NOTES ....................................................................................................................................... 74
A. General definitions

1. Transnational corporations

Transnational corporations (TNCs) are incorporated or unincorporated enterprises comprising parent enterprises and their foreign affiliates. A parent enterprise is defined as an enterprise that controls assets of other entities in countries other than its home country, usually by owning a certain equity capital stake. An equity capital stake of 10% or more of the ordinary shares or voting power for an incorporated enterprise, or its equivalent for an unincorporated enterprise, is normally considered as the threshold for the control of assets. A foreign affiliate is an incorporated or unincorporated enterprise in which an investor, who is a resident in another economy, owns a stake that permits a lasting interest in the management of that enterprise (an equity stake of 10% for an incorporated enterprise, or its equivalent for an unincorporated enterprise). In WIR, subsidiary enterprises, associate enterprises and branches – defined below – are all referred to as foreign affiliates or affiliates.

- A subsidiary is an incorporated enterprise in the host country in which another entity directly owns more than a half of the shareholder’s voting power, and has the right to appoint or remove a majority of the members of the administrative, management or supervisory body.

- An associate is an incorporated enterprise in the host country in which an investor owns a total of at least 10%, but not more than half, of the shareholders’ voting power.

- A branch is a wholly or jointly owned unincorporated enterprise in the host country which is one of the following: (i) a permanent establishment or office of the foreign investor; (ii) an unincorporated partnership or joint venture between the foreign direct investor and one or more third parties; (iii) land, structures (except structures owned by government entities), and/or immovable equipment and objects directly owned by a foreign resident; or (iv) mobile equipment (such as ships, aircraft, gas- or oil-drilling rigs) operating within a country, other than that of the foreign investor, for at least one year.

2. Foreign direct investment

Foreign direct investment (FDI) is defined as an investment involving a long-term relationship and reflecting a lasting interest and control by a resident entity in one economy (foreign direct investor or parent enterprise) in an enterprise resident in an economy other than that of the foreign direct investor (FDI enterprise or affiliate enterprise or foreign affiliate). FDI implies that the investor exerts a significant degree of influence on the management of the enterprise resident in the other economy. Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates, both incorporated and unincorporated. FDI may be undertaken by individuals as well as business entities.

Flows of FDI comprise capital provided (either directly or through other related enterprises) by a foreign direct investor to an FDI enterprise, or capital received from an FDI enterprise by a foreign direct investor. FDI has three components: equity capital, reinvested earnings and intra-company loans.

- Equity capital is the foreign direct investor’s purchase of shares of an enterprise in a country other than its own.

- Reinvested earnings comprise the direct investor’s share (in proportion to direct equity participation) of earnings not distributed as dividends by affiliates, or earnings not remitted to the direct investor. Such retained profits by affiliates are reinvested.

- Intra-company loans or intra-company debt transactions refer to short- or long-term borrowing and lending of funds between direct investors (parent enterprises) and affiliate enterprises.
FDI stock is the value of the share of their capital and reserves (including retained profits) attributable to the parent enterprise, plus the net indebtedness of affiliates to the parent enterprise. FDI flow and stock data used in WIR are not always defined as above, because these definitions are often not applicable to disaggregated FDI data. For example, in analysing geographical and industrial trends and patterns of FDI, data based on approvals of FDI may also be used because they allow a disaggregation at the country or industry level. Such cases are denoted accordingly.

3. Non-equity forms of investment

Foreign direct investors may also obtain an effective voice in the management of another business entity through means other than acquiring an equity stake. These are non-equity forms of investment, and they include, inter alia, subcontracting, management contracts, turnkey arrangements, franchising, licensing and product-sharing. Data on these forms of transnational corporate activity are usually not separately identified in the balance-of-payments statistics. These statistics, however, usually present data on royalties and licensing fees, defined as “receipts and payments of residents and non-residents for: (i) the authorized use of intangible non-produced, non-financial assets and proprietary rights such as trademarks, copyrights, patents, processes, techniques, designs, manufacturing rights, franchises, etc., and (ii) the use, through licensing agreements, of produced originals or prototypes, such as manuscripts, films, etc.”

B. Availability, limitations and estimates of FDI data presented in WIR

FDI data have a number of limitations. This section therefore spells out how UNCTAD collects and reports such data. These limitations need to be kept in mind also when dealing with the size of TNC activities and their impact.

1. FDI flows

FDI data in annex tables 1 and 2, as well as in most of the tables in the text, are on a net basis (capital transactions’ credits less debits between direct investors and their foreign affiliates). Net decreases in assets (outward FDI) or net increases in liabilities (inward FDI) are recorded as credits (recorded with a positive sign in the balance of payments), while net increases in assets or net decreases in liabilities are recorded as debits (recorded with an opposite sign in the balance of payments). In the annex tables, as well as in the tables in the text, the opposite signs are reversed for practical purposes in the case of FDI outflows. Hence, FDI flows with a negative sign in WIR indicate that at least one of the three components of FDI (equity capital, reinvested earnings or intra-company loans) is negative and is not offset by positive amounts of the other components. These are instances of reverse investment or disinvestment.

UNCTAD regularly collects published and unpublished national official FDI data flows directly from central banks, statistical offices or national authorities on an aggregated and disaggregated basis for its FDI/TNC database (www.unctad.org/fdistatistics). These data constitute the main source for the reported data on FDI. These data are further complemented by data obtained from: (i) other international organizations such as the International Monetary Fund (IMF), the World Bank and the Organisation for Economic Co-operation and Development (OECD); (ii) regional organizations such as the ASEAN Secretariat, European Bank for Reconstruction and Development (EBRD), Banque Centrale des Etats de l’Afrique de l’Ouest, Banque des Etats de l’Afrique Centrale and Eastern Caribbean Central Bank; and (iii) UNCTAD’s own estimates.

For those economies for which data were not available from national official sources, or for those for which data were not available for the entire period of 1980-2010 covered in the World Investment Report 2011 (WIR11),
data from the IMF were obtained using the IMF’s *International Financial Statistics* and *Balance of Payments Statistics Online*, June 2011. If the data were not available from the above IMF data source, data from the IMF’s *Country Report*, under Article IV of the IMF’s Articles of Agreements, were also used.

For those economies for which data were not available from national official sources and the IMF, or for those for which data were not available for the entire period of 1980-2010, data from the World Bank’s *World Development Indicators Online* were used. This report covers data up to 2009.

Data from the EBRD’s *Transition Report 2010* were utilized for those economies in the Commonwealth of Independent States for which data were not available from one of the above-mentioned sources.

Furthermore, data on the FDI outflows of the OECD, as presented in its publication, *Geographical Distribution of Financial Flows to Developing Countries*, and as obtained from its online databank, were used as a proxy for FDI inflows. As these OECD data are based on FDI outflows to developing economies from the member countries of the Development Assistance Committee (DAC) of OECD, inflows of FDI to developing economies may be underestimated.

Finally, in those economies for which data were not available from either of the above-mentioned sources, or only partial data (quarterly or monthly) were available, estimates were made by:

a. annualizing the data, if they are only partially available (monthly or quarterly) from either national official sources or the IMF;

b. using the mirror data of FDI of major economies as proxy;

c. using national and secondary information sources;

d. using data on cross-border mergers and acquisitions (M&As) and their growth rates; and

e. using specific factors.

* A more detailed methodology for each economy on data collection, reporting and estimates for *WIR11* is provided in section C. Longer time-series data are also available on its site or FDI statistics home page, www.unctad.org/fdistatistics.

2. FDI stocks

Annex tables 3 and 4, as well as some tables in the text, present data on FDI stocks at book value or historical cost, reflecting prices at the time when the investment was made.

As in the case of flow data, UNCTAD regularly collects published and unpublished national official FDI stock data as well directly from central banks, statistical offices or national authorities on an aggregated and disaggregated basis for its FDI/TNC database (www.unctad.org/fdistatistics). These data constitute the main source for the reported data on FDI. These data are further complemented by data obtained from (i) other international organizations such as the IMF; (ii) regional organizations such as the ASEAN Secretariat; and (iii) UNCTAD’s own estimates.

