Resolution adopted by the Economic and Social Council on 27 July 2016

[on the recommendation of the Commission on Science and Technology for Development (E/2016/31)]

2016/23. Science, technology and innovation for development

The Economic and Social Council,

Recognizing the role of the Commission on Science and Technology for Development as the United Nations torch-bearer for science, technology and innovation for development,

Recognizing also the critical role and contribution of science, technology and innovation in building and maintaining national competitiveness in the global economy, addressing global challenges and realizing sustainable development,

Recognizing further the seminal role that information and communications technologies play in promoting and empowering science, technology and innovation for development,

Recalling the 2005 World Summit Outcome,¹ in which it was recognized that science and technology, including information and communications technologies, are vital for the achievement of the internationally agreed development goals, and reaffirming the commitments contained therein,

Recalling also that the United Nations Conference on Trade and Development is the secretariat of the Commission,

Recognizing that the General Assembly, in its resolution 68/220 of 20 December 2013 on science, technology and innovation for development, encouraged the United Nations Conference on Trade and Development to continue to undertake science, technology and innovation policy reviews, with a view to assisting developing countries and countries with economies in transition in identifying the measures that are needed to integrate science, technology and innovation policies into their national development strategies,

Recalling Economic and Social Council decision 2011/235 of 26 July 2011 providing for the extension, until 2015, of the mandate of the Gender Advisory Board of the Commission, as well as General Assembly resolutions 66/129 of 19 December 2011 and 66/211 and 66/216 of 22 December 2011 addressing,

¹ General Assembly resolution 60/1.
respectively, the improvement of the situation of women in rural areas, barriers to equal access for women and girls to science and technology, and the integration of a gender perspective into development policies and programmes,

*Taking note of* the importance for science, technology and innovation development policies and programmes to address various aspects of the digital divide,

*Recognizing* that the availability, accessibility and affordability of quality education in science, technology and mathematics at the primary, secondary and tertiary levels is essential in order to create a social environment conducive to the promotion of science, technology and innovation,

*Taking note of* General Assembly resolution 70/1 of 25 September 2015, entitled “Transforming our world: the 2030 Agenda for Sustainable Development”, in which the Assembly adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets,

*Recognizing* the instrumental role of science, technology and innovation and information and communications technologies in the achievement of a number of Sustainable Development Goals, and highlighting the role of science, technology and innovation, along with information and communications technologies, as an enabler of the 2030 Agenda to continue to address global challenges,

*Taking note of* General Assembly resolution 69/313 of 27 July 2015 on the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, and noting the establishment of the Technology Facilitation Mechanism,

*Welcoming* the Paris Agreement under the United Nations Framework Convention on Climate Change, adopted at the twenty-first session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, held in Paris, from 30 November to 13 December 2015.2

*Welcoming also* General Assembly resolution 70/125 of 16 December 2015 on the outcome document of the high-level meeting of the Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society,

*Welcoming further* the work of the Commission on its two current priority themes, “Smart cities and infrastructure” and “Foresight for digital development”,

*Recognizing* the need for new approaches that embed capacity-building in the areas of science, technology and innovation as a crucial component of national development plans, inter alia, through collaboration between the relevant ministries and regulatory bodies,

*Recognizing also* that technology foresight exercises could help policymakers and stakeholders in the implementation of the 2030 Agenda through the identification of challenges and opportunities that can be addressed strategically, and that technology trends should be analysed, keeping in view the wider socioeconomic context,

---

2 See FCCC/CP/2015/10/Add.1, decision 1/CP.21, annex.
Recognizing further that well-developed innovation and digital ecosystems\(^3\) play a fundamental role in the effective digital development and facilitation of science, technology and innovation,

Recognizing the increased regional integration efforts across the world and the associated regional dimension of science, technology and innovation issues,

Noting the significant achievements and continuing potential contribution of science, technology and innovation and information and communications technologies to human welfare, economic prosperity and employment,

