# IMPLICATIONS OF APPLYING THE NEW DEFINITION OF «ICT GOODS»

**UNCTAD Technical Notes on ICT for Development** 

TECHNICAL NOTE NO1 UNEDITED TN/UNCTAD/ICT4D/01 May 2011

# Implications of applying the new definition of "ICT goods"

#### 1. Introduction

Global exports of information and communication technology (ICT) goods represented 12 per cent of world merchandise trade in 2009, and are increasingly dominated by Asia<sup>1</sup>. In fact, seven of the top ten exporters are Asian economies with China clearly in leading position.

In recent years, several changes have been introduced in the criteria used to define ICT goods. This note explores the impact of the change in the scope of the ICT goods definition. After presenting in details the changes in the definition and its rationale, it looks at the impact of applying the new definition on the international ranking of exporters and importers of ICT goods. It also examines what products account for the most important additions and deletions in the new definition.

It should be noted that changes in the definition does not imply a change in real trade flows. The objective of this note is to document how the change in definition has influenced the relative importance of different countries as ICT goods traders. Understanding the implications of the new definition is relevant for UNCTAD's mandate to produce internationally comparable statistics on trade in ICT goods, within the framework of the Core Indicators developed by the *Partnership on Measuring ICT for Development*.<sup>2</sup>

#### 2. ICT goods definition and correspondence issues

Since 1999, the OECD's *Working Party on Indicators for the Information Society (WPIIS)* has provided a forum to define internationally comparable statistical indicators on ICT penetration, use and impact. Among other achievements, the WPIIS has provided a definition of ICT goods (2003 and 2009). In the context of the *Partnership on Measuring ICT for Development*, UNCTAD is in charge of the collection of two core indicators on trade in ICT goods: the proportion of ICT goods in total exports and imports of each countries.<sup>3</sup> These core indicators are based on the WPIIS definition of ICT goods. In 2003, the OECD's WPIIS produced a first definition of ICT goods. The criteria for ICT goods were updated in 2009 but the new list of ICT goods corresponding to these criteria was only released by the OECD in 2010.<sup>4</sup> The objective of the update in the definition is to simplify and shorten the list of ICT goods. It also intends to match as close as possible with the basic definition of ICT products which is 'ICT products must primarily be intended to fulfill or enable the function of information processing and communication by

http://unctad.org/Templates/webflyer.asp?docid=14417&intItemID=1528&lang=1

<sup>&</sup>lt;sup>1</sup> See UNCTAD/PRESS/PR/2011/004 of 02/02/11

<sup>&</sup>lt;sup>2</sup> http://new.unctad.org/default 575.aspx.

See Manual on the production of statistics on the information economy, UNCTAD 2009, revised edition.

<sup>&</sup>lt;sup>4</sup> See OECD's Guide to Measuring the Information Society 2009.

electronic means, including transmission and display.' (Guide for Measuring the Information Society 2009).

As observed by the OECD<sup>5</sup>, comparing the two lists is not without technical difficulties. The 2003 list for classifying traded products was laid out in the Harmonized System (HS) 2002 while the 2010 list was first expressed in the CPC rev2 classification, then converted in HS 2007. Converting the new product list from HS 2007 back into HS 2002 for product by product comparisons is possible but not always straightforward. Indeed, in a number of cases, the correspondence does not happen on a line for line basis but rather on a "one line to many lines" or even on a "many lines to many lines" basis.

Thus, in proposing a conversion from CPC rev 2, to HS 2007 and then into HS 2002, the OECD used an approach whereby goods are made to correspond across classifications by "bloc of items time series" (one cluster in HS 2007 is deemed as approximately equivalent to another cluster in HS 2002). This approach ensure some degree of time series comparability despite the fact that the two lists of ICT goods obtained do not always tally perfectly<sup>6</sup>.

In this note, the focus is on the main differences between the "old" and the "new" lists, in terms of the change of scope and change in the value of trade entailed. The new definition of ICT goods involves both the removal of a number of product lines and the addition of a few new ones. The following paragraphs detail and substantiate the main changes.