For those economies for which data were not available from national official sources, or for those for which data were not available for the entire period of 1980-2010 covered in the *WIR11*, data from the IMF were obtained using the IMF’s *Balance of Payments Statistics Online*, June 2011. Finally, in those economies for which data were not available from either of the above-mentioned sources, estimates were made by either adding up FDI flows over a period of time, or adding or subtracting flows to an FDI stock that had been obtained for a particular year from national official sources, or the IMF data series on assets and liabilities of direct investment, or by using the mirror data of FDI stock of major economies as proxy.

* A more detailed methodology for each economy on data collection, reporting and estimates for *WIR11* is provided in section C. Longer time-series data are also available on its site or FDI statistics home page, www.unctad.org/fdistatistics.
C. Sources and methodology of data on FDI for each country

The following section provides details on sources and methodology of data on FDI, as well as the estimation method of these data, for each of the economies used in the Report or contained in the UNCTAD FDI/TNC database.

- **Afghanistan**
  - National institution reporting FDI:
    ○ Da Afghanistan Bank
  - Data source used in the report:
    - **Inflows**
      *Note:* Data from 2002 to 2005 are on fiscal year basis.
    - **Inward stock**
      Estimated by accumulating inflows since 1970.
    - **Outward FDI**
      Not available.
  - Availability of all FDI flows and stock components:
    ○ Not available.

- **Albania**
  - National institution reporting FDI:
    ○ Bank of Albania
  - Reporting system used:
    ○ Surveys.
  - Data source used in the report:
    - **Flows**
      The national institution mentioned above.
    - **Inward stock**
      Data prior to 2002 are estimated by accumulating inflows since 1970. Data for 2003-2009 are based on the national institution. 2010 data is estimated by adding flows to the 2009 stock.
    - **Outward stock**
      The national institution.
  - Availability of all FDI flows and stock components:
    ○ Inflows and inward stock from 2001.

- **Algeria**
  - National institution reporting FDI:
    ○ Banque d’Algérie
  - Data source used in the report:
    - **Flows**
      The national institution mentioned above.
    - **Stocks**
      Estimated by accumulating flows since 1970.
  - Availability of all FDI flows and stock components:
    ○ Not available.

- **Angola**
  - National institution reporting FDI:
    ○ Bank of Angola
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
      *Note:* Proxy is based on investments reported by the following economies:
      - 1992 France
      - 1993-1995 United States
      - 1996-2000 France, Portugal and the United States
      - 2001 Brazil, France, Portugal and the United States.
  - **Inward stock**
    Data prior to 2002 are estimated by accumulating inflows since 1970. 2003-2009 are based on the national institution.
  - **Outward stock**
    Data prior to 2007 are estimated by accumulating outflows since 1986. 2007-2009 based on the national institution.
  - Availability of all FDI flows and stock components:
    ○ Inflows for 1999.
Methodological Note

- Anguilla, Antigua and Barbuda, Dominica, Grenada, Montserrat, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines
  - National institution reporting FDI:
    ○ East Caribbean Central Bank (ECCB)
  - Reporting system used:
    ○ Surveys, administrative sources and interviews with some of the foreign direct investment enterprises.
  - Valuation system used:
    ○ Current price.
  - Data source used in the report:
    • Inflows
      1. Anguilla: The national institution mentioned above.
    • Outflows
        Note: Proxy is based on investments reported by the following economies:
      1999 France and the United States.
      2000 France.
      2001-2002 Brazil and France.
      2003 and 2005 Brazil.
      2004 Brazil and Portugal.
      3. Dominica: Not available.
      4. Grenada: Not available.
      5. Montserrat: Not available.
      7. Saint Lucia: Not available.
    • Inward stock
    • Outward stock
      Not available.
  - Availability of all FDI flows and stock components:

- **Argentina**
  - National institution reporting FDI:
    - Ministerio de Economía de la Nación, Instituto Nacional de Estadística y Censos, Dirección Nacional de Cuentas Internacionales
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
      - Note: Proxy is based on investments reported by the following economies:
        - 1984 Brazil, Chile and the United States.
        - 1985 Belgium and Luxembourg, Brazil and the United States.
        - 1986 Belgium and Luxembourg, Plurinational State of Bolivia, Brazil, Ecuador, France, the Netherlands and the United States.
        - 1987 Brazil, Chile, Ecuador, France, Germany, the Netherlands, the United States and the Bolivarian Republic of Venezuela.
        - 1988 Brazil, Chile, France, Germany, the Netherlands, the United States and the Bolivarian Republic of Venezuela.
        - 1989 Belgium and Luxembourg, Plurinational State of Bolivia, Brazil, Chile, Ecuador, France, Germany, the Netherlands, Peru, the United States and the Bolivarian Republic of Venezuela.

- **Armenia**
  - National institution reporting FDI:
    - National Statistical Service
  - Data source used in the report:
    - **Inflows**
      The national institution mentioned above.
    - **Outflows**
      - Note: Proxy is based on investments reported by the following economies:
        - 1997 France.
        - 1999 Bulgaria and Kazakhstan.
        - 2000 Kazakhstan.
        - 2001 Bulgaria.
        - 2002 Bulgaria and Cyprus.
    - **Inward stock**
      Data prior to 1991 are estimated by subtracting flows from the stock of 1991. 1991–2010 are based on the national institution.
    - **Outward stock**
      Data prior to 1991 are estimated by subtracting flows from the stock of 1991. 1991–2010 are based on the national institution.
      - Availability of all FDI flows and stock components:
        - Inward stock from 1991.
        - Not available for outward stock.
• **Outward stock**
  Data prior to 2002 are estimated by accumulating outflows since 1997. 2002-2009 data are based on the national institution. 2010 data is estimated by adding flows to the 2009 stock.

- Availability of all FDI flows and stock components:

- **Aruba**
  - National institution reporting FDI:
    - Centrale Bank van Aruba
  - Data source used in the report:
    - **Inflows**
      Proxy for 1987 based on investments reported by the Netherlands, OECD for 1989 and the national institution mentioned above thereafter.
    - **Outflows**
      *Note:* Proxy is based on investments reported by the following economies:
      1988 Netherlands.
      1989 Belgium and Luxembourg.

- **Inward stock**
  Data prior to 1999 are estimated by accumulating inflows since 1987. 1999 and thereafter is based on the national institution.

- **Outward stock**
  Data prior to 2000 are estimated by subtracting outflows from the stock of 2000. 2001 and thereafter is based on the national institution.

- Availability of all FDI flows and stock components:

- **Australia**
  - National institution reporting FDI:
    - Australian Bureau of Statistics
  - Reporting system used:
    - Surveys.

- Valuation system used:
  - Current price.

- Data source used in the report:
  - The national institution mentioned above.
  - Stocks for 1980-1987 are on a fiscal year basis (as at June).

- Availability of all FDI flows and stock components:
  - All.

- **Austria**
  - National institution reporting FDI:
    - Austrian National Bank
  - Data source used in the report:
    - Flows and stocks
      The national institution mentioned above.
  - Availability of all FDI flows and stock components:
    - Stocks from 1980.

- **Azerbaijan**
  - National institution reporting FDI:
    - National Bank of Azerbaijan
  - Data source used in the report:
    - **Inflows**
      EBRD for 1993 and the national institution mentioned above thereafter.
    - **Outflows**
    - **Inward stock**
      The national institution.
    - **Outward stock**
      Data prior to 2003 are estimated by accumulating outflows since 1996. 2000-2009 data are based on the national institution.

