NOTE

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

General disclaimer

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Where the designations "economy" or "country or area" appear, they cover countries, territories or areas.

The designations "developing", "transition" and "developed" are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process.

The assignment of countries or areas to specific groupings is done for statistical convenience and does not imply any assumption regarding political or other affiliation of countries or territories by the United Nations.

Material in this publication may be freely quoted or reprinted, but acknowledgement is obligatory, together with a reference to the document number (TD/STAT.40).

This document has been reproduced without formal editing.

La cote des documents de l'Organisation des Nations Unies se compose de lettres majuscules et de chiffres. La mention d'une telle cote indique qu'il est fait référence à un document de l'Organisation.

Déni de responsabilité

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent, de la part du secrétariat de l'Organisation des Nations Unies, aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

Les appellations «économie» ou «pays ou zone» désignent des pays, des territoires ou des zones.

Le recours aux appellations «en développement», «en transition» et «développés» ne représente qu'une commodité à des fins statistiques et n'exprime pas nécessairement un jugement quant au niveau atteint par un pays ou une zone donnée concernant le processus de développement.

La répartition des pays en groupes particuliers ne représente qu'une commodité à des fins statistiques et ne présume en aucune manière d'une quelconque affiliation politique ou autre de la part des pays ou des territoires.

Le contenu de la présente publication peut être cité ou reproduit sans autorisation, sous réserve qu'il soit fait mention de ladite publication et de sa cote (TD/STAT.40).

Le présent rapport est reproduit sans être édité.

The *UNCTAD Handbook of Statistics* provides a collection of statistics and indicators relevant to the analysis of international trade, investment and development. Reliable statistical information is indispensable for formulating sound policies and recommendations that may commit countries for many years as they strive to integrate into the world economy and improve the living standards of their citizens. Whether it is for research, consultation or technical cooperation, UNCTAD needs reliable and internationally comparable trade, financial and macroeconomic data, covering several decades and as many countries as possible.

In addition to facilitating the work of the secretariat's economists, the *Handbook* provides all other users - policymakers, research specialists, academics, officials from national governments or international organizations, journalists, executive managers, members of non-governmental organizations - with access to cross-comparable sets of data. The *Handbook* presents a consolidated, yet wide-ranging overview of the statistical series available at UNCTAD.

The publication is available in printed copy and DVD format. Moreover, the statistical series published in the *Handbook* are also available online at *UNCTADstat* (<http://unctadstat.unctad.org/wds>). Unlike the *Handbook*, which captures statistics at one point of time, *UNCTADstat* is continuously updated and enhanced, thus providing users with the latest available data. Consequently, the figures from the *Handbook* may not always correspond to *UNCTADstat*.

To help us provide better and more relevant statistics to users, you are invited to send your comments to statistics@unctad.org.

Le *Manuel de statistiques de la CNUCED* fournit des statistiques et indicateurs essentiels à l'analyse du commerce international, de l'investissement et du développement. Une information statistique fiable est indispensable à la formulation de politiques saines et de recommandations qui engageront les pays pour de longues années dans leur processus d'intégration dans l'économie mondiale et d'amélioration des conditions de leurs peuples. Que ce soit pour la recherche, la concertation ou la coopération technique, la CNUCED a besoin de données commerciales, financières et macroéconomiques fiables, comparables au niveau international et disponibles, si possible, sur plusieurs décennies et pour un maximum de pays.

En plus de faciliter les travaux des économistes du secrétariat, le *Manuel* fournit à tous les autres utilisateurs, décideurs, chercheurs, universitaires, fonctionnaires d'administrations nationales ou d'organisations internationales, journalistes, cadres d'entreprises ou membres d'organisations non gouvernementales, un accès à des données transversales comparables. Le *Manuel* présente un aperçu harmonisé des séries statistiques disponibles à la CNUCED.

Le *Manuel* est disponible en version imprimée et DVD. De plus, les données présentées sont disponibles en ligne, dans *UNCTADstat* (<http://unctadstat.unctad.org/wds>). À la différence du *Manuel* qui présente des statistiques figées à un moment donné, *UNCTADstat* est améliorée et actualisée régulièrement pour mettre à la disposition des utilisateurs les données les plus récentes. Par conséquent, les données du *Manuel* ne pourront être comparées systématiquement à celles d'*UNCTADstat*.

Afin de mettre à disposition des utilisateurs des statistiques toujours plus pertinentes, nous vous invitons à nous faire part de vos commentaires en nous écrivant à statistics@unctad.org.

Some exceptions are indicated in footnotes.

Les exceptions sont indiquées dans les notes en bas de page.

Unless otherwise specified, country aggregates are the sum of the relevant country data by group. Calculations of aggregates may include data estimated by the UNCTAD secretariat that are not necessarily all reported separately. When there are insufficient representative reported or estimated data points within a country aggregate, no aggregation is undertaken and symbol (-) is assigned.

Sauf indication contraire, les agrégats de pays sont obtenus en sommant les données des pays composant le groupe. Les calculs d'agrégats peuvent inclure des données estimées par le secrétariat de la CNUCED qui ne sont pas nécessairement toutes rapportées séparément. Les agrégats ne sont calculés que lorsqu'il y a assez de données significatives, rapportées ou estimées. Dans le cas contraire, l'agrégation ne sera pas calculée et la valeur sera remplacée par le symbole (-).

Because of rounding, details and percentages in tables do not necessarily add up to totals.

Par ailleurs, la somme des chiffres et des pourcentages indiqués dans les tableaux ne correspond pas nécessairement aux totaux en raison des arrondis.

Data are checked to ensure that they match the geographical coverage of the countries, as described at the beginning of the *Handbook*. However sometimes gaps cannot not be avoided due to data unavailability. They are thus described in notes at the end of the table.

Les données sont collectées et vérifiées pour qu'elles correspondent à la couverture géographique des pays, telle qu'elle est décrite en début de *Manuel*. Toutefois certains écarts ne peuvent parfois être évités en raison de l'indisponibilité des données. Ils sont alors décrits dans les notes de fin de tableau.

Unless otherwise stated, dollars (\$) refer to United States dollars and data in dollars are expressed in current United States dollars of the year to which they refer.

Sauf indication contraire, le terme dollar (\$) s'entend du dollar des États-Unis d'Amérique et les données en dollars sont exprimées en dollars courants de l'année à laquelle elles se réfèrent.

Average annual growth rates are defined as the coefficient b in the exponential trend function $y = ae^{bt}$ where t stands for time. This method takes all observations in a period into account. Therefore, the resulting growth rates reflect trends that are not unduly influenced by exceptional values.

Les taux moyens d'évolution annuelle sont définis par le coefficient b de la fonction exponentielle de tendance $y = ae^{bt}$, où t représente le temps. Cette méthode permet de prendre en compte toutes les observations concernant une période donnée sans que le taux de croissance obtenu ne soit trop affecté par des valeurs exceptionnelles.

The term "economies", as used in this publication, refers to regions, countries and territories. In case of a change in the statistical coverage of a country, it is identified by adding an end year after the country name when the country name remains unchanged. The change in the statistical coverage may affect the assignment of the country to specific groupings. For this reason, it may also affect the aggregates depending on whether or not the concerned entities are included in the same country grouping.

Every year, UNCTAD reviews and updates the definition and composition of country groupings. Such changes may impact significantly on the figures from one version to another. The modifications are thoroughly outlined in the section Documentation at *UNCTADstat* website.

Geographical distribution of developing, transition and developed economies

There is no established convention for the designation of "developing", "transition" and "developed" countries or areas in the United Nations system.

The World total represents the sum of the figures of the above three groups plus the figures of a group of "Other territories" not elsewhere classified. These territories are included in the world total if they have been reported but are not presented individually or in any group.

"Developing" and "developed" categories are further divided by geographical region.

The composition of the groupings is detailed below.

Dans cette publication, le terme «économies» couvre les régions, les pays et les territoires. Une année adjointe au nom d'un pays indique un changement de couverture statistique lorsque le nom du pays reste inchangé. Un changement de couverture statistique peut affecter l'inclusion du pays dans des groupements de pays spécifiques. Les données pour un groupement dépendront de l'appartenance ou non des nouvelles entités au même groupement.

La CNUCED révisé et met à jour la définition et la composition des groupements de pays chaque année. Ces changements peuvent affecter de manière significative les chiffres d'une année de publication à l'autre. Le détail des changements est disponible dans la rubrique Documentation sur le site web d'*UNCTADstat*.

Répartition géographique des économies en développement, économies en transition et économies développées

La distinction entre pays ou régions "en développement", "en transition" et "développés", ne correspond à aucune nomenclature officielle à l'échelle du système des Nations Unies.

Le total Monde représente la somme des trois groupes ci-dessus plus les données d'un groupe "Autres territoires" non-classés ailleurs. Lorsqu'elles sont disponibles, les données de ces territoires sont incluses dans le total monde mais ne sont présentées ni individuellement ni dans aucun groupe.

Les économies en "développement" et "développées" sont elles-mêmes subdivisées suivant des critères géographiques.

La composition des groupements est détaillée ci-dessous.

- Partners not elsewhere specified: "Confidential information and differences", "Neutral zone", "Free zones" and "Bunkers". These specific partners are only used in the merchandise trade tables.

MEMO ITEMS

Developing economies are presented at three levels of aggregation: the total group, the group excluding China (referring to continental China) and the group excluding the least developed countries.

Developing economies are also categorized into three subgroups according to their average 2011-2013 nominal GDP per capita: high-income (above \$5,141), middle-income (between \$1,142 and \$5,141) and low-income (below \$1,142).

The category, "Heavily indebted poor countries" includes those economies benefiting from the debt reduction initiative of the World Bank and the International Monetary Fund.

Since 1994, the United Nations has recognized the particular problems of the Small Island Developing States (SIDS). However, the UN never established criteria to determine an official list of SIDS. An unofficial list is used by UNCTAD for analytical purposes.

Least developed countries and landlocked developing countries are recognized by the United Nations as categories that require special attention from the international community.

AUTRES TERRITOIRES

La composition du groupement "Autres territoires" est la suivante :

- Territoires non-classés ailleurs : Antarctique ; île Bouvet ; Territoire britannique de l'Antarctique ; Territoire britannique de l'océan Indien ; île Christmas ; Îles des Cocos (Keeling) ; Terres australes et antarctiques françaises ; Îles Heard et McDonald ; Île Norfolk ; Pitcairn ; Saint-Barthélemy ; Saint-Martin (partie française) ; Géorgie du Sud et îles Sandwich méridionales ; Îles mineures éloignées des États-Unis et îles du Pacifique sous administration des États-Unis.
- Partenaires non classés ailleurs : 'combustibles de soute et provisions de bord', 'informations confidentielles et différences', 'zone neutre', 'zones franches'. Ces partenaires sont utilisés exclusivement dans les tableaux du commerce de marchandises.

