalem.

9. New Israeli Shekel series (i.e., the "A" tables) are not included here for the BP and FT series. These were compiled within the ETS by using published figures (in Israeli shekels) for the longest available period. For earlier years, figures in Israeli liras and old shekels were converted respectively according to the following ratios:
- 1 new Israeli shekel = 10,000 Israeli liras
 - 1 new Israeli shekel = 1,000 old shekels.

10. United States dollar series (i.e., the "B" tables) for the period 1968-1979 were obtained by converting the computed New Israeli shekels into United States dollars using the average annual exchange rate as quoted in the International Monetary Fund, International Financial Statistics (Washington D.C., IMF, 1985 and 1987).

Conversion of series originally expressed in national currency into a common currency - U.S. dollars - through the use of official exchange rates is not always satisfactory owing to the deviation of the official exchange rates from purchasing power parities. For this reason, some data in U.S. dollars contained in this document can be used only as an approximation of the relative magnitudes involved. They can alternatively serve as a source of primary data requiring further processing and adjustment.

11. For the period 1980-1987, Israeli data as originally published in U.S. dollars were used wherever available. Since the U.S. dollar series published by the Israel CBS were computed using quarterly data expressed in New Israeli Shekels and quarterly exchange rates, they are more accurate than the series generated by the use of annual exchange rates. Calculations based on annual exchange rates (as in 9 and 10 above) were resorted to only when original data were found to be inaccurate or incomplete.
12. All tables in percentages (i.e., the "C" and "D" tables) are calculated from tables denominated in United States dollars (i.e., the "B" tables).
13. The following symbols are used:
- . = category not applicable
 - .. = unknown, series discontinued, or not available for publication
 - US\$ = United States Dollars
 - NIS = New Israeli Shekels

All years refer to calendar years, starting on 1 January and ending on 31 December.

TABLES FT/I/1B - FT/III/1B

1. The following series were computed as sums of their components:
 - Total Trade Balance;
 - Total Exports; Total Agricultural Exports; Total Industrial Exports;
 - Total Imports; Total Agricultural Imports; Total Industrial Imports;
 - Trade Balance with Jordan; Total Exports (to Jordan); Total Imports (from Jordan);
 - Trade Balance with Israel; Total Exports (to Israel); Total Imports (from Israel);
 - Trade Balance with other countries; Total Exports (to other countries); Total Imports (from other countries).

Note: Owing to administrative and related complications, Gaza Strip ceased importing from Jordan and other Arab countries after 1977.

2. Agricultural and Industrial Exports and Imports (by main market):

For 1982-87

- 1985-87: JSGAS, 1988, Vol. XVIII, No. 1, pp. 6-7, Table C/1
- 1983-84: JSGAS, 1987, Vol. XVII, No. 2, pp. 6-7, Table C/1
- 1982: JSGAS, 1985, Vol. XV, No. 2, pp. 6-7, Table C/1

Except for 1987: The only data available for agricultural/industrial trade with Israel 1987 cover the first three quarters of that year; Using data on total trade with Israel for the whole of 1987 and the average distribution of industrial/agricultural goods in the first three quarters, the commodity distribution for the fourth quarter can be estimated, thus allowing a quantification of agricultural/industrial trade with Israel for the whole of 1987.

For 1968-81

Figures are computed from (converted) New Israeli Shekel data in:

- 1981: SAI, 1984, No. 35, p. 751, Table XXVII/10
- 1980: SAI, 1983, No. 34, p. 764, Table XXVII/
- 1979: SAI, 1982, No. 33, p. 739, Table XXVII/11
- 1977-78: SAI, 1980, No. 31, p. 685, Table XXVII/11
- 1975-76: SAI, 1978, No. 29, p. 773, Table XXVII/11
- 1974: JSGAS, 1977, Vol. VII, No. 4, 41, pp. 6-7, Table C/1
- 1972-73: SAI, 1975, No. 26, p. 692, Table XXVI/12
- 1971: SAI, 1974, No. 25, p. 692, Table XXVI/11
- 1968-70: SAI, 1973, No. 24, p. 704, Table XXVI/11

3. All other series:

- 1970-87: SAI, 1989, No. 40, p. 709, Table XXVII/11
- 1968-69: From (converted) New Israeli Shekel data in:
SAI, 1973, No. 24, p. 709, Table XXVI/II

Except:

1986: For West Bank data on Exports to Jordan, the figures used are the sum of the components which differ from the published figure. Figures for Trade Balance with Jordan, Total Exports and Total Trade Balance were corrected accordingly.

1984: For Gaza Strip data on Exports to Israel, the figures used are the sum of the components (Agricultural and Industrial Exports) which differ from the published figure. Trade Balance with Israel, Total Exports and Total Trade Balance were corrected accordingly.

TABLES FT/I/1C - FT/III/1C

For all years:

Computed from the respective series in Tables FT/I/1B - FT/III/1B

Note: Rows 1-7 are in million United States dollars;
 Rows 8-10 express the exports to Jordan of that commodity from the area (WB/GS/OPT) as a percentage of the corresponding total export category for that area;
 Rows 11-13 express imports from Jordan of that commodity to that particular area as a percentage of the corresponding total import category for that area;
 The same applies for trade with Israel (rows 14-19) and with Other Countries (rows 20-25).