- Availability of all FDI flows and stock components:

- **Bahamas**
  - National institution reporting FDI:
Central Bank of the Bahamas
- Reporting system used:
  - International Transaction Reporting System (ITRS).
- Valuation system used:
  - Current Price.
- Data source used in the report:
  - **Inflows**
    - Reinvested earnings are currently included under Other Capital.
    - After 1997, data were revised to include loans and repayments of loans between direct investors and their direct investment enterprises.
  - **Outflows**
    - Proxy is based on investments reported by the following economies:
      - 1985 Belgium and Luxembourg and the United States.
      - 1988 Belgium and Luxembourg, France and the United States.
  - **Inward stock**
    Estimated by accumulating inflows since 1970.
  - **Outward stock**
    Not available.
- Availability of all FDI flows and stock components:
  - Not available.
- **Bahrain**
  - National institution reporting FDI:
    - Central Bank of Bahrain
  - Reporting system used:
    - Surveys.
    - For the first time in 2004, after technical cooperation was given by the Economic and Social Commission for Western Asia (ESCWA) and UNCTAD, a survey on inward FDI was undertaken. Stock data from this survey were used.
  - Data source used in the report:
    - **Inflows**
      - Proxy is based on investments reported by the following economies:
        - 1982 United States.
    - **Outflows**
      - Proxy is based on investments reported by the following and economies:
        - 1982 United States.
    - **Stocks**
      Data prior to 1989 are estimated by subtracting flows from the stock of 1989. 1989 data are based on the IMF. 1990-2010 data are based on the national institution.
- Availability of all FDI flows and stock components:
  - Not available.
- **Bangladesh**
  - National institution reporting FDI:
    - Bangladesh Bank
  - Reporting system used:
    - Surveys.
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
      The national institution for 1990-2010.
    - **Stocks**
      Data prior to 1997 are estimated by subtracting flows from the stock of 1997. 1997-2010 are based on the national institution.
Availability of all FDI flows and stock components:
- Inward flows and stock from 1995.
- Outward flows and stock from 2000.

### Barbados
- National institution reporting FDI:
  - Central Bank of Barbados
- Reporting system used:
  - Surveys.
- Valuation system used:
  - Book value.
- Data source used in the report:
  - **Flows**
    - The national institution mentioned above. 2009-2010 data are estimated.
  - **Stocks**
    - 1980-2002 are based on the national institution. 2003-2010 are estimated by adding flows to the 2002 stock.
- Availability of all FDI flows and stock components:
  - Not available for stocks.

### Belarus
- National institution reporting FDI:
  - National Bank of the Republic of Belarus (NNB)
- Reporting system used:
  - Surveys and Bilateral sources. Inflows are further complemented by data from the NBB’s Banking Supervision department report.
- Valuation system used:
  - Book value.
- Data source used in the report:
  - **Inflows**
    - The national institution mentioned above.
  - **Outflows**
    - Proxy for 1993-1996 and the national institution thereafter.
    - **Note:** Proxy is based on investments reported by the following economies:
      - 1993: China and Germany.
      - 1994: China and France
      - 1995: China.
      - 1996: Austria, Germany and Poland.
- **Stocks**
  - Data prior to 1996 are estimated by subtracting flows from the stock of 1996. 1996-2010 are based on the national institution.
- Availability of all FDI flows and stock components:
  - Inflows from 2000.
  - Outflows from 2007.
  - Inward stock from 2002.

### Belgium
- National institution reporting FDI:
  - National Bank of Belgium
- Reporting system used:
  - Flows: data on equity and other capital are based on ITRS whereas data on reinvested earnings are based on surveys.
  - Stock: data are accumulated flows of equity and other capital based on ITRS whereas data on reinvested earnings are based on surveys.
- Valuation system used:
  - Current price.
- Data source used in the report:
  - The national institution mentioned above.
- Availability of all FDI flows and stock components:
  - All.

### Belize
- National institution reporting FDI:
  - Central Bank of Belize
- Data source used in the report:
  - **Inflows**
  - **Outflows**
    - The national institution.
  - **Inward stock**
    - Data are estimated by accumulating inflows since 1970. 2000-2010: Central Bank.
  - **Outward stock**
    - Data are estimated by accumulating outflows since 1984. 2000-2010: Central Bank.
- Availability of all FDI flows and stock components:

- Benin, Burkina Faso, Côte d’Ivoire, Guinea-Bissau, Mali, Niger, Senegal and Togo
  - National institution reporting FDI:
    ○ Banque Centrale de l’Afrique de l’Ouest (BCEAO)
  - Data source used in the report:
    • Inflows
  • Outflows
      Note: Proxy is based on investments reported by the following economies: 1988-1989 Belgium and Luxembourg. 1988-1990 France.
Methodological Note

2008 and estimate for 2009-2010.

• Inward stock
  1. Benin: Data prior to 1996 are estimated by subtracting inflows from the stock of 1996. 1996-1998 data are based on the IMF. 1999-2007 data are based on the national institution. 2008-2010 data is estimated by adding inflows to the 2007 stock.
  2. Burkina Faso: Data prior to 1999 are estimated by accumulating inflows since 1970. 1999-2007 data are based on the national institution. 2008-2010 data is estimated by adding inflows to the 2007 stock.
  3. Côte d’Ivoire: Data prior to 1998 are estimated by accumulating inflows since 1970. 1998 data are based on the IMF. 1999-2008 data are based on the national institution. 2009-2010 data is estimated by adding inflows to the 2007 stock.
  5. Mali: Data prior to 1997 are estimated by subtracting inflows from the 1997 stock. 1997-1998 are based on the IMF. 1999-2008 data are based on the national institution. 2009-2010 data is estimated by adding inflows to the 2007 stock.
  6. Niger: Data prior to 1999 are estimated by accumulating inflows since 1970. 1999-2008 data are based on the national institution. 2009-2010 data is estimated by adding inflows to the 2007 stock.

• Outward stock
  1. Benin: Data prior to 1999 are estimated by accumulating outflows since 1979. 1999-2009 data are based on the national institution. 2010 data is estimated by adding outflows to the 2009 stock.
  2. Burkina Faso: Data prior to 1999 are estimated by accumulating outflows since 1974. 1999-2007 data are based on the national institution. 2008-2010 data is estimated by adding outflows to the 2007 stock.
  3. Côte d’Ivoire: Data prior to 1999 are estimated by accumulating outflows since 1986. 1999-2006 data are based on the national institution. 2007-2010 data is estimated by adding outflows to the 2006 stock.
  4. Guinea-Bissau: 2002-2008 data are based on the national institution. 2009-2010 data is estimated by adding outflows to the 2007 stock.
  5. Mali: Estimated by accumulating outflows since 1975. 2000-2008 are based on the national institution. 2009-2010 are estimated.

- Availability of all FDI flows and stock components:
     * Outflows for 2006.
     * Stocks for 2002-2005.

- Reporting system used:
  ○ ITRS.
- Valuation system used:
  ○ Current prices.
- Data source used in the report:
  • Flows
    The national institution mentioned above.
  • Stocks
    Estimated by accumulating flows since 1997.

- Availability of all FDI flows and stock components:
  ○ Not available.

• Bhutan
  - National institution reporting FDI:
    ○ Royal Monetary Authority of Bhutan
  - Data source used in the report:
    • Inflows
      OECD for 1990-1991, 1995-1997, and the national institution mentioned above thereafter. Note: Data from the national institution are on fiscal year basis.
    • Outward FDI
      Not available.
    • Inward stock
      Estimated by accumulating inflows since 1974.

- Availability of all FDI flows and stock components:
  ○ Not available.

• Bolivia, Plurinational State of
  - National institution reporting FDI:
    ○ Banco Central de Bolivia
  - Reporting system used:
    ○ Surveys and central bank’s estimates.
    Note: * Inflows, since 2000 data on inflows are net values because FDI survey has started the collection of information on disinvestment (capital withdrawal, equity sale to local investors and amortisation of intra company loans).
    * Outflows are based on central bank’s estimates.
    * Since December 2003, data on Stocks reflect the outcomes of the amplified Survey on Foreign Private
Capital (flows and balances of foreign assets and liabilities) done for the period December 2003 - September 2004. For the previous periods, Stocks are based on the Central Bank’s estimates. The series 1997-2002 is under revision, in view of the outcomes of the mentioned survey. Other capital for inward stock includes assets other than equity capital. Its values are $175 million, $205.9 million, and $205.9, for 2003, 2004 and 2005, respectively.