POUR MÉMOIRE

Les économies en développement sont présentées à trois niveaux d'agrégation : le groupe dans son intégralité, puis sans la Chine continentale et enfin sans les pays les moins avancés.

Les économies en développement sont également réparties en trois groupes de revenu en fonction de la moyenne des années 2011-2013 du PIB nominal par habitant : revenu élevé (supérieur à 5 141 \$), intermédiaire (entre 1 142 \$ et 5 141 \$) et faible (inférieur à 1 142 \$).

Le groupe des pays pauvres très endettés inclut les pays bénéficiant de l'initiative de désendettement de la Banque mondiale et du Fonds monétaire international.

Depuis 1994, les Nations Unies ont également pris en compte les problèmes particuliers des petits États insulaires en développement. Cependant, l'ONU n'a jamais établi de critères en vue d'en établir une liste officielle. Une liste non officielle est utilisée par la CNUCED à des fins analytiques.

Pour l'ONU, les pays les moins avancés et les pays en développement sans littoral sont des groupes de pays qui requièrent une attention particulière de la communauté internationale.

COMPOSITION OF COUNTRY GROUPINGS

COMPOSITION DES GROUPEMENTS DE PAYS

High-income developing economies (UNCTAD) (74)

Algeria; American Samoa; Angola; Anguilla; Antigua and Barbuda; Argentina; Aruba; Bahamas; Bahrain; Barbados; Bonaire, Sint Eustatius and Saba; Botswana; Brazil; British Virgin Islands; Brunei Darussalam; Cayman Islands; Chile; China; Colombia; Cook Islands; Costa Rica; Cuba; Curaçao; Dominica; Dominican Republic; Ecuador; Equatorial Guinea; Falkland Islands (Malvinas); French Polynesia; Gabon; Grenada; Guam; Hong Kong, Special Administrative Region of China; Iran (Islamic Republic of); Iraq; Jamaica; Kuwait; Lebanon; Libya; Macao, Special Administrative Region of China; Malaysia; Maldives; Mauritius; Mexico; Montserrat; Namibia; Nauru; New Caledonia; Niue; Northern Mariana Islands; Oman; Palau; Panama; Peru; Qatar; Republic of Korea; Saint Helena; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Saudi Arabia; Seychelles; Singapore; Sint Maarten (Dutch part); South Africa; Suriname; Taiwan Province of China; Thailand; Trinidad and Tobago; Turkey; Turks and Caicos Islands; United Arab Emirates; Uruguay; and Venezuela (Bolivarian Republic of).

Middle-income developing economies (UNCTAD) (52)

Belize; Bhutan; Bolivia (Plurinational State of); Cabo Verde; Cameroon; Congo; Côte d'Ivoire; Djibouti; Egypt; El Salvador; Fiji; Ghana; Guatemala; Guyana; Honduras; India; Indonesia; Jordan; Kiribati; Lao People's Democratic Republic; Lesotho; Marshall Islands; Mauritania; Micronesia (Federated States of); Mongolia; Morocco; Myanmar; Nicaragua; Nigeria; Pakistan; Papua New Guinea; Paraguay; Philippines; Samoa; Sao Tome and Principe; Solomon Islands; South Sudan; Sri Lanka; State of Palestine; Sudan; Swaziland; Syrian Arab Republic; Timor-Leste; Tonga; Tunisia; Tuvalu; United Republic of Tanzania; Vanuatu; Viet Nam; Wallis and Futuna Islands; Yemen; and Zambia.

Low-income developing economies (UNCTAD) (33)

Afghanistan; Bangladesh; Benin; Burkina Faso; Burundi; Cambodia; Central African Republic; Chad; Comoros; Democratic People's Republic of Korea; Democratic Republic of the Congo; Eritrea; Ethiopia; Gambia; Guinea; Guinea-Bissau; Haiti; Kenya; Liberia; Madagascar; Malawi; Mali; Mozambique; Nepal; Niger; Rwanda; Senegal; Sierra Leone; Somalia; Togo; Tokelau; Uganda; and Zimbabwe.

HIPC - Heavily indebted poor countries (IMF) (36)

Afghanistan; Benin; Bolivia (Plurinational State of); Burkina Faso; Burundi; Cameroon; Central African Republic; Chad; Comoros; Congo; Côte d'Ivoire; Democratic Republic of the Congo; Ethiopia; Gambia; Ghana; Guinea; Guinea-Bissau; Guyana; Haiti; Honduras; Liberia; Madagascar; Malawi; Mali; Mauritania; Mozambique; Nicaragua; Niger; Rwanda; Sao Tome and Principe; Senegal; Sierra Leone; Togo; Uganda; United Republic of Tanzania; and Zambia.

Économies en développement à revenu élevé (CNUCED) (74)

Afrique du Sud ; Algérie ; Angola ; Anguilla ; Antigua-et-Barbuda ; Arabie saoudite ; Argentine ; Aruba ; Bahamas ; Bahreïn ; Barbade ; Bonaire , Saba et Saint-Eustache ; Botswana ; Brésil ; Brunéi Darussalam ; Chili ; Chine ; Colombie ; Costa Rica ; Cuba ; Curaçao ; Dominique ; Émirats arabes unis ; Équateur ; Gabon ; Grenade ; Guam ; Guinée équatoriale ; Hong-Kong , région administrative spéciale de Chine ; Îles Caïmanes ; Îles Cook ; Îles Falkland (Malvinas) ; Îles Mariannes du Nord ; Îles Turques et Caïques ; Îles Vierges britanniques ; Iran (République islamique d') ; Iraq ; Jamaïque ; Koweït ; Liban ; Libye ; Macao, région administrative spéciale de Chine ; Malaisie ; Maldives ; Maurice ; Mexique ; Montserrat ; Namibie ; Nauru ; Nioué ; Nouvelle-Calédonie ; Oman ; Palaos ; Panama ; Pérou ; Polynésie française ; Province chinoise de Taiwan ; Qatar ; République de Corée ; République dominicaine ; Sainte-Hélène ; Sainte-Lucie ; Saint-Kitts-et-Nevis ; Saint-Martin (partie hollandaise) ; Saint-Vincent-et-les Grenadines ; Samoa américaines ; Seychelles ; Singapour ; Suriname ; Thaïlande ; Trinité-et-Tobago ; Turquie ; Uruguay et Venezuela (République bolivarienne du).

Économies en développement à revenu intermédiaire (CNUCED) (52)

Belize ; Bhoutan ; Bolivie (État plurinational de) ; Cabo Verde ; Cameroun ; Congo ; Côte d'Ivoire ; Djibouti ; Égypte ; El Salvador ; État de Palestine ; Fidji ; Ghana ; Guatemala ; Guyana ; Honduras ; Îles Marshall ; Îles Salomon ; Îles Wallis-et-Futuna ; Inde ; Indonésie ; Jordanie ; Kiribati ; Lesotho ; Maroc ; Mauritanie ; Micronésie (États fédérés de) ; Mongolie ; Myanmar ; Nicaragua ; Nigéria ; Pakistan ; Papouasie-Nouvelle-Guinée ; Paraguay ; Philippines ; République arabe syrienne ; République démocratique populaire lao ; République-Unie de Tanzanie ; Samoa ; Sao Tomé-et-Principe ; Soudan ; Soudan du Sud ; Sri Lanka ; Swaziland ; Timor-Leste ; Tonga ; Tunisie ; Tuvalu ; Vanuatu ; Viet Nam ; Yémen et Zambie

Économies en développement à revenu faible (CNUCED) (33)

Afghanistan ; Bangladesh ; Bénin ; Burkina Faso ; Burundi ; Cambodge ; Comores ; Érythrée ; Éthiopie ; Gambie ; Guinée ; Guinée-Bissau ; Haïti ; Kenya ; Libéria ; Madagascar ; Malawi ; Mali ; Mozambique ; Népal ; Niger ; Ouganda ; République centrafricaine ; République démocratique du Congo ; République populaire démocratique de Corée ; Rwanda ; Sénégal ; Sierra Leone ; Somalie ; Tchad ; Togo ; Tokélaou et Zimbabwe.

PPTe - Pays pauvres très endettés (FMI) (36)

Afghanistan ; Bénin ; Bolivie (État plurinational de) ; Burkina Faso ; Burundi ; Cameroun ; Comores ; Congo ; Côte d'Ivoire ; Éthiopie ; Gambie ; Ghana ; Guinée ; Guinée-Bissau ; Guyana ; Haïti ; Honduras ; Libéria ; Madagascar ; Malawi ; Mali ; Mauritanie ; Mozambique ; Nicaragua ; Niger ; Ouganda ; République centrafricaine ; République démocratique du Congo ; République-Unie de Tanzanie ; Rwanda ; Sao Tomé-et-Principe ; Sénégal ; Sierra Leone ; Tchad ; Togo et Zambie.

LLDCs - Landlocked developing countries¹ (32)

Afghanistan; Armenia*; Azerbaijan*; Bhutan; Bolivia (Plurinational State of); Botswana; Burkina Faso; Burundi; Central African Republic; Chad; Ethiopia; Kazakhstan*; Kyrgyzstan*; Lao People's Democratic Republic; Lesotho; Malawi; Mali; Mongolia; Nepal; Niger; Paraguay; Republic of Moldova*; Rwanda; South Sudan; Swaziland; Tajikistan*; The former Yugoslav Republic of Macedonia*; Turkmenistan*; Uganda; Uzbekistan*; Zambia; and Zimbabwe.

¹ The countries marked with an * are classified as economies in transition (neither developed nor developing). However, as they are landlocked States, they are also members of this group.

SIDS - Small island developing States (UNCTAD) (29)

Antigua and Barbuda; Bahamas; Barbados; Cabo Verde; Comoros; Dominica; Fiji; Grenada; Jamaica; Kiribati; Maldives; Marshall Islands; Mauritius; Micronesia (Federated States of); Nauru; Palau; Papua New Guinea; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Samoa; Sao Tome and Principe; Seychelles; Solomon Islands; Timor-Leste; Tonga; Trinidad and Tobago; Tuvalu; and Vanuatu.

LDCs - Least developed countries (48)***Africa and Haiti***

Angola; Benin; Burkina Faso; Burundi; Central African Republic; Chad; Democratic Republic of the Congo; Djibouti; Equatorial Guinea; Eritrea; Ethiopia; Gambia; Guinea; Guinea-Bissau; Haiti; Lesotho; Liberia; Madagascar; Malawi; Mali; Mauritania; Mozambique; Niger; Rwanda; Senegal; Sierra Leone; Somalia; South Sudan; Sudan; Togo; Uganda; United Republic of Tanzania; and Zambia.

Asia

Afghanistan; Bangladesh; Bhutan; Cambodia; Lao People's Democratic Republic; Myanmar; Nepal; and Yemen.