Noting also that the success of using technology and innovation policies at the national level is facilitated by, among other things, creating policy environments that enable education and research institutions, businesses and industry to innovate, invest and transform science, technology and innovation into employment and economic growth incorporating all interrelated elements, including knowledge transfer,

Noting further various ongoing and future initiatives related to science, technology and innovation to explore important issues associated with the Sustainable Development Goals,

Recommends the following for consideration by national Governments, the Commission on Science and Technology for Development and the United Nations Conference on Trade and Development:

(a) Governments, individually and collectively, are encouraged to take into account the findings of the Commission and to consider taking the following actions:

(i) To closely link science, technology, innovation and strategies of sustainable development by prominently featuring capacity-building in information and communications technologies and science, technology and innovation in national development planning;

(ii) To promote local innovation capabilities for inclusive and sustainable economic development by bringing together local scientific, vocational and engineering knowledge, mobilizing resources from multiple channels, improving core information and communications technology and supporting smart infrastructure, including through collaboration with and among national programmes;

(iii) To encourage and support the science, technology and innovation efforts leading to the development of infrastructure and policies that support the global expansion of information and communications technology infrastructure, products and services, including broadband Internet access to all people, catalysing multi-stakeholder efforts to bring 1.5 billion new Internet users online by 2020 and endeavouring to improve the affordability of such services;

(iv) To undertake systemic research, including foresight exercises, on new trends in science, technology and innovation and information and

communications technologies and their impact on development, particularly in the context of the 2030 Agenda for Sustainable Development;⁴

(v) To work, with input from a variety of stakeholders, including appropriate United Nations agencies, to formulate, adopt and implement science, technology and innovation policies aimed at contributing to the implementation of the Sustainable Development Goals;

(vi) To use strategic foresight exercises to identify potential gaps in education for the medium and long term and address such gaps with a policy mix, including the promotion of science, technology, engineering and mathematics education and vocational training;

(vii) To use strategic foresight as a process to encourage structured debate among all stakeholders, including representatives of Government, science, industry and civil society and the private sector, particularly small and medium-sized enterprises, towards creating a shared understanding of long-term issues and building consensus on future policies;

(viii) To undertake strategic foresight initiatives on global and regional challenges at regular intervals and cooperate towards the establishment of a mapping system to review and share technology foresight outcomes, including pilot projects, with other Member States, making use of existing regional mechanisms, and in collaboration with relevant stakeholders;

(ix) To encourage the review of progress on integrating science, technology and innovation in the achievement of the Sustainable Development Goals;

(x) To conduct assessments of national innovation systems, including digital ecosystems, drawing from foresight exercises, at regular intervals, to identify weaknesses in the systems and make effective policy interventions to strengthen their weaker components, and share outcomes with other Member States;

(xi) To recognize the need to promote the functional dynamics of innovation systems and other relevant methodologies based on diversified policy instruments to support science, technology and innovation development priorities, in order to strengthen the coherence of such systems for sustainable development;

(xii) To encourage digital natives to play a key role in a community-based approach to science, technology and innovation capacity-building, and facilitate the use of information and communications technologies in the context of the 2030 Agenda;

(xiii) To put in place policies that support the development of digital ecosystems, bearing in mind the potential of emerging digital technologies to leapfrog existing technologies for development, that are inclusive and take into account the socioeconomic and political context of countries and attract and support private investment and innovation, particularly encouraging the development of local content and entrepreneurship;

(xiv) To collaborate with all relevant stakeholders, promote the application of information and communications technologies in all sectors, improve
environmental sustainability and encourage the creation of suitable facilities to recycle and dispose of e-waste;

(xv) To address the ongoing and persistent gender gap in the fields of science, technology and innovation as a whole, and science, technology, engineering and mathematics education in particular, by encouraging mentoring and supporting other efforts to attract and retain women and girls in those fields;

(xvi) To support the policies and activities of developing countries in the fields of science and technology through North-South and South-South cooperation by encouraging financial and technical assistance, capacity-building, technology transfer on mutually agreed terms and conditions and technical training programmes or courses;

(b) The Commission is encouraged:

(i) To continue its role as a torch-bearer for science, technology and innovation and to provide high-level advice to the Economic and Social Council and the General Assembly on relevant science, technology, engineering and innovation issues;

(ii) To help to articulate the important role of information and communications technologies and science, technology and innovation as enablers in the 2030 Agenda by acting as a forum for strategic planning and providing foresight about critical trends in science, technology and innovation in key sectors of the economy and drawing attention to emerging and disruptive technologies;

(iii) To consider how its work aligns with, feeds into and complements other international forums on science, technology and innovation and efforts supporting the implementation of the 2030 Agenda;

(iv) To raise awareness and facilitate networking and partnerships among various technology foresight organizations and networks, in collaboration with other stakeholders;

(v) To promote, in the spirit of the 2030 Agenda and the Addis Ababa Action Agenda, international cooperation in the field of science and technology for development, including capacity-building and technology transfer on mutually agreed terms and conditions;

(vi) To raise awareness among policymakers about the process of innovation and to identify particular opportunities for developing countries to benefit from such innovation, with special attention being placed on new trends in innovation that can offer novel possibilities for developing countries;

(vii) To proactively strengthen and revitalize global science, technology and innovation partnerships for sustainable development, which would entail the engagement of the Commission in (a) translating technology foresight into elaborating the scope of specific international projects for targeted research, technology development and deployment and initiatives for building human resource capacity for science, technology and innovation; and (b) exploring innovative financing models and other resources contributing to enhancing the

5 General Assembly resolution 69/313, annex.
capacities of developing countries in collaborative projects and initiatives in

(viii) To discuss and explore innovative financing models as a means to attract
new stakeholders, innovators and sources of investment capital for science,
technology, engineering and innovation-based solutions, in collaboration with
other organizations, where appropriate;

(ix) To promote capacity-building and cooperation in research and
development, in collaboration with relevant institutions, including appropriate
United Nations agencies, working to facilitate the strengthening of innovation
systems that support innovators, particularly in developing countries, to boost
their efforts to contribute to the achievement of sustainable development;

(x) To provide a forum for sharing best practices, the results of foresight
exercises, successful local innovation models, case studies and experience on
the use of science, technology and engineering for innovation, including the
application of new emerging technologies, in symbiotic relationship with
information and communications technologies, for inclusive and sustainable
development, and to share findings with all relevant United Nations entities
including through the Technology Facilitation Mechanism and its multi-
stakeholder forum on science, technology and innovation;

(xi) To continue to play an active role in creating awareness of the potential
contribution of science, technology and innovation to the 2030 Agenda
through substantive inputs, as appropriate, to relevant processes and bodies of
the United Nations, and to share findings and good practices on science,
technology and innovation among Member States and beyond;

(xii) To highlight the importance of the work of the Commission related to the
implementation of and follow-up to the areas of information and
communications technologies and science, technology and innovation related
to the Sustainable Development Goals, with the Chair of the Commission to
report at appropriate reviews and meetings of the Council, taking into account
that 2016 is the first year of implementation of the 2030 Agenda;

(c) The United Nations Conference on Trade and Development is
encouraged:

(i) To seek funding proactively for the expansion of science, technology and
innovation policy reviews, with an emphasis on the critical role of information
and communications technologies in empowering science, technology and
innovation and engineering capacity-building and utilization, and the
implementation of the recommendations on those reviews, as appropriate, in
close cooperation with United Nations agencies and international
organizations;

(ii) To look into the feasibility of including elements of strategic foresight
and digital ecosystem assessment in policy reviews of science, technology and
innovation and information and communications technologies, possibly by
including a chapter dedicated to these themes;

(iii) To plan for periodic updates on progress made in countries for which
science, technology and innovation policy reviews have been performed and to
invite those countries to report to the Commission on progress made, lessons
learned and challenges encountered in implementing recommendations;
(iv) To encourage the Gender Advisory Board of the Commission to provide inputs to the policy deliberations and documentation of the Commission, to report on progress at the annual sessions of the Commission and to better integrate gender perspectives into science, technology and innovation policy reviews.

48th plenary meeting