- Valuation system used:
  ○ Book value.
- Data source used in the report:
  • Flows and Inward stock
    The national institution mentioned above.
  • Outward stock
    Data prior to 1997 are estimated by subtracting outflows from the stock of 1997. 1997-2009 data are based on the national institution
- Availability of all FDI flows and stock components:
  ○ Inflows from 1987.
  ○ Not available for outflows.
  ○ Inward stock from 1997.
  ○ Outward stock from 2003.

- Bosnia and Herzegovina
  - National institution reporting FDI:
    ○ Central Bank of Bosnia and Herzegovina
  - Data source used in the report:
    • Flows
      The national institution mentioned above.
    • Inward stock
      Data prior to 2003 are estimated by subtracting inflows from the stock of 2003. 2003-2009 data are based on the national institution. 2010 data is estimated by adding inflows to the stock of 2009.
    • Outward stock
      2004-2006 data are based on the national institution. 2007-2010 data are estimated by adding outflows to the stock of 2006.
- Availability of all FDI flows and stock components:
- Botswana
  - National institution reporting FDI:
    ○ Bank of Botswana
  - Data source used in the report:
    • Flows
    • FDI stock
      Data prior to 1990 are estimated by subtracting inflows from the stock of 1990. 1990-2010 data are based on the national institution.
- Availability of all FDI flows and stock components:
  ○ Outflows from 1993.
- Brazil
  - National institution reporting FDI:
    ○ Banco do Brasil
  - Data source used in the report:
    • Flows
      The national institution mentioned above.
    • Inward stock
      The national institution.
    • Outward stock
      Data prior to 2001 are estimated by subtracting outflows from the stock of 2001. 2001-2010 data are based on the national institution.
- Availability of all FDI flows and stock components:
- British Virgin Islands
  - Data source used in the report:
    • Inflows
Note: Proxy is based on investments reported by the following economies:

2005-2006 China, Croatia, Czech Republic, Hong Kong (China), Israel, Japan, Macao (China) and the United States.

2007-2008 Brazil, China, Germany, Hong Kong (China), Japan, Macao (China), Russian Federation, United States.

**Outflows**

Proxy and estimate for 2009-2010.

Note: Proxy is based on investments reported by the following economies:

1992 Brazil, France, Thailand, United States and the Bolivarian Republic of Venezuela.

1993 Belgium and Luxembourg, Brazil, France, Thailand, the United States and the Bolivarian Republic of Venezuela.

1994 Belgium and Luxembourg, Brazil, France, Germany, Kazakhstan and the United States.

1995 Belgium and Luxembourg, Estonia, France, Germany, Kazakhstan and the United States.

1996 Belgium and Luxembourg, Bulgaria, Estonia, France, Germany, Kazakhstan, Portugal and the United States.

1997 Belgium and Luxembourg, Estonia, France, Germany, Kazakhstan, Malaysia, Portugal and the United States.

1998 Belgium and Luxembourg, Croatia, Estonia, Germany, Hong Kong (China), Kazakhstan, Portugal and the United States.

1999 Belgium and Luxembourg, Croatia, Czech Republic, Estonia, France, Hong Kong (China), Kazakhstan, Lithuania, New Zealand, Portugal and the United States.

2000 Belgium and Luxembourg, Bulgaria, Croatia, Czech Republic, Estonia, France.

2001 Belgium and Luxembourg, Brazil, Bulgaria, Croatia, Czech Republic, Estonia, France, Germany, Hong Kong (China), Kazakhstan, Latvia, Lithuania, Philippines, Portugal, Russian Federation and the United States.

2002 Brazil, Bulgaria, Croatia, Cyprus, El Salvador, Estonia, France, Germany, Hong Kong (China), Iceland, Kazakhstan, Latvia, Lithuania, Portugal, Russian Federation and the United States.

2003 Australia, Belgium, Brazil, Bulgaria, Croatia, Cyprus, El Salvador, Estonia, France, Georgia, Germany, Hong Kong (China), Iceland, Kazakhstan, Latvia, Lithuania, Portugal, Romania and the United States.

2004 Australia, Brazil, Bulgaria, Croatia, Cyprus, Czech Republic, El Salvador, Estonia, Georgia, Hong Kong (China), Iceland, Kazakhstan, Latvia, Lithuania, Portugal, Romania, Sweden and the United States.

2005 Australia, Brazil, Bulgaria, Czech Republic, El Salvador, Estonia, France, Germany, Hong Kong (China), Japan, Kazakhstan, Sweden and United States.

2006 Brazil, Bulgaria, Czech Republic, El Salvador, Estonia, France, Germany, Hong Kong (China), Japan, Kazakhstan and the United States.

2007-2008 Australia, Brazil, Bulgaria, Germany, Hong Kong (China), Japan, Russian Federation, United States.

- **Inward stock**
  Estimated by accumulating inflows since 1976.

- **Outward stock**
  Estimated by accumulating outflows since 1988.

- Availability of all FDI flows and stock components:
  - Not available.
Methodological Note

• **Brunei Darussalam**
  - National institution reporting FDI:
    ○ Department of Economic Planning and Development, Prime Minister’s Office

2006-2008  Brazil, France, Germany, Hong Kong (China), Japan, Republic of Korea, Malaysia, Mexico and Sweden.

• Inward stock
  Estimated by accumulating inflows since 1974.

• Outward stock
  Estimated by accumulating outflows since 1975.

- Availability of all FDI flows and stock components:
  o Not available.

• Chile
  - National institution reporting FDI:
    o Banco Central de Chile
  - Data source used in the report:
    • Flows
      The national institution mentioned above.
    • Inward stock
      Data prior to 1997 are estimated by subtracting inflows from the stock of 1997. 1997-2010 data are based on the national institution.
    • Outward stock
      Data prior to 1997 are estimated by accumulating outflows since 1977. 1997-2010 data are based on the national institution.
- Availability of all FDI flows and stock components:
  ○ Inflows from 1996.
  ○ Outflows from 1997.
  ○ Stocks from 1997.

**China**
- National institution reporting FDI:
  ○ Data from the Ministry of Commerce (MOFCOM) are used for inflows. These data are reported on a gross basis (or do not take into account debits of inward transactions). Data on outflows from 2003 and onward were obtained from the same ministry.
  ○ Outflows data prior to 2003 were obtained from State Administration of Foreign Exchange (SAFE).
  ○ Data from MOFCOM are used for stock.
- Reporting system used:
  ○ Administrative sources.
- Data source used in the report:
  • Inflows
  • Outflows
    SAFE prior to 2003 and MOFCOM thereafter.
  
  **Note:** Data for 2009-2010 are calculated by adding the flows of non-financial sector to the estimated flows of the financial sector. The flows of the financial sector are estimated by applying the growth rate of the non-financial sector.
  • Inward stock
    Data prior to 1994 are estimated by accumulating inflows since 1979. 1994-2008 data are based on MOFCOM. 2009-2010 data is estimated.
  • Outward stock
    Data prior to 2003 are estimated by accumulating outflows since 1982. 2003-2008 are based on MOFCOM, 2009 on SAFE.
- Availability of all FDI flows and stock components:
  ○ Inflows for 1997-2006.

**Colombia**
- National institution reporting FDI:
  ○ Banco de la Republica de Colombia
- Data source used in the report: The national institution mentioned above.
- Availability of all FDI flows and stock components:
  ○ Inflows from 2000.
  ○ Inward stock from 1996.

**Comoros**
- National institution reporting FDI:
  ○ Banque Centrale des Comores
- Data source used in the report:
  • Inflows
  • Outflows
    IMF for 1990.
  • Inward stock
    Estimated by accumulating inflows since 1978.
  • Outward stock
    Not available.
- Availability of all FDI flows and stock components:
  ○ Inflows for 1987.