Islands

Comoros; Kiribati; Sao Tome and Principe; Solomon Islands; Timor-Leste; Tuvalu; and Vanuatu.

LLDCs - Pays en développement sans littoral¹ (32)

Afghanistan ; Arménie* ; Azerbaïdjan* ; Bhoutan ; Bolivie (État plurinational de) ; Botswana ; Burkina Faso ; Burundi ; Éthiopie ; ex-République yougoslave de Macédoine* ; Kazakhstan* ; Kirghizistan* ; Lesotho ; Malawi ; Mali ; Mongolie ; Népal ; Niger ; Ouganda ; Ouzbékistan* ; Paraguay ; République centrafricaine ; République démocratique populaire lao ; République de Moldova* ; Rwanda ; Soudan du Sud ; Swaziland ; Tadjikistan* ; Tchad ; Turkménistan* ; Zambie et Zimbabwe.

¹ Les pays avec astérisque font partie du groupement des économies en transition (ni développées ni en développement). Cependant, comme ce sont des pays sans littoral, ils appartiennent aussi à ce groupement.

SIDS - Petits États insulaires en développement (CNUCED) (29)

Antigua-et-Barbuda ; Bahamas ; Barbade ; Cabo Verde ; Comores ; Dominique ; Fidji ; Grenade ; Îles Marshall ; Îles Salomon ; Jamaïque ; Kiribati ; Maldives ; Maurice ; Micronésie (États fédérés de) ; Nauru ; Palaos ; Papouasie-Nouvelle-Guinée ; Sainte-Lucie ; Saint-Kitts-et-Nevis ; Saint-Vincent-et-les Grenadines ; Samoa ; Sao Tomé-et-Principe ; Seychelles ; Timor-Leste ; Tonga ; Trinité-et-Tobago ; Tuvalu et Vanuatu.

PMA - Pays les moins avancés (48)***Afrique et Haïti***

Angola ; Bénin ; Burkina Faso ; Burundi ; Djibouti ; Érythrée ; Éthiopie ; Gambie ; Guinée ; Guinée-Bissau ; Guinée Équatoriale ; Haïti ; Lesotho ; Libéria ; Madagascar ; Malawi ; Mali ; Mauritanie ; Mozambique ; Niger ; Ouganda ; République centrafricaine ; République démocratique du Congo ; République-Unie de Tanzanie ; Rwanda ; Sénégal ; Sierra Leone ; Somalie ; Soudan ; Soudan du Sud ; Tchad ; Togo et Zambie.

Asie

Afghanistan ; Bangladesh ; Bhoutan ; Cambodge ; Myanmar ; Népal ; République démocratique populaire lao et Yémen.

Îles

Comores ; Îles Salomon ; Kiribati ; Sao Tomé-et-Principe ; Timor-Leste ; Tuvalu et Vanuatu.

The tables included in this book represent analytical summaries of the full time-series contained in the DVD version of the *UNCTAD Handbook of Statistics 2015*.

The *Handbook* refers to the Standard International Trade Classification (SITC) Revision 3 detailed in the DVD. Depending on the table, nomenclature of statistics is detailed at the 3-digit level or by broad product groupings as follows:

Codes	SITC Product groupings
0 - 9	All products
0 + 1 + 22 + 4	All food items
2 minus (22 + 27 + 28)	Agricultural raw materials
27 + 28 + 68 + 667 + 971	Ores, metals, precious stones and non-monetary gold
3	Fuels
5 + 6 + 7 + 8 minus (667 + 68)	Manufactured goods:
5	- Chemical products
7	- Machinery & transport equipment
6 + 8 minus (667 + 68)	- Other manufactured goods

PART ONE

International merchandise trade

Table 1.1 shows the value of total exports (free on board - FOB) and imports (cost, insurance and freight - CIF), expressed in millions of dollars and percentages of the world total, of individual countries, geographical regions and selected economic groupings. The trade flows shown in this table are on the general trade system basis for all countries except those marked with an asterisk which employ the special trade system. The general trade system is used when the statistical territory of a compiling country coincides with its economic territory. Consequently, imports include all goods entering the economic territory of a compiling country and exports include all goods leaving the economic territory of the compiling country. The special trade system is used when the statistical territory comprises only a particular part of the economic territory within which "goods may be disposed of without customs restriction". In such a case, imports include all goods entering the free circulation area of the compiling country, which means cleared through customs for home use, and exports include all goods leaving the free circulation area of a compiling country.

Average annual growth rates of international trade derived from table 1.1 are presented in table 1.2.

Table 1.3 contains trade balances (exports FOB minus imports CIF). Balances are expressed as a percentage of imports.

Table 1.4 shows the relative importance of trade among group members compared to the regional exports or total exports of that group.

PART TWO

International merchandise trade by region

Table 2.1 shows the export and import structure of individual countries by main regions of origin and destination. Data are presented for as many individual economies as possible, while trade partners are grouped in 14 major clusters.

Table 2.2 (A to J) presents the structure of exports by destination and imports by origin by major commodity groups for 10 selected country groups. The table provides detailed information on the world trade network for 19 regions of origin and destination and six commodity groups.

Les tableaux inclus dans cette publication constituent un résumé analytique des séries chronologiques complètes publiées dans le DVD du *Manuel de statistiques 2015 de la CNUCED*.

Le *Manuel* se réfère à la Classification type pour le commerce international (CTCI) révision 3 détaillée dans le DVD. Selon les tableaux, les statistiques sont présentées, au niveau détaillé de la nomenclature (position à trois chiffres) ou par groupements de produits dont la composition est la suivante :

Groupe de produits CTCI
Total tous produits
Produits alimentaires
Matières premières d'origine agricole
Minerais, métaux, pierres précieuses et or à usage non monétaire
Combustibles
Articles manufacturés :
- Produits chimiques
- Machines et matériel de transport
- Articles manufacturés divers

PREMIÈRE PARTIE

Commerce international des marchandises

Le tableau 1.1 donne la valeur des exportations (franco à bord - FAB) et des importations (coût, assurance et fret - CAF) totales de marchandises, exprimée en millions de dollars et en pourcentage du monde, des pays et régions géographiques et d'une sélection de groupements économiques. Les flux du commerce présentés dans ce tableau se réfèrent au système du commerce général pour tous les pays, à l'exception de ceux qui utilisent le système du commerce spécial, identifiés par un astérisque. Le système du commerce général est utilisé lorsque le territoire statistique d'un pays coïncide avec son territoire économique, et en conséquence, les importations comprennent tous les biens admis sur le territoire du pays déclarant et les exportations, tous les biens qui le quittent. Le système du commerce spécial est utilisé lorsque le territoire statistique ne comprend qu'une partie du territoire économique à l'intérieur de laquelle « les biens peuvent être écoulés librement sans restriction douanière ». Dans ce cas, les importations comprennent tous les biens qui entrent dans la zone de libre circulation du pays déclarant, c'est-à-dire qui ont été dédouanés pour mise à la consommation et les exportations comprennent tous les biens qui quittent la zone de libre circulation du pays déclarant.

Les taux d'évolution annuels moyens du commerce international des marchandises, calculés à partir des valeurs des tableaux 1.1 figurent dans le tableau 1.2.

Le tableau 1.3 présente les balances commerciales (exportations FAB moins importations CAF), ainsi que ces mêmes balances en pourcentage des importations.

Le tableau 1.4 indique l'importance des exportations entre pays membres de groupements commerciaux par rapport aux exportations régionales et totales de ces groupements.

DEUXIÈME PARTIE

Commerce international des marchandises par régions

Le tableau 2.1 présente la structure des exportations et des importations des pays par régions d'origine et de destination. Les données sont présentées pour le plus grand nombre possible d'économies tandis que les partenaires commerciaux sont classés en 14 groupes principaux.

Le tableau 2.2 (A à J) indique la structure des exportations par destinations ainsi que celle des importations par origines et par principaux groupes de produits pour le monde et une sélection de 10 groupements de pays. Le tableau fournit une information détaillée sur le réseau du commerce mondial pour 19 régions d'origine et de destination, et six groupes de produits.

Totals of international merchandise trade presented in the tables in Part one are not strictly comparable with those in Part two and three. Discrepancies arise due to the use of different complementary sources and treatment of unallocated residual trade flows.

Exports by destination may differ considerably in some cases from data on imports as reported by trade partners for a variety of factors, among which, the following may be of particular importance:

- Most import data are reported on a CIF rather than an FOB basis;
- There is a time lag between the date on which goods are recorded as exports and their arrival at their destination;
- There may be considerable differences between the recorded destination of exports and the actual destination as shown in import statistics;
- Adjustments across commodity groups may be treated differently by exporters and importers;
- The use of different product nomenclatures by the exporting and importing countries.

UN Comtrade database is the main data source for tables in chapters 2 and 3. These data should be used with good knowledge of the coverage and the limitations of the main data source available at <http://comtrade.un.org/db/help/uReadMeFirst.aspx>.

PART THREE

International merchandise trade by product

Table 3.1 shows the structure of exports and imports for individual economies by nine commodity groups (total, all food items, agricultural raw materials, fuels, ores and metals, manufactured goods, including chemical products, machinery and transport equipment and other manufactured goods) for selected years.

Table 3.2 (A - World, B - Developing economies and C - Developed economies, respectively) presents the structure of exports for the world, developing and developed economies by product, at the SITC Revision 3, 3-digit level. For each group (A, B and C), the following indicators are shown:

- Share of each product in the world
- Share of each product in the group
- Average growth rate of the product for the period (2005-2014)
- Difference of the average growth rate of the product from that of the world.

Table 3.2D establishes for each economy the list of main products exported (SITC Revision 3, 3-digit level). Shares of each product in the total exports of the country, the region and the world are also indicated.

Table 3.2E lists major exporters of 70 leading products among developing economies at the SITC Revision 3, 3-digit level. Share of the product in total exports of each major exporter is shown. Country's share in world or developing economies' exports of the product is also calculated.

Table 3.3 provides concentration and structural change indices for exports and imports by product at SITC Revision 3, 3-digit level. The first indicator shows whether a product market is concentrated in a few countries or more homogeneously distributed among several countries. The structural change indicator shows whether the distribution of the world market share for each product differs from a benchmark year (1995).

Les totaux du commerce international des marchandises présentés dans les tableaux de la première partie ne sont pas strictement comparables à ceux des deuxième et troisième parties. Ces écarts sont dus à l'utilisation de sources complémentaires différentes et à la ventilation des marges résiduelles non distribuées du commerce.