Overall, the change results in a reduction of the scope, both in terms of number of items covered and their value. In the HS 2007 classification, the change in definition entailed the removal of 79 product items, and the addition of 7, resulting in a total number of 95 ICT goods items. In value terms this means a decline of approximately 11% of global exports of "ICT goods" in 2009 (see annex 1). This is very close to the difference of 9.5% between the two definitions identified by the OECD for the year 2008<sup>8</sup>.

#### 3. Trade value by products included/removed in ICT goods list

The new definition results in both additions and removals from the ICT goods lists. However, each good added or removed carry different weights in trade terms. Tables 1 and 2 present the goods for which the largest shifts in trade value occur, for goods removed and for goods added respectively.

As far as goods removed from the list are concerned, the new definition excludes cable goods, and also goods which "...use electronic processing to detect, measure and /or record physical phenomena or to control a physical process.<sup>9</sup>" In trade value terms, one can observe a relatively even distribution of value among the goods removed (table 1). The item that tops the list are CD-Roms and DVDs (HS 852340 Optical media for the recording of sound/of other phenomena), which account for just 10% of the total value of removed goods in 2009. Other removed goods that are significantly traded include machine-tools such as automatic regulating/controlling instruments, measuring/checking

<sup>7</sup> Respective numbers for HS 02 are 87 goods removed and 10 additions, and 88 removals for 10 additions for HS 96.

<sup>&</sup>lt;sup>5</sup> Measuring trends in ICT trade: from HS 2002 to HS 2007. DSTI/ICCP/IIS(2010)5/FINAL, OECD.

<sup>&</sup>lt;sup>6</sup> OECD 2010.

<sup>&</sup>lt;sup>9</sup> Guide to measuring the information society 2009, OECD.

instruments, and machines & apparatus for the manufacture of semiconductor devices/of electronic integrated circuits. Taken together, the top 20 items (out of 79) account for two thirds of the trade in removed items.

The new definition introduces several new products into the list of ICT goods. Some of these – such as video consoles – reflect the development of new ICT products. Other goods that were previously not part of the list have been incorporated to reflect technological changes which now allow, for example, a printer or an Automatic Teller Machine (ATM) to communicate with other machines through a network. Other goods, in particular in the electronic component category, have been introduced due to the correspondence methodology applied to convert CPC rev2 products into HS 2007 lines. The list of the added ICT goods following to the change in definition is presented in annex 3. In total, the additions to the new list amounted to some 59 billion US\$ of exports, in 2009.

Table 2 reveals that the degree of concentration in value terms is much higher for the goods added to the new ICT goods list than for the goods removed. Video games (30% of total value of "added goods") and three different types of printers account for more than 89% of the total exports in added goods.

Table 2: Goods **added** to the ICT goods list, ranked by trade value.

| HS<br>code | Exports in<br>US\$ million<br>2009 | Description   | % of total exports added goods | Cumulated %<br>of total<br>exports added<br>goods |

## 4. Impact of the definition by country

The change in ICT goods definition induces for all countries both the addition and the removal of items, which are discussed here. The net impact is generally negative but fluctuates widely by country.

## 4.1 Goods removed by the change in definition

The annex 4 contains the list of goods removed by the new definition.

The table 3 shows the ten largest exporters of goods removed from the ICT goods list. At the world level, the change in definition entails a reduction of 234 US\$ billion of such exports. This reduction has mostly affected some of the largest exporters of ICT goods, as the three countries that account for the largest shares in removed goods are the US, Germany and Japan. The large impact on Germany is probably explained by the removal

of machine-tools, of which it is a significant exporter. China on the other hand, despite being the world's first exporter of ICT goods only ranks 4<sup>th</sup> among the country "losing out" to the change in definition. Therefore, the change in definition accentuates the shift towards Developing Asia for ICT goods exports. China's lead at the top of the rankings of ICT good exports will probably be further strengthened as a consequence of the change of definition.

Table 3: Top exporters of goods **removed** from the ICT goods list by the new definition

| Rank | Economy          | Exports of removed goods (US\$ million), 2009 | Share of total exports of removed goods |
|------|------------------|---|---|
| 1    | United States    | 37'177  | 16%                                     |
| 2    | Germany          | 34'648  | 15%                                     |
| 3    | Japan            | 22'941  | 10%                                     |
| 4    | China            | 17'195  | 7%                                      |

# 4.2 Goods added by the new definition

Concerning the few goods added by the change in definition, their total exports amounted to 59 billion US\$. As is typical for ICT goods, China clearly leads the rankings in exports of such goods, accounting for almost 30% of the world's total. China is followed by the Netherlands, Germany and other large traditional exporters of ICT goods. Thailand, a somewhat less significant exporter of ICT goods also entered the top-10 list of new ICT goods exporters with 1.2 US\$ billion exports under the new definition, as presented in table 4.