**Congo, Democratic Republic of**

- Availability of all FDI flows and stock components:

- **Libyan Arab Jamahiriya**

  National institution reporting FDI:
  - Central Bank of Libya
Methodological Note

- Reporting system used:
  ○ Surveys.
- Valuation system used:
  ○ Current prices.
- Data source used in the report:
  • Flows
    The national institution mentioned above. Estimate for 2010.
  • FDI stocks
    Data prior to 1986 are estimated by subtracting flows from the stock of 1986. 1986-1988 data are based on the IMF. 1989-2010 data are estimated by adding flows to the 1988 stock.
- Availability of all FDI flows and stock components:
  ○ Not available.

• Lithuania
- National institution reporting FDI:
  ○ Bank of Lithuania
- Reporting system used:
  ○ Surveys.
- Valuation system used:
  ○ Market price for listed companies and book value for non-listed companies.
- Data source used in the report:
  The national institution mentioned above.
- Availability of all FDI flows and stock components:
  ○ Inflows from 1995.
  ○ Outflows from 1997.
  ○ Stocks from 1996.

• Luxembourg
- National institution reporting FDI:
  ○ Service Central de la Statistique et des Etudes Economique du Luxembourg (STATEC)
  ○ Banque Centrale du Luxembourg
- Reporting system used:
  ○ Surveys.
- Data source used in the report:
  • Flows
    The national institutions mentioned above.
    Note: Flows data exclude investment by and from SPEs (holding companies and other financial vehicles). However, data include transactions made by these SPEs.
  • Stocks
    The national institutions 1995-2009. 2010 estimated
    Note: Stock data have been derived from the annual survey on FDI since 1995. The banking and insurance sectors are covered fully, while only the larger companies are included in the other sectors so as to ensure a high level of significance of the statistics. Stock data on Luxembourg excludes assets and liabilities of SPEs (holding companies and other financial vehicles). The population of companies surveyed has been progressively extended over time.
- Availability of all FDI flows and stock components:
  ○ All.

• Macao, China

    - Not available.
- Availability of all FDI flows and stock components:
  - Not available.

**New Zealand**
- National institution reporting FDI:
  - New Zealand Statistics
- Reporting system used:
  - Surveys.

Notes: * Up to 1999 the annual data are as at March and as at December thereafter. * Flows for 2000 is exceptional. New Zealand Statistics derived the data by adding the last 3 quarters of the calendar year 2000 to the estimated first quarter (estimated by dividing by 4 year 1999 and 2000 as at March) * Total inflows for 2001 and total outflows for 2000 and 2001 have been suppressed for confidentiality reasons by New Zealand Statistics - IMF data are used for these years.

- Valuation system used:
  - Market prices.

Notes: * Where financial instruments are denominated in a foreign currency, they are converted at spot exchange rates. * The time of ownership change are the basis of recording financial transactions and stocks. * Transactions are recorded on an accrual basis. This requires that some items, representing the difference between the accrual and cash record, have to be recorded as components of the financial account. For example, income in the current account is recorded when earned. The difference between income earned and cash settlement when payment becomes due is included in the accounts as a net financial transaction in the underlying instrument. Similarly, the prepaid premiums and unpaid claims on insurance (i.e. the difference between premiums earned and claims payable on the one hand and premium and claim payments on the other) should be recorded as financial transactions. Every effort is made in data collections to adhere to these principles, and data in the financial account and the IIP are considered to approximate them.

- Data source and used in the report:
  - Flows
    - The national institution mentioned above.
  - Inward stock
  - Outward stock
    - Data prior to 1992 are estimated by
subtracting outflows from the stock of 1992. 1992 data is based on the IMF. 1993-2010 data are based on the national institution.

• **Outward FDI**
  Not available.

- Availability of all FDI flows and stock components:
  - Not available.

- **Norway**
  - National institution reporting FDI:
    ○ Statistics Norway
  - Reporting system used:
    ○ ITRS for flows.
    ○ Surveys for inward stock.
    ○ Administrative sources for outward stock.

*Notes:* The outward FDI position statistics reported by Statistics Norway is a continuation of Norges Bank’s statistics from 1988 to 2000 and replaces previous estimates for the years 1999, 2000, 2001 and 2002. The major upward shift in stock position is due to new methods, from 1997 to 1998. The figures presented are based on data from the Directorate of Taxes. Until the publishing in 2006, the figures on stocks of direct investments abroad (the special statistics) included both direct and indirect equity in the investment objects. Since the publishing in 2007, the equity has been limited to directly owned/associated enterprises. Other capital (mainly loans), however, still includes all direct relations between Norwegian investors and directly and indirectly owned/associated enterprises abroad. The changes also mean that there will be consistency in the methodology between the stock statistics on Norwegian direct investments abroad and foreign direct investments in Norway.

- **Valuation system used:**
  - Current price for flows.
  - Book value for stock.

- **Data source used in the report:**
  - **Flows**
    IMF for 1980 and the national institutions mentioned above thereafter.
  - **Inward stock**
    Data prior to 1987 are estimated by subtracting inflows from the stock of 1987. 1987-2009 data are based on the national institution. 2010 data is estimated by adding inflows to the stock of 2009.
  - **Outward stock**

- Availability of all FDI flows and stock components:

- **Oman**
  - National institution reporting FDI:

      - 1999 New Zealand

- **Inward stock**
  1980-1997 data are based on the national institution. 1998-2010 data are estimated by adding inflows to the 1997 stock.

- **Outward stock**
  Estimated by accumulating outflows since 1977.

- **Availability of all FDI flows and stock components:**

- **Paraguay**
  - National institution reporting FDI:
    - Banco Central del Paraguay
  - Data source used in the report:
    - **Inflows**
      The national institution mentioned above.
    - **Outflows**
      *Note:* Proxy is based on investments reported by the following economies:
1985  Belgium and Luxembourg, Chile, United States and the Bolivarian Republic of Venezuela.
1986  Chile, United States and the Bolivarian Republic of Venezuela.
1987 and 1989  Belgium and Luxembourg.
1988  Belgium and Luxembourg, Chile and France.
1992  Belgium and Luxembourg, Brazil, China and France.
1993  Brazil, China and France.

**Inward stock**
Data prior to 1995 are estimated by accumulating inflows since 1970. 1995-2010 data are based on the national institution.

**Outward stock**
Data prior to 1995 are estimated by subtracting outflows from the stock of 1995. 1995-2010 data are based on the national institution.

- Availability of all FDI flows and stock components:
  - Inflows form 1990.
  - Inward stock from 1996.

**Peru**
- National institution reporting FDI:
  - Banco Central de Reserva del Perú
- Data source used in the report:
  - Inflows and Stocks
    The national institution mentioned above.
  - Outflows

- Availability of all FDI flows and stock components:
  - Inflows from 2006-2010.

**Philippines**
- National institution reporting FDI:
  - Bangko Sentral ng Pilipinas
- Reporting system used:
  - ITRS serves as the primary database on the placement and withdrawal of investment in equity capital (including the purchase and sale of condominiums) with funds coursed through the banking system.
  - Cross Border Transactions Survey complements ITRS as it captures those transactions coursed through banks abroad and inter-company accounts, both of which are missed out in the ITRS.
  - BSP Investment Registration Records serve as the database for non-cash transactions such as technical fees, equipment and debt that are converted to equity. Registration with the BSP of both cash and non-cash investment is optional and the incentive to register lies in the assurance from the banking system of the availability of foreign exchange for repatriation of profit and dividend and capital withdrawal.
  - External Debt Statistics serve as the database for inter-company borrowings. The data collection functions under a debt registration system similar to registration of investment. Debt registration is also optional and offers the same incentive as the investment registration system.
  - Banking Statistics data source for all investment-related transactions of banks.
  - Other administrative records - e.g., financial statements and balance sheets, news articles.
- Notes:  * The 5th edition of the Balance of Payments Manual (BPM5) was adopted in 2000 covering data starting 1999. There is a difference in coverage of data on direct investment flows from 1999 onwards compared to those of prior years. In particular, the change in coverage pertains to inter-company loans. From 1999 onwards, direct investment flows include intra-company loans under the “other capital” component of direct investment, as spelled out in the BPM5 manual. Previously, intra-company loans were not part of direct investment but classified under the medium- and long-term loan accounts.
  - FDI stock data started only in 2002 when the Bangko Sentral ng Pilipinas (BSP) compiled the international investment position statistics in compliance with the Special Data Dissemination Standard (SDDS) requirement of the IMF.
- Valuation system used:
  ○ Valuation is a mixture of market price and historical cost depending on the source. Cash transactions based on ITRS are likely to reflect market price while non-cash transactions are likely valued at historical cost particularly machinery and equipment converted to equity.