Les exportations ventilées par destinations peuvent accuser un écart parfois considérable par rapport aux importations rapportées par les partenaires en raison de divers facteurs dont les plus importants sont les suivants :

- Les importations sont déclarées en principe sur la base de la "valeur CAF" plutôt que sur la base de la "valeur FAB" ;
- Les importations de marchandises peuvent arriver à destination et être enregistrées longtemps après la date de leur enregistrement à l'exportation ;
- D'importantes différences peuvent exister entre la destination des exportations déclarée par les pays exportateurs et la destination réelle qu'indiquée dans les statistiques d'importation ;
- Les ajustements par groupes de produits peuvent être traités différemment par les exportateurs et importateurs ;
- L'utilisation de nomenclatures de produits différentes par le pays exportateur et le pays importateur.

La base de données *UN Comtrade* est la source principale des tableaux présentés dans les chapitres 2 et 3. Ces données doivent être utilisées en étant pleinement conscient de la couverture et des limitations de la source de données, disponibles à l'adresse : <http://comtrade.un.org/db/help/uReadMeFirst.aspx>.

TROISIÈME PARTIE

Commerce international des marchandises par produits

Le tableau 3.1 fournit la structure des exportations et des importations des pays par produits classés en neuf groupes (total, produits alimentaires, matières premières d'origine agricole, combustibles, minerais et métaux, produits manufacturés, dont produits chimiques, machines et matériel de transport, articles manufacturés divers) pour une sélection d'années.

Les tableaux 3.2 (A - Monde, B - Économies en développement, et C - Économies développées) présentent respectivement les exportations par produits, au niveau de la CTICI révision 3 (position à trois chiffres). Pour chaque groupement (A, B et C), les indicateurs suivants sont calculés :

- la part de chaque produit dans le monde
- la part de chaque produit dans le groupement
- le taux de croissance moyen de la période (2005-2014)
- l'écart de ce dernier par rapport au taux de croissance moyen mondial.

Le tableau 3.2D établit, pour chaque économie, la liste des principaux produits (CTICI révision 3, position à trois chiffres) qu'elle exporte. La part de chaque produit dans le total des exportations du pays, de la région et du monde est également indiquée.

Le tableau 3.2E liste les plus gros exportateurs de 70 produits parmi les produits de la CTICI révision 3 (position à trois chiffres) les plus exportés par les économies en développement. La part du produit dans les exportations totales de chaque gros exportateur est fournie. Les parts du pays dans les exportations du produit dans le monde ou dans les économies en développement sont également montrées.

Le tableau 3.3 fournit les indices de concentration et de changement structurel des exportations et des importations par produits au niveau de la CTICI révision 3 (position à trois chiffres). Le premier indicateur montre comment le marché d'un produit est concentré sur quelques pays ou réparti de façon plus homogène entre plusieurs pays. L'indicateur de changement structurel indique si la répartition du commerce d'un produit entre les pays exportateurs ou importateurs a connu une évolution importante par rapport à une année de référence (1995).

PART FOUR

International merchandise trade indicators

Table 4.1 includes concentration and diversification indices. The diversification index indicates whether the export or import structure of each country or country grouping differs from the world patterns. The concentration index specifically shows how exports and imports of individual countries or country groupings are concentrated on several products or otherwise distributed in a more homogeneous manner among a series of products.

Table 4.2 contains export and import volume indices, rounding out trade value available in tables 1.1 and 1.2. Export and import unit value indices, derived terms of trade and purchasing power of exports indices are also provided.

To improve data coverage, especially for the latest periods, the following procedure was used in the calculation of unit value indices:

- A set of average price indices at SITC Revision 3, 3-digit level are constructed using *UNCTADstat* Commodity Price Statistics, international and national sources and UNCTAD secretariat estimates.
- At the country level, unit value indices are calculated using current year trade values at the SITC Revision 3, 3-digit level, available in table 3.2 as weights.

In some instances these indices may differ from the estimates published in official sources, since the main aim is to provide tentative estimates for most countries on a comparable basis.

Table 4.3 presents average applied import MFN (Most Favoured Nation) tariff rates for major categories of non-agricultural and non-fuel products by individual markets. Product categories are defined in terms of SITC Revision 3 and all corresponding Harmonized System (HS) 6-digit codes have been aggregated for each category.

PART FIVE

International trade in services

Table 5.1 presents total exports and imports of services. The statistics shown correspond to IMF *Balance of Payments and International Investment Position Manual, Sixth Edition (BPM6)* definitions and are jointly compiled by UNCTAD and the World Trade Organization (WTO). The aggregate data include estimates of missing values that are not shown separately. Services figures shown comprise the following 12 principal services categories: Manufacturing services on physical inputs owned by others; maintenance and repair services n.i.e.; transport; travel; construction; insurance and pension services; financial services; charges for the use of intellectual property n.i.e.; telecommunications, computer, and information services; other business services; personal, cultural and recreational services; and, government goods and services n.i.e.

Table 5.2 presents statistics on international trade in services by category of service for 40 major exporters and importers and selected groups. Other measures included are the percentage of the world total and annual percentage change. The statistics shown correspond to IMF *Balance of Payments and International Investment Position Manual, Sixth Edition (BPM6)* definitions and are jointly compiled by UNCTAD and the World Trade Organization (WTO). Data are presented from year 2005 onwards and, for some items, available for exports only. Table includes the following ten categories: goods-related services; transport; travel; construction; insurance and pension services; financial services; charges for the use of

QUATRIÈME PARTIE

Indicateurs du commerce international des marchandises

Le tableau 4.1 contient les indices de concentration et de diversification. L'indice de diversification indique si la structure, par produits, des exportations ou importations d'un pays ou groupe de pays diverge de la structure par produits observée au niveau du monde. L'indice de concentration montre comment les exportations et importations d'un pays ou groupe de pays sont concentrées sur quelques produits ou réparties de façon plus homogène sur une gamme de produits.

Le tableau 4.2 fournit les indices de volume des exportations et des importations complétant ainsi l'information en valeur disponible dans les tableaux 1.1 et 1.2. Les indices de la valeur unitaire des exportations et importations, les indices dérivés des termes de l'échange et du pouvoir d'achat des exportations sont également inclus.

Afin d'améliorer la couverture des données, et spécialement pour les années récentes, la méthode suivante a été utilisée pour le calcul des valeurs unitaires:

- Un ensemble d'indices de prix moyens au niveau de la CTCl révision 3 (position à trois chiffres) a été construit en utilisant des données provenant des Statistiques des prix des produits de base d'*UNCTADstat*, de sources internationales et nationales ainsi que d'estimations du secrétariat de la CNUCED.
- Au niveau des pays individuels, les indices de valeur unitaire ont été calculés en utilisant les valeurs des exportations et des importations de l'année courante au niveau de la CTCl révision 3 (position à trois chiffres), disponibles dans la table 3.2 comme pondération.

Dans certains cas, ces indices peuvent différer des estimations publiées dans les sources officielles, le but principal étant de fournir des estimations approximatives et comparables pour la plupart des pays.

Le tableau 4.3 contient les données sur les droits de douane NPF (nation la plus favorisée) moyens appliqués, par les marchés individuels, à l'importation des principales catégories de produits non-agricoles et non-pétroliers. Les catégories de produits sont définies sur la base de la CTCl, révision 3, et, pour chaque catégorie, les codes à 6 chiffres du Système harmonisé (SH) correspondants ont été agrégés.

CINQUIÈME PARTIE

Commerce international des services

Le tableau 5.1 présente les exportations et importations totales des services. Ces statistiques sont le résultat d'un travail commun entre la CNUCED et l'Organisation mondiale du commerce (OMC) et elles correspondent aux définitions du *Manuel de la balance des paiements et de la position extérieure globale, sixième édition (MBP6)* du FMI. Les agrégats inclus dans le tableau 5.1 comprennent les valeurs estimées qui ne sont pas présentées séparément. Les séries correspondent aux 12 principales catégories de services suivantes : services de fabrication fournis sur des intrants physiques détenus par des tiers ; services d'entretien et de réparation n.c.a. ; transports ; voyages ; construction ; services d'assurance et de pension ; services financiers ; frais pour usage de la propriété intellectuelle n.c.a. ; services de télécommunications, d'informatique et d'information ; autres services aux entreprises ; services personnels, culturels et relatifs aux loisirs ; et, biens et services des administrations publiques n.c.a.

Le tableau 5.2 présente les séries de données sur la structure du commerce des services par catégories de services, pour 40 exportateurs et importateurs principaux et une sélection de groupements. Il présente également le pourcentage du total mondial et la variation annuelle. Ces statistiques sont le résultat d'un travail commun entre la CNUCED et l'Organisation mondiale du commerce (OMC) et elles correspondent aux définitions du *Manuel de la balance des paiements et de la position extérieure globale, sixième édition (MBP6)* du FMI. Les données des pays sont présentées à partir de 2005 et, pour certaines catégories, seules les données des exportations sont disponibles. Le tableau présente les dix

intellectual property n.i.e.; telecommunications, computer, and information services; other business services; and personal, cultural and recreational services.

For convenience, manufacturing services on physical inputs owned by others and maintenance and repair services n.i.e. are grouped as "Goods-related services".

Table 5.3 shows statistics on the international maritime transport. It contains data on the size of the world merchant fleet by flag of registration and by type of ship. The table presents also, for each region or country 1) its share in the world fleet, and 2) the share of each ship-type in its fleet. The table incorporates a consolidated time series from several issues of the UNCTAD *Review of Maritime Transport*. The Review reports on the worldwide evolution of shipping, sea-ports and multimodal transport of liquid bulk, dry bulk and containers.

PART SIX Commodities

Table 6.1 includes the annual and quarterly free market price indices in current dollars for selected commodities exported by developing economies. Price indices are also available for aggregated primary commodity groups: All food, food and tropical beverages, food, tropical beverages, vegetable oilseeds and oils, agricultural raw materials and minerals, ores and metals, excluding petroleum. A combined price index in current dollars covers these subgroups of commodities. Weights of the aggregated price indices are based on the value of exports of developing countries from 1999 to 2001 and the base year is 2000 (2000=100). Crude petroleum price indices and unit value indices of manufactured goods exports by developed economies are presented as memo items.

PART SEVEN International finance

Table 7.1 presents values of the current account (net) in millions of dollars and as percentage of GDP. Balance of payments current account data cover all transactions between residents and non-residents of a reporting economy. The current account describes the difference between current receipts and expenditures for internationally traded goods and services, primary income, and secondary income between residents and non-residents. From a national perspective, the current account balance shows the gap between national savings and domestic investment.

Tables 7.2.1 and 7.2.2 contain information on foreign direct investment (FDI), flows and stock, expressed in millions of dollars. These figures correspond to the Statistical Annexes of the UNCTAD *World Investment Report 2015*. The *World Investment Report*, which is released in June each year, contains annual data up to the year before, e.g. the 2015 edition contains annual FDI data up to 2014. However, at the time of publication, the data for the most recent year are still preliminary and are subject to revision by the national authorities. When they revise data, UNCTAD updates its database accordingly.