Table 4: Top exporters of goods added to the ICT goods list by the new definition

| Rank | Economy          | Exports of added goods (US\$ million), 2009 | Share of total exports of added goods |
|------|------------------|---|---------------------------------------|
| 1    | China            | 17'055                                      | 29%                                   |

## 4.3 Net effect of the new ICT goods definition

Annex 2 presents for all countries the value of exports of goods added, removed and the net effect of the change of definition for the ICT goods list. For the world as a whole, the net impact of the change is a reduction of the value of ICT goods exports by some 173 US\$ billion, an eleven percent fall. Goods added to the list account for approximately one quarter (25%) of the value of goods removed from the list. In China, the change in definition did not entail a significant reduction of the total value of ICT goods exported, as the value of added goods is worth 99% of the value of the goods removed. Again, the impact of the change in definition has reinforced the prominence of this country at the top of world's rankings in ICT goods exports.

Table 5 shows the countries for which the net effect (addition minus removal of goods) has been the most pronounced. Again, it is striking that traditional ICT goods exporters among developed countries have been generally more affected by the change in definition. The US, Germany, Japan and France have seen the five largest net falls in the value of their ICT goods exports. The change in definition will therefore accelerate the trend observed in recent years of ICT goods exports shifting from West to East<sup>10</sup>.

Table 5: Largest net impacts of change in ICT goods definition on exports of ICT goods (2009)

| Rank | Economy                   | Added minus removed exports | Size of<br>added<br>against<br>removed |
|------|---------------------------|-----------------------------|--|
| 1    | United States             | -32'001                     | 10%                                    |
| 2    | Germany                   | -28'525                     | 1%                                     |
| 3    | Japan                     | -20'772                     | 1%                                     |

Annex 2 displays the net effect of the change in the ICT goods definition. For a number of small economies, including Bolivia, the Republic of Moldova and El Salvador, the change in the scope has resulted in an almost total elimination of their ICT goods exports since those were almost exclusively concentrated on the "removed" goods. By contrast, in the case of Indonesia, exports in items added to the new ICT goods list exceeds by 327 US\$ millions the value of exports of goods removed.

Table 6 proposes an overview of the country rankings induced by the change in definition for the top 25 exporters of ICT goods. The standings of the "newcomers" in ICT goods exports have generally strengthened, while the opposite is true for the traditional developed countries exporters. The Republic of Korea (+2) and Poland (+3) for example gained ranks with the change in definition. On the other hand, Germany (-3), and Canada (-4) lost several ranks as a result of the change in definition.

# 5. Impact of the change in definition on imports.

On the import side, China tops the list in terms of the reduction of imports of ICT goods with the new definition (table 7), with a fall of 26 billion. It is followed by the US and Germany (-15 and -12 billion US\$ respectively). A mix of traditional and new exporters complete the list of the top ten reductions in imports of such goods. The change in definition of ICT goods has had a more balanced impact on the rankings in import terms. However, the change in definition entails one significant change on the import side: the United States and China exchange spots at the top of the rankings with the United States reclaiming its position as top importer of ICT goods under the new definition. Annex 5 provides the full list of economies with the changes entailed by the new definition.

Table 7: Ten largest reductions in ICT goods imports due to change in definition

#### 6. Conclusions

The change in ICT goods definition proposed by the OECD in 2010 and adopted by the Partnership on Measuring ICT for Development entails both additions and subtractions of goods from the list. Overall, the subtraction effect dominates and leads to an 11% reduction of exports of ICT goods under the new definition, at the world level. Some products weight more heavily than others both among the added and the removed goods. The impact of the change in definition also varies by country and affects world rankings in terms of exports and imports of ICT goods. The new definition accentuates the shift towards Asia and Eastern Europe as a growing source of ICT exports, a trend which has been observed in recent years. China, in particular, is one of the few countries for which the value of exports removed from the list is almost entirely compensated by the additions under the new definition. On the other hand, traditional exporters among developed countries tend to see their exports decline the most. For a few countries with a marginal role in ICT exports, the change in definition entails a total elimination of their ICT exports. The change in definition is accompanied by a change in underlying classification from HS 2007 to HS 2002, which makes comparisons between the old list and the new list somewhat problematic as the correspondence between the two classifications is not always straightforward. Hence, time series will have to be interpreted with some caution.