TABLES FT/I/1D - FT/III/1D

For all years:

Computed from the respective series in Tables FT/I/1B - FT/III/1B.

Note: Each agricultural component and each industrial component of exports is expressed as a percentage of total exports from the particular area to that particular market. Agricultural and industrial imports are expressed as a percentage of total imports from that particular source to that particular area.

TABLE FT/III/2B

1. Total Exports was obtained by adding Exports to Israel, Exports via Israel, and Exports to Jordan.
2. Disaggregated US dollar data is not available for the year 1970. Accordingly the totals which appear in the table for that year correspond to the series generated in Table FT/III/1B.
3. For all years except 1970 the following series were computed as sums of their components: Total Exports via Israel; Total Exports; Agricultural Exports to Jordan; Industrial Exports to Jordan. The last two series were recomputed due to inaccuracies in the published sum of components.
4. Other Industrial Exports: computed as the difference between Industrial Exports to Jordan and all other components.
5. For other series:
 - (a) Components of Exports to Jordan:
 - 1984-87: JSGAS, 1988, vol. XVIII, No. 2, p. 11, Table C/4
 - 1980-85: JSGAS, 1987, vol. XVII, No. 1, p. 11, Table C/4
 - (b) Components of Exports via Israel:
 - 1984-87: JSGAS, 1988, vol. XVIII, No. 2, p. 10, Table C/3
 - 1980-85: JSGAS, 1987, vol. XVII, No. 1, p. 10, Table C/3
 - (c) The following were calculated from (converted) New Israeli Shekel data:
 - (i) Exports to Jordan and components of Exports via Israel:
 - 1977-79: JSGAS, 1985, vol. XV, p. 17, Table C/5
 - 1972-76: JSGAS, 1979, vol. IX, p. 14-15, Table C/5
 - 1971: JSGAS, 1978, vol. VIII, No. 3-4, p. 14-15, Table C/5
 - (ii) Marble and pickled olives exports:
 - 1979: JSGAS, 1981, vol. XI, No. 2, p. 15, (Footnote) Table C/5
 - 1978: JSGAS, 1979, vol. VIII, p. 15, (Footnote) Table C/5
 - 1977: JSGAS, 1978, vol. VIII, p. 15, (Footnote) Table C/5

TABLE FT/III/2C

TABLE FT/III/3B

1. Total Imports was generated by adding Imports from Israel, Imports from Jordan, and Imports via Israel.
2. Disaggregated US dollar data is not available for the year 1970. Accordingly the totals which appear in the table for that year correspond to the series generated in Table FT/III/1B.
3. 1980-87
 - (a) Components of Imports from Jordan:
 - 1986-87: JSGAS, 1988, vol. XVIII, No. 1, p. 12, Table C/5
 - 1980-85: JSGAS, 1987, vol. XVII, No. 1, p. 12, Table C/5
 - (b) Components of Imports via Israel:
 - 1986-87: JSGAS, 1988, vol. XVIII, No. 1, p. 10, Table C/3
 - 1980-85: JSGAS, 1987, vol. XVII, No. 1, p. 10, Table C/3
 - (c) Other Industrial Imports:
 - 1984-87: Series obtained by subtracting the sum of the components from the published total.
4. 1968-79
Calculated from (converted) New Israeli Shekel data as follows:
 - (a) For components of Imports from Jordan:
 - 1977-79: JSGAS, 1985, vol. XV, No. 1, p. 13, Table C/7
 - 1973-76: JSGAS, 1980, vol. IX, No. 4, p. 19, Table C/9
 - 1971-72: JSGAS, 1977, vol. VI, No. 4, p. 19, Table C/9
 - (b) Agricultural Imports from Jordan, Industrial Imports from Jordan and their total, namely Imports from Jordan, as well as Imports via Israel, were recomputed as the sum of their components, which may in some cases differ from the published totals. Consequently, the following series were recomputed as the difference between the total and the sum of all other components: Imports from Jordan; Other Agricultural Imports from Jordan; Other Industrial Imports from Jordan.

TABLES DP/II/1A - DP/III/1A

1. Population at End-of-year; Population at Beginning-of-Year; Natural Increase; Population Movement: 1967-87: SAI, 1989, No. 40, p. 700, Table XXVII/1

Except:

- 1986-87: For Gaza Strip, computed figures for Population at End- and Beginning-of-year replace published figures.
- 1983-84: For the West Bank, computed figures for Population at End- and Beginning-of-year replace published figures.
2. Mid-Year Population was obtained as the mean of Population at End-of-year and Beginning-of-year figures.
3. Annual growth rates are computed as the terminal growth rates between Population at Beginning-of-year and Population at Beginning-of- the preceding year.