- Data source used in the report:
  • **Flows**
    The national institution mentioned above.
  • **Stocks**
    Data prior to 2001 are estimated by accumulating flows since 1970. 2001-2009 data are based on the national institution. 2010 is estimated by adding flows to the 2009 stock.

- Availability of all FDI flows and stock components:
  ○ Inflows from 1999.

**Poland**
- National institution reporting FDI:
  ○ National Bank of Poland
- Data source used in the report:
  • **Inflows**
  • **Outflows**
  • **Inward stock**
    The national institution.
  • **Outward stock**
    Data prior to 1991 are estimated by subtracting outflows from the stock of 1992. 1992-2010 data are based on the national institution.

- Availability of all FDI flows and stock components:
  ○ Inflows from 1991.
  ○ Outflows from 1996.
  ○ Outward stock from 1996.

**Portugal**
- National institution reporting FDI:
  ○ Banco de Portugal
- Reporting system used:
  ○ ITRS and surveys for flows.
  ○ Surveys for Stocks.
- Valuation system used:
  ○ Current price for flows.
  ○ Market value for stocks.
- Data source used in the report:
  • **Flows**
    The national institution mentioned above.
  • **Stocks**
    Data prior to 1990 are estimated by subtracting flows from the stock of 1990. 1990-2010 data are based on the national institution.

- Availability of all FDI flows and stock components:
  ○ Flows from 1980.
  ○ Stocks from 1995.

**Puerto Rico**
- Data source used in the report:
  • **Inflows**
    Proxy.
    Note: Proxy is based on investments reported by the following economies:
    1997 Belgium and Luxembourg, Republic of Korea and Sweden.
    2001 France and Sweden.
    2002 Republic of Korea and Sweden.
    2004 Sweden.

  - Reporting system used:
    - Surveys.
    - Note: For the first time in 2004, after technical cooperation was given by the Economic and Social Commission for Western Asia (ESCWA) and UNCTAD, a survey on inward FDI was undertaken. Stock data from this survey were used.
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
    - Note: Proxy is based on investments reported by the following economies:
      1984 Germany.
      1993 France and the United States.
      1999 Morocco and Saudi Arabia.
      2003 Bulgaria, Cyprus, France, Romania and Saudi Arabia.
      2004-2005 Bulgaria, Cyprus, Morocco, Romania and Saudi Arabia.

• **Switzerland**
  - National institution reporting FDI:
    - Swiss National Bank
  - Reporting system used:
    - Surveys.
  - Valuation system used:
    - Current price for flows.
    - Book value for stocks.
  - Data source used in the report:
    The national institution mentioned above.
  - Availability of all FDI flows and stock components:
  - Availability of all FDI flows and stock components:

• **Outward stock**
  Estimated by accumulating outflows since 1984.

- Availability of all FDI flows and stock components:
  - Not available.

• **Taiwan Province of China**
  - National institution reporting FDI:
    - Central Bank of China
  - Reporting system used:
    - ITRS and administrative sources.
  - Valuation system used:
    - Current prices for flows.
    - Book value and Current price for stocks.
  - Data source used in the report:
    - Flows
      The national institution mentioned above.
    - Inward stock
    - Outward stock
      Data prior to 2000 are estimated by subtracting outflows from the stock of 2000. 2000-2010 are based on the national institution.
  - Availability of all FDI flows and stock components:
    - Inflows from 1984.
    - Outflows from 1989.
    - Stocks from 2000.

• **Tajikistan**
  - National institution reporting FDI:
    - National Bank of Tajikistan
  - Data source used in the report:

  Note: * Because the following invested targets are calculated differently, inward stock for (a) listed companies is based on market value and (b) unlisted companies is based on the net worth.
  * Outward is based on Book value because Taiwan’s companies invest mostly in unlisted companies abroad.

• **The FYR of Macedonia**
  - National institution reporting FDI:
    - National Bank of the Republic of Macedonia
  - Data source used in the report:
    - Flows
      The national institution mentioned above.
    - Inward stock
      Data prior to 1997 are estimated by subtracting inflows from the stock of 1997. 1997-2009 data are based on the national institution. 2010 estimate.
    - Outward stock
      The national institution. 2010 estimate.
  - Availability of all FDI flows and stock components:
    - Inflows from 1997.

• **Thailand**
  - National institution reporting FDI:
    - Bank of Thailand
  - Data source used in the report:
    - Flows
      The national institution mentioned above.
    - Stocks
      The national institution mentioned above. 2010 estimate.
- Availability of all FDI flows and stock components:

- **Timor-Leste**
  - Data source used in the report:
    - **Inflows**
    - **Outward FDI**
      Not available.
    - **Inward stock**

- Availability of all FDI flows and stock components:
  - Not available.

- **Tokelau**
  - Data source used in the report:
    - **Inflows**
    - **Outward FDI**
      Not available.
    - **Inward stock**
      Estimated by accumulating inflows since 1996.

- Availability of all FDI flows and stock components:
  - Not available.

- **Tonga**
  - National institution reporting FDI:
    - Tonga Department of Statistics
  - Data source used in the report:
    - **Inflows**
    - **Outflows**
    - **Inward stock**
      Estimated by accumulating inflows since 1977.

- **Trinidad and Tobago**
  - National institution reporting FDI:
    - Central Bank of Trinidad and Tobago
  - Data source used in the report:
    - **Inflows**
      The national institution mentioned above
    - **Outflows**
    - **Inward stock**
      Estimated by accumulating inflows since 1970.
    - **Outward stock**
      Estimated by accumulating outflows since 1983.

- Availability of all FDI flows and stock components:

- **Tunisia**
  - National institution reporting FDI:
    - Banque Centrale de Tunisie
  - Data source used in the report:
    - The national institution mentioned above.
  - Availability of all FDI flows and stock components:
    - Inflows 1993-2010.

- **Turkey**
  - National institution reporting FDI:
    - Central Bank of the Republic of Turkey
  - Reporting system used:
    - ITRS for flows - reinvested earnings are obtained through surveys.
    - Surveys for inward stock.
    - Administrative sources for outward stock.
  - Data source used in the report:
    - **Flows**
      The national institution mentioned above.
• **Stocks**
  Data prior to 2000 are estimated by subtracting flows from the stock of 2000. 2000-2010 data are based on the national institution.

- Availability of all FDI flows and stock components:
  ○ Inflows from 2002.

• **Turkmenistan**
  - Data source used in the report:
    • **Inflows**
    • **Outward FDI**
      Not available.
    • **Inward stock**
      Estimated by accumulating inflows since 1993.
  - Availability of all FDI flows and stock components:
    ○ Not available.

• **Turks and Caicos Islands**
  - Data source used in the report:
    • **Inflows**
    • **Outflows**
      Proxy and estimate for 2007-2010.
  
  **Note:** Proxy is based on investments reported by the following economies:
  1994 Belgium and Luxembourg and France.
  1996 France and Portugal.
  2001 Estonia, Germany and Portugal.
  2004 Portugal and Romania.
  2005 Bulgaria, France and Romania.
  2006 Bulgaria and Romania.
  
• **Inward stock**
  Estimated by accumulating inflows since 1983.
• **Outward stock**
  Not available.

- Availability of all FDI flows and stock components:
  ○ Not available.

• **Tuvalu**
  - Data source used in the report:
    • **Inflows**
    • **Outward FDI**
      Not available.
    • **Inward stock**
      Estimated by accumulating inflows since 1994.
  - Availability of all FDI flows and stock components:
    ○ Not available.