A foreign direct investment (FDI) is defined as an investment involving a long-term relationship and reflecting a lasting interest in and control by a resident entity in one economy (foreign direct investor or parent enterprise) of an enterprise resident in a different economy (FDI enterprise or affiliate enterprise or foreign affiliate).

catégories de services suivantes : services connexes aux biens ; transports ; voyages ; construction ; services d'assurance et de pension, services financiers ; frais pour usage de la propriété intellectuelle n.c.a. ; services de télécommunications, d'informatique et d'information ; autres services aux entreprises ; et, services personnels, culturels et relatifs aux loisirs.

Les services de fabrication fournis sur des intrants physiques détenus par des tiers et les services d'entretien et de réparation n.i.a. sont regroupés en "Services connexes aux biens".

Le tableau 5.3 montre des statistiques sur le transport maritime international. Il contient des données sur la flotte marchande mondiale par pavillons d'immatriculation et par types de navires. Le tableau présente également, pour chaque région ou pays, 1) sa part dans la flotte totale mondiale, et 2) la part que représente chaque type de navire dans sa flotte. Le tableau englobe des informations consolidées provenant de différentes éditions de la publication *Review of Maritime Transport* de la CNUCED. Elle rend compte de l'évolution du transport multimodal, portuaire et maritime concernant les principaux trafics de vrac liquide, de vrac sec et de conteneurs.

SIXIÈME PARTIE Produits de base

Le tableau 6.1 présente les indices annuels et trimestriels des prix en dollars courants sur le marché libre d'une sélection de produits de base exportés par les économies en développement. Ces indices sont aussi disponibles au niveau des groupes de produits de base suivants : total des produits alimentaires, produits alimentaires et boissons tropicales, produits alimentaires, boissons tropicales, huiles et graines oléagineuses, matières premières d'origine agricole et minéraux, minerais et métaux (hors pétrole). Un indice de prix combiné en dollars courants couvre tous ces groupes de produits. Les pondérations des indices ont été calculées à partir de la valeur des exportations des pays en développement de 1999 à 2001 et l'année de base est l'année 2000 (2000=100). Les indices des prix du pétrole et la valeur unitaire des exportations d'articles manufacturés par les économies développées sont présentés pour mémoire.

SEPTIÈME PARTIE Finance internationale

Le tableau 7.1 fournit les valeurs du compte courant (net) en millions de dollars et en pourcentage du produit intérieur brut. Le compte des transactions courantes de la balance des paiements recouvre toutes les transactions entre entités résidentes et non-résidentes de l'économie déclarante. Le compte courant indique la différence entre les recettes et les paiements des biens et services échangés, les revenus primaires et les revenus secondaires entre résidents et non-résidents. D'une perspective nationale, la balance du compte courant montre l'écart entre les épargnes nationales et l'investissement intérieur.

Les tableaux 7.2.1 et 7.2.2 contiennent les valeurs des investissements étrangers directs (IED), flux et stocks, présentées en millions de dollars. Les chiffres correspondent aux données contenues dans l'Annexe statistique du *Rapport sur l'investissement dans le monde 2015* de la CNUCED. Le *Rapport sur l'investissement dans le monde*, publié en juin chaque année, contient des données annuelles allant jusqu'à l'année précédant l'année de publication, p.ex. l'édition 2015 contient des données annuelles de l'IED jusqu'en 2014. Cependant, au moment de sa publication, les données des années les plus récentes sont encore préliminaires et sont sujettes à des révisions de la part des autorités nationales. Lorsque les données sont révisées, la CNUCED met à jour sa base de données en conséquence.

L'investissement étranger direct (IED) est un investissement impliquant une relation à long terme et témoignant de l'intérêt durable d'une entité résidant dans un pays (investisseur étranger direct ou société mère) à l'égard d'une entreprise résidant dans un autre pays (entreprise bénéficiaire, entreprise affiliée, ou encore

Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates.

A direct investment enterprise is defined as an incorporated or unincorporated enterprise in which the direct investor, resident in another economy, owns 10 percent or more of the ordinary shares or voting power (or the equivalent).

Table 7.3 presents the time series on receipts and payments of personal remittances in millions of dollars. These data are also shown as percentage of exports (receipts) or imports (payments) of goods and services, respectively, and as percentage of GDP.

PART EIGHT GDP and population

Table 8.1 provides information on nominal gross domestic product (GDP), total and per capita. GDP data - expenditure approach in dollars, are derived from data in national currencies, converted into dollars, using annual period-average exchange rates.

Table 8.2 contains annual average growth rates for total and per capita GDP. The annual average growth rate of GDP is derived on the basis of constant price series in national currency.

Table 8.3 provides data on GDP by type of expenditure and gross value added (VA) by kind of economic activity, expressed in millions and shares. The share of each component of GDP/VA is derived on the basis of current price series in national currencies.

Table 8.4 provides total population and urban population estimates. The figures for certain groups may differ from those published by the sources, where UNCTAD definitions for these groups are different.

filiale étrangère). Cet investissement englobe à la fois la transaction initiale entre les deux entités et toutes les transactions ultérieures entre elles et entre filiales étrangères.

L'entreprise d'investissement direct est définie comme une entreprise dotée ou non de la personnalité morale, dans laquelle un investisseur direct qui est résident d'une autre économie détient au moins 10 pour cent des actions ordinaires ou des droits de vote (ou l'équivalent).

Le tableau 7.3 présente les séries chronologiques sur les recettes et les paiements des envois de fonds personnels en millions de dollars. Ces données sont également communiquées en pourcentage des exportations (recettes) et importations (paiements) des biens et des services, et en pourcentage du PIB.

HUITIÈME PARTIE PIB et population

Le tableau 8.1 fournit le produit intérieur brut (PIB) nominal total et par habitant. Les données du PIB - approche des dépenses en dollars, ont été obtenues à partir des valeurs de PIB exprimées à l'origine en monnaies nationales, converties en dollars, en appliquant les taux de change annuel dérivés des moyennes mensuelles.

Les taux annuels moyens de variation du PIB total et du PIB par habitant sont disponibles dans les tableaux 8.2. Le taux de croissance annuel moyen se base sur le PIB aux prix constants en monnaie nationale.

Le PIB total est décomposé par catégories de dépenses et valeur ajoutée (VA) brute par branches d'activité économique dans le tableau 8.3. Les données de ce tableau sont indiquées en pourcentage du PIB/VA aux prix courants en monnaie nationale.

Le tableau 8.4 présente des estimations sur la population totale et la population urbaine. Les chiffres de certains groupements de pays peuvent être différents de ceux publiés par la source lorsque la CNUCED donne des définitions différentes pour ces groupements.

UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

- (1) Including unspecified destinations.
- (2) Before 2000, the trade of the member countries of Southern African Customs Union (SACU) was not reported separately, but for SACU as a whole. Therefore, for the period 1995 to 1999, intra-trade figures of these countries are UNCTAD estimates. From 2001 to 2009, intra-trade among SACU member countries is under-valued.
- (3) Exports data include a considerable amount of re-exports.
- (4) From 2011 onwards, including commercial mining.
- (5) France including French Guiana, Guadeloupe, Martinique, Mayotte, Monaco and Reunion (and excluding intra-trade).
- (6) Prior to 2009, excluding re-exports.
- (7) Prior to 2005, excluding customs free zones.

Calculs du secrétariat de la CNUCED, basés sur la matrice du commerce de marchandises d'*UNCTADstat* de la CNUCED

Notes :

- (1) Y compris des destinations non-spécifiées.
- (2) Le commerce des pays membres de l'Union douanière d'Afrique australe (SACU) n'était pas rapporté séparément avant 2000, mais pour l'Union en tant qu'entité. Pour cette raison, les flux commerciaux intra-groupe de ces pays sont estimations de la CNUCED pour la période 1995 à 1999. De 2001 à 2009, le commerce intra-groupe entre les membres de SACU est sous-évalué.
- (3) Les données des exportations comprennent une part importante de réexportations.
- (4) À partir de 2011, y compris l'exploitation minière commerciale.
- (5) France incluant Guadeloupe, Guyane française, Martinique, Mayotte, Réunion et Monaco (et excluant les flux intra).
- (6) Avant 2009, non-compris les réexportations.
- (7) Avant 2005, non-compris les zones franches douanières.

UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

- (1) Including unspecified destinations.
- (2) Before 2000, the trade of the member countries of Southern African Customs Union (SACU) was not reported separately, but for SACU as a whole. Therefore, for the period 1995 to 1999, intra-trade figures of these countries are UNCTAD estimates. From 2001 to 2009, intra-trade among SACU member countries is under-valued.
- (3) From 2011 onwards, including commercial mining.
- (4) France including French Guiana, Guadeloupe, Martinique, Mayotte, Monaco and Reunion (and excluding intra-trade).
- (5) Prior to 2005, excluding customs free zones.

Source :

Calculs du secrétariat de la CNUCED, basés sur la matrice du commerce de marchandises d'*UNCTADstat* de la CNUCED

Notes :

- (1) Y compris des destinations non-spécifiées.
- (2) Le commerce des pays membres de l'Union douanière d'Afrique australe (SACU) n'était pas rapporté séparément avant 2000, mais pour l'Union en tant qu'entité. Pour cette raison, les flux commerciaux intra-groupe de ces pays sont estimations de la CNUCED pour la période 1995 à 1999. De 2001 à 2009, le commerce intra-groupe entre les membres de SACU est sous-évalué.
- (3) À partir de 2011, y compris l'exploitation minière commerciale.
- (4) France incluant Guadeloupe, Guyane française, Martinique, Mayotte, Réunion et Monaco (et excluant les flux intra).
- (5) Avant 2005, non-compris les zones franches douanières.

UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

- (a) More than 30% of total trade under SITC Rev.3, code 931: "Special transactions & commodities not classified".
- (1) Including trade not classified according to kind (codes 911 and 931 of SITC Rev.3).
- (2) As a consequence of the improved coverage of gold beginning in 2013/2014 in response to the OECD "Recommendation of the Council on Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas" of 25 May 2011 (C/MIN(2011)12/FINAL), the reported or estimated trade of gold as well as its share in the total trade may have significantly increased in certain countries.
- (3) Before 2000, the trade of the member countries of Southern African Customs Union (SACU) was not reported separately, but for SACU as a whole. Therefore, for the period 1995 to 1999, intra-trade figures of these countries are UNCTAD estimates. From 2001 to 2009, intra-trade among SACU member countries is under-valued.
- (4) Exports data include a considerable amount of re-exports.
- (5) From 2011 onwards, including commercial mining.
- (6) France including French Guiana, Guadeloupe, Martinique, Mayotte, Monaco and Reunion (and excluding intra-trade).
- (7) Prior to 2009, excluding re-exports.
- (8) Prior to 2005, excluding customs free zones.
- (9) In 2005, exports of telecommunication and sound recording apparatus (SITC Rev. 3, Division 76) may be over-reported as a result of fraud in VAT declaration ("missing trader fraud") (UNDESA, Expert Group Meeting on International Economic and Social Classifications, 2011, "Measuring Trends in ICT Trade: From HS2002 To HS2007 / ICT Product Definition").