# **ANNEX**

# List of annexes:

- Annex 1: Exports of ICT goods in 2009 under the old and new definition
- Annex 2: Goods removed and added into the ICT definition
- Annex 3: List of goods added to the ICT goods list after the change in definition
- Annex 4: List of goods removed from the ICT goods list after the change in definition
- Annex 5: Impacts of the change in the definition on ICT goods imports by economies.

Annex 1: Exports of ICT goods in 2009 under the old and new definition

| HS 2007                      | HS 2002 | HS 1996 | HS 2007 Description   |
|------------------------------|---------|---------|---|
|                              |         |         |   |
| Telecommunications equipment |         |         |   |
| 854420                       | 854420  | 854420  | Co-axial cable & oth. co-axial elec. conductors   |
| 854470                       | 854470  | 854470  | Optical fibre cables  |
| Electronic components        |         |         |   |
| 850431                       | 850431  | 850431  | Electrical transformers (excl. dielectric) having a power handling capacity not >1kVA   |
| 850450                       | 850450  | 850450  | Inductors, n.e.s. (excl. for cathode ray tubes)   |
| 850490                       | 850490  | 850490  | Parts of the machines of 85.04  |
| 853221                       | 853221  | 853221  | Fixed electrical capacitors, other than those of 8532.10  |
| 853224                       | 853224  | 853224  | Fixed electrical capacitors, other than those of 8532.10, ceramic dielectric, multilayer  |
| 853230                       | 853230  | 853230  | Variable/adjustable (pre-set) electrical capacitors   |
| 853310                       | 853310  | 853310  | Fixed carbon electrical resistors, composition/film types   |
| 853321                       | 853321  | 853321  | Fixed electrical resistors (excl. fixed carbon resistors, composition/film types), for a power handling capacity not >20W                     |
| 853329                       | 853329  | 853329  | Fixed electrical resistors (excl. fixed carbon resistors, composition/film types)   |
| 853331                       | 853331  | 853331  | Wirewound variable electrical resistors, incl. rheostats & potentiometers (excl. heating resistors), for a power handling capacity not >20W   |
| 853339                       | 853339  | 853339  | Wirewound variable electrical resistors, incl. rheostats & potentiometers (excl. heating resistors)   |
| 853340                       | 853340  | 853340  | Electrical resistors (excl. heating resistors, light dependent resistors)   |
| 853390                       | 853390  | 853390  | Parts of the electrical resistors of 85.33  |
| 854390                       | 854270  | 854250  | Parts of electrical machines and apparatus nes.   |
|                              |         |         |   |
| Audio and video equipment    |         |         |   |
| 852329                       |         |         | Magnetic media for the recording of sound/of other phenomena, but excl. products of Ch. 37., other than cards incorporating a magnetic stripe |
|                              | 852311  | 852311  | Unrecorded magnetic tapes, width < 4 mm   |
|                              | 852312  | 852312  | Unrecorded magnetic tapes, width 4-6.5 mm   |
|                              | 852313  | 852313  | Unrecorded magnetic tapes, width > 6.5 mm   |
|                              | 852320  | 852320  | Unrecorded magnetic discs   |