• **Uganda**
  - National institution reporting FDI:
    ○ Bank of Uganda
  - Reporting system used:
    ○ Surveys.
  - Valuation system used:
    ○ Current prices.
  - Data source used in the report:
    • **Inflows**
    • **Inward stock**
      Data prior to 1999 are estimated accumulating inflows since 1970. 1999-2010 data are based on the national institution.
    • **Outward FDI**
      Not available.
  - Availability of all FDI flows and stock components:
    ○ Inward stock from 1999.
• Ukraine
- National institution reporting FDI:
  ○ National Bank of Ukraine
- Data source used in the report:
  The national institution mentioned above.
- Availability of all FDI flows and stock components:
  ○ Inward FDI from 2002.
  ○ Outward stock from 2004.
  ○ Outflows from 2005.

• United Arab Emirates
- National institution reporting FDI:
  ○ Central Bank of the United Arab Emirates
- Data source used in the report:
  • Inflows
  • Outflows

  **Note:** Proxy is based on investments reported by the following economies:
  1988 Belgium and Luxembourg, France, Netherlands, Thailand and the United States.
  1989 Belgium and Luxembourg, China, France, Netherlands, Thailand and the United States.
  1990 Belgium and Luxembourg, China, France, Thailand and United States.
  1991 Belgium and Luxembourg, France, Malaysia, Thailand and United States.
  1992 Belgium and Luxembourg, China, France, Malaysia, Thailand and the United States.
  1993 Belgium and Luxembourg, China, France, Malaysia, Netherlands, Thailand and the United States.
  1994 Belgium and Luxembourg, China, France, Malaysia, Netherlands, Saudi Arabia and the United States.
  1995 Bangladesh, Belgium and Luxembourg, China, France, Japan, Malaysia, Pakistan, Portugal, Saudi Arabia and the United States.
  1996 Azerbaijan, Bangladesh, Belgium and Luxembourg, France, Malaysia, Morocco, Pakistan, Portugal, Saudi Arabia and the United States.
  1997 Azerbaijan, Bangladesh, Belgium and Luxembourg, France, Kazakhstan, Malaysia, Mauritius, Morocco, Netherlands, Pakistan, Portugal, Saudi Arabia and the United States.
  1998 Azerbaijan, Bangladesh, Belgium and Luxembourg, France, Japan, Kazakhstan, Malaysia, Mauritius, Morocco, Netherlands, Pakistan, Portugal, Saudi Arabia and the United States.
  1999 Azerbaijan, Bangladesh, Belgium and Luxembourg, France, Japan, Kazakhstan, Kyrgyzstan, Malaysia, Mauritius, Morocco, Netherlands, Pakistan, Portugal, Saudi Arabia and the United States.
  2001 Australia, Azerbaijan, Belgium and Luxembourg, Brazil, Bulgaria, France, Germany, Kazakhstan, Kyrgyzstan, Malaysia, Mauritius, Morocco, Netherlands, Pakistan, Sweden and the United States.
  2002 Australia, Azerbaijan, Belgium, Brazil, Bulgaria, France, Germany, Kazakhstan, Kyrgyzstan, Malaysia, Mauritius, Morocco, Netherlands, Pakistan, Sweden and the United States.
• **Inward stock**
  Estimated by accumulating inflows since 1970.
• **Outward stock**
  Estimated by accumulating outflows since 1980

- Availability of all FDI flows and stock components:
  ○ Not available.

**United Kingdom**
- National institution reporting FDI:
  ○ National Statistics Office of the United Kingdom
- Data source used in the report:
  • **Inflows**
  • **Outflows and Stocks**
    The national institution.

- Availability of all FDI flows and stock components:
  ○ Inflows from 1984.
  ○ Outflows from 1990.
  ○ Stocks from 1993.

**United Republic of Tanzania**
- National institution reporting FDI:
  ○ Bank of Tanzania
- Data source used in the report:
  • **Inflows**
  • **Outflows**

  *Note:* Proxy is based on investments reported by the following economies:
  - 1996: Belgium and Luxembourg.
  - 1997: France and Germany.
  - 1998 and 2003: Germany.
  - 2001: Australia and Germany.
  • **Inward stock**
    Data prior to 1995 are estimated by subtracting inflows from the stock of 1995. 1995-2007 data are based on the national institution. 2008-2010 are estimated by adding inflows to the stock.
• **Outward stock**
  Not available.

- Availability of all FDI flows and stock components:

**United States**
- National institution reporting FDI:
  ○ Bureau of Economic Analysis, United States Department of Commerce
- Reporting system used:
  ○ Surveys.
- Valuation system used:
  ○ Data on FDI used in this Report do not include current cost adjustments, in other words they are on a historical-cost basis.
  ○ The Bureau of Economic Analysis prepares estimates of the investment positions (stock) that are valued on three bases—historical cost, current cost, and market value. Unlike the positions on a current-cost and market-value basis, the historical-cost position is not ordinarily adjusted to account for changes in the replacement cost of the tangible assets of affiliates or in the market value of foreign parent companies’ equity in United States’ affiliates. Here we report the market-value.
- Data source used in the report:
  The national institution mentioned above.

- Availability of all FDI flows and stock components:
  ○ Flows from 1980.

**Uruguay**
- National institution reporting FDI:
  ○ Banco Central del Uruguay
- Data source used in the report:
  • **Inflows**
- **Outflows**
- **Inward stock**
  Data prior to 1999 are estimated by subtracting inflows from the stock of 1999. 1999 data is based on the IMF. 2000-2010 data are based on the national institution.
- **Outward stock**
  Data prior to 1999 are estimated by subtracting outflows from the stock of 1999. IMF for 1999. 2000-2010 data are based on the national institution.

- **Availability of all FDI flows and stock components:**

- **Uzbekistan**
  - Data source used in the report:
    - **Inflows**
      1992-2009 data are based on the EBRD. 2010 is estimated.
    - **Outward FDI**
      Not available.
    - **Inward stock**
      Estimated by accumulating inflows since 1992.
  - **Availability of all FDI flows and stock components:**
    - **Not available.**

- **Vanuatu**
  - National institution reporting FDI:
    - Reserve Bank of Vanuatu
  - Data source used in the report:
    - **Inflows**
    - **Outward FDI**

    ○ Inflows for 1999.

- **Zambia**
  - National institution reporting FDI:
    ○ Zambia Investment Center
    ○ Bank of Zambia
  - Data source used in the report:
    - **Inflows**
    - **Outward FDI**
      The national institutions for 2007, 2009-2010.
    - **Inward stock**
      Data prior to 2006 are estimated by subtracting inflows from the stock of 2006. 2006-2010 are based on the national institution.
    - **Outward stock**
      2006-2010 are based on the national institution.
  - Availability of all FDI flows and stock components:
    ○ Inflows from 2007.
    ○ Inward stock from 2006.

- **Zimbabwe**
  - National institution reporting FDI:
    ○ Reserve Bank of Zimbabwe
  - Data source used in the report:
    - **Flows**
      The national institution mentioned above. 2009 is estimated.
    - **Inward stock**
      Estimated by accumulating inflows since 1970.
    - **Outward stock**
      Estimated by accumulating outflows since 1983.
  - Availability of all FDI flows and stock components:
    ○ Not available.
Memorandum:

- Belgium and Luxembourg
  - National institution reporting FDI:
    - National Bank of Belgium
      
      **Note:** Up to 2001, the Belgium National Bank reported FDI data for the Belgium and Luxembourg Economic Union. As of 2002, this economic union is no longer in effect. Consequently, FDI data are reported separately by the respective national authorities. Therefore, data for 2002 onwards are not comparable to the combined flows as reported in previous years because of different methodologies.

  - Data source used in the report:
    - Flows
    - Inward stock
    - Outward stock

  - Availability of all FDI flows and stock components:

- Serbia and Montenegro
  - National institution reporting FDI:
      
      **Note:** Up until the establishment of the Central Bank of Montenegro, March 15, 2001, the National Bank of Serbia reported FDI statistics for the State Union of Serbia and Montenegro. From 2002, the two central banks started reporting separate FDI statistics. As of this year, FDI statistics for Serbia and Montenegro are calculated as the sum of data for Serbia, obtained from the National Bank of Serbia, and for Montenegro, obtained from the Central Bank of Montenegro.