Calculs du secrétariat de la CNUCED, basés sur la matrice du commerce de marchandises d'*UNCTADstat* de la CNUCED

Notes :

- (a) Plus de 30% du commerce sous la position 931 de la CTCl rév. 3 : "Transactions et articles spéciaux non classés".
- (1) Y compris le commerce non classé par catégorie (codes 911 et 931 de la CTCl Rév.3).
- (2) Suite à l'amélioration de la couverture des données de l'or monétaire à partir de 2013/2014 conformément à la "Recommandation du Conseil relative au Guide sur le devoir de diligence pour des chaînes d'approvisionnement responsables en minerais provenant de zones de conflit ou à haut risque" de l'OCDE du 25 mai 2011 (C/MIN(2011)12/FINAL), le commerce de l'or, rapporté ou estimé par les pays ainsi que leur part dans le commerce total peuvent avoir considérablement augmenté pour certains pays.
- (3) Le commerce des pays membres de l'Union douanière d'Afrique australe (SACU) n'était pas rapporté séparément avant 2000, mais pour l'Union en tant qu'entité. Pour cette raison, les flux commerciaux intra-groupe de ces pays sont estimations de la CNUCED pour la période 1995 à 1999. De 2001 à 2009, le commerce intra-groupe entre les membres de SACU est sous-évalué.
- (4) Les données des exportations comprennent une part importante de réexportations.
- (5) À partir de 2011, y compris l'exploitation minière commerciale.
- (6) France incluant Guadeloupe, Guyane française, Martinique, Mayotte, Réunion et Monaco (et excluant les flux intra).
- (7) Avant 2009, non-compris les réexportations.
- (8) Avant 2005, non-compris les zones franches douanières.
- (9) En 2005, les exportations d'appareils et équipements de télécommunication et pour l'enregistrement et la reproduction du son (CTCl rév. 3, code 76) ont pu être sur-déclarées du fait de la fraude à la TVA ("fraude carrousel") (ONU DAES, Réunion du groupe d'experts des classifications économiques et sociales internationales, 2011, "Measuring Trends in ICT Trade: From HS2002 To HS2007 / ICT Product Definition").

UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

- More than 30% of total trade under SITC Rev.3, code 931: "Special transactions & commodities not classified".
- Including trade not classified according to kind (codes 911 and 931 of SITC Rev.3).
- As a consequence of the improved coverage of gold beginning in 2013/2014 in response to the OECD "Recommendation of the Council on Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas" of 25 May 2011 (C/MIN(2011)12/FINAL), the reported or estimated trade of gold as well as its share in the total trade may have significantly increased in certain countries.
- Before 2000, the trade of the member countries of Southern African Customs Union (SACU) was not reported separately, but for SACU as a whole. Therefore, for the period 1995 to 1999, intra-trade figures of these countries are UNCTAD estimates. From 2001 to 2009, intra-trade among SACU member countries is under-valued.
- From 2011 onwards, including commercial mining.
- France including French Guiana, Guadeloupe, Martinique, Mayotte, Monaco and Reunion (and excluding intra-trade).
- Prior to 2005, excluding customs free zones.

Calculs du secrétariat de la CNUCED, basés sur la matrice du commerce de marchandises d'*UNCTADstat* de la CNUCED

Notes :

- Plus de 30% du commerce sous la position 931 de la CTCI rév. 3 : "Transactions et articles spéciaux non classés".
- Y compris le commerce non classé par catégorie (codes 911 et 931 de la CTCI Rév.3).
- Suite à l'amélioration de la couverture des données de l'or monétaire à partir de 2013/2014 conformément à la "Recommandation du Conseil relative au Guide sur le devoir de diligence pour des chaînes d'approvisionnement responsables en minerais provenant de zones de conflit ou à haut risque" de l'OCDE du 25 mai 2011 (C/MIN(2011)12/FINAL), le commerce de l'or, rapporté ou estimé par les pays ainsi que leur part dans le commerce total peuvent avoir considérablement augmenté pour certains pays.
- Le commerce des pays membres de l'Union douanière d'Afrique australe (SACU) n'était pas rapporté séparément avant 2000, mais pour l'Union en tant qu'entité. Pour cette raison, les flux commerciaux intra-groupe de ces pays sont estimations de la CNUCED pour la période 1995 à 1999. De 2001 à 2009, le commerce intra-groupe entre les membres de SACU est sous-évalué.
- À partir de 2011, y compris l'exploitation minière commerciale.
- France incluant Guadeloupe, Guyane française, Martinique, Mayotte, Réunion et Monaco (et excluant les flux intra).
- Avant 2005, non-compris les zones franches douanières.

Notes:

- (1) The symbol ** indicates the grouping to which the country belongs and to which the percentage share shown applies. The percentage represents a country's export share in the total exports of the commodity of the group to which the country belongs (i.e. "developing" or "developed" or "transition" economies).
- (2) Data are estimated at least for one of the reference years.

Notes :

- (1) Le symbole ** indique le groupement auquel le pays appartient et par rapport auquel est calculé le pourcentage. Ce pourcentage est la part que représentent les exportations du produit par le pays par rapport aux exportations du même produit par le groupement auquel le pays appartient (économies "en développement" ou "développées" ou "en transition").
- (2) Données estimées pour au moins une des années de référence.

UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

(1) Concentration index:

The normalized formula of Herfindahl-Hirschmann index (Market HHI) is used to measure the degree of market concentration.

$$H_i = \frac{\sqrt{\sum_{j=1}^n \left(\frac{x_{ij}}{X_i}\right)^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

where

H_i = value of concentration index for product i

x_{ij} = value of export for country j and product i

$$X_i = \sum_{j=1}^n x_{ij}$$

n = number of individual markets (countries)

An index value closer to 1 indicates highly concentrated markets. On the contrary, a value closer to 0 reflects a more homogeneous distribution of market shares among countries.

(2) Structural change index:

The structural change index is a measure of changes in the market structure of a product.

$$I_i = \frac{\sum_{j=1}^n |S_{ij}^1 - S_{ij}^0|}{2}$$

where:

I_i = value of structure index for product i (ranking from 0 to 1)

S_{ij}^0 = share of trade of product i for country j for the benchmark year (1995)

S_{ij}^1 = share of trade of product i for country j in the concerned year

A value close to 1 for a product indicates a significant change in the market shares among exporters (or importers), compared to a benchmark year.

Notes :

(1) Indice de concentration :

La formule normalisée de l'indice de Herfindahl-Hirschmann (HHI du marché), mesure le degré de concentration du marché.

$$H_i = \frac{\sqrt{\sum_{j=1}^n \left(\frac{x_{ij}}{X_i}\right)^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

avec

H_i = valeur de l'indice de concentration pour le produit i

x_{ij} = valeur des exportations du pays j pour le produit i

$$X_i = \sum_{j=1}^n x_{ij}$$

n = nombre de marchés (pays)

Une valeur de l'indice proche de 1 indique un marché très concentré. En revanche, une valeur proche de 0 démontre une répartition plus homogène des parts de marché entre les pays.

(2) Indice de changement structurel :

L'indice de changement structurel mesure les changements de structure du marché d'un produit.

$$I_i = \frac{\sum_{j=1}^n |S_{ij}^1 - S_{ij}^0|}{2}$$

où

I_i = valeur de l'indice de changement structurel, pour le produit i (comprise entre 0 et 1)

S_{ij}^0 = part du commerce du produit i pour le pays j , par rapport au commerce total de ce produit pour l'année de référence (1995)

S_{ij}^1 = part du commerce du produit i pour le pays j , par rapport au commerce total de ce produit pour l'année concernée

Une valeur proche de 1 indique un grand changement des parts de marché au sein des exportateurs ou des importateurs, par rapport à l'année de référence.

UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

(a) More than 30% of total trade under SITC Rev.3, code 931: "Special transactions & commodities not classified"

(1) Number of products exported (or imported) at the three-digit SITC, Rev. 3 level.

(2) The diversification index is computed by measuring the absolute deviation of the trade structure of a country from world structure:

$$S_j = \frac{\sum_i |h_{ij} - h_i|}{2}$$

where

h_{ij} = share of product i in total exports or imports of country or country group j

h_i = share of product i in total world exports or imports

The diversification index takes values between 0 and 1. A value closer to 1 indicates greater divergence from the world pattern.

This index is a modified Finger-Kreinin measure of similarity in trade. For more information, please consult the article of Finger, J. M. and M. E. Kreinin (1979), "A measure of 'export similarity' and its possible uses" in the *Economic Journal*, 89: 905-12.

(3) Concentration index, also named Herfindahl-Hirschmann Index (Product HHI), is a measure of the degree of product concentration. The following normalized HHI is used in order to obtain values between 0 and 1:

$$H_j = \frac{\sqrt{\sum_{i=1}^n \left(\frac{x_{ij}}{X_j} \right)^2} - \sqrt{1/n}}{1 - \sqrt{1/n}}$$

where

H_j = country or country group index

x_{ij} = value of exports for country j and product i

$$X_j = \sum_{i=1}^n x_{ij}$$

and

n = number of products (SITC Revision 3 at 3-digit group level)

An index value closer to 1 indicates a country's exports or imports are highly concentrated on a few products. On the contrary, values closer to 0 reflect exports or imports are more homogeneously distributed among a series of products.

Calculs du secrétariat de la CNUCED, basés sur la matrice du commerce de marchandises de *UNCTADstat* de la CNUCED

Notes :

(a) Plus de 30% du commerce sous la position 931 de la CTCl rév. 3 : "Transactions et articles spéciaux non classés"

(1) Nombre de produits au niveau de groupes de la CTCl (rév. 3, position à 3 chiffres) exportés (ou importés) par chaque pays.

(2) L'indice de diversification mesure la déviation absolue de la structure du pays par rapport à la structure mondiale :

$$S_j = \frac{\sum_i |h_{ij} - h_i|}{2}$$

avec

h_{ij} = part du produit i dans le total des exportations ou importations du pays ou groupe de pays j

h_i = part du produit i dans le total des exportations ou importations mondiales

La valeur de l'indice de diversification est comprise entre de 0 et 1. Plus l'indice est proche de 1, plus la divergence par rapport à la structure mondiale est élevée.

Cet indice modifié de Finger-Kreinin mesure la similitude dans le commerce. Pour plus d'informations, veuillez consulter l'article de Finger, JM et ME Kreinin (1979), "A measure of 'export similarity' and its possible uses", the Economic Journal, 89: 905-12.