| HS 2007  | HS 2002 | HS 1996 | HS 2007 Description   |
|--|---------|---------|---|
|  | 852440  | 852440  | Magnetic tapes for reproducing phenomena other than sound or image  |
|  | 852451  | 852451  | Other magnetic tapes (excl. of 8524.40) : Of a width not exceeding 4 mm   |
|  | 852452  | 852452  | Other magnetic tapes (excl. of 8524.40) : Of a width exceeding 4 mm but not exceeding 6.5 mm  |
|  | 852453  | 852453  | Other magnetic tapes (excl. of 8524.40) : Of a width exceeding 6.5 mm   |
| Other ICT goods  |         |         |   |
| 846900   | -       | _       | Typewriters other than printers of heading 84.43; word-processing machines  |
|  | 846911  | 846911  | Word-processing machines  |
| 847010   | 847010  | 847010  | Electronic calculators capable of operation without an external source of electric power and pocket-size data recording, reproducing and displaying machines with calculating functions |
| 847021   | 847021  | 847021  | Other electronic calculating machines incorporating a printing device   |
| 847029   | 847029  | 847029  | Other electronic calculating machines   |
| 847090   | 847040  | 847040  | Accounting machines   |
| 847310   | 847310  | 847310  | Parts and accessories (other than covers, carrying cases and the like) suitable for use solely or principally with machines of heading No. 84.69  |
| 847321   | 847321  | 847321  | Parts and accessories of the electronic calculating machines of subheading No. 8470.10, 8470.21 or 8470.29  |
| Instruments and appliances for measuring, checking, testing, navigating and other purposes |         |         |   |
| 852691   | 852691  | 852691  | Radio navigational aid apparatus  |
| 852692   | 852692  | 852692  | Radio remote control apparatus  |
|  | 901041  | 901041  | Apparatus for the projection or drawing of circuit patterns on sensitised semiconductor materials - direct write-on-wafer apparatus   |
| 848620   |         |         | Machines & apparatus for the manufacture of semiconductor devices/of electronic integrated circuits   |
|  | 901042  | 901042  | Apparatus for the projection or drawing of circuit patterns on sensitised semiconductor materials - step and repeat aligners  |
|  | 901049  | 901049  | Apparatus for the projection or drawing of circuit patterns on sensitised semiconductor materials - other   |
| 901410   | 901410  | 901410  | Direction finding compasses   |
| 901420   | 901420  | 901420  | Instruments and appliances for aeronautical or space navigation (other than compasses)  |
| 901480   | 901480  | 901480  | Other navigational instruments and appliances   |
| 901490   | 901490  | 901490  | Parts and accessories of direction finding compasses, other navigational instruments and appliances   |
| 901540   | 901540  | 901540  | Photogrammetrical surveying instruments and appliances  |
| 901580   | 901580  | 901580  | Other surveying instruments and appliances  |

| HS 2007 | HS 2002 | HS 1996 | HS 2007 Description  |
|---------|---------|---------|--|
| 902410  | 902410  | 902410  | Machines and appliances for testing the hardness, strength, compressibility, elasticity or other mechanical properties of materials, metals  |
| 902480  | 902480  | 902480  | Other machines and appliances for testing the hardness, strength, compressibility, elasticity or other mechanical properties of materials  |
| 902490  | 902490  | 902490  | Parts and accessories for machines and appliances for testing the hardness, strength, compressibility, elasticity or other mechanical properties of materials  |
| 902620  | 902620  | 902620  | Instruments and apparatus for measuring or checking the pressure of liquids or gases, excluding instruments and apparatus of heading Nos. 9014, 9015, 9028 or 9032   |
| 902710  | 902710  | 902710  | Instruments and apparatus for physical or chemical analysis, gas or smoke analysis apparatus   |
| 902730  | 902730  | 902730  | Spectrometers, spectrophotometers and spectrographs using optical radiations (UV, visible, IR)   |
|         | 902740  | 902740  | Instruments and apparatus for measuring or checking quantities of heat, sound or light, exposure meters  |
| 902780  | 902780  | 902780  | Other instruments and apparatus for physical or chemical analysis  |
| 902750  | 902750  | 902750  | Other instruments and apparatus using optical radiations (UV, visible, IR)   |
| 902810  | 902810  | 902810  | Gas meters   |
| 902820  | 902820  | 902820  | Liquid meters  |
| 902830  | 902830  | 902830  | Electricity meters   |
| 902890  | 902890  | 902890  | Parts for gas, liquid or electricity supply or production meters, including calibrating meters therefor  |
| 902910  | 902910  | 902910  | Revolution counters, production counters, taximeters, mileometers, pedometers and the like   |
| 902920  | 902920  | 902920  | Speed indicators and tachometers; stroboscopes   |
| 902990  | 902990  | 902990  | Parts and accessories for revolution counters, production counters, taximeters, mileometers, pedometers and the like; speed indicators and tachometers, other than those of heading No. 90.14 or 90.15; stroboscopes |
| 903010  | 903010  | 903010  | Instruments and apparatus for measuring or detecting ionising radiations   |
| 903020  | 903020  | 903020  | Cathode-ray oscilloscopes and cathode-ray oscillographs  |
|         |         | 903083  | Other instruments for measuring or checking semiconductor wafers or devices with a recording device  |
| 903032  |         |         | Multimeters with a recording device  |
| 903084  |         |         | Other instruments & apparatusspecially designed for telecommunications, with a recording device  |
| 903031  | 903031  | 903031  | Multimeters without a recording device   |
| 903033  |         |         |  |
| 903039  | 903039  | 903039  | Other instruments and apparatus for measuring or checking voltage, current, etc. without a recording device  |
| 903040  | 903040  | 903040  | Other instruments and apparatus, specially designed for telecommunications (for example, cross-talk meters, gain measuring instruments, distortion factor meters, psophometers)                                      |
| 903082  | 903082  | 903082  | Other instruments for measuring or checking semiconductor wafers or devices  |
| 903089  | 903083  |         | Other instruments & apparatusspecially designed for telecommunications   |
| 903110  | 903110  | 903110  | Measuring or checking instruments, appliances and machines n.e.s, machines for balancing mechanical parts  |
| 903120  | 903120  | 903120  | Measuring or checking instruments, appliances and machines n.e.s, test benches   |