  - Data source used in the report:
    The national institutions mentioned above.
  - Availability of all FDI flows and stock components:
    - Not available.

D. Data revisions and updates

All FDI data and estimates in *WIR* are continuously revised. Because of ongoing revisions, FDI data reported in *WIR* may differ from those reported in earlier Reports or other publications of UNCTAD or any other international or regional organizations. In particular, recent FDI data are being revised in many economies according to the fifth edition of the *Balance of Payments Manual of the IMF*. Because of this, the data reported in last year’s Report may be completely or partly changed in this Report.

E. Data verification

In compiling data for this year’s Report, requests were made to national official sources of all economies for verification and confirmation of the latest data revisions and accuracy. In addition, websites of national official sources were consulted. This verification process continued until **10 June 2011**. Any revisions made after this process may not be reflected in the Report. Below is a list of economies for which data were checked using either of these methods. For the economies which are not mentioned below, the UNCTAD secretariat could not have the data verified or confirmed by their respective governments.

F. Definitions and sources of the data in annex tables on the UNCTAD website (www.unctad.org/wir) and the CD-ROM

Annex tables 5-8 show the ratio of inward and outward FDI flows to gross fixed capital formation and inward and outward FDI stock to GDP. All of these data are in current prices.

The data on GDP were obtained from the UNCTAD GlobStat database, the IMF’s CD-ROM on International Financial Statistics, May 2011 and the IMF’s World Economic Outlook, April 2011. For some economies, such as Taiwan Province of China, data are complemented by official sources.

The data on gross fixed capital formation were obtained from the UNCTAD GlobStat database and IMF’s CD-ROM on International Financial Statistics, May 2011. For some economies, for which data are not available for the period 1980-2010, or part of it, data are complemented by data on gross capital formation. These data are further complemented by data obtained from: (i) national official sources; and (ii) World Bank data on gross fixed capital formation or gross capital formation, obtained from World Development Indicators Online.

Figures exceeding 100% may result from the fact that, for some economies, the reported data on gross fixed capital formation do not necessarily reflect the value of capital formation accurately, and that FDI flows do not necessarily translate into capital formation.

G. Definitions and sources of the data on cross-border M&As in annex tables 9-16

FDI is a balance-of-payments concept involving the cross-border transfer of funds. Cross-border M&As statistics shown in the Report are based on information reported by Thomson Reuters. Such M&As conform to the FDI definition as far as the equity share is concerned. However, the data also include purchases via domestic and international capital markets, which should not be considered as FDI flows. Although it is possible to distinguish types of financing used for M&As (e.g. syndicated loans, corporate bonds, venture capital), it is not possible to trace the origin or country-sources of the funds used. Therefore, the data used in the Report include the funds not categorized as FDI.

The UNCTAD database on cross-border M&As contains information on ultimate and immediate target and acquiring countries. To approximate further FDI flows, in WIR11, tables relating to cross-border M&As by region/country are tabulated based on: 1) the immediate target country principle for the sales of equity shares in a resident enterprise; 2) the ultimate acquiring country principle for the purchases of equity shares in a non-resident enterprise; and 3) the ultimate target country principle for the sales of equity shares in a non-resident enterprise, unless otherwise specified. Round tripping cases are also considered on the basis of the immediate acquiring and immediate target country principles.

FDI flows are recorded on a net basis (capital account credits less debits between direct investors and their foreign affiliates) in a particular year. In WIR11, M&As data are also recorded on a net basis, i.e. expressed as differences between gross cross-border acquisitions and divestment by firms in/from a particular country or in/from a particular industry. Transaction amounts recorded in the UNCTAD M&As statistics are those at the time of closure of the deals, and not at the time of announcement. The M&As values are not necessarily paid out in a single year.
There are three main types of cross-border M&As deals: 1) those that involve the sale of a domestic company to a foreign company; 2) those that involve the sale of a foreign affiliate to a domestic company; and 3) those that involve the purchase by a foreign company of another foreign company operating in a host country. Three examples are given to illustrate differences in the three main types of deal, and the way they are recorded:

1) An Argentine domestic company in Argentina is sold to a foreign company. Argentina is the immediate target country, and the foreign country is the ultimate acquiring country. The deal is recorded as the creation of a foreign investment in Argentina (inward investment / positive sale) and the creation of an investment abroad in the foreign country (outward investment / positive purchase).

2) An Argentine domestic company acquires the affiliate of a foreign company operating in Argentina. Argentina is the immediate target country, and the foreign country is the ultimate target country. The deal is recorded as the dissolution of a foreign investment (inward divestment / negative sale) in Argentina and the dissolution of an investment abroad (outward divestment / negative purchase) in the foreign country.

3) A foreign company A acquires an affiliate of foreign company B operating in Argentina. Argentina is the immediate target country, foreign country B is the ultimate target country, and foreign country A is the ultimate acquiring country. The deal is recorded as an inward investment (positive sale) by foreign country A in Argentina and an inward divestment (negative sale) by foreign country B in Argentina, with the net-change being zero in Argentina. It is also recorded as an outward divestment (negative purchase) in foreign country A, and as an outward investment (positive purchase) in foreign country B.

Data showing cross-border M&As activities by industry are also recorded on a net basis as sales and purchases. The UNCTAD database contains information on immediate target and immediate acquiring industries. In *WIR10*, tables relating to cross-border M&As by sector/industry are tabulated based on the immediate target industry and the immediate acquiring industry. Following are three illustrative examples:

1) A foreign food TNC acquires, in a given country, a domestic chemical company. This transaction is recorded in the columns on M&As by industry of seller in the chemical industry with positive sign. It is also recorded in the columns on M&As by industry of purchaser in the food industry (with positive sign).

2) A domestic food company acquires, in its own country, the affiliate of a foreign-owned company operating in the chemical industry. This transaction is recorded in the columns on M&As by industry of seller in the chemical industry with a negative sign. It is also recorded in the columns on M&As by industry of purchaser in the chemical industry with a negative sign. (As this database has no information about the industry of the parent company that is divesting its chemical foreign affiliate, the same industry as that of its foreign affiliate is used).

3) A foreign food TNC acquires, in a given country, an affiliate operating in the chemical industry owned by another foreign TNC. This transaction is recorded in the columns on M&As by industry of seller in the chemical industry with both negative and positive signs, with the net-change being zero. It is also recorded in the columns on M&As by industry of purchaser in the food industry (with positive sign) and the chemical industry (with negative sign). (As this database has no information about the industry of the parent company that is divesting its chemical foreign affiliate, the same industry as that of its foreign affiliate is used).

Data on greenfield investment projects used in the Report are based on the information provided by fDi markets of Financial Times. fDi Markets tracks all new investment projects and expansion of existing investments without information on the equity participation by investors. It suggests that data may include investments that are not qualified as FDI joint-ventures are also included only where they lead to a new physical operation. While there is no minimum size for a project to be included, as a selection criteria for inclusion in this database an investment project has to create new direct jobs and capital investment.

Information sources to collate and validate those projects include Financial Times newswires, nearly 9,000 media sources, project data received from over 1,000 industry organizations and investment agencies, data purchased from market research and publication companies. The data are cross-referenced against multiple sources and over 90% of them are validated with company sources. As far the industry classification is concerned every FDI project tracked by fDi Markets is classified according to its cluster, sector, and business activity, based on a proprietary industry classification system.

Notes

1 This general definition of FDI is based on OECD Benchmark Definition of Foreign Direct Investment, fourth edition (OECD 2008) and International Monetary Fund, Balance of Payments and International Investment Position Manual, sixth edition (IMF 2009).

2 International Monetary Fund, Balance of Payments Manual fifth edition, p. 40. In the sixth edition it refers to “charges for the use of intellectual property”.

3 Includes Australia, Austria, Belgium, Canada, Denmark, European Commission, Finland, France, Germany, Greece, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Republic of Korea (member as of 1 January 2010), Spain, Sweden, Switzerland, United Kingdom and United States.