(3) L'indice de concentration, aussi appelé indice de Herfindahl-Hirschmann (HHI des produits), mesure le degré de concentration des produits. Il a été normalisé afin d'obtenir des valeurs comprises entre 0 et 1, selon la formule suivante :

$$H_j = \frac{\sqrt{\sum_{i=1}^n \left(\frac{x_{ij}}{X_j} \right)^2} - \sqrt{1/n}}{1 - \sqrt{1/n}}$$

avec

H_j = Indice du pays ou groupe de pays

x_{ij} = valeur des exportations du pays j pour le produit i

$$X_j = \sum_{i=1}^n x_{ij}$$

et

n = nombre de produits (de la CTCl Révision 3, position à 3 chiffres)

Une valeur de l'indice proche de 1 indique que les exportations ou les importations d'un pays sont très concentrées sur quelques produits. Au contraire, des valeurs proches de 0 reflètent une répartition plus homogène des parts entre les produits.

4.2 Unit value indices of exports and imports

2000 = 100

Sources:

UNCTAD secretariat calculations and estimates, based on:

- ECLAC, *CEPALSTAT* External trade deflator
- EUROSTAT, online database, Trade unit value indices by reporting country
- IMF, *International Financial Statistics*
- U.S. Bureau of Labor Statistics, External trade price indices
- Ministry of Finance Japan, Trade statistics, Unit value indices
- Bank of Japan, Price indices
- UNCTAD, *UNCTADstat* Commodity Price Statistics
- UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

- (1) Unit value index: For the latest periods, the following procedure was used in the calculation of unit value indices in order to improve their data coverage, as well as those of volume indices.
- A set of average price indices at SITC Revision 3, 3-digit level are constructed using *UNCTADstat* Commodity Price Statistics, international and national sources and UNCTAD secretariat estimates.
 - At the country level, unit value indices are calculated using current year trade values available at the SITC Rev. 3, 3-digit level, at *UNCTADstat* (http://unctadstat.unctad.org/wds/ReportFolders/reportFolders.aspx?sRF_ActivePath=P,15912,15914&sRF_Expanded=P,15912,15914) as weights.
- In some instances these indices may differ from the estimates published in official sources, since the main aim is to provide tentative estimates for most countries on a comparable basis.

- (2) From 2011 onwards, including commercial mining.
- (3) From 2005 onwards, including customs free zones.
- (4) Excluding gold.

4.2 Indices de la valeur unitaire des exportations et des importations 2000 = 100

Sources :

Calculs et estimations du secrétariat de la CNUCED, sur la base de :

- CEPALC, *CEPALSTAT* Déflateur du commerce extérieur
- EUROSTAT, base de données en ligne, Indices de valeur unitaire par pays déclarant
- FMI, *Statistiques financières internationales*
- Bureau des statistiques du travail des États-Unis (BLS), Indices des prix du commerce extérieur
- Ministère des finances du Japon, Statistiques du commerce, Indices de valeur unitaire du commerce
- Banque du Japon, Indices des prix
- CNUCED, *UNCTADstat* Statistiques des prix des produits de base
- CNUCED, *UNCTADstat* Matrice du commerce de marchandises

Notes :

- (1) Indice de la valeur unitaire : pour les années récentes, la méthode suivante a été utilisée pour le calcul des indices de valeurs unitaires afin d'améliorer la couverture de ces données ainsi que celle des indices du volume.
 - Un ensemble d'indices de prix moyens au niveau de la CTCI révision 3 (position à trois chiffres) a été construit en utilisant des données provenant des Statistiques des prix des produits de base d'*UNCTADstat*, de sources internationales et nationales ainsi que d'estimations du secrétariat de la CNUCED.
 - Au niveau des pays individuels, les indices de la valeur unitaire ont été calculés en utilisant les valeurs des exportations et des importations de l'année courante, disponibles au niveau de la CTCI rév. 3 (position à trois chiffres) dans UNCTADstat (http://unctadstat.unctad.org/wds/ReportFolders/reportFolders.aspx?sRF_ActivePath=P,15912,15914&sRF_Expanded=P,15912,15914) comme pondération.Dans certains cas, ces indices peuvent différer des estimations publiées dans les sources officielles, le but principal étant de fournir des estimations approximatives et comparables pour la plupart des pays.
- (2) À partir de 2011, y compris l'exploitation minière commerciale.
- (3) À partir de 2005, y compris les zones franches douanières.
- (4) Non-compris l'or.

Notes:

- This table presents tariff data for selected years only. For the complete information, please refer to the *Handbook* 2015 DVD.

Notes :

- Ce tableau présente les tarifs pour une sélection d'années seulement. La série complète est disponible dans le DVD du *Manuel* 2015.

- (1) Product categories are defined in terms of SITC Revision 3, and all corresponding Harmonized System (HS) 6-digit codes have been aggregated for each category.
- (2) Simple average for a selected product group calculated from simple average at HS 6-digit level. It has been calculated dividing the sum of simple averages rates by the actual number of simple average rates.
- (3) Weighted average for each product group calculated from simple average at HS 6-digit level. Country's own imports at HS 6-digit level for corresponding years are used as weights. Where imports are not reported, mirror imports have been compiled using exports of partner countries.
- (4) For the European Union, data refer to the composition of the group during that year.
- (5) Specific tariff rates have been converted into ad valorem equivalents (AVE).

- (1) Les catégories de produits sont définies sur la base de la CTIC, révision 3, et pour chaque catégorie, les codes à 6 chiffres du Système harmonisé (SH) correspondants ont été agrégés.
- (2) Moyenne arithmétique simple pour un groupe de produits déterminés calculée à partir de moyennes arithmétiques simples au niveau du code à 6 chiffres du Système harmonisé. Elle est calculée en divisant la somme des taux moyens par le nombre de taux moyens.
- (3) Moyenne arithmétique pondérée, pour chaque catégorie de produits, calculée à partir des moyennes simples au niveau du code à 6 chiffres du SH. Pour chaque année, les coefficients de pondération sont les importations de chaque marché au niveau du code à 6 chiffres du SH. Lorsque les importations n'étaient pas disponibles, elles ont été évaluées par les données miroir basées sur les exportations des pays partenaires.
- (4) Pour une année donnée, les tarifs de l'Union européenne se réfèrent à la composition du groupe durant cette année.
- (5) Les droits de douane spécifiques ont été convertis en taux équivalents ad valorem (EAV).

5.2 Exports and imports of services by service category

Sources:

UNCTAD and WTO secretariats' calculations based on:

- IMF, *Balance of Payments Statistics*
- Eurostat, online database
- OECD, *OECD.Stat*
- UN DESA Statistics Division, *UN ServiceTrade* database
- Other international and national sources

Notes:

- The statistics presented correspond to the definitions of the IMF *Balance of Payments and International Investment Position Manual, Sixth Edition (BPM6)*. For those countries and territories who present their figures according to the fifth edition of the *Manual (BPM5)*, data were adjusted to the *BPM6* definitions in cases where such adjustments were possible.

Estimated data for individual countries are included in the calculation of geographical regions or economic groupings, but not always shown separately. When possible, the values missing in principal international sources are estimated by using the growth rates derived from the data available in national or other international sources.

Individual economies are ranked based on both reported and estimated 2013 figures. Non-publishable estimates are indicated by a "-" sign.

- (1) Goods-related services cover manufacturing services on physical inputs owned by others and maintenance and repair services n.i.e.
- (2) Include all transport services involving the carriage of people and objects from one location to another as well as related supporting and auxiliary services. Also included are postal and courier services.
- (3) Travel credits cover goods and services for own use or to give away acquired from an economy by non-residents during visits to that economy. Travel debits cover goods and services for own use or to give away acquired from other economies by residents during visits to these other economies.
- (4) Construction covers the creation, renovation, repair, or extension of fixed assets in the form of buildings, land improvements of an engineering nature, and other such engineering constructions as roads, bridges, dams, and so forth. It also includes related installation and assembly work. It includes site preparation and general construction as well as specialized services such as painting, plumbing, and demolition. It also includes management of construction projects.
- (5) Insurance and pension services include services of providing life insurance and annuities, nonlife insurance, reinsurance, freight insurance, pensions, standardized guarantees, and auxiliary services to insurance, pension schemes, and standardized guarantee schemes.
- (6) Financial services cover financial intermediary and auxiliary services, except insurance and pension fund services. These services include those usually provided by banks and other financial corporations.
- (7) Charges for the use of intellectual property n.i.e. include:
 - (a) charges for the use of proprietary rights (such as patents, trademarks, copyrights, industrial processes and designs including trade secrets, franchises) and
 - (b) charges for licenses to reproduce or distribute (or both) intellectual property embodied in produced originals or prototypes (such as copyrights on books and manuscripts, computer software, cinematographic works, and sound recordings) and related rights (such as for live performances and television, cable, or satellite broadcast).
- (8) - Telecommunications services encompass the broadcast or transmission of sound, images, data, or other information by telephone, telex, telegram, radio and television cable transmission, radio and television satellite, electronic mail, facsimile, and so forth, including business network services, teleconferencing, and support services. They do not include the value of the information transported. Also included are mobile telecommunications services, Internet backbone services, and online access services, including provision of access to the Internet. Excluded are installation services for telephone network equipment (included in construction) and database services (included in information services).
 - Computer services consist of hardware- and software-related services and data-processing services. Exclude noncustomized packaged software (systems and applications), and video and audio recordings, on physical media; computer-training courses not designed for a specific user; and leasing of computers without an operator.
 - Information services include news agency services, such as the provision of news, photographs, and feature articles to the media. Other information provision services include database services, direct non-bulk subscriptions to newspapers and periodicals, other online content provision services, and library and archive services.

5.2 Exportations et importations des services par catégories de services

Sources :

Calculs des secrétariats de la CNUCED et de l'OMC sur la base de :

- FMI, *Statistiques de la balance des paiements*
- Eurostat, base de données en ligne
- OCDE, *OECD.Stat*
- ONU DAES Division des statistiques, *UN ServiceTrade* database
- Autres sources internationales et nationales

- Les statistiques présentées correspondent aux définitions du *Manuel de la balance des paiements et de la position extérieure globale, sixième édition (MBP6)* du FMI. Dans la mesure du possible, les données ont été ajustées selon les définitions du *MBP6* pour les pays et territoires qui présentent leurs statistiques conformément à la cinquième édition du *Manuel (MBP5)*.

Les valeurs estimées pour les pays individuels sont comprises dans les calculs des groupements géographiques ou économiques, mais elles ne sont pas toujours présentées séparément. Si possible, les données manquantes dans les sources principales sont estimées en utilisant les taux d'évolution dérivés des données disponibles dans les sources nationales ou autres sources internationales.

Les économies individuelles sont classées en fonction des données rapportées et estimées de l'année 2013. Les estimations qui ne sont pas publiables sont indiquées par le signe "-".