TABLE DP/IV/1A

1. Population:
 - 1983-87: Statistical Yearbook of Jerusalem, 1987, No. 6, Table III/6, p. 60
 - 1975-82: Statistical Yearbook of Jerusalem, 1986, No. 5, Table III/7, p. 52
 - 1974: Statistical Yearbook of Jerusalem, 1983, No. 2, p. 30
 - 1967-72: Statistical Yearbook of Jerusalem, 1987, No. 6, Table III/6, p. 60

NOTE: According to the above sources, data for 1978-82 excludes "non-Jews" resident in west Jerusalem; data for 1967, 1972, 1974-77 and for 1983-87 include this figure.

2. Population Movement:
 - 1973-83: Statistical Yearbook of Jerusalem, 1984, No. 3, Table III/11, p. 111
3. Natural Increase:
 - 1977-86: Statistical Yearbook of Jerusalem, 1986, No. 6, Table IV/3, p. 67
 - 1973-76: Statistical Yearbook of Jerusalem, 1984, No. 3, Table III/10, p. 111

TABLE DP/V/2A

1. Average Mid-year Population estimates for Gaza Strip and the West Bank were computed by averaging the respective Population at Beginning-of-year and Population at End-of-year as in Tables DP/II/1A and DP/II/1A.
2. Average Mid-year Population for east Jerusalem is as in Table DP/IV/1A.
3. Total average Mid-year Population in the Occupied Territory was computed as a sum of the three component areas (WB/GS/EJ). Where data for east Jerusalem were missing, Total Population was only the sum of the population in Gaza Strip and the West Bank, with figures bracketed.
4. Annual Rate of Growth was computed as the terminal growth rate between Average Mid-year Population in that particular year and the Average Mid-year Population of the preceding year.

TABLES DP/II/3A-DP/III/3A

Computed by applying End-of-year male and female Population ratios to mid-year Population totals from the following sources:

1. Total Mid-year Population:
Tables DP/I/1A-DP/III/1A
2. End-of-year: Male Population, Female Population, Sex Ratios:
1987: SAI, 1989, No. 40, Table XXVII/3, p. 701
1985-86: SAI, 1988, No. 39, Table XXVII/3, p. 706
1967-84: JSGAS, 1987, vol. XVII, No. 1, Table 1, p. 66.

TABLES DP/I/4A-DP/III/4A

1. Israeli sources originally categorized population age groups in 16 quintiles, covering 0 to 75+ years of age. However, as of 1982, the last 3 categories, namely (65-69), (70-74) and (75+) were merged into one single category (65+), thus leaving 13 categories. In 1985, data was rearranged again and the categories were reduced to nine. Only the categories of (0-4), (15-19), (20-24) were retained, the others being merged into decile groups.
2. To accommodate these changes, two steps were followed:
 - (a) The Israeli practice regarding persons aged 65 and above was adopted, thus merging the categories of (65-69), (70-74) and (75+) for the years 1967-1981.
 - (b) To retain the other quintile groups, for each absolute number of each new decile group, the two absolute numbers of its two corresponding component quintile groups were calculated using the same proportion these quintile groups had in relation to their deciles total in the latest available year, namely 1984. The drawback in using this method is that a constant structure of age groups for the period of 1985-1987 is assumed.
3. Data for 1968 does not provide figures for female age groups. Hence these had to be calculated by subtracting figures for male age groups from the corresponding total categories.
4. Data for total population age groups was then generated by adding up the component groups of female and male population groups.
5. Sources for all Female and Male Population age groups:
 - 1987: SAI, 1989, No. 40, Table XXVII/3, p. 701
 - 1985-86: SAI, 1988, No. 39, Table XXVII/3, p. 706
 - 1982-84: ATSQ, 1987, No. XVII, vol. 1, Table 2, p. 67
 - 1981: SAI, 1982, No. 33, Table XXVII/3, p. 734
 - 1980: SAI, 1981, No. 32, Table XXVII/3, p. 714
 - 1979: SAI, 1980, No. 31, Table XXVII/3, p. 678
 - 1978: SAI, 1979, No. 30, Table XXVII/3, p. 718
 - 1977: SAI, 1978, No. 29, Table XXVII/3, p. 766
 - 1976: SAI, 1977, No. 28, Table XXVII/3, p. 706
 - 1975: SAI, 1976, No. 27, Table XXVII/3, p. 688
 - 1974: SAI, 1975, No. 26, Table XXVI/3, p. 685
 - 1973: SAI, 1974, No. 25, Table XXVI/3, p. 683
 - 1971-72: SAI, 1973, No. 24, Table XXVI/3, pp. 694-695
 - 1969-70: SAI, 1971, No. 22, Table Y/3, pp. 623-624
 - 1968: SAI, 1969, No. 20, Table X/2, pp. 633
 - 1967: SAI, 1971, No. 22, Table Y/3, pp. 623-624
6. Initially, data for Total Population age groups were obtained by adding up the components, i.e. Male and Female Population groups. However, there were discrepancies between the totals thus obtained and the published series for Mid-Year and for End-Year Population. To obtain consistent population series, each age group of Male, Female, and Total Population, was adjusted by multiplying them by the same ratio of the calculated total to the published total.