| HS 2007   | HS 2002 | HS 1996 | HS 2007 Description   |
|---|---------|---------|---|
| 903149  | 903130  | 903130  | Measuring or checking instruments, appliances and machines n.e.s, profile projectors  |
| 903141  | 903141  | 903141  | Other optical instruments and appliances, for inspecting semiconductor wafers or devices or for inspecting photomasks or reticles used in manufacturing semiconductor devices |
| 903180  | 903180  | 903180  | Other measuring or checking instruments, appliances and machines, n.e.s.  |
| 903210  | 903210  | 903210  | Thermostats   |
| 903220  | 903220  | 903220  | Manostats   |
| 852610  | 852610  | 852610  | Radar apparatus   |
| Industrial process control equipment                      |         |         |   |
| 903190  | 903190  | 903190  | Parts and accessories for measuring or checking instruments, appliances and machines, n.e.s.  |
| 903289  | 903289  | 903289  | Other automatic regulating or controlling instruments and apparatus, n.e.s.   |
| 903290  | 903290  | 903290  | Parts and accessories for automatic regulating or controlling instruments and apparatus   |
| Medical and surgical equipment and orthopaedic appliances |         |         |   |
| 901811  | 901811  | 901811  | Electro-cardiographs  |
| 901812  | 901812  | 901812  | Ultrasonic scanning apparatus   |
| 901813  | 901813  | 901813  | Magnetic resonance imaging apparatus  |
| 901814  | 901814  | 901814  | Scintigraphic apparatus   |
| 901819  | 901819  | 901819  | Other electro-diagnostic apparatus (including apparatus for functional exploratory examination or for checking physiological parameters)                                      |
| 902212  | 902212  | 902212  | Computed tomography apparatus   |
| 902213  | 902213  | 902213  | Other apparatus based on the use of X-rays, for dental uses   |
| 902214  | 902214  | 902214  | Other apparatus based on the use of X-rays, for medical, surgical or veterinary uses  |
| 902219  | 902219  | 902219  | Other apparatus based on the use of X-rays, for other uses  |
| Optical media   |         |         |   |
| 852340  |         |         | Optical media for the recording of sound/of other phenomena, but excl. products of Ch. 37.  |
|   | 852431  | 852431  | Discs for laser reading systems, for repr. phenomena other than sound/image   |
|   | 852432  | 852432  | Discs for laser reading systems, for repr. sound only   |
|   | 852439  | 852439  | Discs for laser reading systems (excl. those for repr. phenomena other than sound/image & those for repr. sound only)   |

Annex 5: Impacts of the change in the definition on ICT goods imports by economies.

| Economy                          | Ranking<br>under new<br>definition | Value of imports<br>under new definition<br>(US\$ million), 2009 | Ranking<br>under old<br>definition | Value of imports<br>under old definition<br>(US\$ million), 2009 | Change in imports value | Change<br>in<br>ranking |