- (1) Les services connexes aux biens comprennent services de fabrication fournis sur des intrants physiques détenus par des tiers et services d'entretien et de réparation n.i.e.

Notes:

- Balance-of-payments current account data cover all transactions between residents and non-residents of a reporting economy, involving economic values and mainly concerning goods, services, income and current transfers. In general, the current account balance describes the difference between current receipts and expenditures for internationally traded goods and services, primary income, and secondary income between residents and non-residents. From a national perspective, the current account balance would equal the gap between national savings and domestic investment.

Notes :

- Les données du compte des transactions courantes de la balance des paiements recouvrent toutes les transactions, entre entités résidentes et non-résidentes, portant sur des valeurs économiques, concernant notamment les biens, les services, les revenus et les transferts courants. En général, la balance du compte courant indique la différence entre les recettes et les paiements pour des biens et des services échangés, les revenus primaires et les revenus secondaires entre résidents et non-résidents. D'une perspective nationale, la balance du compte courant représente l'écart entre les épargnes nationales et l'investissement intérieur.

7.2.1 Foreign direct investment: Inward and outward flows

Sources:

- UNCTAD, Division on Investment and Enterprise, *World Investment Report*, Statistical Annex
(http://unctad.org/en/Pages/DIAE/World%20Investment%20Report/World_Investment_Report.aspx)

Notes:

Foreign direct investment (FDI) is defined as an investment involving a long-term relationship and reflecting a lasting interest in and control by a resident entity in one economy (foreign direct investor or parent enterprise) of an enterprise resident in a different economy (FDI enterprise or affiliate enterprise or foreign affiliate). Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates.

A direct investment enterprise is defined as an incorporated or unincorporated enterprise in which the direct investor, resident in another economy, owns 10 percent or more of the ordinary shares or voting power (or the equivalent).

FDI inflows and outflows comprise capital provided (either directly or through other related enterprises) by a foreign direct investor to a FDI enterprise, or capital received by a foreign direct investor from a FDI enterprise.

FDI includes the following three components: equity capital, reinvested earnings and intra-company loans.

- Equity capital is the foreign direct investor's purchase of shares of an enterprise in a country other than its own.

- Reinvested earnings comprise the direct investor's share (in proportion to direct equity participation) of earnings not distributed as dividends by affiliates or earnings not remitted to the direct investor. Such retained profits by affiliates are reinvested.

- Intra-company loans or intra-company debt transactions refer to short- or long-term borrowing and lending of funds between direct investors (parent enterprises) and affiliate enterprises.

Data on FDI flows are presented on net bases (capital transactions' credits less debits between direct investors and their foreign affiliates). Net decreases in assets or net increases in liabilities are recorded as credits (with a positive sign), while net increases in assets or net decreases in liabilities are recorded as debits (with a positive sign). Hence, FDI flows with a negative sign indicate that at least one of the three components of FDI is negative and not offset by positive amounts of the remaining components. These are called reverse investment or disinvestment.

(2) FDI outflows data from 1988 to 1991 inclusive refer to Slovenia only; the inflows figures for those years also cover the other Republics of the Socialist Federal Republic of Yugoslavia.

(3) Partial data; total USSR territory is not covered.

(4) Data from 1970 to 2001 inclusive refer to Belgium-Luxembourg; from 2002 onwards data cover Belgium only.

Notes :

L'investissement étranger direct (IED) est un investissement impliquant une relation à long terme et témoignant de l'intérêt durable d'une entité résidant dans un pays (investisseur étranger direct ou société mère) à l'égard d'une entreprise résidant dans un autre pays (entreprise bénéficiaire, entreprise affiliée, ou encore filiale étrangère). Cet investissement englobe à la fois la transaction initiale entre les deux entités et toutes les transactions ultérieures entre elles et entre filiales étrangères.

L'entreprise d'investissement direct est définie comme une entreprise dotée ou non d'une personne morale, dans laquelle un investisseur direct qui est résidant d'une autre économie, détient au moins dix pour cent des actions ordinaires ou des droits de vote (ou l'équivalent).

Les flux entrants et sortants de l'IED comprennent les capitaux fournis par l'investisseur direct (soit directement, soit par l'intermédiaire d'autres entreprises avec lesquelles il est lié) à l'entreprise d'investissement direct ou les capitaux reçus de cette entreprise par l'investisseur.

L'IED est composé des trois catégories suivantes : le capital social, les bénéfices réinvestis et les emprunts intra-compagnie.

- Le capital social inclut l'achat des actions d'une entreprise située à l'étranger par l'investisseur direct résidant dans l'économie déclarante.

- Les bénéfices réinvestis correspondent à la part qui revient à l'investisseur direct (au prorata de sa participation directe au capital) sur les bénéfices qui ne sont pas distribués sous forme de dividendes par les entreprises apparentées, ainsi que les bénéfices des succursales qui ne sont pas versés à l'investisseur direct. Ces bénéfices retenus par les affiliés sont réinvestis.

- Les emprunts intra-compagnie ou les transactions intra-compagnie concernant les dettes ou les créances se réfèrent aux emprunts et prêts des fonds à court- ou long-terme entre l'investisseur direct (entreprise parente) et les entreprises apparentées (affiliées).

Les données sur les flux de l'IED se présentent sur une base nette (les crédits moins les débits des transactions en capital entre l'investisseur direct et son entreprise apparentée). Les augmentations nettes en passifs et les décroissances nettes en actifs se déclarent comme crédits (avec le signe positif), tandis que les augmentations nettes en actifs et les décroissances nettes en passifs se déclarent comme débits (avec le signe négatif). Par conséquent, les flux de l'IED avec un signe négatif indiquent qu'au moins une des trois catégories de l'IED est négative et n'est pas contrebalancée par les valeurs positives des autres catégories. Il s'agit alors de désinvestissements ou de réductions d'investissement.

(a) Base actif/passif.

(c) Principe directionnel calculé depuis la base actif/passif.

(1) Non-compris les centres financiers offshore dans les Caraïbes : Anguilla, Antigua-et-Barbuda, Aruba, Bahamas, Barbade, îles Vierges britanniques, îles Caïmanes, Curaçao, Dominique, Grenade, Montserrat, Saint-Kitts-et-Nevis, Sainte-Lucie, Saint-Vincent-et les Grenadines, Sint Maarten (partie néerlandaise) et îles Turques et Caïques.

(2) Les données de l'IED sortant, de 1988 à 1991, couvrent seulement la Slovénie ; pour la même période, les flux entrants comprennent aussi d'autres Républiques de la République socialiste fédérative de Yougoslavie.

(3) Données partielles : elles ne couvrent pas la totalité de territoire de l'URSS.

(4) Les données de 1970 à 2001 se réfèrent à Belgique-Luxembourg ; à partir de 2002 les données couvrent uniquement la Belgique.

7.2.2 Foreign direct investment: Inward and outward stock

Sources:

- UNCTAD, Division on Investment and Enterprise, *World Investment Report*, Statistical Annex
(http://unctad.org/en/Pages/DIAE/World%20Investment%20Report/World_Investment_Report.aspx)

Notes:

Foreign direct investment (FDI) is defined as an investment involving a long-term relationship and reflecting a lasting interest in and control by a resident entity in one economy (foreign direct investor or parent enterprise) of an enterprise resident in a different economy (FDI enterprise or affiliate enterprise or foreign affiliate). Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates.

A direct investment enterprise is defined as an incorporated or unincorporated enterprise in which the direct investor, resident in another economy, owns 10 percent or more of the ordinary shares or voting power (or the equivalent).

FDI stock is the value of the share of their capital and reserves (including retained profits) attributable to the parent enterprise, plus the net indebtedness of affiliates to the parent enterprises.

Notes :

L'investissement étranger direct (IED) est un investissement impliquant une relation à long terme et témoignant de l'intérêt durable d'une entité résidant dans un pays (investisseur étranger direct ou société mère) à l'égard d'une entreprise résidant dans un autre pays (entreprise bénéficiaire, entreprise affiliée, ou encore filiale étrangère). Cet investissement englobe à la fois la transaction initiale entre les deux entités et toutes les transactions ultérieures entre elles et entre filiales étrangères.

L'entreprise d'investissement direct est définie comme une entreprise dotée ou non d'une personne morale, dans laquelle un investisseur direct, qui est résidant d'une autre économie, détient au moins dix pour cent des actions ordinaires ou des droits de vote (ou l'équivalent).

Le stock de l'IED représente la valeur de la part des capitaux et des réserves (y compris les bénéfices non distribués) attribuables à l'entreprise mère, plus l'endettement net des filiales de l'entreprise.

Notes :

(1) Le taux de croissance annuel moyen se base sur le PIB aux prix constants en monnaie nationale.

Le taux de croissance annuel moyen pour une période de n années est calculé selon la méthode des moindres carrés.

(2) Y compris le Sahara occidental.

(3) Année 1992 : rupture de séries. A partir de 1992, y compris 8 pays de la CEI et LERY de Macédoine.

Notes:

- Percentage shares are derived from GDP and gross VA at current prices in dollars.
- Detailed information on each country is available at:
<http://unstats.un.org/unsd/snaama/downloads/Download-GDPcurrent-USD-countries.xls>
- (1) The breakdown by type of expenditure is expressed in percentage share of GDP. Shares of GDP by type of expenditure might not add-up to 100 per cent due to statistical discrepancies.
- (2) The breakdown by kind of economic activity is in percentage share of total value added.
- (3) Includes agriculture, hunting, forestry and fishing (ISIC Rev.3, divisions 01-05).
- (4) Includes mining and quarrying, manufacturing, electricity, gas and water supply, and construction (ISIC Rev.3, divisions 10-45).
- (5) Include all other economic activities (ISIC Rev.3, divisions 50-99).
- (6) Including Western Sahara.

Notes :

- Les pourcentages sont calculés par rapport au PIB et à la VA brut aux prix courants en dollars.
- Des informations détaillées sur les pays sont disponibles sur :
<http://unstats.un.org/unsd/snaama/downloads/Download-GDPcurrent-USD-countries.xls>
- (1) La ventilation par catégories de dépense est calculée en pourcentage du PIB. La somme des pourcentages du PIB par catégories de dépenses peut ne pas être égale à 100 à cause des écarts statistiques.
- (2) La ventilation par branches d'activité économique est exprimée en pourcentage de la valeur ajoutée totale.
- (3) Inclut l'agriculture, la chasse, la sylviculture et la pêche (CITI rév.3, divisions 01-05).
- (4) Inclut les activités extractives, les activités de fabrication, la production et distribution d'électricité, de gaz et d'eau et la construction (CITI rév.3, divisions 10-45).
- (5) Incluent toutes les autres activités économiques (CITI rév.3, divisions 50-99).
- (6) Y compris le Sahara occidental.
